January, 2016

Hon. Dr. Philip Mpango (MP)
Minister for Finance and Planning
United Republic of Tanzania
DAR ES SALAAM

Honourable Minister,

LETTER OF TRANSMITTAL

In accordance with Section 21 (1) of the Bank of Tanzania Act 2006, I hereby submit:

- (a) A report on economic developments and the Bank's operations, in particular, the implementation and outcome of monetary policy, and other activities during the fiscal year 2014/15, and
- (b) The Bank's balance sheet as at 30th June, 2015, the Profit and Loss Accounts for the year ended 30th June, 2015 and associated financial statements, as well as detailed notes to the accounts for the year and the previous year's comparative data certified by external auditors along with the auditors' opinion.

Yours sincerely,

Bldulo:

Prof. Benno Ndulu Governor

Bank of Tanzania.

Governor's Foreword

In 2014/15, the economy experienced challenges emanating from global strengthening of the US dollar, delays in disbursing foreign budget funds and contracting concessional borrowings as well as decline in the prices of most of the export commodities in the world market. These were compounded by other domestic and external factors leading to rapid depreciation of the shilling, particularly in the last quarter of 2014/15. Nonetheless, the economy continued to record a high growth of 7.0 percent in the year ending December 2014, albeit slightly lower than 7.3 percent growth registered a year before. Inflation was also kept subdued at single digit, but edged up steadily in the second part of 2014/15. For the whole fiscal year, inflation averaged 5.4 percent against the medium-term target of 5.0 percent.

The Bank of Tanzania implemented monetary policy geared towards taming inflationary pressures in support of economic growth. Liquidity amongst banks was maintained within the desirable limits, albeit with some variations caused mainly by swings in government budgetary flows and the reduction of the statutory minimum reserve ratio from 10 percent to 8 percent towards the end of 2014. The latter was reinstated at the end May 2015 to alter conditions that contributed to large volatility in the exchange rate. The Bank also introduced various regulatory measures to ensure safety, stability and soundness of the financial sector. This saw the banking system, in particular, remaining resilient to shocks as reflected by adequate levels of capital and liquidity in the banking sector. Also, the Bank continued to manage risks associated with increased innovations in the financial sector, as well as modernizing the payments system and supporting financial inclusion.

In 2015, output is projected to expand by 7.1 percent largely underpinned by the on-going and upcoming infrastructure projects, low global oil prices, adequate and reliable power supply from gas, and stable macroeconomic policies. Meanwhile, inflation is expected to hover around the medium-term target of 5 percent, bolstered by reduction of power generation costs after completion of gas pipeline, adequate food supply and subdued world oil prices. Monetary policy will remain focused at sustaining low and stable rate of inflation in supporting growth of the economy. Measures will also continue to be undertaken to safeguard the stability and soundness of the financial sector, ensure efficiency in the payments system and increase financial inclusion.

Bank of Tanzania Vision and Mission

Vision:

"To be a world class central bank, in maintaining price and financial stability consistent with supporting economic growth".

Mission:

"To maintain price stability, and to promote integrity and stability of the financial system consistent with sustained growth of the national economy".

Monetary Policy Framework of the Bank of Tanzania

Objective of Monetary Policy

The primary objective of the Bank of Tanzania is to formulate and implement monetary policy directed to delivering domestic price stability, which is defined as low and stable inflation over time. Inflation is computed in terms of annual change in the Consumer Price Index (CPI). The medium-term target of inflation is 5 percent. The inflation target is considered appropriate for providing conducive environment for sustainable growth in output, thereby contributing to a better overall economic performance.

Intermediate Target Variable

The Bank of Tanzania controls inflation by managing the growth of money supply, and the chosen money supply measure is extended broad money supply (M3). Therefore, M3 is the intermediate target variable and is composed of currency in circulation outside banks and total deposits held by commercial banks, including foreign currency deposits. M3 is chosen because it is the monetary aggregate that is estimated to have closest relationship with the rate of inflation.

Operating Target Variable

In order to influence the growth of M3, the Bank of Tanzania controls the growth of reserve money (base money or high powered money), which is related to money supply through the money multiplier. Reserve money is defined as the liabilities of the Bank of Tanzania, which include currency held outside the Bank of Tanzania and banks' deposits with the Bank of Tanzania.

Monetary Policy Instruments

The Bank of Tanzania uses indirect instruments of monetary policy to influence the level of money supply. The main instrument is open market operations (OMO), which involves sale or purchase of securities by the Bank to withdraw or inject liquidity into the economy. Other indirect instruments include selling and buying of foreign exchange in the inter-bank foreign exchange market, i.e., foreign exchange market operations (FEMO), repurchase agreements (repo), and standby facilities (i.e., Lombard and discount windows). These instruments are complimented by statutory reserve requirements and moral suasion.

Modalities for Monetary Policy Implementation

- i. At the beginning of every fiscal year, the Bank of Tanzania sets annual monetary policy targets in its Monetary Policy Statement, in accordance with the broader macroeconomic policy objectives of the Government.
- ii. The Monetary Policy Statement is approved by the Bank's Board of Directors and submitted to the Minister for Finance, who in turn submits it to the National Assembly.
- iii. The same procedure is followed in the mid-year review of the Monetary Policy Statement, which shows progress in the implementation of the monetary policy, outlook for the remaining period and measures necessary to archive the objectives.
- iv. The Monetary Policy Committee (MPC) of the Board of Directors of the Bank, which is chaired by the Governor, is responsible for setting the monetary policy direction bi-monthly, consistent with the targets in the Monetary Policy Statement.
- v. The Surveillance Committee, which is a management committee, meets daily to evaluate daily liquidity developments. A Technical Committee chaired by the Director of Economic Research and Policy reviews liquidity developments on daily basis and advises the Surveillance Committee on appropriate daily measures.

Executive Summary

In 2014, the world economy was characterized by stable growth in output, low inflation and subdued energy and commodity prices. Global output grew by 3.4 percent for three years in a row; with advanced economies recording increase in growth while emerging market and developing economies slowing down. In sub-Saharan Africa and SADC regions, output grew at a slower pace than in 2013 while in EAC region output expanded at a faster pace. Global inflation eased to 3.5 percent in 2014 from 3.9 percent in 2013, largely driven by subdued energy and food prices. In advanced economies, inflation stabilized while in emerging market and developing economies it eased. Sub-Saharan Africa, SADC, and EAC also experienced moderation in inflation, mainly on account of lower fuel and food prices and prudent monetary policy.

Going forward, the global economy is projected to grow by 3.5 percent in 2015 and 3.8 percent in 2016, mainly driven by a rebound in advanced economies. Growth in the emerging market and developing economies is expected to slow down further in 2015, mainly due to lower than historical growth rates for some large emerging market economies and oil exporters, while in Sub-Saharan Africa, growth is expected to slow down mainly due to declining commodity prices. The EAC and SADC regions are expected to grow by 6.3 percent and 4.5 percent respectively in 2015. As for global inflation in 2015 to 2016, projections are mixed, with inflation in the advanced economies being projected to decline mainly driven by anticipated continued fall in oil prices, while in emerging markets and developing economies, inflation is expected to increase in 2015, partly due to strengthening of the US dollar against other currencies. Inflation in the EAC and SADC regions is expected to decline driven by improvement in regional food supply and continued low global oil prices.

The Tanzania economy continued to record strong growth in 2014, albeit at a slower pace of 7.0 percent compared to 7.3 percent in 2013. The main contributors to growth were construction, trade and repairs, agriculture, transport and storage, and manufacturing activities. In 2015, growth is expected to remain strong buoyed by continued investment in infrastructure, manufacturing activities and the positive economic impact of the sustained decline in global oil prices.

Inflation remained at single digit throughout 2014/15, averaging 5.4 percent against the medium-term target of 5.0 percent. This was mainly driven by low food prices following bumper harvest, fall in global oil prices and prudent monetary policy. Inflation is expected to remain at single digit in 2015/16, supported by stable outlook for food, subdued global oil prices and sustained prudent monetary policy.

Monetary policy was implemented amidst the challenge of rapid weakening of the shilling, particularly in the second part of 2014/15. In 2014/15, the shilling weakened against the US dollar by 9.2 percent compared with 2.3 percent in the preceding year. The depreciation of the shilling was primarily caused by global strengthening of the US dollar and exacerbated by other factors including delays in disbursement of budget support funds and concessional borrowing. The Bank of Tanzania took several measures to tame the situation which included tightening monetary policy, reduction of foreign exchange net open position of banks and increase in sales of foreign exchange in the market. Consistent with these measures, money supply grew by 13.1 percent against the target of 15.8 percent, while banks credit to various economic activities expanded by 21.0 percent against the projected 19.5 percent. Much of credit to private sector went to transport and communication, trade, and manufacturing activities.

As regards public finance, government budgetary operations were characterised by shortfalls in domestic revenue collection and external loans and grants, leading to lower than projected government spending. Revenue collection was 86.7 percent of the target, while expenditure was 84.9 percent of the estimate for 2014/15. As a result, the fiscal deficit was 3.3 percent of GDP against the target of 3.6 percent for 2014/15. The deficit was financed through domestic and foreign borrowing. The national debt stock was USD 19,141.3 million at the end of June 2015, an increase of 5.9 percent from end of June 2014. External debt accounted for 80 percent of the debt stock and the balance was domestic. Solvency and liquidity indicators show that external indebtedness remained at low risk of debt distress.

The current account balance narrowed to a deficit of USD 4,215.2 million in 2014/15 compared with a deficit of USD 5,281.1 million in 2013/14, driven by increased receipts from manufactured exports and tourism, and reduction of oil import bill. The overall balance of payments worsened to a deficit of USD 116.1 million compared to a surplus of USD 268.2 million in the preceding year, due to decreases in capital transfers and government borrowing, as well as increase in amortization on external loans. The stock of gross foreign official reserves at the end of June 2015 was USD 4,285.0 million, sufficient to cover 4.1 months of projected imports of goods and services, excluding those financed by foreign direct investments.

The financial sector continued to be sound and stable. The Banking sector remained profitable, liquid and well capitalized to sustain growth and withstand shocks. The ratio of non-performing loans to gross loans which measures the quality of assets decreased to 6.6 percent in 2014/15 from 8.1 percent in 2013/14. The ratio of core capital and total capital to total risk weighted assets and off balance sheet items were 16.1 percent and 17.6 percent respectively well above the minimum regulatory requirement of 10 percent and 12.0 percent in the same order. Major progress was also achieved in the microfinance industry.

The Zanzibar economy grew by 7.0 percent in 2014 compared with 7.2 percent in 2013, driven by improved performance in services and industrial activities. Inflation eased to an average of 3.6 percent in 2014/15 from 5.9 percent in the preceding year, mainly driven by a notable decrease in prices of non-food items, particularly fuel. Revenue collection amounted to TZS 362.8 billion in 2014/15, slightly below the target of TZS 365.8 billion. Expenditure was below the estimate by 31.6 percent, on account of low disbursements of funds from development partners for budget support and project funds. As a result, a deficit of TZS 81.9 billion, after grants, was realized. The current account balance deteriorated to a deficit of USD 89.9 million in 2014/15 compared with a deficit of USD 33.7 million in the preceding year, largely due to decrease in inflows of current transfers from development partners and export of goods and services.

PART I

AN OVERVIEW OF ECONOMIC DEVELOPMENTS

1.0 Global and Regional Economic Developments

1.1 Global Economic Environment Output

Global economic growth remained positive in 2014, expanding by 3.4 percent as in the two preceding years. In advanced economies, real GDP growth increased while emerging market and developing economies registered a slow growth (Table 1.1).

Real GDP in advanced economies expanded by 1.8 percent compared with 1.4 percent in 2013. The United Kingdom, Germany, United States, Euro Area, France and Canada recorded growth in output while it contracted in Japan and Italy. The increase in output in the United States was due to supportive monetary policy, increase in exports and private consumption, whilst in the United Kingdom growth was largely driven by robust private consumption and strong business investment. In Germany, real GDP expanded mainly on account of strong domestic demand. In Canada, growth was largely supported by strong recovery in the United States, and increased exports and investment. Output growth in the Euro Area was mostly attributed to accommodative monetary policy, slowdown in fiscal consolidation and decline in oil prices. On the other hand, in Japan output growth contracted partly attributed to decreased domestic demand arising from an increase in consumption tax.

In the emerging market and developing economies, growth slowed down to 4.6 percent in 2014 from 5.0 percent recorded in 2013, largely due to domestic policy tightening and slowdown in investment in some of the economies. Growth in China, which is the largest economy, declined mainly due to a fall in investment that resulted in excess capacity in upstream industries such as steel, cement and flat glass. Growth in India picked up on account of an increase in industrial production, exports and investments.

Growth in the Association of South Eastern Asia Nations (ASEAN-5) declined to 4.6 percent in 2014 from 5.2 percent in the preceding year. Output growth declined in Indonesia, Philippines and Thailand; while expanding in Malaysia and Vietnam. The decline in output growth in Indonesia was partly attributed to weak investment and uncertainties related to iron ore export ban and mid-2014 elections. The slowdown in growth in Thailand was due to political tensions experienced in 2014.

Source: IMF, World Economic Outlook Database April 2015, African Economic Outlook 2015

In African economies, output growth increased to 3.9 percent in 2015 from 3.5 percent in 2013, largely on account of improved domestic demand. GDP growth in Sub-Saharan Africa remained strong at 5.0 percent, albeit lower than 5.2 percent in 2013.

In the Southern African Development Community (SADC) region, real GDP grew by 4.5 percent in 2014 compared with 5.2 percent in 2013 (**Table 1.2**). Output growth in most of SADC countries decreased, except for Democratic Republic of Congo, Madagascar, Malawi, Namibia, Mozambique and Mauritius. The slowdown in most of the countries was due to slowdown

in agriculture, mining, water and electricity, manufacturing and construction activities.

Table 1.2: Real GDP Growth in the SADC Region

Real GDP growth in the East African Community (EAC) rose to 5.8 percent in 2014 from 5.2 percent in 2013 (**Table 1.3**). Output growth in the member countries increased, except for Kenya and Tanzania; with Rwanda growing faster. The growth in Rwanda was largely contributed by agriculture, mining and quarrying, manufacturing, real estate, information, communication and construction activities. In Uganda, real GDP growth was driven by agriculture, trade, real estate, and information and communication activities. In contrast, the growth in Kenya declined on account of slowdown in agriculture, whole sale and retail trade, manufacturing and electricity activities.

Inflation

Global inflation declined to 3.5 percent in 2014 from 3.9 percent in 2013, largely on account of lower commodity prices, particularly food and fuel (**Table 1.4**). Inflation in the advanced economies was 1.4 percent, same as in 2013. Inflation rate eased in the United Kingdom, Germany, Italy, France, Euro Area, and European Union, due to the

decline in commodity prices and weak demand. On the other hand, inflation picked up in Japan, largely attributed to a weak Yen and increase in consumption tax. In emerging markets and developing economies, inflation declined, mainly driven by lower prices for oil. Similarly, inflation in sub-Saharan Africa decelerated due to low global food and fuel prices.

In the SADC region, inflation declined to an average of 5.6 percent in 2014 from 6.7 percent in 2013 (**Table 1.5**). Inflation in most SADC member states fell, with exception of Democratic Republic of Congo, Madagascar, South Africa, Swaziland and Zambia. The fall in inflation was largely due to decline in food, energy and transport costs.

In EAC region, inflation eased to an average of 4.8 percent in 2014 from 6.1 percent in 2013 (**Chart**

1.1). In Uganda, Rwanda and Tanzania inflation decreased, mainly on account of lower fuel and food prices, and tight monetary policy. Inflation in Burundi decreased due to a fall in food prices. Conversely, inflation in Kenya increased due to high food prices.

Intra-EAC region Trade

Tanzania's intra-EAC trade rose by 60.3 percent to USD 1,304.43 million in 2014 from the preceding year, as both imports and exports increased (**Table 1.6**). Exports to Kenya almost doubled to USD 445.91 million, while imports increased by 96.2 percent to USD 654.63 million. Exports to Uganda increased by 11.0 percent to USD 73.33 million, while imports declined to USD 47.98 million from USD 57.69 million. Tanzania remained a net exporter to Rwanda and Burundi for the past seven years, while recording trade deficit with Kenya for six consecutive years.

Kenya continued to dominate the intra-EAC trade relative to its counterparts and remained the major trading partner of Tanzania accounting for 84.4 percent of Tanzania's intra-EAC trade. Tanzania's major exports to the EAC region were maize grain and seeds, sisal rope, oil cake, vegetables, tea, mosquito nets, rice and cement. Major imports included medicine, soap, cement, margarine, spare parts, petroleum products and machine. The share of Tanzania's exports to Kenya accounted for 74.6 percent of its total exports to the EAC region in 2014 compared with 54.2 percent in the preceding year. The share of exports to Uganda, Burundi and Rwanda declined. Imports from

Kenya accounted for 92.7 percent of Tanzania's imports from the EAC (**Table 1.7**).

World Economic Outlook

According to the International Monetary Fund's (IMF) World Economic Outlook (WEO) of April 2015, the global economy is projected to grow by 3.5 percent in 2015 and 3.8 percent in 2016, largely driven by a rebound in advanced economies, with the US economy playing the most significant role. Growth in the emerging market and developing economies is expected to slow down further in 2015, mainly due to lower than historical growth rates for some large emerging market economies and oil exporters. In Sub-Saharan Africa, growth is expected to slow down mainly due to declining commodity prices, the effects of Ebola epidemic in West African countries and deceleration of growth in major trading partners particularly China. The EAC and SADC regions are expected to grow by 6.3 percent and 4.5 percent respectively in 2015. Since about 42 percent of Tanzania's exports are to the EAC and SADC countries, the projected

growth for the regions is expected to continue to contribute towards improving Tanzania's exports.

On inflation, the IMF's WEO of April 2015 projects divergence in global inflation in 2015 to 2016. Inflation in the advanced economies is expected to decline to 0.4 percent in 2015, from 1.4 percent recorded in 2014, mainly driven by anticipated continued fall in oil prices. In emerging markets and developing economies, inflation is expected to increase from 5.1 percent in 2014 to 5.4 percent in 2015, partly due to strengthening of the US dollar against other currencies. Inflation in the EAC and SADC regions is expected to decline to 4.4 percent and 5.3 percent in 2015, from 4.7 percent and 5.9 percent in 2014, respectively. The decline is expected to be driven by improvement in regional food supply and continued low global oil prices, which will partly offset the impact of appreciation of US dollar against their respective currencies.

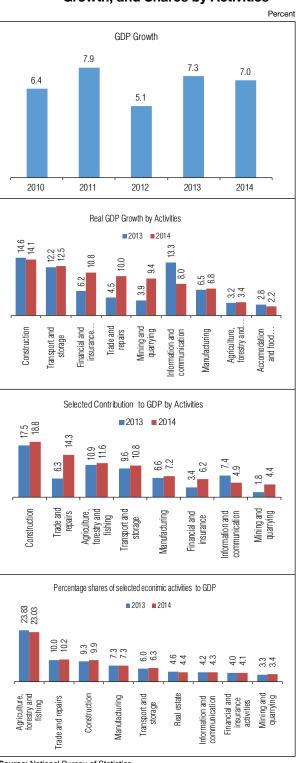

2.0 Domestic Economic Developments

2.1 Output

The growth of real output in Tanzania remained strong in 2014, amid declining global demand. Real GDP grew at 7.0 percent¹ in 2014 compared to 7.3 percent¹ in 2013 (**Chart 2.1**). In nominal terms, the value added was TZS 79,442 billion compared to TZS 70,953 billion in the preceding year. This translates into per capita income of TZS 1.7 million, equivalent to USD 1,043, and a real per capita GDP growth rate of 4.1 percent.

Activities that contributed mostly growth of output were construction, trade and repairs, agriculture, transport and storage, and manufacturing. In terms of pace of growth, construction, transport and storage, financial and insurance, and trade and repairs, and manufacturing activities were dominant (Chart 2.2). Services, particularly trade and repair, public administration, transport and real estate and business, together accounted for the largest share of about 41 percent of GDP for three years in a row. Agriculture was second, accounting for 29 percent; followed by construction (12 percent) and manufacturing (6 percent).

Chart 2.1: Real Growth of GDP, Contribution to Growth, and Shares by Activities

Source: National Bureau of Statistics

¹ Based on rebased GDP series. In absolute terms, real value added of output was TZS 41,231 billion in 2014 compared with TZS 38,547 billion in 2013.

Box 1: Rebasing of GDP

In October 2014, the National Bureau of Statistics (NBS) released the revised nominal GDP estimates for Tanzania Mainland with 2007 as the new base year instead of 2001, marking the 5th revision, after that of 1966, 1976, 1992 and 2001. The new GDP at current prices figure for 2013 is 31.4 percent higher than the same year in the old series. This release portrays the economic activities better and ensures international comparability. With this revision all indicators that use GDP as a denominator will change with different implications.

Selected Economic Activities Performance Agriculture

In 2014, value added in agriculture grew by 3.4 percent compared with 3.2 percent in 2013 and its share to GDP was 28.9 percent. The improved performance was due to favorable weather conditions as well as increased provision of subsidized inputs. Notable increase was recorded in the production of food crops; particularly maize, rice, sorghum and millet. In addition, production of traditional cash crops, particularly tobacco and cashew nuts increased following a sustained increase in world market prices.

Production of food crops decreased slightly to 15.5 million tonnes during 2014/15 crop-season from 16.0 million tonnes in the preceding year. Cereals production was estimated at 8.9 million tonnes relative to 9.8 million tonnes in 2013/14 while that of non-cereals was 6.6 million tonnes compared with 6.2 million tonnes. Food production in 2015/16 is expected to be more than the national food requirement by 20 percent.

Production of major traditional export crops—cashew nuts, sisal, tea, and tobacco—increased while coffee, cotton, declined from the preceding year (Table 2.1). The production of cashew nuts and tobacco went up mainly due to good weather, improved utilization of subsidized inputs, good producer prices, as well as use of warehouse receipt system. Conversely, production of coffee and cotton was lower relative to the preceding year due to unfavourable weather, low farm gate prices and inadequate farm inputs.

Livestock, forestry and fishing together, accounted for 12.7 percent of the value added of the share of agriculture to GDP in 2014. Livestock activity registered a growth rate of 2.2 percent in 2014 compared to 2.0 percent in the 2013, while its share was 7.4 percent compared to 8.2 percent in 2013. Forestry grew at 5.1 percent in 2014 compared to 4.7 percent in preceding year while its share to GDP remained at 3.1 percent as in 2013. Value added in fishing activity grew by 2.0 percent in 2014 compared with 5.5 percent in 2013, while its share to GDP was at 2.3 percent as in the past two years.

Industry and Construction

Value added in industry and construction grew by 10.3 percent in 2014 and accounted for 23.0 percent of GDP. Construction and manufacturing activities were the main contributors. Construction activity, whose share was 12.5 percent of GDP, grew by about 14 percent for two years in a row reflecting increased construction and rehabilitation of bridges, buildings, and road network.

Manufacturing activity recorded a growth of 6.8 percent in 2014 compared with 6.5 percent in 2013. Using Manufacturing Production Index (MPI), manufacturing production grew by 9.1 percent from an index of 328.3 recorded in 2013 (**Table 2.2**)². A large part of the improved performance was registered in wood and paper products, fabricated metal products, machinery and equipment. This was largely accounted for by steadiness in power supply and increase in domestic and foreign demand. Employment in this activity increased to 93,792 employees in 2014 from 85,188 employees in 2013, with food, beverages and tobacco activities contributing more than half of the total employment in manufacturing (**Table 2.3**).

² Manufacturing Production Index (MPI) measures changes in production of commodities in real terms.

Mining and Quarrying

Value added in mining and quarrying activity grew by 9.4 percent in 2014 compared with 3.9 percent in 2013 (**Table 2.4**). This was mainly on account of increase in the production of coal and diamond. The increase in production of coal was driven by a rise in demand from cement industries while the increase in production of diamond reflected the resumption of operations at Williamson Diamond Mine. Production of gold, gypsum, tanzanite, phosphates and limestone declined. The decline in production of gold, which is the main export mineral in terms of value, was mainly influenced by price fall in the world market.

Table 2.4: Production of Selected Minerals

Mineral	Unit	2010	2011	2012	2013	2014 ^p	Percentage change

Electricity and Gas

Electricity and gas, combined expanded by 9.3 percent in 2014 compared with 13.0 percent

in 2013. Electricity generation rose to 6,182.7 million kWh from 5,997.4 million kWh, following improved water supply at hydro-power generating plants of Kidatu, Nyumba ya Mungu and Mtera (**Table 2.5**). Natural gas production decreased on account of cessation of production contracts between TANESCO and two companies, Aggreko and Symbion Plc. Meanwhile, the construction of natural gas infrastructure from Mtwara and Lindi to Dar es Salaam was completed and is expected to increase supply of electricity in the country.

Services

The value added in services increased by 7.2 percent and accounted for 41.0 percent of GDP in 2014 (Table 2.6 & Table 2.7). This activity was dominated by trade and repairs, public administration and transport and storage. The share of trade and repairs activity more than doubled to 10.0 percent in 2014 from the preceding year as a result of improvement in business environment. Transport and storage activities increased by 12.5 percent in 2014 compared with 12.2 percent in the preceding year. Cargo handling at Dar es Salaam port also improved owing to measures implemented to reduce time for cargo clearance; notably, improved payments system through the real time gross settlement. Financial and insurance activities grew by 10.8 percent in 2014 compared with 6.2 percent in 2013, consistent with increased financial deepening and innovations. This is in light of implementation of financial inclusion measures, especially those targeting the unbanked and underbanked population. In addition the use of mobile financial services also changed the landscape of accessibility to financial services.

Gross National Disposable Income

Gross national disposable income (GNDI) grew at 6.2 percent in 2014 compared with 7.2 percent in the preceding year³. Consumption grew by 3.4 percent compared with 10.4 percent in 2013 while gross capital formation grew by 1.9 percent compared with 9.4 percent. This resulted in narrowing of the resource balance, defined as savings minus investment (**Chart 2.2** and **Table 2.8**). Gross saving as a percent of GDP increased from15.9.percent in 2014 from 9.6.percent in 2013 and gross capital formation to GDP was 32.7 percent compared with 30.5 percent in 2013.

Aggregate Demand

In 2014, domestic aggregate demand expanded by 4.5 percent, in real terms, compared with 8.5 percent in 2013. The growth was mostly accounted for by net exports, which grew by 14.8 percent. Final consumption grew at a significantly slow pace by 3.4 percent in 2014 compared with 10.4 percent in 2013 on account of contraction of government final consumption by 0.5 percent compared to a growth of 18.1 percent in 2013. The final consumption was 78 percent of GDP in 2014 compared with 85 percent in the preceding year. Private consumption expanded by 4.5 percent compared with 8.4 percent in 2013 (Chart 2.3). Gross capital formation grew by 7.0 percent compared with 4.4 percent in the preceding year. Gross capital formation accounted for 33 percent of GDP in 2014 compared with 30 percent in 2013 and an average of 31 percent in the preceding five years.

³ GNDI comprises of compensation of employees, property income, net current transfers, operating surplus or mixed income and is obtained by adding net current transfers from abroad to Gross National Income

Chart 2.3: Growth in GDP, Consumption and Investment

Source: National Bureau of Statistics

Outlook for the Economy

The steady growth of output in the recent years is projected to be sustained in 2015; real GDP is projected to grow by 7.0 percent. The projected high growth of output is anchored by the on-going infrastructure investments, expansion in private and public sector construction activities, as well as improvement in external sector performance as the global economy gradually regains ground and inflation is kept low and stable.

2.2 Prices

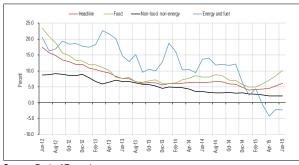

Inflation Developments

Headline inflation remained at single digit throughout in 2014/15, averaging 5.4 percent compared with the medium-term target of 5.0 percent. In the year ending June 2015, inflation was 6.1 percent compared with 6.4 percent in the corresponding period in 2014 (**Chart 2.4**). The relatively low level of inflation was mainly driven by low food prices following regional bumper harvest, fall in global oil prices and prudent monetary policy.

Annual food inflation averaged 7.2 percent in 2014/15 compared with 7.1 percent in the preceding year. In the year ending June 2015, food inflation was 10.1 percent compared with 8.1 percent in the corresponding period in 2014. Inflation that excludes food and energy prices—was low at 2.2 percent in the year ending June 2015 and below 3.3 percent throughout the year. The low non-food inflation was mostly driven by decline in communications cost.

The headline inflation is expected to remain in single digit in 2015/16, as in the preceding year. This will be supported by stable outlook for adequate food in the country, subdued global commodity prices particularly oil, as well as a sustained prudent monetary policy.

Chart 2.4: Inflation Developments

Source: Bank of Tanzania

Food Supply

The stock of food held by the National Food Reserve Agency (NFRA) amounted to 353,702 tonnes at the end of June 2015, significantly higher than 189,494 tonnes at the end of June 2014 (**Table 2.9**). The stock comprised 348,638 tonnes of maize, 1,124 tonnes of sorghum and 3,939 tonnes of paddy. During the year, the NFRA purchased 305,569 tonnes and sold 141,361 tonnes; out of which 12,878 tonnes were sold to Disaster Relief Coordination Unit of the Prime Minister's Office; 3,906 tonnes were sold to the Prison's Department; 35,812 tonnes were sold to the World Food Programme; and 88,765 tonnes were sold to private traders.

Food Prices

Wholesale prices for food crops were somewhat mixed in 2014/15. Prices of maize, sorghum and finger millet were lower relative to the preceding year, while those of rice, beans and potatoes increased (Table 2.10). The decline in prices of maize, sorghum and finger millet is associated with favourable weather in most of the producing areas as well as increased supply of subsidized inputs. The prices of rice, beans and potatoes increased owing to unfavourable weather coupled with food shortage in neighbouring countries.

3.0 Monetary Policy

3.1 Monetary Policy Targets

During 2014/15, monetary policy was implemented in line with the medium-term target for inflation of 5.0 percent and projected output growth of 7.3 percent for 2014/15. Liquidity condition in the economy was generally satisfactory, notwithstanding some variations caused by government budgetary operations and downward revision of the statutory minimum reserve requirement (SMR) from 10 percent to 8 percent in December 2014.

The revision of the SMR was intended to increase the capacity of banks to support economic activity. However, the policy decision coincided with the strengthening of the US dollar, globally and delayed disbursement of foreign finance for the Government budget. These, coupled with seasonal factors led to rapid depreciation of the shilling, which in turn precipitated into shortage psychology escalating the depreciation further in the last quarter of 2014/15. In order to reduce exchange rate volatility and tame inflation expectations, SMR ratio was reversed to 10 percent at the end of May 2015. In addition, foreign exchange net open position of banks was reduced to 5.5 percent from 7.5 percent of core capital. These measures were complemented by increased open market operations and foreign exchange operations.

3.2 Money Supply and Credit

Monetary policy operations generally succeeded in maintaining liquidity in the economy at appropriate levels. As a result, money supply was within the targets throughout the year. Extended broad money supply (M3) recorded annual growth of 13.1 percent compared with 15.8 percent in the preceding year and the target of 15.8 percent. The slowdown in M3 was mainly driven by deceleration in net domestic assets of the banking system, particularly net claims on government.

Net claims on government from the banking system grew by 12.4 percent compared with 42.2 percent in the preceding year. In absolute terms, net claims on government increased by TZS 487.8 billion compared with TZS 955.5 billion in the preceding year. The significant decrease is mainly explained by net redemption of government securities. Credit to the private sector by banks grew at annual rate of 21.0 percent, above the projection of 19.5 percent. Transport and communication, trade, and manufacturing activities recorded high growth of credit from banks. The share of private sector credit to GDP increased to 17.0 percent from 15.5 percent in the preceding year, while that of private sector credit to deposits was 85.4 percent up from 79.2 percent, indicating improved financial intermediation. Credit growth was broadbased across activities, with trade, personal, manufacturing, agriculture, and transport and communication activities recording the largest shares of credit to private sector (Chart 3.1). Meanwhile, net foreign assets of the banking system grew at an annual rate of 18.5 percent compared with 9.0 percent in the preceding year, driven mostly by both real and valuation gains resulting from the depreciation of the shilling (Table 3.1).

3.3 Interest Rates of Banks

Interest rates on deposits and loans exhibited a general decrease in 2014/15 relative to the preceding year. Overall time deposits rate declined to an average of 8.42 percent from 8.78 percent registered in 2013/14, while the overall lending rate eased to 16.04 percent from 16.23 percent (Table 3.2). Interest rate on one year deposits decreased to 10.55 percent from 11.48 percent, while rates on loans for the same tenure increased to 14.42 percent from 14.34 percent. As a result, the spread between one year lending and deposits rates widened to an average of 3.87 percentage points in 2014/15 from 2.86 percentage points recorded in 2013/14.

3.4 Financial Markets

In 2014/15, the financial markets were marked by further liberalization of the capital and financial account transactions. The liberalization was

implemented by issuance of the Foreign Exchange (Listed Securities) (Amendment) Regulations 2014, the Foreign Exchange (Amendment) Regulations 2014, and the Capital Markets and Securities (Foreign Investors) Regulations 2014. These regulations removed capital account restrictions on free movement of capital to enable Tanzania residents to invest in other East African Community (EAC) Partner States and allow other EAC residents to participate in the Tanzanian capital and money markets. This policy decision is in line with Tanzania's commitment under the EAC Common Market Protocol.

The markets also were characterized by large swings in liquidity for both local and foreign currencies. The liquidity was low particularly in the second half of 2014/15, hence significantly raising interest rates on debt securities and exchange rates. These developments were mostly caused by domestic as well as external factors; notably, delays in disbursement of budget funds from development partners and the global strengthening of the US dollar following growth prospects of the US economy. The high interest and exchange rates observed in most part of the second half of 2014/15 somehow moderated towards the end of the year under review owing to measures taken by the Bank of Tanzania.

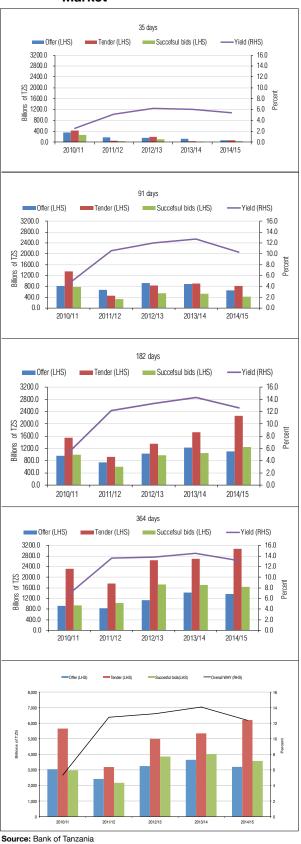

Treasury Bills Market

Treasury bills of different maturities continued to be used for monetary policy operations and government financing. During 2014/15, Treasury bills worth TZS 3,195.0 billion were offered compared with TZS 3,645.0 billion in the preceding year (**Chart 3.2**). The auctions were over-subscribed in most part of period, with investors showing strong preference for long-term maturities. The value of tendered amount was TZS 6,207.2 billion for the whole year compared with TZS 5,346.5 billion recorded in the preceding year. The over-subscription was indication of adequate level of liquidity in the market. Despite the over-

subscription, only bids worth TZS 3,576.7 billion were successful as some of them were at highly discounted prices. Yields across the maturity spectrum generally decreased relative to the preceding year (**Chart 3.2**). The overall weighted average yield decreased to 12.37 percent from 14.07 percent. Meanwhile, Treasury bills worth TZS 3,932.5 billion were redeemed, hence contributing to liquidity in the market.

Chart 3.2: Developments in Treasury Bills Market

Treasury Bonds Market

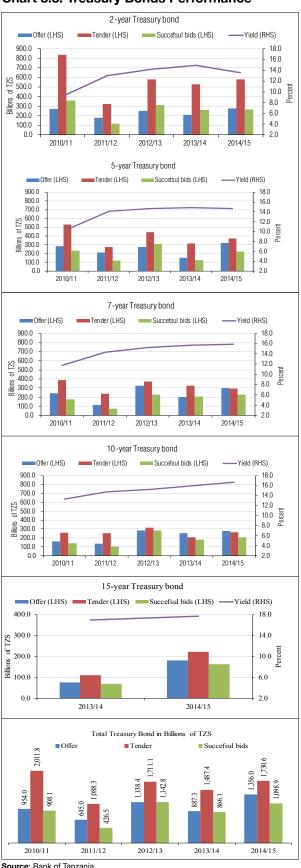

Treasury bonds comprising of 2-, 5-, 7-, 10and 15-years were auctioned for financing of government operations and traded in the secondary market at Dar es Salaam Stock exchange (DSE). The auctions was conducted at alternating maturities in fortnight intervals, same as in the past few years.

In 2014/15, Treasury bonds worth TZS 1,356.0 billion were offered during the auctions compared with TZS 887.3 billion in the preceding year. The auctions were generally over-subscribed, albeit with notable under-subscription in auctions for 7- and 10-year bonds (**Chart 3.3**). The value of tendered amounted was TZS 1,730.6 billion compared with TZS 1,487.4 billion recorded in the preceding year. Owing to deep discount prices, successful bids amounted to TZS 1,098.9 billion but higher compared with TZS 866.1 billion in 2014/15.

Yields on 2- and 5- year bonds decreased in tandem with strong preference for the maturities, while the yields for the other maturities increased. Yields on 2-year bond decreased to an average of 13.50 percent from 14.94 percent in the preceding year, while that of 5-year bond declined to 14.65 percent from 14.89 percent. For the 7- and 10-year bonds, the yields rose to 15.88 percent and 16.67 percent from 15.65 percent and 15.92 percent, respectively. As for 15-year bond, yield increased to 17.66 percent from 16.98 percent.

In the secondary market, Treasury bonds traded at the Dar es Salaam Stock Exchange amounted to TZS 380.1 billion, with 44.0 percent of the transactions taking place in the third quarter of 2014/15. The 10-year bond accounted for 35.0 percent of the transactions, followed by 7-, 5- and 15-year bond at 24 percent, 20 percent and 17 percent, respectively. The 2-year bond was the least traded since it is the most liquid and preferred by banks as a collateral for loans in the inter-bank cash market. The yields to maturity on the bonds ranged between 11.18 percent and 18.69 percent.

Chart 3.3: Treasury Bonds Performance

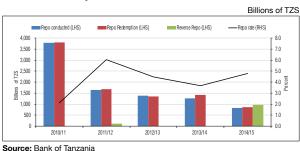

Repurchase Agreements and Lombard Loan **Facility**

The Bank of Tanzania continued to conduct repurchase agreements (repo) and Lombard facility with banks to ensure that liquidity in the market is at appropriate parameters. In 2014/15, repo worth TZS 836.0 billion were conducted compared with TZS 1,265.6 billion in preceding year (Chart 3.4). At the same time, repo worth TZS 861 billion fell due for repayment. In addition, to ensure adequate liquidity in the banking system, the Bank of Tanzania conducted reverse repo worth TZS 965.0 billion in 2014/15. The repo rate averaged at 4.79 percent compared with 3.69 percent in the preceding year. In a separate dimension, the Bank of Tanzania allowed banks to access the Lombard loan facility—a short-term borrowing window for banks established by Bank of Tanzania-to ensure that the level of liquidity in the economy remains as adequate as needed. Transactions through the Lombard loan facility varied across banks and months, mostly driven by seasonal influences.

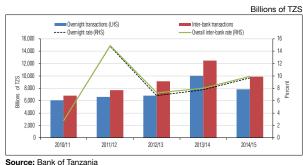

Chart 3.4: Repo Transactions

Inter-Bank Cash Market

The inter-bank cash market transactions amounted to TZS 9,888 billion in 2014/15 compared with TZS 12,476.2 billion in the preceding year (Chart 3.5). Overnight transactions accounted for about 79.0 percent of the transactions and its rate averaged at 9.67 percent compared with 7.75 percent in 2013/14.

Chart 3.5: Inter-bank Cash Market Transactions

Box 2. Opening up of the Capital Account to Facilitate Capital Markets Transactions by East African Residents and Removal of Restrictions on Participation of Foreigners in the Capital Markets

In May 2014, the Bank of Tanzania issued the Foreign Exchange (Listed Securities) (Amendment) Regulations 2014 and the Foreign Exchange (Amendment) Regulations 2014 removing capital account restrictions on free movement of capital to enable Tanzania residents to invest in other East African Community (EAC) Partner States and allow other EAC residents to participate in the Tanzanian capital and money markets. In addition, new Capital Markets and Securities (Foreign Investors) Regulations 2014 were issued in September 2014, allowing participation of foreign investors in the Tanzanian capital market subject to the continuous disclosures of acquisitions in accordance with the Capital Markets and Securities (Substantial Acquisitions, Take-overs and Mergers) Regulations 2006. These regulations have also allowed the participation of foreigners in the government securities subject to the conditions stipulated in the Foreign Exchange (Listed Securities (Amendment) Regulations 2014.

The restrictions removed relate to capital market transactions within the EAC are as follows:

- i. Purchase of bonds and other debt instruments locally by non-residents;
- ii. Sale or issue of debt securities locally by non-residents;
- iii. Purchase of government securities locally by non-residents;
- iv. Purchase of foreign securities by residents;
- v. Participation of residents in foreign capital markets;
- vi. Sale or issue of debt securities abroad by residents;
- vii. Sale or issue of collective investment schemes securities locally by non-residents;
- viii. Outward direct investments; and
- ix. Sale or issue of securities outside Tanzania by residents.

Participation in the primary market auctions and secondary market for government securities by residents of EAC Partner States other than Tanzania are governed by the following conditions:

- The total amount of Government securities acquired does not exceed 40 percent of a particular issue.
- b. The amount acquired by the residents from a single country does not exceed two thirds of 40 percent in (a) above.
- c. The Government securities acquired under (b) above are not transferred to a Tanzanian resident within twelve months from the date acquired.

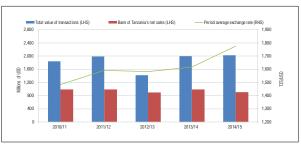

Inter-Bank Foreign Exchange Market

The inter-bank foreign exchange market (IFEM) was characterised by moderate swings in volumes and high volatility in the exchange rate, particularly in the second half of 2014/15. The volatility in the exchange rate emanated from strengthening of the US dollar following a rebound of US economy. This was compounded by delays in foreign budgetary financing, low season of export earnings and high season for dividend payments. These created foreign exchange shortage psychology and excessive speculative tendencies in the foreign exchange market.

Driven by the above factors, the shilling depreciated against the US dollar, at a faster pace in the second half of 2014/15. In the first half, the shilling depreciated at a monthly average of 0.6 percent as opposed to 3.2 percent in the second half. On annual basis, the shilling depreciated by 9.2 percent in 2014/15 compared with 2.3 percent in 2013/14. In absolute terms, the shilling was traded at an average rate of TZS 1,775.0 per USD from an average of TZS 1,624.9 per USD in the preceding year (**Chart 3.6**).

In response to these developments, the Bank of Tanzania scaled up foreign exchange sales from a monthly average of USD 62 million in the first half of 2014/15 to USD 89 million in the second half. For the whole year, the Bank of Tanzania sold USD 906.7 million on net terms, which was about 45 percent of the market turnover. In addition, the Bank of Tanzania increased the minimum reserve requirement ratio, lowered the foreign exchange net open position of banks and restricted banks from transacting foreign exchange derivatives without evidence of underlying economic activity to ensure orderly market practices.

Chart 3.6: Inter-Bank Foreign Exchange Market Transactions

Source: Bank of Tanzania

4.0 Public Finance

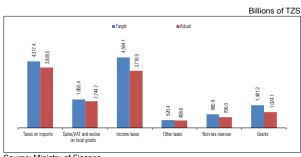

Fiscal policy for 2014/15 focused on continued implementation of the Five-Year Development Plan I and MKUKUTA II while observing limit on budget deficit with particular emphasis on priority programmes under the Big Results Now (BRN) initiative. On the outturn, government budgetary operations was characterised by shortfalls in domestic revenue collections, and lower than projected disbursements of foreign program and project funds and non-concessional loans. This resulted into a lower than projected government spending. Thus, the overall fiscal deficit was 3.3 percent of GDP compared with the projected 3.6 percent of GDP for 2014/15. The deficit was financed through both domestic and foreign borrowing. Net foreign financing was TZS 2,006.7 billion, whereas net domestic borrowing was TZS 799.8 billion.

4.1 Revenue and Grants

Domestic revenue collections, including local government own sources, amounted to TZS 10,957.8 billion, equivalent to 86.7 percent of the targeted TZS 12,636.5 billion. Domestic revenue collected by the central government was 12.5 percent of GDP4 compared with the target of 14.4 percent and 13.2 percent in 2013/14. Tax revenue amounted to TZS 9,891.7 billion, or 87.6 percent of the target, with a large part collected from imports and income taxes (Chart 4.1). Nontax revenue was TZS 706.0 billion or 80.2 percent of the target. The shortfall in tax collections was largely observed in income and excise taxes. This was mostly on account of decline in value of imported dutiable and taxable goods, as well as decrease in transactions eligible for withholding taxes especially in mining, oil and gas activities. Further, reluctance by some traders on the use of Electronic Fiscal Devices (EFDs) contributed to the shortfall. During the year, grants from development partners amounted to TZS 1,024.1

billion, equivalent to 1.2 percent of GDP, and were about 69 percent of projection. Grants in the form of general budget support, project and basket funds amounted to TZS 382.3 billion, TZS 514.2 billion and TZS 127.6 billion, respectively.

Chart 4.1: Government Resources in 2014/15

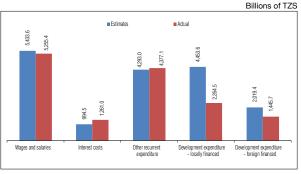

Source: Ministry of Finance

4.2 Expenditure

The Government continued to align expenditure with the available resources while observing key priority programs in support of economic growth and poverty reduction. Total expenditure during 2014/15 amounted to TZS 14,603.7 billion, or 84.9 percent of the budget, equivalent to 17.3 percent of GDP. Recurrent expenditure was TZS 10,893.5 billion and the balance was development expenditure (Chart 4.2). Development expenditure was 57.3 percent of the estimates due to lower than projected disbursement of non-concessional loans and project funds, as well as shortfall in domestic revenue collection. This largely contributed to slow pace of executing development projects.

⁴ TZS 84,624.9 billion GDP at market price

5.0 National Debt

The national debt stock stood at USD 19,141.3 million at the end of June 2015, an increase of 5.9 percent from end of June 2014 and was equivalent to 34.7 percent of GDP. External debt amounted to USD 15,294.6 million and domestic debt was USD 3,846.7 million. Public debt accounted for the largest share of national debt at USD USD 16,645.8 million or 87.0 percent (**Chart 5.1**).

Chart 5.1: Developments in Public Debt

Source: Ministry of Finance and Bank of Tanzania

5.1 External Debt

External debt stock increased to USD 15,294.9 million at the end of June 2015 from USD 14,236.9 million in the corresponding period in 2014. Despite the increase, solvency and liquidity indicators depict that Tanzania's external indebtedness remained at low risk of debt distress. In present value (PV) terms, debt-to-GDP ratio remained sustainable at 20.0 percent compared to the indicative threshold of 50.0 percent. The ratio is projected to rise to around 23.0 percent in the medium-term, and thereafter stabilize at around 21.0 percent.

The ratio of external debt-to-export of goods and services in PV terms was 97.4 percent at the end of June 2015 against the threshold of 200 percent, and is projected to edge up to 100 percent in the medium-term before stabilizing at around 95 percent in the long-term. The liquidity indicators of external debt service-to-export of goods and services and debt service-to-revenue were at 8.7 percent and 13.0 percent against the indicative thresholds of 25.0 percent and 22.0 percent, respectively.

The profile of external debt by type of borrower indicates that central government debt amounted to USD 12,154.3 million at the end of June 2015, representing an increase of USD 1,026.9 million from the end of corresponding period in 2014. The central government accounted for the largest share of external debt by 79.5 percent (**Table 5.1**).

Note: DOD denotes Disbursed Outstanding Debt Source: Ministry of Finance and Bank of Tanzania

In terms of currency composition of central government's disbursed outstanding debt, a large proportion was denominated in Special Drawing Rights (SDR) at 48.5 percent, lower compared with 52.7 percent at the end of June 2014. The decrease was mainly due to appreciation of US dollar against the SDR. As a result, the impact of exchange rate fluctuations on central government outstanding debt was a decline of USD 668.1 million (**Table 5.2**).

Table 5.2: Government Disbursed Outstanding

Source: Ministry of Finance

The proportion of concessional debt to external debt declined to 63.0 percent at the end of June 2015 from 69.1 percent at the end of June 2014. The decline was due to appreciation of US dollar against SDR, the currency in which most of the

concessional debt is denominated. In addition, inadequate resources from concessional sources necessitated recourse to commercial borrowing, hence contribting to the decrease.

As regards extenal debt by creditor category, the proportion of multilateral debt remained dominant, albeit decreasing to 46.8 percent from 49.7 percent at the end of June 2014 (Table 5.3). Debt owed to bilateral creditors also declined to 10.5 percent from 12.5 percent. The decrease in the share of multilateral debt was largely explained by exchange rate fluctuations, while that of bilateral debt was a reflection of dwindling resources from creditors. Following decrease in the proportions of multilateral and bilateral debts, the proportion of commercial debt (including export credit) increased to 42.7 percent from 37.8 in 2014. The changes mostly reflect the country's shift towards commercial creditors to finance infrastructure projects which cannot be met by limited concessional resources.

Note: DOD stands for Disbursed Outstanding Debt **Source**: Ministry of Finance and Bank of Tanzania

External debt contracted during 2014/15 amounted to USD 861.4 million, out of which USD 500 million were contracted by the central government and USD 346.6 million by the private sector. New disbursements received amounted to USD 2,397.1 million, out of which USD 1,989.0 million was received by the central government. On the other hand, external debt payments amounted to USD 423.1 million, out of which USD 208.6 million was principal repayment and USD 214.5 million was interest payments and other charges.

5.2 Domestic Debt

The stock of domestic debt reached TZS 7,594.7 billion at end of June 2015, an increase of TZS 1,059.2 billion from the end of June 2014 (Chart **5.2**). The increase reflected increased government financing requirements, more especially following delays in disbursement of programs funds from development partners. The debt stock was equivalent to 8.7 percent of GDP and 21.6 percent of the national debt. Debt contrated by issuing government bonds accounted for 65.3 percent of the domestic debt stock, followed by Treasury bills at 22.0 percent (Table 5.4). Commercial banks continued to be the leading holders of the domestic debt, accounting for 49.0 percent, while debt owed to the the Bank of Tanzania was 21.6 percent (Table 5.5).

Domestic debt contracted for government financing amounted to TZS 2,927.0 billion in 2014/15, an increase of TZS 322.3 billion from the preceding year. A large part of the debt contracted was through Treasury bills worth TZS 1,768.2 billion and the balance was Treasury bonds (Chart 5.3). Meanwhile, domestic debt amounting to TZS 3,539.8 billion fell due for redemption, out of which, principal and interest of TZS 1,326.5 billion was paid out of government resources, and the balance was rolled over. New issuance of domestic debt through Treasury bills and bonds in 2015/16 is projected at TZS 4,033.0 billion, out of which TZS 2,600.0 billion will be for rolling-over maturing obligations and TZS 1,433.0 billion for financing purposes.

Chart 5.3: Government Securities Issued for Financing Purposes

6.0 External Sector

6.1 Balance of Payments Performance

The overall balance of payments worsened to a deficit of USD 116.1 million in 2014/15 compared to a surplus of USD 268.2 million in the preceding year, owing to decrease in capital transfers and government borrowing coupled with increase in amortization on external loans. Meanwhile, gross foreign official reserves amounted to USD 4,285.0 million at the end of June 2015 from USD 4,637.7 million at the end of June 2014. The reserves were sufficient to cover 4.1 months of projected imports of goods and services excluding those financed through foreign direct investments (Chart 6.1). Gross foreign assets of commercial banks amounted to USD 1,023.3 million, up from USD 866.1 million at the end of June 2014, reflecting banks accumulation of foreign assets partly motivated by the strengthening of the US dollar.

Chart 6.1: Bank of Tanzania Gross Reserves

Source: Bank of Tanzania

During the year ending June 2015, the current account balance of the balance of payments narrowed by 20.2 percent to a deficit of USD 4,215.2 million from the corresponding period in 2013/14. The improvement was mostly driven by increase in export of goods and services, as well as decrease in goods import, which more than offset the decline in official current transfers (**Table 6.1**).

Export of Goods and Services

The value of goods export increased by 7.0 percent to USD 5,618.0 million in 2014/15 from the preceding year. Traditional exports increased by 8.5 percent, mainly driven by cashew nuts and coffee. The value of cashew nuts export increased significantly on account of volume and price, while that of coffee was as a result of rise in price. Nontraditional exports rose by 6.7 percent to USD 3,977.4 million and was largely contributed by manufactured goods, fish and fish products, and re-exports (Chart 6.2). The value of gold which dominates non-traditional export, declined owing to a fall in world market price. As a result, the share of gold in non-traditional exports declined to 30.8 percent from 39.6 percent in 2013/14 (Chart **6.3**). Services receipts were higher than payments during the year, with a significant part received from travel and transportation. The receipts from travel services, which is mainly tourism, amounted to USD 2,198.7 million compared to USD 1,972.8 million in 2013/14, while transportation receipts amounted to USD 954.4 million compared with USD 851.9 million.

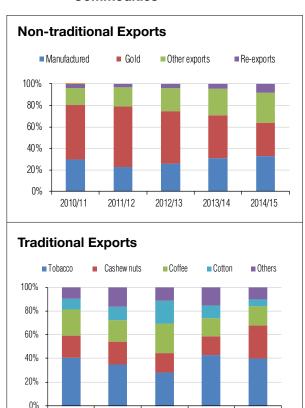

Chart 6.2: Exports Performance

Import of Goods and Services

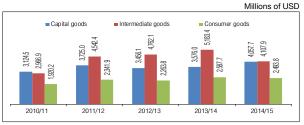

2011/12

The value of import of goods declined by 6.1 percent to USD 10,659.4 million in 2014/15 from the value in the preceding year (Chart 6.4). Intermediate goods import decreased, mainly driven by oil import bill, following a fall in world market prices and decrease in volume. On the other hand, services payment went up by 3.5 percent to USD 2,710.7 million.

2012/13

2013/14

Chart 6.4: Composition of Imports by Major Categories in 2014/15

Source: Tanzania Revenue Authority and Bank of Tanzania

Income and Capital Transfers

Primary income account recorded a deficit of USD 719.6 million in 2014/15 compared with USD 648.1 million in 2013/145. The outturn resulted from contraction of investment income from abroad coupled with a sharp rise in interest payments by the government, which almost doubled to USD 227.7 million. On the other hand, the balance in the secondary income account slightly narrowed to a surplus of USD 574.8 million in 2014/15 compared with USD 743.9 million in the preceding year, driven mainly by a decrease in current transfers to the government by 34.0 percent to USD 289.9 million⁶. The balance in the capital account transfers declined to USD 520.1 million in 2014/15 from USD 747.5 million, also driven by fall in inflows to the government by 33.4 percent to USD 455.2 million.

Financial Account Transactions

During 2014/15, a net borrowing (i.e. net incurrence of liabilities exceeding net acquisition of asset) of USD 3,696.1 million was recorded in the financial account, being 13.9 percent lower than the amount recorded in the preceding year. This was driven by a combination of a decline in loan disbursements and increase in amortization.

2014/15

⁵ Primary income refers to income directly related to use of factors of production e.g. labour and capital in the production process. This consist of the remuneration of employees (wages and social contributions) and interest, dividends, land income, etc. resulting from the loan or rental of financial assets or land

⁶ Secondary income refers to transfers an economy provides or receives not in exchange of anything-without a quid pro quo

Foreign direct and portfolio investment inflows amounted to USD 2,152.0 million and USD 15.0 million, respectively, compared with USD 2,066.0 million and USD 5.9 million in 2013/14. Net acquisition of foreign assets declined to USD 181.1 million compared with USD 447.0 million.

Direction of Trade

Tanzania's main trading partners for 2014/15 remained the same as in the preceding year. About 50 percent of goods import originated from India, China, Switzerland and the United Arab emirates, while 52 percent of goods exports were destined to India, South Africa, china and Switzerland (Table 6.2).

Table 6.2: Direction of Trade in 2014/15

6.2 World Commodity Prices

During 2014/15, world market prices of coffee, tea (Mombasa auction) and sisal were higher relative to the preceding year, whereas those of oil, gold, cloves, cotton and tea (average) were lower (Table **6.3**). The increase in prices of coffee was largely due to a fall in production in Brazil, Peru, Indonesia and Vietnam. The price of sisal increased largely on account of improved global demand. Tea (average) price fell mainly due to a rise in production in India and Australia following favourable weather, while prices of cotton and cloves decreased largely due to a decline in demand in China and weak global demand, respectively.

Oil prices decreased due to increased global production by non-OPEC, particularly the United States, as well as OPEC's decision to maintain production levels unchanged despite the sharp decline in oil prices. The price of gold decreased mainly due to weak demand for gold as a safe investment, partly attributed to the strengthening of the US dollar.

Table 6.3: World Commodity Prices

Commodity	Units	2012/13	2013/14	2014/15	Percentage change
Robusta coffee	USD per kg	2.24	2.07	2.15	3.9

Ledger, Bloomberg

Prices of crude oil are expected to fall to around USD 57.50 per barrel in 2015 from USD 96.20 per barrel in 2014, on account of expected production from non-OPEC and OPEC, particularly Iraq, Saudi Arabia and Iran⁷. The price of gold is projected to decrease by 7.2 percent to USD 1,175.0 per troy ounce in 2015, largely driven by expectations of a continued strengthening of the US dollar.

Coffee prices are projected to decline in 2015, largely due to expectations of increased production in Brazil and Vietnam following favourable weather. Arabica coffee production in Brazil is projected to return to a surplus, while Vietnam is expected to maintain sturdy production. The price of cotton is projected to decline mainly due to high stocks as production outpaced demand for the past three years (Table 6.4).

Table 6.4: Outlook for World Market Commodity Prices

			Actual		Projection	Percentage
Commodity	Unit	2012	2013	2014	2015	change

7.0 Economic Developments in Zanzibar

During 2014/15, the Revolutionary Government of Zanzibar has continued to implement policies geared to attain macroeconomic targets as stipulated in the Vision 2020, Zanzibar Strategy for Growth and Reduction of Poverty II and Millennium Development Goals. Development plans during 2014/15 were geared at achieving high growth particularly in economic sectors that have backward and forward linkages to the tourism activities.

7.1 Output

Real gross domestic product (GDP) grew by 7.0 percent in 2014 compared with 7.2 percent in 2013 (**Chart 7.1**). In nominal terms, GDP was TZS 2,132.2 billion in 2014, translating into per capita income of TZS 1,552,000, equivalent to USD 939. Sectors that contributed to the high growth were services and industry, which grew by 9.7 percent and 5.5 percent, respectively. In contrast, value added in agriculture, fishing and forestry activity contracted by 0.4 percent compared to a growth of 13.2 percent in 2013 (**Table 7.1**). This was largely driven by fall in production of crops following unfavourable weather.

Note: P denotes provisional.

Source: Office of the Chief Government Statistician.

Performance of Selected Economic Activities Services

In 2014, accommodation and food services activity grew by 6.9 percent compared with 9.5 percent in 2013. Despite the slowdown, the number of tourists significantly increased to 311,891 from 181,301 in 2013 (**Chart 7.2**). This was partly explained by improvement in methodology of capturing data by including tourist arrivals using local flights and sea ports (**Table 7.1**). Transport and storage activity expanded by 7.0 percent, lower than 9.4 percent in 2013, mainly associated with decline in activities of telecommunication companies.

Chart 7.2: Tourist Arrivals in Zanzibar

Source: Office of the Chief Government Statistician

Agriculture, Forestry and Fishing

Value added in agriculture, forestry and fishing activity contracted by 0.4 percent in 2014 compared to 13.2 percent in 2013 due to unfavorable weather, which affected production of food crops; notably paddy, cassava, banana and yams (**Tables 7.1** and **Table 7.3**). However, fishing, livestock and forestry and hunting recorded positive growth rates. Procurement of cloves and seaweed, which are the main export crops, increased mainly on account of improved prices in the world market. Rubber output dropped because of aging trees.

Table 7.2: Procurement of Major Export Crops in Zanzibar

Industry and Construction

Industrial activities improved in 2014, with mining and quarrying production increasing to TZS 16.3 billion from TZS 15.6 billion (**Tables 7.4**). This was associated with an increased demand for gravels following expansion in construction activities. Manufacturing activity increased mostly in production of bread, window UPVC and noodles following increased demand.

Table 7.4: Performance of Industry and Construction in Zanzibar

				Millio	ns of TZS
Economic activity	2010	2011	2012	2013	2014 ^p
Mining and quarrying	12,116.1	14,347.7	16,169.8	15,581.1	16,343.1
Manufacturing	67,399.5	72,149.1	74,731.7	79,865.8	87,780.3
Electricity and gas	2,282.1	3,092.7	3,385.0	3,491.6	3,656.3
Water supply and sewerage	3,496.3	3,781.9	3,912.2	4,148.5	4,349.0
Construction	66 722 1	86572.3	95 180 2	96 993 3	99 912 6

Note: P denotes provisional, calculations are based on constant prices.

During 2014, electricity distribution increased to 273.3 million KWh from 247.0 million KWh in 2013, owing to increased demand from small-scale industries, domestic users and repairs of street lights. Electricity distributed to customers of prepaid electricity tariff (TUKUZA), accounted for 41.0 percent of the total distribution while large and medium industries accounted for 34.8 percent.

Gross Capital Formation

During 2014, capital formation decreased to TZS 475.4 billion from TZS 515.8 billion recorded in 2013, largely due to decline of investments in construction projects and infrastructure. Capital formation was dominated by construction, machinery and transport equipment (Table 7.5)⁸.

Table 7.5: Capital Formation by Type of Assets

7.2 Prices Developments Inflation

Annual headline inflation in Zanzibar averaged 3.6 percent in 2014/15 compared with 5.9 percent in the preceding year (Chart 7.3). The moderation in inflation was mainly driven by a notable decrease in prices of non-food items, particularly fuel. Annual non-food inflation dropped to 3.9 percent from 8.6 percent, largely due to deceleration of prices of fuel products. In contrast, annual food inflation edged up to 3.5 percent from 3.4 percent in 2013/14, mainly on account of increase in prices of fish.

Chart 7.3: Inflation Developments in Zanzibar

Source: Office of Chief Government Statistician.

7.3 Zanzibar Government Budgetary Operations

During 2014/15, Zanzibar's Government budgetary operations, on cheques issued, registered a deficit of TZS 81.9 billion including grants, compared with a deficit of TZS 61.6 billion in 2013/14. The deficit turned to TZS 57.6 billion after adjustment to cash. Total resources (revenue and grants) amounted to TZS 401.9 billion, out of which TZS 362.8 billion or 90.3 percent was from domestic sources and the balance was grants.

Revenue collection amounted to TZS 362.8 billion, slightly below the target of TZS 365.8 billion. The performance was mainly on account

⁸ Construction includes buildings, roads and bridges and land improvement.

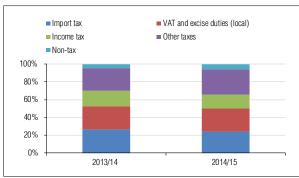

of enhanced efforts in revenue collection, coupled with VAT refund from the Union Government and transfer of dividends by public corporations. Tax revenue was TZS 342.0 billion, or 94.3 percent of total revenue collection. Despite the improved performance, tax revenue was below the target by 15.1 percent, mainly on account of decrease in taxable imports (**Chart 7.4**). Non-tax revenue was also below the target by 26.4 percent. VAT and excise duty accounted for the largest share of 26.6 percent of total revenue collection, followed by tax on imports with 24.0 percent (**Chart 7.5**).

Chart 7.4: Zanzibar Government Revenue by Sources

Source: President's Office-Finance, Economy and Development Planning (POFEDP), Zanzibar.

Chart 7.5: Share of Total Revenue by Sources

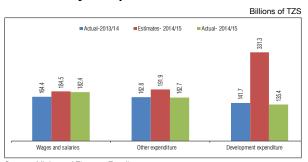

Source: Ministry of Finance, Zanzibar.

On expenditure front, the Government spent TZS 483.8 billion during 2014/15 below the estimate by 31.6 percent. This was mainly on account of low disbursements of funds from development partners, particularly general budget support and project funds. Recurrent expenditure amounted to TZS 348.4 billion and was below the estimate by 7.4 percent; while development expenditure amounted to TZS 135.4 billion, below the estimate by 40.9 percent (Chart 7.6).

Funds from development partners accounted for 64.0 percent of the development expenditure and the balance was government contribution.

Chart 7.6: Zanzibar Government Expenditure by Component

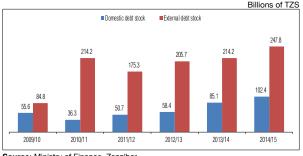

Source: Ministry of Finance, Zanzibar

7.4 Debt Developments in Zanzibar

The debt stock reached TZS 350.2 billion at the end of June 2015 compared with TZS 299.3 billion in the preceding year. The increase was on account of new issuance of government securities and depreciation of the shilling against the US dollar. External debt accounted for 70.8 percent and the balance was domestic debt (**Chart 7.7**). The ratio of debt to GDP⁹ increased to 16.4 percent from 16.2 percent at the end of June 2014.

Chart 7.7: Zanzibar Debt Stock

Source: Ministry of Finance, Zanzibar

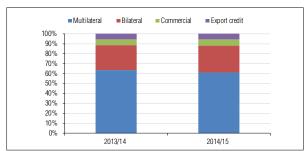

External debt stood at USD 122.6 million at the end of June 2015 compared with USD 129.8 million at the end of June 2014. External debt guaranteed by the Union Government amounted to USD 107.0 million, or 87.2 percent of the external debt, and the balance was non-guaranteed debt. Debt owed to multilateral creditors accounted for the largest

⁹ Zanzibar GDP at current prices in 2014 was TZS 2,133.5 billion.

share of external debt at 61.0 percent, followed by bilateral creditors with 27.0 percent (**Chart 7.8**). In terms of maturity structure, long-term external debt with maturity above 20 years continued to dominate by 62.3 percent, followed by debt with maturity below 10 years by 36.6 percent (**Table 7.6**). As regards use of funds, the largest beneficiary was transport and communication sector at 49.5 percent, followed by social welfare and education at 38.1 percent; while, agriculture sector was the least by 1.0 percent.

Chart 7.8: External Debt by Creditor Category

Source: Ministry of Finance, Zanzibar

Table 7.6: Zanzibar External Debt by Maturity

				USD Milli	on
			Percentage share	Percentage	_
Maturity	2013/14	2014/15 ^p	2014/15	change	_
Less than 10 years	50.3	44.8	36.5	-10.9	
10-20 years	1.5	1.5	1.2	0.0	
More than 20 years	78.1	76.4	62.3	-2.2	
Total	129.8	122.6	100.0	-5.5	

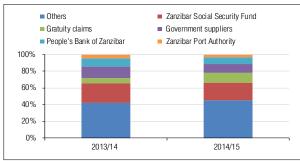

Source: Ministry of Finance, Zanzibar

Domestic debt stock amounted to TZS 102.4 billion at the end of June 2015, an increase of 20.3 percent from the end of June 2014. Much of the increase manifested in debts owed to Zanzibar Social Security Fund (ZSSF), the People's Bank of Zanzibar (PBZ), domestic suppliers and pensioners, and new issuance of government securities.

The profile of domestic debt by creditor indicates that a large part was owed to 'other creditors', notably holders of government securities, domestic suppliers and pensioners, altogether accounting for 67.4 percent of domestic debt. Debt owed to ZSSF and PBZ was 20.7 percent and 8.0 percent of domestic debt, respectively

(Chart 7.9). In terms of maturity structure, debt with 'undetermined maturity' (pensioner's claims, supplier's credits) surged by 93.1 percent to TZS 75.8 billion, from the corresponding period in 2013, and represented 74.1 percent of domestic debt. Debt maturing within two to ten years was TZS 18.5 billion and constituted 18.0 percent of domestic debt. Debt with maturity of less than one year declined to TZS 8.1 billion at end of June 2015 from TZS 8.3 billion in the preceding year, accounting for 7.9 percent of the domestic debt stock.

Chart 7.9: Domestic Debt by Holders

Source: Ministry of Finance, Zanzibar

7.5 External Sector Performance Current Account

The current account balance deteriorated to a deficit of USD 89.9 million in 2014/15 compared with a deficit of USD 33.7 million in the preceding year. The widening of the deficit was largely driven by decrease in inflows of current transfers from development partners and export of goods and services (**Table 7.7**).

Export of Goods

The value of export of goods and services amounted to USD 202.1 million in 2014/15 compared with USD 220.5 million recorded in the preceding year. The value of goods export declined to USD 62.6 million from USD 79.9 million, largely on account of decrease in cloves export volume to 2,800 tonnes from 5,400 tonnes in 2013/14, due to cyclical nature of the crop (**Table 7.8** and **Chart 7.10**).

Import of Goods

The value of import of goods and services increased to USD 322.1 million in 2014/15 from USD 309.4 million in the preceding year, mostly driven by imports of goods (Table 7.9). Imports of goods increased to USD 263.8 million from USD 251.7 million, mainly driven by intermediate and consumer goods. Consumer goods remained dominant in the total import bill for two years in a row by accounting for 39.9 percent (Chart 7.11).

Services, Income and Current Transfers

The services account balance was a surplus of USD 81.2 million in 2014/15 compared with a surplus of USD 82.9 million in the preceding year. Services receipt declined to USD 139.5 million, while payments increased to USD 58.4 million (Table 7.10). On the other hand, the income account balance improved to a surplus of USD 2.1 million from a deficit of USD 4.1 million in 2013/14. Current transfers balance registered a surplus of USD 28.1 million, from a surplus of USD 59.3 million, following decrease in current transfers from development partners.

PART II

BANK OF TANZANIA OPERATIONS

Corporate Governance

During 2014/15, several issues on governance of the Bank of Tanzania and legislative framework governing banking business in the country were executed. As regards governance, for the first time, the Board of Directors of the Bank held a retreat in September 2014 during which self-assessment of its performance was conducted. During the retreat, the Board also adopted its annual work programme for 2014/15. In addition, Mr. Yona S. Killagane—one of the Directors of the Board—was appointed a member of the Monetary Policy Committee with effect from February 2015.

In an effort to strengthen Board members' capacity in central banking governance, the Bank continued to expose the Board of Directors to various seminars and conferences. Two Board members attended the 15th African Corporate Governance Conference held in July 2014 in Johannesburg. In addition, in December 2014, one Board member attended a high level forum on Central Bank Governance organised by the International Monetary Fund in Dubai, which focussed on audit oversight and assurance mechanisms. In April 2015, another Board member attended a seminar on Effective Internal Audit for Central Banks organised by the Central Banking Publications in London. The seminars and conferences aimed at imparting the necessary knowledge and skills to the Board members to enable them effectively discharge their oversight role.

On the legislative framework governing banking business, the Foreign Exchange (Bureau de Change) Regulations, 2015 GN No. 245, and the Banking and Financial Institutions (Mortgage Finance) Regulations, 2015 GN No. 254, were published in the Government Gazette in July 2014. The objective was to align the regulations with the recent developments in the market (i.e., address gaps observed since they were last issued) and accommodate other international best practices. In addition, the changes in the foreign exchange regulations focused on further liberalisation of

capital account transactions for residents of the East African Community¹⁰. Furthermore, a Draft Bill for the National Payment Systems Act was passed by the Parliament in May 2015 and is expected to become operational in September 2015.

The Bank of Tanzania also commenced operationalization of the Complaints Resolution Desk at the Bank's premises in April 2015. The Desk attends complaints of bank customers in the event that the banks have not satisfactorily addressed their complaints.

Strategic Planning and Performance Review

During 2014/15, the Bank of Tanzania adopted and started to implement Balanced Score Cards (BSC) methodology for planning and performance measurement of its activities. Accordingly, the strategic plan of the Bank for 2015/16 – 2019/20 has been prepared on the basis of the BSC Methodology. In addition, the Bank reviewed organization structures particularly with a view to improve the organization performance and address evolving challenges in implementation of the Bank's activities.

Three projects which are construction of Dodoma Branch; Tanzania Automated Clearing House and Acquisition and Deployment of Enterprise Governance, Risk Management and Compliance (GRC) were completed during the year. In line with this, the Bank continued to make efforts in enhancing usage of technology in project monitoring.

The Bank continued to coordinate the financial sector reform programme. The main activities were in the areas of rolling out the public awareness programmes on financial leasing and capacity building of stakeholders in the financial sector. In addition, the Bank continued to work closely with the Government in implementing financial sector reform activities under the Private Sector

The Foreign Exchange (Bureau de Change) Regulations, 2015 GN No. 245 is available on the Bank of Tanzania website www.bot.go.tz

Competitiveness Project. This involved access to finance window, including enhancement of the framework for assessing capital charger for market, and operational risks and building the capacity of financial sector regulators. In this regard, the Bank received USD 60 million from the International Development Association (IDA), as an additional financing for Housing Finance Project with the objective of sustaining and deepening Mortgage Refinance Tanzania Company's capacity to support the mortgage market. The additional finance is also for enhancement of the seed capital for the Housing Microfinance Fund (HMFF) to enhance the scope of the Fund in reaching housing finance needs11. The HMFF was established in 2014/15 and is administered by the Bank.

Credit Guarantee Schemes

In 2014/15, the Bank continued to manage credit guarantee schemes (CGS) on behalf of the Government under the agency agreement, pending formation of an independent institution. The management of the schemes involves: issuing credit guarantee in accordance with the Credit Guarantee Schemes Guidelines; reviewing and implementing CGS policies and guidelines; processing claims against the defaulted guaranteed loans; and monitoring performance of the guaranteed loans.

The CGS is comprised of two facilities: export credit guarantee scheme (ECGS) and small scale enterprises credit guarantee scheme (SME-CCGS)¹².

Since the inception of the ECGS in 2002/03, loans extended by lending institutions amounted to TZS 1,291.2 billion at the end of June 2015, while cumulative value of guarantees issued was TZS 987.5 billion. Meanwhile, cumulative

value of expired guarantees since inception was TZS 601.8 billion. Thus, the outstanding guarantees amounted to TZS 387.5 billion at the end of 2014/15. As regards the SME-CGS, the loans extended by lending institutions was TZS 7.1 billion since its inception in 2004/05. The cumulative amount of guarantees amounted to TZS 3.5 billion while the guarantees that expired amounted to TZS 2.7 billion. This translates to an outstanding guarantees of TZS 0.7 billion.

Banking

In 2014/15, the Bank of Tanzania continued to provide banking services to the two Governments (the United Republic of Tanzania and the Revolutionary Government of Zanzibar), banks and the general public. The banking services were provided using improved modern payment systems and enhanced security and service delivery. The various banking services to banks included maintenance of the statutory minimum reserve requirements, clearing accounts services, as well as provision of liquidity through liquidity facilities available for banks. It is noteworthy that new accounts were opened for two banks that were licensed during the year under review: Tanzania Agricultural Development Bank and China Commercial Bank.

The Bank of Tanzania also opened accounts for the Regional Treasury offices (Sub-Treasuries) following the roll-over of the Tanzania Interbank Settlement System to sub-Treasuries, which has facilitated in reducing payment cycle for the regions.

In an endeavor to improve banking services in the country, the Tanzania Automated Clearing House (TACH) was further enhanced in April 2015, whereby use of cheque imaging and electronic fund transfer (EFT) was introduced in clearing operations. This has facilitated in reducing the clearing period countrywide. The implementation of TACH system also facilitated in payment of

¹¹ The Housing Microfinance Fund is an initiative of the Government to alleviate poverty and boost shared growth.

¹² The ECGS was established in 2002/03 to promote high value exports by facilitating access to finance through issuance of credit guarantees on loans to exporters while the SME-CCGS established in 2004/05 to promote small scale enterprises by facilitating access to finance from financial institutions in the country.

government pensioners through EFT beginning May 2015.

As regards currency services, the Bank of Tanzania continued with its role of issuing and managing distribution of currency through the head office and its branches located in Arusha, Mwanza, Zanzibar and Mbeya. Safe custody centres located in Mtwara, Kigoma, Sumbawanga, Tanga, Pemba, Tabora, Bukoba and Songea also continued to be used for similar purpose. In order to increase the coverage for currency distribution in Tanzania, another safe custody centre was opened in Shinyanga, making a total of nine (9) safe custody centres in the country.

In the course of enhancing clean money policy and efforts to minimise currency issue expenses, the Bank converted TZS 500 banknote into coin. The measure aimed at replacing the banknotes denomination, which was wearing off quickly due to its high velocity or wider circulation. The coin was put into circulation in October 2014.

National Payment Systems

The Bank of Tanzania implemented several measures in its efforts of modernizing the national payment systems to ensure that they are effective, efficient and secure. During 2014/15, National Payment Systems (NPS) Bill, 2015 was enacted by the Parliament in March 2015 and subsequently the Act was assented in April 2015. In addition, The Tanzania Automated Clearing House (TACH) system went live in April 2015. The TACH system enables the exchange of low value instruments among participating banks in a safe and efficient manner, and facilitate settlement of banks' clearing obligations through the Tanzania Inter-bank Settlement System (TISS). Currently, the TACH system clears cheques and credit Electronic Fund Transfers (EFTs) utilizing the state-of the-art cheque image truncation technology, which facilitates a T+1 cheque clearing period countrywide from the previous T+3 up to 7 days. This has improved

efficiency in processing of cheques by reducing the clearing period and liquidity optimization.

In addition, connectivity between TISS and the Dar es Salaam Stock Exchange (DSE) became operational in February 2015. This implies that trade settlement between counterparts at the DSE can now be settled through TISS, hence achieving delivery versus payment mechanism, whereby payment is made simultaneously with delivery of security, thus mitigating failure to settle risks.

The Government was able to connect all its sub-treasuries located in 24 regions to TISS. The connectivity allows expedition of payment processes—enhanced security as well as minimizing fraud incidences related to cheques payments. It also improves cost effectiveness, auditability and management of accounts. Further, the East African Payment System (EAPS) which connects the EAC member states' Real Time Gross Settlement systems (RTGSs) went live in May 2014. The system started its operations with three member states namely Tanzania, Kenya, and Uganda, while Rwanda joined later in February 2015.

On the electronic money landscape, the Bank permitted one mobile network operator (MNO), Airtel Tanzania, to introduce usage of Near Field Communication (NFC) technology for its mobile money customers to access and transact in their mobile wallets. Airtel was also allowed to introduce store-value payment cards as alternative digital financial services instrument to be used parallel with its consumers' traditional mobile phone channel. The adoption of these new technologies, as alternative channels in the mobile money financial services, is expected to improve efficiency in mobile phone payments. Furthermore, crossborder mobile payment services between Tigo Tanzania and Tigo Rwanda customers continued to operate while Vodacom Tanzania partnered with Safaricom Kenya in February 2015 to offer cross-

border M-Pesa services among their customers. In addition Vodacom M-Pesa customers, Tigo Pesa customers started to receive in bound remittance through Western union worldwide.

During the reviewed period, the Bank initiated the process of adopting the Principles for Financial Markets Infrastructures (PFMIs) which are standards for ensuring safety and efficiency of the NPS. These Standards were issued by the Bank of International Settlement (BIS) replacing the Core Principles for Payments and Securities Systems (CPSS) so as to enhance safety in the financial markets infrastructures following the global financial crisis of 2008/09.

Research and Publications

In 2014/15, the Bank initiated and conducted a number of research activities with broad objective of informing policy formulation and implementation. The Bank also organized a number of outreach seminars aimed at disseminating research output to the stakeholders and policy makers. In addition, the Bank prepared and circulated various economic publications and reports including monthly, quarterly and annual economic reviews as well as monetary policy statements. Research activities initiated during the year under review, include the following:

(i) The Relative Importance of Foreign and Domestic Shocks for Macroeconomic fluctuations in Tanzania.

Following major economic reforms, coupled with an increasing pace of integration into the global economy over the last two decades, the Tanzanian economy is increasingly facing the challenges of coping with international economic disturbances. The study sought to explore the main sources of external economic shocks, the extent to which they affect domestic economic variables, and whether they are more or

less important when compared to shocks of domestic origin. Key research questions that were addressed include: (a) Are foreign shocks of a greater or lesser importance than domestic shocks for the Tanzanian economy? (b) Has the introduction of the flexible exchange rate policy made the Tanzanian economy more or less sensitive to foreign shocks? and (c) To what extent has monetary policy been exogenous in the sense of influencing rather than responding to domestic and foreign shocks?

(ii) Interaction between Finance, Financial Stability and Economic Growth

The study aimed to provide insights on the linkages between financial sector development. financial stability and economic growth. The study used trend analysis approach to investigate the relationship between financial development and growth on one hand; and financial sector stability and growth on the other hand. An important lesson on the findings of this study is that financial sector development is a necessary but not sufficient condition for high and sustained economic growth. The study underscores the need for: promotion of macroeconomic stability with more attention on creating as much fiscal space and foreign reserve buffers as possible, and building regional markets through integration and cooperation in order to strengthen the resilience of economies against the financial crisis and global market shocks. In addition, the study emphasises the need for regulators and supervisors to stay ahead of financial innovations by continuously upgrading the skills and instruments for financial regulations and supervision.

(iii) Monetary Policy Framework in Tanzania: A proposal to Review the Policy Rate

This paper proposes the need to reconsider the policy rate with a view to coming up with a more active rate. The study provided a review of Bank of Tanzania liquidity operations and assessment of the reasons behind the limited success of the current bank rate, with special attention given to discussion about the set-up of the current policy framework in in order to give sufficient clarity about the environment in which the proposed policy rate will operate. The study also attempts to raise and answer important questions that may be encountered in the operationalization of the proposed rate.

During 2014/15, the Bank continued with implementation of the Data Warehouse project. The current phase of implementation comprises design and building of operational Enterprise Data Warehouse (EDW) and Business Intelligence (BI) solutions for the Directorate of Economic Research and Policy and associates. Activities accomplished during the year include business requirements gathering and analysis, actual design and build of the EDW and BI solutions. The deliverables of this stage included design and build documents, and draft physical EDW and BI framework that include first version of the Oracle Data Integrator (ODI) and the EDW code. Subsequent activities include system and user acceptance testing and deployment.

Microfinance

In order to enhance access and usage of financial services to low income and unbanked segment of the population, the Government in collaboration with the Bank of Tanzania, reviewed the National Microfinance Policy (NMP) of 2000 and drafted the National Microfinance Act. The reviewed NMP sets broad policy objectives, re-defines roles of key players, and facilitates monitoring and coordination of microfinance activities in the country. The drafted Act aims to provide legal framework that would promote microfinance activities and protect consumers. The need for review of the

policy and drafting of the Act were mainly driven by new developments in the microfinance sector, particularly financial innovations, which have raised challenges in monitoring performance; and misconduct in packaging, pricing of products and debt collection.

During 2014/15, the Bank conducted financial capability survey. The survey indicated a strong relationship between poverty and level of education, level of education and financial inclusion, and financial inclusion and level of financial capability. The survey has been useful in defining baseline indicators of the financial education framework. In addition, the Bank of Tanzania conducted a study on informal financial groups with financial support from the Financial Sector Deepening Trust. The study provides an insight into the potential of informal financial groups in enhancing financial inclusion and calls for mandatory registration of IFGs that accumulate substantial amount of money in order to minimise risks.

The Bank of Tanzania also finalized development of the microfinance database system that would facilitate in monitoring the performance of the microfinance in both Tanzania mainland and Zanzibar. The system is intended to provide information on activities of microfinance institutions, particularly credit-only institutions, to ensure the stability of financial system.

Balance of Payments

The Bank of Tanzania, in collaboration with Tanzania Investment Centre and the National Bureau of Statistics, conducted the 8th cycle of survey of companies with foreign assets and/or liabilities on foreign private investment for 2012 and 2013. The survey facilitates investment promotion, and compilation of statistics for balance of payments and international investment position¹³. The Bank also collaborated with the Ministry of Natural

¹³ The report of Foreign Private Capital Flows is available at www.bot.go.tz

Resources and Tourism, National Bureau of Statistics, Immigration Department and Zanzibar Commission for Tourism in conducting the 12th cycle of international visitors exit survey¹⁴. The survey facilitated in tourism promotion and compilation of balance of payments and national accounts statistics.

Banking Supervision

The Bank of Tanzania implemented several regulatory and supervisory measures to ensure safety, stability and soundness of the banking system. In addition, risks associated with new technology and innovations in the financial sector continued to be managed. During 2014/15, the banking sector remained safe and sound with adequate capital and liquidity levels being above the regulatory requirements. Notably, the ratio of core capital to total risk-weighted assets and off-balance sheet items was 16.1 percent, while total capital to total risk-weighted assets and offbalance sheet exposures was 17.6 percent. Both ratios were above the minimum requirements of 10 and 12 percent, respectively¹⁵. The ratio of liquid assets to demand liabilities was 37.3 percent, above the minimum requirement of 20 percent. The quality of assets of the banking sector improved significantly, as reflected by the ratio of non-performing loans to gross loans which decreased to 6.6 percent from 8.1 percent in the preceding year.

The banking sector continued to expand, comprising of 36 commercial banks, 12 community banks, three financial institutions, one development finance institution, three microfinance companies, one mortgage refinancing company, two financial leasing companies and one representative office at the end of 2014/15. In line with these developments, number of bank branches increased to 709 branches from 634 branches in the preceding year. In addition, two development

14 The report of International Visitors Exit Survey is available at www.bot.go.tz

finance institutions as well as two finance leasing companies were licensed.

 Ω During 2014/15, a number of prudential regulations were reviewed, with a view to improving and keeping in line with developments in the banking industry. The revised regulations were gazetted in August 2014 and two more sets covering mortgage finance and bureaux de change were gazetted in June 2015.

In an endeavour to facilitate easy access to borrowers' information by bankers, the credit reference system continued to improve in terms of data submission and quality, where 46 pout of 54 banking institutions submitted data to the credit reference databank. Similarly, 32 non-regulated institutions shared credit information through the credit reference bureaus.

The number of banking institutions approved by the Bank to conduct agent banking business increased to nine from seven in the preceding year¹⁶. In 2014/15, the number of banking agents was 2,335 compared with 1,253 in the preceding year. The volume of transactions through banking agents amounted to TZS 741.1 billion in 2014/15 compared with TZS 142.4 billion in the preceding year. The Bank of Tanzania is developing an onsite supervisory framework and revising Agent Banking Guidelines, 2013 to facilitate smooth functioning and development of agent banking business in the country.

Bureau de change operations continued to expand, as the number of number of bureaus increased to 261 from 244 in 2013/14, out of which, 234 were operating in Tanzania mainland and 27 in Zanzibar. Bureaux de change regulations were reviewed to include new minimum capital requirements and provisions to allow remittances. In addition, the Bank of Tanzania in collaboration with the Tanzania Revenue Authority, is in the process of establishing

¹⁵ The minimum ratios have since been changed to 12.5 percent and 14.5 percent respectively from August 2014 but there is a moratorium of three years.

¹⁶ The approved banking institutions in 2014/15 were National Microfinance Bank PLC, Access Bank Tanzania Limited, FINCA Microfinance Bank Limited, CRDB Bank Plc., Equity Bank Tanzania Limited, Tanzania Postal Bank, DCB Commercial Bank Plc, and Amana Bank Limited.

bureau de change management system with the objective of enhancing the monitoring of the bureau de change operations.

Corporate Services

In 2014/15, the Bank of Tanzania continued to perform its core functions as well as other operations. Through communication stakeholders and the general the public, information on economic and financial developments as well as the Bank's operations were disseminated. The main communication channels were publications, website, exhibitions and various events through meetings, seminars and workshops. The main events included hosting of the 17th Conference of Financial Institutions and East African Community Monetary Affairs Committee meeting¹⁷. The Bank also participated in various regional and international forums organized by the IMF, SADC, Association of African Central Banks, and International Growth Centre.

In addition, in an endeavour to enhance transparency and effectiveness of monetary policy, decisions of the Monetary Policy Committee (MPC) meetings were communicated to banking and financial institutions, and the media. In a distinct but related to this endeavour, public awareness activities were also conducted on diverse issues. These included new developments in the financial sector; such as monetary policy decisions, credit reference systems, financial inclusion, mortgage financing and implementation of the EAC Monetary Union Protocol.

As regards corporate social responsibility, the Bank continues to provide sponsorship to students pursuing bachelor and master's degree programmes in Tanzanian universities under the Mwalimu Nyerere Memorial Scholarship Fund and the Gilman Rutihinda Fund.

Branch Activities and Training Institute

<u>During 2014/15</u>, the Bank of Tanzania continued

17 The proceedings of the 17th Conference of Financial Institutions is available in print and on the Bank of Tanzania website: www.bot.go.tz

to execute functions through its branches located in Arusha, Dodoma, Mbeya, Mwanza and Zanzibar¹⁸. The main activities included providing banking, currency and settlement services; as well as monitoring economic performance in designated zones. The branches also provided public awareness on the functions of the Bank of Tanzania and economic issues. Further, the branches participated in the Regional Consultative Committee meetings and investors' forums in their respective zones to inform on economic and financial sector developments.

During the year under review, the branches also conducted studies to inform policy. Notably, a study on contract farming schemes was conducted to examine whether contract farming schemes for cotton, sisal, sugar and tobacco have improved farmers' economic and social welfare and addressed access to market constraints. Preliminary findings suggested that contract farming generally improved farmers' income and access to markets and better social services such as health, education and shelter. The study also indicated that although contract farming was found to be generally beneficial, it still faces challenges related to, among others, availability of credit, state of infrastructure, timing of payments, contract enforcement and inadequate competition. Therefore, following recommendations made: improving technical and extension services; building capacity of institutions including farmers' associations; realigning farming contracts in order to accommodate interests of all stakeholders; government playing a more visible role; improving capacity of judicial and regulatory institutions; and improve infrastructure especially feeder roads.

The other studies that were conducted by branches were tanzanite processing and tourism developments in Zanzibar. The objective of tanzanite study was to examine nature and volume of tanzanite, supply chain and factors for the low response of private sector to process of

18 Dodoma branch commenced operations in 2014/15.

rough tanzanite. It was found that a clear chain of tanzanite supply exists, but most of trade is done in informal markets and much of the rough tanzanite is sold outside the country. Furthermore, it was found that the existing market structure that tend to depress prices in favour of the buyer because they have more information on market prices and demand. Thus, it was recommended that the government puts in place credit schemes to support small-scale and artisanal tanzanite miners as well as processors, establish a tanzanite cutting and polishing export zone at Mererani. This would serve as marketing centre for rough tanzanite, establish and strength training institutions to provide specialized skills in gemstone cutting and polishing skills commensurate to international standards. The government is also recommended to impose a total export ban on rough tanzanite of all weights.

The study on tourism developments in Zanzibar was envisaged to examine the recent developments in tourism activities, specifically determinants of tourist arrivals in recent years. The study showed that most tourists were attracted by beautiful beaches, availability of modern hotels as well as safety and security. The Government is recommended to lure investors and other stakeholders to construct international standard conference facilities, widen its promotions to other regions so as to avoid risks associated with economic downturns and provide special discounts particularly to senior foreign citizens so as to further increase the number of tourist arrivals.

During the review period, banking, currency, and clearing services were provided as planned to commercial banks and Government departments and were complimented by safe custody centres. Following the introduction of Tanzania Automated Clearing House (TACH) in May 2015, the clearing time was reduced from seven days to a day. In addition, currency processing lag was cut-down to one-week for 10,000/- denomination compared to the required one-month lag owing to less soiled notes collected from the public. The currencyprocessing lag for 5,000/- denomination declined to six months from one year. This was partly contributed by awareness campaigns conducted by the respective branches and various exhibitions, particularly the 'Nane Nane'. In these exhibitions, the public was educated on counterfeit notes, currency security features, and proper handling of bank notes.

REPORT OF THE DIRECTORS

1. INTRODUCTION

The Directors present this report together with the audited financial statements for the financial year ended 30 June 2015, which disclose the state of financial affairs of the Bank of Tanzania (the "Bank").

During the year, the Bank continued to implement its mandate as provided in the Bank of Tanzania Act, 2006 to ensure sustainable growth of national economy. As part of its mandate to issue and distribute currency to the economy, besides its branch network, the Bank operates safe custody centres in some parts of the country. During the year under review, the Bank operated five branches, one training institute and nine safe custody centres in the country.

The Bank continued to monitor and disseminate information and data on economic activities in the country. Economic reports covering various regions were disseminated at various fora, including at regional coordination committees and investors' fora.

ESTABLISHMENT

The Bank of Tanzania was established under the Bank of Tanzania Act, 1965. The act was repealed in 1995 and 2006. The Bank currently operates under the Bank of Tanzania Act, 2006.

BANK'S VISION

The vision of the Bank is: "To be a world class central bank, in maintaining price and financial stability consistent with supporting economic growth."

BANK'S MISSION

The Bank's mission is: "To maintain price stability, and to promote integrity and stability of the financial system consistent with sustained growth of the national economy."

2. STATUTE AND PRINCIPAL ACTIVITIES

Bank of Tanzania (BOT) is the Central Bank of the United Republic of Tanzania comprising Tanzania Mainland and Zanzibar, and is wholly owned by the Government of the United Republic of Tanzania. Its operations are governed by the Bank of Tanzania Act, 2006.

A summary of functions and objectives of the Bank are to:

- Formulate, implement and be responsible for monetary policy, including foreign exchange rate
 policy, issue currency, regulate and supervise banks and financial institutions including mortgage
 financing, development financing, lease financing, licensing and revocation of licenses and to
 deal, hold and manage gold and foreign exchange reserves of Tanzania;
- Compile, analyse, and publish the monetary, financial, balance of payments statistics and other statistics covering various sectors of the national economy;
- Regulate, monitor and supervise the payment, clearing and settlement systems;
- Act as a banker and fiscal agent of the Government of the United Republic of Tanzania and the Revolutionary Government of Zanzibar ('the Governments'); and
- Ensure the integrity of the financial system and support the general economic policies of the Government and promote sound monetary, credit and banking conditions conducive to the development of the national economy.

3. RESOURCES AND STRENGTH

Resources and strengths that facilitate the Bank's endeavour in achieving its strategic objectives include human, financial and technological resources.

In terms of human capital, the Bank has well-qualified and committed staff dedicated to a long-term career in the Bank. Likewise, the management adheres to good governance and promotes labour relations. From its strategic perspective, the Bank enhances its financial sufficiency by improving management of its resources through prioritization of initiatives, implementing initiatives within the available financial envelope and prudently managing its sources of income. On technological side, the Bank has made significant efforts of adopting modern technology to improve its day-to-day operations. Further, the Bank has strategically located branches and custody centres, which facilitate efficient banking services.

The Bank has also undertaken various reforms that contribute to the attainment of its objectives. For example, the on-going modernization of the monetary policy framework is expected to improve the efficiency and effectiveness of the monetary policy implementation.

4. REVIEW OF THE BANK'S PERFORMANCE AND BROAD GOALS

During the year, the Bank's Corporate Plan continued to focus on attaining three broad goals that translate its primary mandates. These are:

- Maintaining price stability;
- Promoting integrity and stability of the financial system; and
- Strengthening corporate governance.

Basing on the three broad goals, the Bank's performance revealed the following:

Maintaining price stability

The Bank had set the target to maintain core inflation at single digit throughout the period to end June 2015 and maintaining official foreign reserves sufficient to cover at least 4.0 months of projected imports of goods and services, excluding those financed by foreign direct investment; and generating at least 0.75 percent return per annum on foreign reserves.

During the year, both core and headline inflation rates declined from 3.5 percent and 6.4 percent recorded in June 2014 to 2.2 percent and 6.1 percent, respectively. The decline in headline inflation was on account of improved domestic food supply in the Eastern Africa region, prudent monetary policy stance and fiscal consolidation.

Official gross foreign reserves declined to USD 4,402.2 million as of 30 June 2015 compared to USD 4,634.1 million recorded as of 30 June 2014. This level of official reserves was sufficient to cover about 4.2 months of projected import of goods and services excluding Foreign Direct Investments (FDI) related imports.

Foreign reserves were managed consistent with the strategic objective of capital preservation, adequate liquidity, and maximizing return on investments.

4. REVIEW OF THE BANK'S PERFORMANCE AND BROAD GOALS (CONTINUED)

Promoting integrity and stability of the financial system

Financial stability is defined as a smooth operation of the system of financial intermediation between households, firms and the Governments through a range of financial institutions. Stability in the financial system is evidenced by an effective regulatory infrastructure, effective and well developed financial markets, and effective and sound financial institutions. The financial system remained stable and efficient in providing financial services to the economy during the financial year ended June 2015.

As at the end of June 2015, the quality of loans issued by the banking sector during the year was maintained within acceptable limits. The establishment of the credit reference system was implemented, which was intended to improve credit risk management practices in the country, through sharing credit information and eventually helping to improve loan quality.

The banking sector was adequately capitalized in aggregate terms during the review period. During the year, all capital adequacy ratios were maintained within acceptable range.

Strengthening corporate governance

Improve organizational and individual performance

The Bank continued to use Strategic Management Maturity Level (SMML) to measure the level of attainment of strategic objectives and overall staff performance levels set during the year.

The Strategic Management Maturity Model™ (SMMM¹) was used to measure progress that the Bank is making in strategic management and performance measurements efforts. The model uses five levels of maturity where the starting point is 1 and the best score is 5. The scores are assigned to nine different dimensions namely; leadership, culture and values, strategic thinking and planning, strategic budgeting, organisational alignment, performance measurement, performance management, process improvement and sustainability of strategic management.

The overall performance of the Bank during the year improved to an average of 3.5 in year 2015 from 2.7 attained during year 2014.

Staffing, Capacity Building and Work Environment

The Bank was adequately staffed with the right capabilities to accomplish its strategic and operational objectives. This position was a result of implementation of Human resource plans and strategies that enabled the Bank to fill vacant positions in time. Moreover, the Bank remained a favourable employer in the labour market with staff retention rate of 99.9%.

To improve knowledge and skills of employees, the Bank continued to address skills requirements through the annual corporate training plan and budget.

Core Competency Framework

The Bank continued to have a safe and healthy working environment. All office facilities and working tools operated smoothly. Employees' benefits and welfare services were delivered as planned and staff well being and morale was maintained.

¹ SMMM assessment is conducted periodically to inform management of where the Bank stands in terms of strategic management. It also allows management to monitor progress in improving maturity of strategic management and to allow benchmarking the Bank against other high performing organisations.

4. REVIEW OF THE BANK'S PERFORMANCE AND BROAD GOALS (CONTINUED)

Strengthening corporate governance

Enhance Compliance with Legislation, Regulations, Policies and Standards

During the year, the Bank continued to put emphasis on compliance with the Bank of Tanzania Act, 2006; Public Procurement Act, 2011; and other legislations, regulations, policies and standards in executing its mandate.

Further, the Bank continued to adhere to Anti-Money Laundering (AML) and the Combating Financing of Terrorism Units (CFT) by continuing coordination of Anti-Money Laundering (AML)/Combating Financing of Terrorism (CFT) activities as an effort to ensure that the Bank adhered to legislation, regulations and policies. The Bank spearheaded coordination of AML/CFT initiatives within the Bank and among stakeholders in the country and more particularly with the Financial Intelligence Unit (FIU). The Bank also continued to play a part in the Eastern and Southern Africa Anti-Money Laundering Group (ESAAMLG) meetings and shared experiences and benchmark practices in combating AML/CFT.

Improve management of Bank's resources

In improving management of the Bank's resources, the Bank continued to implement planned projects. Major projects completed during the year include construction of Dodoma Branch, Tanzania Automated Clearing House (TACH) and Governance Risk and Compliance (GRC) Phase II.

During the period under review, the Bank continued to maintain its properties and facilities including buildings, machinery, equipment and motor vehicles in order to ensure that they are always in good working condition.

Bank's Engagement with External Stakeholders

The Bank continued to nurture its relationship with external stakeholders, seeking to gain confidence and trust in protecting the Bank's reputation. In order to improve its reputation, the Bank continued to address stakeholders' needs, expectations and providing timely responses to stakeholders' inquiries.

Other developments

Growth of currency in circulation

The position of currency in circulation as at 30 June 2015 was TZS 4,094,261.1 million as compared to TZS 3,596,703.1 million as at 30 June 2014, hence representing an increase of TZS 497,557.9 million; equivalent to 13.8 per cent (2014: 18.7 per cent) in line with momentary policies that ensure sustainable economic growth.

Public education programs

The Bank participated in various public education programs that were aimed at sensitizing the public on the roles and functions of the Bank. Further the Bank undertook public awareness campaigns on the bank notes and its security features.

5. CORPORATE GOVERNANCE

Members of the Board of Directors other than the Governor and Deputy Governors are appointed by the Minister for Finance of the United Republic of Tanzania, while the latter are appointed by the President of the United Republic of Tanzania. The following Directors served in the Board during the year.

No.	Name	Position	Age	Discipline	Date of Appointment	Nationality
1	Prof. Benno J. Ndulu	Governor and Chairman of the Board	65	Economist	08 January 2008	Tanzanian

KEY

In accordance with Section 9(2) (c) of the Bank of Tanzania Act, 2006, a representative of the Ministry of Finance of the United Republic and Principal Secretary to the Treasury of the Revolutionary Government of Zanzibar are ex-officio members.

Bank of Tanzania ascribes to the highest standards of corporate governance. The Bank through the Board of Directors and Management upholds and practices the principles of sound corporate governance.

To this end, the Bank of Tanzania Act, 2006, has provided a framework for ensuring application of sound corporate governance principles and best practices by the Bank's Board of Directors and its Committees and Management in the course of managing the day to day affairs/operations of the Bank as summarized below:

- (i) In terms of the provisions of Section 9(1) of the Bank of Tanzania Act, 2006, the Bank's Board of Directors is the supreme policy making body in the Bank, and apart from its specified function of approving the budget of the Bank;
- (ii) Four Committees are currently assisting the Bank's Board of Directors in the discharge of its functions. These are the Monetary Policy Committee, Audit Committee, Banking Supervision Committee and Finance and Investment Committee.

¹ Principal Secretary to the Treasury, Revolutionary Government of Zanzibar.

² Retired on 10 July 2015.

5. CORPORATE GOVERNANCE (CONTINUED)

(a) Monetary Policy Committee

The Monetary Policy Committee was established under the provision of Section 12(1) of the Bank of Tanzania Act, 2006. Its membership comprise of the Governor who is the Chairman, the Deputy Governors, and four Non-executive Directors. The Monetary Policy Committee assists the Board in the review of monetary policy targets; review of research papers and major economic and monetary policy changes before adoption by the Board. The Committee's mandate also covers review of the Governments' revenue and expenditure patterns; review of debt management operations and statutory reports of the Bank related to implementation of monetary and financial policies.

The Members of the Monetary Policy Committee as at 30 June 2015 were as follows:

No	Name	Position	Discipline	Nationality
1	Prof. Benno J. Ndulu	Chairman	Economist	Tanzanian
2	Mr. Juma H. Reli	Member	Finance	Tanzanian
3	Mr. Lila H. Mkila	Member	Statistician	Tanzanian
4	Dr. Natu E. Mwamba	Member	Economist	Tanzanian
5	Prof. Haidari K. Amani	Member	Economist	Tanzanian
6	Mrs. Esther P. Mkwizu	Member	Management Consultant	Tanzanian
7	Mr.Omar S. Mussa	Member	Finance	Tanzanian
8	Mr. Yona S. Killagane ¹	Member	Professional Accountant	Tanzanian
9	Mr. Yusto E. Tongola	Secretary	Lawyer	Tanzanian

¹ Appointed to the Committee on 17 February, 2015.

(b) The Audit Committee

Established under the provisions of Section 12(1) of the Bank of Tanzania Act 2006, the Audit Committee is largely composed of Non-executive Directors. The Chairman of the Committee is a Non-executive Director. The Deputy Governor-Administration and Internal Control is the only Executive member of the Committee. The Terms of Reference for the Audit Committee cover four major areas, namely, Internal Control, Financial Reporting, Internal Audit and External Audit.

The Audit Committee's mandate under **Internal Control** covers evaluation of control environment and culture; the adequacy of the internal control systems and compliance with IFRS in the preparation of financial statements; the overall effectiveness of the internal control and risk management framework; The Committee also reviews requests for write off/ back of items from the books of accounts and reviews the effectiveness of the system for monitoring compliance with laws and regulations.

The mandate relating to **Financial Reporting** requires the Audit Committee to review significant accounting and reporting issues and their impact on the financial reports and ensure current financial risk areas are being managed appropriately. The Committee also ensures the adequacy of the financial reporting process and reviews the Bank's annual accounts before approval and adoption by the Board.

With regard to **External Audit**, the Audit Committee reviews and approves the external auditors' proposed audit scope, approach and audit deliverables, draft financial statements before submission to the External Auditors for audit; and also reviews and approves the proposed audit fee.

5. CORPORATE GOVERNANCE (CONTINUED)

(b) The Audit Committee (Continued)

The Committee's mandate on **Internal Audit** covers review of the activities and resources of the internal audit function; effectiveness, standing and independence of internal audit function within the Bank; review of the internal audit plan; and follow up on implementation of internal audit findings and recommendations. The Audit Committee reports to the Board of Directors.

The Members of the Audit Committee as at 30 June 2015 were as follows:

No	Name	Position	Discipline	Nationality
1	Prof. Haidari K. Amani	Chairman	Economist	Tanzanian
2	Mr. Juma H. Reli	Member	Finance	Tanzanian
3	Mrs. Esther P. Mkwizu	Member	Management Consultant	Tanzanian
4	Mr. Omar S. Mussa	Member	Finance	Tanzanian
5	Mr. Yona S. Killagane	Member	Professional Accountant	Tanzanian
6	Mr. Yusto E. Tongola	Secretary	Lawyer	Tanzanian

(c) Banking Supervision Committee

The Banking Supervision Committee was also established under the provision of Section 12(1) of the Bank of Tanzania Act, 2006. Members of the Committee comprise the Governor who is the Chairman, the Deputy Governors, Representative of the Ministry of Finance, Government of the United Republic of Tanzania and Principal Secretary to the Treasury, Revolutionary Government of Zanzibar and four Non-executive directors.

The Banking Supervision Committee is responsible for review of internal control and systems in banks and other financial institutions; the Banking Supervision function; adequacy of the prevailing legal and regulatory framework; operating performance of banks, financial institutions and bureau de change with a view to ensuring safety and soundness in the banking system; financial stability reports before publication; and on emerging supervisory issues. The Committee advises the Board on appropriate policy, legislative and regulatory measures that promote a safe and sound banking system and high supervisory standards and practices.

The Members of the Banking Supervision Committee as at 30 June, 2015 were as follows:

No	Name	Position	Discipline	Nationality
1	Prof. Benno J. Ndulu	Chairman	Economist	Tanzanian
2	Mr. Juma H. Reli	Member	Finance	Tanzanian
3	Mr. Lila H. Mkila	Member	Statistician	Tanzanian
4	Dr. Natu E. Mwamba	Member	Economist	Tanzanian
5	Mr. Khamis M. Omar	Member	Finance	Tanzanian
6	Mr. Bedason A. Shallanda	Member	Economist	Tanzanian
7	Prof. Haidari K. Amani	Member	Economist	Tanzanian
8	Mr. Yona S. Killagane	Member	Professional Accountant	Tanzanian
9	Mr. Yusto E. Tongola	Secretary	Lawyer	Tanzanian

REPORT OF THE DIRECTORS (CONTINUED)

5. CORPORATE GOVERNANCE (CONTINUED)

(d) The Finance and Investment Committee

The Finance and Investment Committee was established under the provision of Section 12 (1) of the Bank of Tanzania Act, 2006. Members of the Committee include the Governor who is the Chairman, the Deputy Governors, and four Non-executive Members of the Board.

The Finance and Investment Committee is responsible for review of the proposed budgets, reallocation of funds involving capital expenditure and supplementary budget requests; quarterly budget performance reports; Financial Regulations and Staff Bylaws; requests for disposal of immovable assets; and Bank's Annual Corporate Plan. The Committee also reviews the appropriateness of the Bank's investment policy and assets allocation strategy; Risk Management Framework for the Bank's operations and Project Management framework.

The Members of the Finance and Investment Committee as at 30 June 2015 were as follows:

No	Name Position		Discipline	Nationality	
1	Prof. Benno J. Ndulu	Chairman	Economist	Tanzanian	
<u> </u>	Mr. Juma H. Reli	Member	Finance	Tanzanian

11	Mr. Yusto E. Tongola	14	6	6	8	11	Committee

6. MEETINGS (CONTINUED)

The Board and its committees meet after every two months with additional meetings convened as and when necessary. During the year, the Board and its committees met to discuss and decide on various business activities. The Board Committees recommend key business decisions to the Board for approval.

7. INDEPENDENCE

All Non-executive Directors are considered by the Board to be independent both in character, judgment and free of relationships or circumstances, which could affect their judgment.

8. CAPITAL STRUCTURE

Section 17 of the Bank of Tanzania Act, 2006 provides the level of authorized capital of the Bank to be one hundred billion Tanzanian Shillings. This amount may be increased by such amount as may be determined by the Board, and authorized by the Minister of Finance, by Notice published in the Government Gazette. The capital of the Bank is subscribed and held only by the Government of the United Republic of Tanzania.

Due to the nature of the Bank's business and statutory requirements the whole capital is held in the form of equity. Different classes of reserves have been prescribed under section 18(1) of the Bank of Tanzania Act, 2006 and **Note 43** to these financial statements. The movement of the capital during the year is reflected under the Statement of Changes in Owners' Equity.

9. RELATIONSHIP WITH STAKEHOLDERS

The Bank recognizes the importance of addressing the needs of its key stakeholders in order to add value, satisfy their needs and expectations to fulfill its mission. The Bank's key stakeholders include the Governments, banking institutions, other financial institutions, development partners, general public and staff. The Bank is committed to delivering value to its stakeholders through better services and good customer care while maintaining good relationship in its engagements.

Accordingly, the Bank fulfills its mandate by delivering the following services to meet its stakeholders' needs and expectations:

- (a) Issuance of Notes and Coins: The Bank provides secure, adequate, durable and portable bank notes and coins; ensure prompt circulation of currency through its branch networks and safe custody centres throughout the country; and promote public awareness on the currency handling and security features;
- (b) Banking Services: The Bank promptly facilitate payments, settlements and clearing of payment instruments for the governments and financial institutions. Further, the Bank provides safe deposit custody for the governments and financial institutions;
- (c) Price Stability: The Bank formulates and executes monetary policy that leads to stable domestic prices; provide policy advice to the governments; disseminate economic reports; ensure stable exchange rates; and conduct government securities auctions;
- (d) Financial Stability: The Bank promotes the stability of the financial system through effective regulation and supervision of banking system; provide safe and efficient payment systems; and promote public access to the financial services;
- (e) Internal Customer requirements: The Bank attracts and retains high caliber staff with integrity, competency and accountability and provides conducive working environment and career development opportunities to its staff.

10. CASH FLOW PROJECTION

Due to the nature of the Banks operations most of the cash projections indicate that future cash flows will mostly be generated from operating, investing and financing activities and that the Bank will continue to be a going concern within the foreseeable future.

11. MANAGEMENT

Section 13(1) of the Bank of Tanzania Act, 2006 vests the management of the Bank and the direction of its business and affairs to the Governor. The Governor is required to discharge such functions and direction, in conformity with the policies and other decisions made by the Board.

The law further provides that the Governor to be assisted by three Deputy Governors. The Deputy Governors head various functions under them which involve thirteen directorates, five independent departments, five branches and the Bank's Training Institute.

12. FUTURE DEVELOPMENT PLANS

To ensure integrity and stability of the financial system, the Bank puts emphasis on ensuring that the financial sector remains on a sound footing to serve the broader needs of the Tanzania economy. Accordingly, special focus will be placed on surveillance of both macro-conditions and the financial system and putting in place elaborate crisis management and resolution framework.

On strengthening corporate governance, the Bank will continue to improve its planning approach and execution through full implementation of the Balanced Score Card (BSC) methodology. Specifically, the Bank will take deliberate measures to create broad awareness and capacity building among staff to implement the plan. In addition, the Bank will focus on enhancing application of modern technologies; improve its work processes and compliance with laws and regulation in order to improve operational efficiency in all its undertakings.

Further, the Bank will focus on service excellence in attending both internal and external stakeholders.

Like any other central bank, the Bank is dedicated to continue advising the governments on economic policy related matters and serving the general public as our ultimate customers.

In addition, the Bank plans to:

- Continue implementing Medium Term Expenditure Framework (MTEF) as a multi-year budgeting instrument;
- Continue implementing Balanced Score Card (BSC) methodology as an instrument for performance measurement;
- Continue with the construction of Mtwara branch and staff residential premises at Dodoma and Mtwara branches;
- Construct and relocate Mwanza branch office;
- Refurbish and modify 2 Mirambo Middle Building;
- Modernise security monitoring systems at Head Office and branches;
- Acquire new software and continue improving business processes through automation;
- Implement MEMO automation as part of business process improvement;
- Acquire and continue maintaining its other existing assets;

13. RESULTS AND DIVIDENDS

During the year, the Bank operations registered a profit for the year of TZS 567,204.7 million (2014: TZS 196,095.0 million). Out of that amount, TZS 358,240.9 million relates to unrealized foreign exchange revaluation gains (2014: TZS 37,221.2 million). The Banks accounting policy requires transfer of unrealized foreign exchange revaluation gain or loss and unrealized gain or loss on financial assets measured at FVTPL to the Equalisation reserve and Securities revaluation reserve respectively. As a result in 2014/15, the Bank recorded distributable profit amounting to TZS 252,817.5 million (2014: TZS 157,621.8 million). Out of this amount, the Bank dividend amounting to TZS 130,000.0 million (2014: TZS 72,454.1 million) in compliance with the provisions on allocation of profits as set out by the Bank of Tanzania Act, 2006.

14. FINANCIAL PERFORMANCE FOR THE YEAR

14.1 Financial results

The performance of the Bank is measured on the basis of the achievements in implementing its core functions as detailed in the Bank of Tanzania Act, 2006. The Bank needs to generate adequate resources in order to support its operations and maintain its independence.

In the course of its operations, the Bank made a total comprehensive income of TZS 577,338.4 million (2014: TZS 197,194.2 million). The income was mainly attributed to gains arising from depreciation of TZS against major currencies, increase in interest income and decline in interest expenses.

14.2 Financial position

The financial position of the Bank is as set out in the Statement of Financial Position shown on page 23. During the year, total assets of the Bank increased by TZS 910,933.7 million (2014: TZS 1,226,789.5 million). The major areas of increase include cash and balances with central and other banks and foreign currency marketable securities amounting to TZS 676,446.2 million and TZS 376,553.1 million, respectively.

On the other hand total equity and liabilities increased by the same amount of TZS 910,933.7 (2014: TZS 1,226,789.5 million) to TZS 12,376,718.2 million. Major areas of increase include currency in circulation, deposit by banks and non-banks financial institutions and reserves amounting to TZS 497,557.9 million, TZS 738,439.5 million and TZS 504,884.3 million respectively. The net increase was however reduced mainly by net redemption of BoT liquidity papers TZS 580,117.5 million.

15. RISK MANAGEMENT AND INTERNAL CONTROL

The Board accepts final responsibility for risk management and internal control systems of the Bank. It is the task of management to ensure that adequate internal financial and operational control systems are developed and maintained on an ongoing basis in order to provide reasonable assurance regarding:

- The effectiveness and efficiency of operations;
- The safeguarding of the Bank's assets;
- Compliance with applicable laws and regulations;
- The reliability of accounting records;
- Business sustainability under normal as well as adverse conditions; and
- Responsible behaviors towards all stakeholders.

The efficiency of any internal control system is dependent on the strict observance of prescribed measures. There is always a risk of non-compliance of such measures by staff. Whilst no system, of internal control can provide absolute assurance against misstatement or losses, the Bank's system is designed to provide the Board with reasonable assurance that procedures in place are operating effectively. The Bank ensures that existing and emerging risks are identified and managed within acceptable risk tolerances.

16. KEY RISK AND UNCERTAINITIES

The key risks that may significantly affect the Bank's strategies and development are mainly financial, operational and strategic. Below we provide a description of the operational and strategic risks facing the Bank. The risks related to financial instruments have been disclosed under **Note 45** of the financial statements:

(a) Operational Risk

This is the risk of both financial and non-financial resulting from inadequate human resource and systems, management failures, ineffective internal control processes, non-compliance, inadequate security and adverse legal judgements. The main operational risks of the Bank were:

Human Resource Risk

The particular nature of the activities of the Bank necessitates specialized knowledge in many areas. The Bank ensures that there is an adequate knowledge base for all specialized job requirements by investing significantly in human resource development in terms of capacity building and practical exposure. The Bank also organizes workshops, seminars, conferences and job attachments to its staff to improve its human resource requirements. It also revises its staff retention scheme to compete with the prevailing labour market.

Business Disruption and Security risks

Risks related to failure to execute business processes and events that compromise the assets, operations and objectives of the Bank. The risks might be due to lack of business continuity management, lack of good practices or controls on the Bank's activities.

17. PRINCIPAL RISK AND UNCERTAINITIES (CONTINUED)

(a) Operational Risk (Continued)

Business Disruption and Security risks (Continued)

The Bank addresses these risks inter alia through ensuring existence of Business Continuity Management (BCM) and sound internal control system which includes: operational and procedural manuals, ICT security policies, back up facilities, contingency planning, and independent internal audit function. Managing operational risk in the Bank is an integral part of day to day operations by the management. Management, Internal Audit Function, Audit Committee and the Board, closely monitors this risk.

Legal Risk

Legal risk arises from any uncertainty of enforceability, whether through legal or judicial processes, of the obligations of the Bank's clients and counter parties. The Bank aims at minimizing such uncertainties through continuous consultations with all relevant parties.

In mitigating this type of risk, the Bank ensures that all business agreements are contracted under Standard Industry Contracts, e.g. International Swaps and Derivatives Association (ISDA), International Securities Markets Association (ISMA), etc. Where substantially different contracts and substantive changes to existing contracts are entered into, external lawyers are contracted. The Bank has in place a clear procedure of the delegation of authorities. Also strict code of conduct and ethics is used to minimize chances of causing legal disputes between the Bank and its counterparts.

(b) Strategic Risk

This risk covers analytical and policy risk which is associated with economic and monetary policy formulation; business risk which refers to the probability of loss inherent in the Bank's operations and environment; performance risk which is associated with formulation and execution of business plans and strategies; and external risks which refer to threats from the external environment such as infrastructure disruption, financial crime and computer viruses, political, social and economic changes. Similar to operational risk, strategic risk may result into damage on the Bank's reputation.

The Bank has an obligation to ensure that it performs its functions and maintains its reputation as a Central Bank in line with requirements of the provision of Section 5(1) of the Bank of Tanzania Act, 2006, Public Procurement Act, of 2011 and its related Public Procurement Regulations, 2013.

In view of the above, the Bank's management ensures that it fulfils its fiduciary responsibilities. The Bank adheres to the best practices and applies principle of sound corporate governance. It also ensures that all relevant employees have clear understanding of the appropriate processes in respect of the best practices and principles of good governance.

The Bank therefore, sets out policies and guidelines that govern sound functional operations within the Bank. The performance of these policies and guidelines are periodically reported to different levels of the Bank's management for control and compliance monitoring.

The top management of the Bank has the necessary freedom and discretion to exercise central banking functions. However, this freedom is exercised within the context of good governance and having regard to a proper balance between accountability and the best interests of the Bank and its various stakeholders.

17. PRINCIPAL RISK AND UNCERTAINITIES (CONTINUED)

(b) Strategic Risk (Continued)

The function of the Bank of overseeing and ensuring the integrity of the country's banking system exposes it to severe criticism whenever there is an incident of bank failure or systemic difficulty. The responsibilities of the Bank regarding monetary policy, the National Payment System (NPS) and the issuing of notes and coins also expose the Bank to a significant risk. The Bank adheres to international best practice and, to this end, maintains close liaison with international peers. The Bank strives towards full compliance with the principles for effective banking supervision as well as the core principles for systemically important payment systems. The Board assessed the internal control systems throughout the financial year ended June 2015 and is of the opinion that they met accepted criteria.

18. SOLVENCY

The Board of Directors confirms that International Financial Reporting Standards (IFRS) applicable accounting standards have been followed and that the financial statements have been prepared on a going concern basis. The Board of Directors has reasonable expectation that the Bank of Tanzania has adequate resources to continue carrying out its statutory activities for the foreseeable future.

19. EMPLOYEES WELFARE

19.1 Management and employees relationship

The relationship between the Bank and its employees continued to be good. Employees complaints raised during the year were resolved mainly through the use of consultative meetings/forums involving the management, trade union and employees through workers council. As a result, healthy relationship continued to exist between management and the trade union.

Complaints are resolved through meetings and discussions. Work morale is good and there were no unresolved complaints from employees. The Bank provides a number of facilities aiming at improving the working environment and living standards of its employees. Such facilities include medical services, transport to and from work, house allowance, employee training and development, leave travel assistance, long service awards for employees as stipulated in the Staff Bylaws.

The Bank of Tanzania is an equal opportunity employer with a total of 1,389 staff as at 30 June 2015 (2014: 1,320) out of which 60.0 per cent (2014: 59.2 per cent) were male and 40.0 per cent (2014: 40.8 per cent) were female.

19.2 Training facilities

The Bank has training facilities at the Bank of Tanzania Training Institute in Mwanza region. During the year, the Training Institute conducted 54 (2014: 54) courses for the Bank of Tanzania Staff, Banking Institutions, East Africa Monetary Union (EAMU) and other Stakeholders. The Training Institute prepares annual training programs according to the Bank's Corporate Training Plan that cater for Bank's staff. The Training Institute also design and implement courses for EAMU and Banking institutions addressing gaps identified in the performance of their staff that require training intervention. The training Institute is also bestowed with training of specified courses for Southern African Development Community (SADC).

19. EMPLOYEES WELFARE (CONTINUED)

19.3 Medical Assistance

All members of staff with a maximum number of five beneficiaries for each employee were availed with medical insurance guaranteed by the Bank. During the year ended 30 June 2015, these services were provided by Jubilee Insurance Company consistent with 2014.

19.4 Health and safety

Effective health, safety and risk management is a priority for the Bank. The Bank's safety management system delivers a safe working environment by continuous and effective assessment. Health and safety incidences of the Bank are monitored by the Bank's Medical Committee and Bank's Business Recovery Team (BBRT) respectively.

19.5 Financial assistance to staff

The Bank provides various loans to employees in accordance with the Staff Bylaws and Financial Regulations in force. These include house loans, motor vehicle loans, personal loans and computer loans.

19.6 Persons with disabilities

Applications for employment by disabled persons are always considered, bearing in mind the aptitudes of the applicant concerned.

In the event of members of staff becoming disabled, every effort is made to ensure that their employment with the Bank continues and appropriate training is arranged. It is the policy of the Bank that training, career development and promotion of disabled persons should, as far as possible, be identical to that of other employees.

19.7 Employee's pension plan

The Bank has an arrangement whereby the employer and employees make monthly contributions to pension schemes. Such contributions are mandatory and aggregate to twenty percent of the employee's basic salary. The detail of benefits plan is provided under Summary of Significant Accounting Policies in **Note 3** to the financial statements.

19.8 Voluntary agreement and worker's council

The Bank has executed a voluntary agreement with Tanzania Trade Union of Industrial and Commercial Workers in order to enhance good industrial relation, employee welfare and retain high calibre employees.

20. GENDER PARITY

The Bank is an equal opportunity employer. It gives equal access to employment opportunities and ensures that the best available person is appointed to any given position free from discrimination of any kind and without regard to factors like gender, marital status, tribes, religion and disability which does not impair ability to discharge duties. As at 30 June 2015 and 2014 the Bank had the following distribution of employees by gender.

<u>Gender</u>	2015	%	2014	%
Male	833	60.0	781	59.2
Female	<u>556</u>	40.0	539	40.8
Total	1389	100.0	1320	100.0

21. RELATED PARTY TRANSACTIONS

All related party transactions and balances are disclosed in **Note 52** to these financial statements. The directors' emoluments and key management personnel have been disclosed in **Note 52** to the financial statements.

22. ENVIRONMENTAL CONTROL PROGRAM

The Bank monitors the impact of its operations on the environment, which is mainly through the use of power, water and the generation of waste. The Bank minimizes the impact through better use of its premises and inbuilt facilities to ensure that there is proper waste management.

23. CORPORATE SOCIAL RESPONSIBILITY

The Bank is committed to fulfilling part of its Corporate Social Responsibility (CSR) through supporting national activities and other areas of interest to the Bank in the United Republic of Tanzania. In this endeavour, the Bank has in place Donation Guidelines that assist in the implementation of CSR. During the year, the Bank donated a total of TZS 354.2 million (2014: TZS 432.0 million).

24. CONTRIBUTION AND SUBSCRIPTIONS

The Bank made various subscriptions and contributions to various organisations which included the African Rural and Agricultural Credit Association (AFRACA); African Association of Central Banks (AACB); Macroeconomic and Financial Management Institute (MEFMI); Capital Markets and Securities Authority (CMSA); Deposit Insurance Board (DIB); Financial Institutions Development Project (FIDP II); Tanzania Institute of Bankers (TIB) and Other Professional Associations and Charities. During the year ended 30 June 2015, such contributions and subscriptions amounted to TZS 3,555.4 million (2014: TZS 3,926.7 million).

25. SECRETARY TO THE BANK

The Secretary to the Bank is responsible for advising the Board on legal and corporate governance matters and, in conjunction with the Chairman, for ensuring good information flows between the Board, its Committees and Management. All members of the Board and Management have access to his legal advice and services.

26. COMPLIANCE WITH LAWS AND REGULATIONS

In performing the activities of the Bank, various laws and regulations having the impact on the Banks operations were observed.

27. SERIOUS PREJUDICIAL MATTERS

During the year ended 30 June 2015, there was no serious prejudicial matters to report as required by Tanzania Financial Reporting Standard No. 1 (Directors' Report).

28. STATEMENT OF COMPLIANCE

The Directors' Report has been prepared in full compliance with requirements of the Tanzania Financial Reporting Standards No. 1 (Directors' Report).

29. AUDITORS

The Controller and Auditor-General (CAG) is the statutory auditor for the Bank of Tanzania pursuant to the provisions of Article 143 of the Constitution of the United Republic of Tanzania of 1977 (revised 2005), Sections 30 -33 of the Public Audit Act No. 11 of 2008 and Section 20(6) of the Bank of Tanzania Act, 2006. Deloitte & Touche, Certified Public Accountants were appointed by CAG to audit the Bank's financial statements on his behalf, pursuant to Section 33 of the Public Audit Act, No 11 of 2008.

Approved by the Board of Directors on 17 December 2015, and signed on its behalf by:

REPORT OF THE DIRECTORS (CONTINUED)

STATEMENT OF DIRECTORS' RESPONSIBILITIES

The Directors are responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards issued by the International Accounting Standards Board (IASB) and the requirements of the Bank of Tanzania Act, 2006 and for such internal controls as Directors determine are necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

The Directors accept responsibility for these financial statements, which have been prepared using appropriate accounting policies supported by reasonable and prudent judgments and estimates, in conformity with International Financial Reporting Standards and in the manner required by the Bank of Tanzania Act, 2006. The Directors are of the opinion that financial statements give a true and fair view of the state of the financial affairs of the Bank and its operating results. The Directors further accept responsibility for the maintenance of accounting records which may be relied upon in the preparation of financial statements, as well as adequate systems of internal financial control.

Nothing has come to the attention of the Directors to indicate that the Bank will not remain a going concern for at least the next twelve months from the date of this statement.

Approved by the Board of Directors on 17 December 2015, and signed on its behalf by:

Prof. Benno J. Ndulu

AUDIT REPORT ON THE FINANCIAL STATEMENTS

Board Chairman,
Bank of Tanzania,
P.O. Box 2939,
Dar es Salaam, Tanzania

REF: REPORT OF THE CONTROLLER AND AUDITOR GENERAL ON THE FINANCIAL STATEMENTS OF BANK OF TANZANIA FOR THE YEAR ENDED 30 JUNE 2015

I have audited the accompanying financial statements of the Bank of Tanzania which comprise the Statement of Financial Position as at 30 June 2015, Statement of Profit or Loss and Other Comprehensive Income, Statement of Changes in Equity and Statement of Cash Flows for the year then ended, and a summary of significant accounting policies and other explanatory notes set out from pages 22 to 119 of this report.

Directors' Responsibility for the financial statements

The Board of Directors of the Bank of Tanzania is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards and the requirements of the Bank of Tanzania Act, 2006. This responsibility includes designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error, selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances.

Responsibilities of the Controller and Auditor General

My responsibility as auditor is to express an independent opinion on the financial statements based on the audit. The audit was conducted in accordance with International Standards on Auditing (ISA), International Standards of Supreme Audit Institutions (ISSAIs) and such other audit procedures I considered necessary in the circumstances. These standards require that I comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Bank of Tanzania preparation and fair presentation of the financial Statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank of Tanzania internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

In addition, Sect. 10 (2) of the Public Audit Act (PPA) No. 11 of 2008 requires me to satisfy myself that the accounts have been prepared in accordance with the appropriate accounting standards and that; reasonable precautions have been taken to safeguard the collection of revenue, receipt, custody, disposal, issue and proper use of public property, and that the law, directions and instructions applicable thereto have been duly observed and expenditures of public monies have been properly authorized.

Further, Sect 48(3) of the Public Procurement Act No. 9 of 2011 require me to state in my annual audit report whether or not the auditee has complied with the provisions of the Law and Regulations.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinion.

AUDIT REPORT ON THE FINANCIAL STATEMENTS CONTINUED)

Unqualified Opinion

In my opinion, the financial statements give a true and fair view of the financial position of Bank of Tanzania as at 30 June 2015 and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards and Bank of Tanzania Act, 2006.

Report on Other Legal and Regulatory Requirements

Compliance with Public Procurement Act

In view of my responsibility on the procurement legislation, and taking into consideration the procurement transactions and processes I reviewed as part of this audit, I state that I did not find any material divergences by management from the requirement of Public Procurement Act No. 9 of 2011 and its related Regulations of 2013.

CONTROLLER AND AUDITOR GENERAL

National Audit Office

Dar es Salaam, Tanzania

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2015

1. REPORTING ENTITY

Legal framework

The Bank of Tanzania operates under the Bank of Tanzania Act, 2006, to act as the Central Bank for the United Republic. Its principal place of business is at 2 Mirambo Street, Dar es Salaam, Tanzania and it operates branches in Arusha, Mbeya, Mwanza, Zanzibar and Dodoma. The Bank is an independent institution with its own legal personality and tables its reports to the Minister for Finance.

The Bank's principal responsibilities are to:

- Conduct monetary policy and manage the exchange rate policy of the Tanzania Shillings, taking into account the orderly and balanced economic development of Tanzania;
- regulate and supervise financial institutions carrying on activities in, or from within, Tanzania, including mortgage financing, lease financing, development financing, licensing and revocation of licenses;
- manage, in collaboration with other relevant supervisory and regulatory bodies, the clearing, payment and settlement systems of Tanzania;
- collect, compile, disseminate, on a timely basis, monetary and related financial statistics; and
- hold and manage gold and foreign exchange reserves of Tanzania.

Under Section 17 of the Bank of Tanzania Act, 2006, the authorized capital of the Bank shall be one hundred billion Tanzanian Shillings (TZS 100 billion), provided that it may be increased by such amount as may be determined by the Board, and authorized by the Minister of Finance, by notice published in the Gazette.

The capital of the Bank shall be subscribed and held solely by the Government of the United Republic of Tanzania. Further, the amount paid as capital of the Bank may be increased from time to time by transfer from the General Reserve of such amounts as the Board may, with the approval of the Minister. The paid up capital shall not be reduced.

Section 18(1) of the Bank of Tanzania Act, 2006 provides that, the Bank shall establish and maintain:

- (a) A General Reserve Fund;
- (b) A Foreign Exchange Revaluation Reserve;
- (c) Other appropriate assets revaluation reserves or retained net unrealized gains reserves, set up under a decision of the Board to reflect changes in market values of the Bank's major assets and in accordance with the best international accounting practice; and
- (d) Other special reserves or funds from time to time from appropriation of net profit.

Under Section 18(2) of the Act, the Bank shall transfer to the General Reserve Fund twenty five per cent of the net profits until such time that the total capital of the Bank reach a sum equivalent to at least ten per cent of the total assets of the Bank less its assets in gold and foreign currencies, thereafter the Bank shall transfer not less than ten per cent of its net profits to the General Reserve Fund.

1. REPORTING ENTITY (CONTINUED)

Legal framework (Continued)

In terms of Section 18(3) of the Act, the Board shall determine, whenever the authorized capital, the General Reserve Fund, the Foreign Exchange Revaluation Reserve and other appropriate asset revaluation reserves or retained net unrealized gains reserves set up by the Board are below five per cent of monetary liabilities all profits shall be retained to the General Reserve Fund, the Foreign Exchange Revaluation Reserve and to any other asset revaluation reserve.

Section 18(4) of the Act provides that; unrealized profits or losses from any revaluation of the Bank's net assets or liabilities in gold, foreign exchange, foreign securities or any internationally recognised reserve asset as a result of any change in the par or other value of any currency unit shall be transferred to a special account to be called the Foreign Exchange Revaluation Reserve Account; the same procedure shall be applied to market value movements in relation to the Bank's other major assets when any of the underlying asset is eventually sold, any resultant realized components shall be transferred to the Statement of Profit or Loss and Other Comprehensive Income.

Section 18(5) of the Act, requires both realized and unrealized gains and losses to be included in the profit calculation but only the residual of any net realized profits of the Bank shall be paid, within three months of the close of each financial year, into the Consolidated Fund; subject to the condition that if at the end of any financial year any of the Governments (The Government of the United Republic and the Revolutionary Government of Zanzibar) is indebted to the Bank, the Bank shall first apply the remainder of its net realized profits to the reduction or discharge of the indebtedness and thereafter such amount as relates to the net realized profits of the Bank in the relevant financial year shall be paid out of the Consolidated Fund to the Treasury of the Government of the United Republic of Tanzania and the Revolutionary Government of Zanzibar in accordance with the formula agreed upon by the Governments.

Section 19(1) of the Act, provides that, where the Bank's Statement of Financial Position indicates that the amount of its assets is less than the amount of its liabilities and the statutory fund, the Minister of Finance shall, on behalf of the United Republic, issue to the Bank negotiable interest-bearing securities at market determined interest rates with a fixed maturity date to the amount necessary to restore the Bank's level of paid up capital.

In terms of Section 20(1) of the Act, the financial year of the Bank shall be the period commencing on 1 July of each year and the accounts of the Bank shall be closed on 30th June of each financial year. Furthermore, Section 20(2) of the Act provides that, the Bank's accounting policies, procedures and associated accounting records shall be consistent at all times with the best international accounting standards.

Section 20(6) of the Act, provides the annual external audit of the Bank to be performed by the Controller and Auditor General in accordance with International Accounting and Auditing Standards and in compliance with the Public Finance Act.

Section 23 of the Act provides that the Bank shall only be placed in liquidation or wound up pursuant to the procedure prescribed in an enactment of Parliament but the provisions of the Companies Act and the Companies Decree shall not apply in relation therewith.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

2. ADOPTION OF NEW AND REVISED INTERNATIONAL STANDARDS (IFRS)

(a) The following new and revised IFRSs have been applied in the current year.

Offsetting Financial Assets and Financial Liabilities (Amendments to IAS 32)

The amendments clarify requirements on offsetting, focusing on four main areas: the meaning of 'currently has a legally enforceable right of set-off', the application of simultaneous realization and settlement, the offsetting of collateral amounts and the unit of account for applying the offsetting requirements.

The management has assessed the requirement of this standard on the Bank's financial reporting framework and is of the opinion that has had no impact.

Recoverable Amount Disclosures for Non-Financial Assets (Amendments to IAS 36) The amendments clarify the disclosures required and introduce an explicit requirement to disclose the discount rate used in determining impairment (or reversals) where recoverable amount (based on fair value less costs of disposal) is determined using a present value technique.

The management has assessed the requirement of this standard on the Bank's financial reporting framework and is of the opinion that it has had no impact.

Novation of Derivatives and Continuation of Hedge Accounting (Amendments to IAS 39 The amendments clarify that there is no need to discontinue hedge accounting if a hedging derivative is novated, provided certain criteria are met. In order to apply the amendments and continue hedge accounting, novation to a central counterparty (CCP) must happen as a consequence of laws or regulations or the introduction of laws or regulations.

The management has assessed the requirement of this standard on the Bank's financial reporting framework and is of the opinion that it is not relevant to the Bank for the year under review.

Defined Benefit Plans: Employee Contributions (Amendments to IAS 19) The amendments clarify the requirements that relate to how contributions from employees or third parties that are linked to service should be attributed to periods of service.

The Bank has a contributory defined benefit plan where employees contribute to the fund. Effects of this amendment will be reflected in the accounts in the next actuarial valuation cycle.

IFRIC 21 Levies

Provides guidance on when to recognize a liability for a levy imposed by a government, both for levies that are accounted for in accordance with IAS 37 Provisions, Contingent Liabilities and Contingent Assets and those where the timing and amount of the levy is certain.

The management has assessed the requirement of this standard on the Bank's financial reporting framework and is of the opinion that it has had no impact.

2. ADOPTION OF NEW AND REVISED INTERNATIONAL STANDARDS (IFRS (CONTINUED)

(b) New and revised IFRS in issue but not yet effective for the year ended 30 June 2015.

Effective for annual

New and Amendments to standards:	periods beginning on or after
IFRS 9 Financial Instruments (2014)	1 January 2018
IFRS 15 Revenue from Contracts with Customers	1 January 2018
2015 Amendments to the IFRS for SMEs	1 January 2017
IFRS 14 Regulatory Deferral Accounts	1 January 2016
Disclosure Initiative (Amendments to IAS 1)	1 January 2016
Agriculture: Bearer Plants (Amendments to IAS 16 and IAS 41)	1 January 2016
Clarification of Acceptable Methods of Depreciation and Amortisation (Amendments to IAS 16 and IAS 38)	1 January 2016
Accounting for Acquisitions of Interests in Joint Operations (Amendments to IFRS 11)	1 January 2016
Equity Method in Separate Financial Statements (Amendments to IAS 27)	1 January 2016
Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28)	1 January 2016
Investment Entities: Applying the Consolidation Exception (Amendments to IFRS 10, IFRS 12 and IAS 28)	1 January 2016

(c) Impact of new and amended standards and interpretations on the financial statements for the year ended 30 June 2015 and future annual period.

The amendments are effective for annual periods beginning on or after 1 January 2016, although entities are permitted to apply them earlier. The Bank has not adopted any of the amendments. The Directors will continue to assess the impact that the application of these improvements to IFRSs might be on the Bank's financial statements when adopted.

IFRS 9 Financial Instruments (2014)

IASB issued a finalised version of IFRS 9 which contains accounting requirements for financial instruments, replacing IAS 39. The standard contains requirements in Classification and measurement of financial assets and financial liabilities; Impairment methodology and Hedge accounting. The 2014 version of IFRS 9 introduces an 'expected credit loss' model for the measurement of the impairment of financial assets, thus upon application of the amendment the Bank will recognise credit loss even without an occurrence of a credit event.

In addition, the version introduces a new hedge accounting model that is designed to be more closely aligned with how entities undertake risk management activities when hedging financial and non-financial risk exposures. The amendment will have impact if the Bank opts to apply hedge accounting on its derivatives. Mandatory effective date for the amendments is for the financial periods starting on or after 1 January 2018.

IFRS 15 Revenue from Contracts with Customers

The standard provides a single, principles based five-step model to be applied to all contracts with customers. Upon application, entities will be required to allocate the transaction price to the performance obligations in the contracts and recognise revenue when (or as) the entity satisfies a performance obligation.

2. ADOPTION OF NEW AND REVISED INTERNATIONAL STANDARDS (IFRS) (CONTINUED)

(c) Impact of new and ammended standards and interpretations on the finacnial statements for the year ended 30 June 2015 and future annual period (Continued)

IFRS 15 Revenue from Contracts with Customers (Continued)

Mandatory effective date for the standard is for the financial periods starting on or after 1 January 2018. The management has assessed the requirement of this standard on the Bank's financial reporting framework and is of the opinion that it will have no impact other than introduction of new disclosures.

IFRS 14 Regulatory Deferral Accounts

IFRS 14 permits an entity which is a first-time adopter of International Financial Reporting Standards to continue to account, with some limited changes, for 'regulatory deferral account balances' in accordance with its previous GAAP, both on initial adoption of IFRS and in subsequent financial statements. Effective date for this standard with its amendments is for the financial periods starting on or after 1 January 2016. The management has assessed the requirement of this amendment on the Bank's financial reporting framework and is of the opinion that the amendment will have no impact.

Disclosure Initiative (Amendments to IAS 1)

Amends IAS 1 Presentation of Financial Statements to address perceived impediments to preparers exercising their judgement in presenting their financial reports by making the following changes:

- Clarification that information should not be obscured by aggregating or by providing immaterial information, materiality considerations apply to all parts of the financial statements, and even when a standard requires a specific disclosure, materiality considerations do apply;
- Clarification that the list of line items to be presented in these statements can be disaggregated and aggregated as relevant and additional guidance on subtotals in these statements and clarification that an entity's share of OCI of equity-accounted associates and joint ventures should be presented in aggregate as single line items based on whether or not it will subsequently be reclassified to profit or loss;
- additional examples of possible ways of ordering the notes to clarify that understandability and comparability should be considered when determining the order of the notes and to demonstrate that the notes need not be presented in the order so far listed in paragraph 114 of IAS 1.

Effective date for the amendments is for the financial periods starting on or after 1 January 2016. The management has assessed the requirement of this amendment on the Bank's financial reporting framework and is of the opinion that the presentation of the financial statements is in line with the amendments and there will be no further impact.

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28)

The amendments clarified that a full gain or loss is recognised when a transfer to an associate or a joint venture involves a business; and a partial gain or loss is recognised if the asset transferred does not contain a business. The gain or loss that is not recognised is eliminated against the cost of the investment.

Mandatory effective date for these amendments is for the financial periods starting on or after 1 January 2016 with early application permitted. The management has assessed the requirement of this amendment on the financial reporting framework and is of the opinion that they will have no material impact.

2. ADOPTION OF NEW AND REVISED INTERNATIONAL STANDARDS (IFRS (CONTINUED)

(c) Impact of new and ammended standards and interpretations on the finacnial statements for the year ended 30 June 2015 and future annual period (Continued)

Clarification of Acceptable Methods of Depreciation and Amortisation (Amendments to IAS 16 and IAS 38)

Amends IAS 16 Property, Plant and Equipment and IAS 38 Intangible Assets to:

- Clarify that a depreciation method that is based on revenue that is generated by an activity that includes the use of an asset is not appropriate for property, plant and equipment;
- introduce a rebuttable presumption that an amortisation method that is based on the revenue generated by an activity that includes the use of an intangible asset is inappropriate, which can only be overcome in limited circumstances where the intangible asset is expressed as a measure of revenue, or when it can be demonstrated that revenue and the consumption of the economic benefits of the intangible asset are highly correlated;
- add guidance that expected future reductions in the selling price of an item that was produced
 using an asset could indicate the expectation of technological or commercial obsolescence of
 the asset, which in turn, might reflect a reduction of the future economic benefits embodied in
 the asset.

Effective date for the amendments is for the financial periods starting on or after 1 January 2016. The management has assessed the requirement of this amendment on the Bank's financial reporting framework and is of the opinion that they will have no impact.

(d) New and ammended standards and interpretations that have no impact to the Bank's financial reporting framework for the year ended 30 June 2015 and future annual period

The management has assessed the requirement of these amendments on the Bank's financial reporting framework and is of the opinion that they will have no material impact.

New and Amendments to standards:	Effective for annual periods beginning on or after
2015 Amendments to the IFRS for SMEs	1 January 2017
Agriculture: Bearer Plants (Amendments to IAS 16 and IAS 41)	1 January 2016
Accounting for Acquisitions of Interests in Joint Operations (Amendments to IFRS 11)	1 January 2016
Equity Method in Separate Financial Statements (Amendments to IAS 27)	S 1 January 2016
Investment Entities: Applying the Consolidation Exception (Amendments to IFRS 10, IFRS 12 and IAS 28)	1 January 2016

2. ADOPTION OF NEW AND REVISED INTERNATIONAL STANDARDS (IFRS) (CONTINUED)

(e) Annual improvement cycles

In September 2014 the IASB issued Annual Improvements to IFRSs 2012-2014 Cycle. The amendments are effective for annual periods beginning on or after 1 January 2016, although entities are permitted to apply them earlier:

Annual Improvements 2012-2014 Cycle makes amendments to the following standards:

- IFRS 5 Adds specific guidance in IFRS 5 for cases in which an entity reclassifies an asset from held for sale to held for distribution or vice versa and cases in which held-for-distribution accounting is discontinued;
- IFRS 7 Additional guidance to clarify whether a servicing contract is continuing involvement in a transferred asset, and clarification on offsetting disclosures in condensed interim financial statements;
- IAS 9 Clarify that the high quality corporate bonds used in estimating the discount rate for
 post-employment benefits should be denominated in the same currency as the benefits to be
 paid; and
- IAS 34 Clarify the meaning of 'elsewhere in the interim report' and require a cross-reference.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Presentation of financial statements

The Bank presents its Statement of Financial Position broadly in order of liquidity. An analysis regarding recovery or settlement within 12 months after the statement of financial position date (current) and more than 12 months after the statement of financial position date (non-current) is presented in **Note 45**.

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position only when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liability simultaneously. Income and expense is not offset in the profit or loss unless required or permitted by any accounting standard or interpretation, and as specifically disclosed in the accounting policies of the Bank.

Basis of preparation

The financial statements have been prepared on a historical cost basis except where otherwise stated or as required by International Financial Reporting Standards and Interpretations to those Standards for assets and liabilities to be stated at their fair value as disclosed in the accounting policies hereafter. The financial statements are presented in thousands of Tanzanian Shillings (TZS '000) except where explicitly stated.

Statement of compliance

The financial statements of Bank of Tanzania have been prepared in accordance with International Financial Reporting Standards and Interpretations to those Standards issued by the International Accounting Standard Board (IASB) in so far as they are practically applicable to the Bank and comply with the requirements of the Bank of Tanzania Act, 2006. The Directors Report is presented together with financial statements in compliance with Tanzania Financial Reporting Standards.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Revenue recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Bank and the revenue can be reliably measured. The following specific recognition criteria must be met before revenue is recognized:

Interest income

For all financial instruments measured at amortised cost, interest income is recorded at the effective interest rate, which is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset or financial liability. The calculation takes into account all contractual terms of the financial instrument (for example, prepayment options) and includes any fees or incremental cost that are directly attributable to the instrument and are an integral part of the effective interest rate, but not future credit losses.

The carrying amount of the financial asset or financial liability is adjusted if the Bank revises its estimates of receipts or payments. The adjusted carrying amount is calculated based on the original effective interest rate and the change in carrying amount is recorded as interest income or expense.

Once the recorded value of a financial asset has been reduced due to an impairment loss, interest income continues to be recognised using the original effective interest rate applied to the new carrying amount.

Fees and commission income

Fees and commissions are generally recognised on an accrual basis when the service has been rendered. Loan commitment fees for loans that are likely to be drawn down are deferred (together with related direct cost) and recognised as an adjustment to the effective interest rate on the loan. Commission and fees arising from negotiating or participating in the negotiation of a transaction for a third party is recognised on completion of the underlying transaction.

Dividend income

Dividend is recognised when the Bank's right to receive the payment is established.

Other income

Other income is recognised in the period in which it is earned.

Dividend payable

Dividend is recognized as a liability in the period in which it is declared. Proposed dividend is disclosed as a separate component of equity.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Expenses

These are losses and other expenses that arise in the course of Bank's ordinary activities. They include interest and administrative expenses. Generally expenses are recognised in the income statement when decrease in future economic benefits related to decrease in an asset or an increase of a liability has arisen and can be measured reliably.

Interest expenses

Interest expense is the cost of debt that has accrued during a specified accounting period regardless of the time of spending the cash. These include interests on liquidity papers, repurchase agreements and IMF drawings.

Since interest on debt is not paid daily, the Bank passes adjusting entries periodically to recognise interest expense within the accounting period that the expense has been accrued. Interest expenses are recorded using the effective interest rate method.

Administrative expenses

This includes expenses that produce no future economic benefits or when, and to the extent that, future economic benefits do not qualify, or cease to qualify, for recognition in the balance sheet as an asset. Such expenses are recognised immediately in the income statement in the accounting period that the cost has been incurred. These include maintenance, transport and travelling, meetings, conference and seminars, water and electricity, fees, rates and security expenses, telecommunication and postage, board expenses, audit fees, budget and annual accounts preparation, loss on disposal of property and equipment, hospitality, legal and investigation expenses.

In addition, administrative expenses include expenses whose economic benefits are expected to arise over several accounting periods and the association with benefit can only be broadly or indirectly determined. Such expenses are recognised, on the basis of First in First out (FIFO) allocation procedures, in the income statement in the accounting period in which the economic benefits are consumed or have expired. They may include stationery and office supplies.

Other expenses

Other expenses are recognised in the income statement when decrease in future economic benefits related to decrease in an asset or an increase of a liability has arisen and can be measured reliably.

Employees' benefits including post-employment benefits

Short-term employment benefits such as salaries, social security contributions, and leave fare assistance are recognized in profit or loss when they fall due.

Retirement benefits

The Bank has a statutory obligation to make contributions for retirement benefits to its employees. All eligible employees of the Bank are currently members of the social security schemes operating in Tanzania. The funds where employees are members are National Social Security Fund (NSSF), Parastatal Pension Fund (PPF), Public Service Pensions Fund (PSPF) and Local Authority Provident Fund (LAPF). Under these schemes, the Bank and employee contribute 18 percent and 2 percent respectively of employee's basic salary every month. New employees who are members of other funds are allowed to continue their membership to any statutory pension funds. The Bank contributed a total of TZS 9,547.3 million to the funds during the year ended 30 June 2015 (2014: TZS 8,867.2 million).

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED) Retirement benefits (Continued)

The Bank signed a Voluntary Agreement (VA) with the Tanzania Union of Industrial and Commercial Workers (TUICO) which provides for a number of benefits on retirement upon attaining a number of years in service with the Bank as specified in the Bank's Staff Bylaws. The provisions in the VA and Staff Bylaws constitute a defined benefits plan which has been accounted and disclosed in accordance with the requirements of International Accounting Standard 19: Employee Benefits.

This is an unfunded defined benefit plan for qualifying employees. There are two categories of benefits to Bank's staff. The first is payable to staff employed for unspecified period of time and second is to executive management who are under specific contracts. Benefits are paid upon end of contract, retirement, withdrawal or death as specified in the Staff Bylaws.

The total accumulated obligation to the Bank relating to this arrangement is based on assessments made by independent actuaries. The actuarial valuation was carried out as at 30 June 2013 by Alexander Forbes, Financial Services (East Africa), Nairobi - Kenya. The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the Projected Unit Credit Method.

Under IAS 19, measurement of scheme liabilities must be calculated under the projected unit credit method, which requires certain demographic and financial assumptions, including future salary growth. The assumptions used are applied for the purposes of compliance with the IAS 19 only.

Re-measurement comprising of actuarial gains and losses are reflected immediately in the statement of the financial position with a charge or credit recognised in Other Comprehensive income in the period in which they occur. Re-measurement recognised in Other Comprehensive Income is reflected immediately in retained earnings and not reclassified to profit or loss.

Past service cost is recognised in the profit or loss in the period of plan amendment.

Net interest is calculated by applying the discount rate at the beginning of the period to the net defined beginning obligation. In the absence of a deep corporate bond market in Tanzania, the Bank has used the discount rate for Tanzania long term bond yields as published in the Bank Monthly Economic Reviews.

The Bank presents current service cost and net interest cost in personnel expenses. Curtailment gains and losses are accounted for as past service cost.

A liability of the termination benefits is recognised at the earlier of when the Bank can no longer withdraw the offer of termination benefits and when the Bank recognises any related restructuring cost.

Other employee benefits

The Bank provides free medical treatment to staffs and their dependants through medical insurance scheme. Exclusions are met by the Bank as medical expenses. The cost is charged to profit or loss. The estimated monetary liability for employees' earned but not taken leave entitlement at the end of the reporting period is recognized as an accrued expense.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Provisions

Provisions are recognised when the Bank has a present legal or constructive obligation as a result of past events, for which it is probable that an outflow of economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

Where the Bank expects some or all of the provision to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is recognised in profit or loss net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Taxes

No provision for income tax is made in the Financial Statements as Section 10 Second Schedule of the Income Tax Act, 2004 exempts the Bank from taxation imposed by law in respect of income or profits.

Further, according to Section 22(1) and (2) of the Bank of Tanzania Act, 2006, the Bank is exempt from payment of any taxes, levies or duties in respect of its profits, operations, capital, property or documents or any transaction, deed, agreement or promissory note to which it is a party. The Bank is also exempt from payment of stamp duty or other duties in respect of notes and coins issued as currency under the Act.

Effective 1 July 2012, the Bank is required to pay Value Added Tax (VAT) on goods or services provided to the Bank at a rate of 18 percent of 55 percent of the value of goods and service. This excludes goods and services not related to the Bank's primary functions. The Bank is also required to pay import and customs duties in accordance with the provisions of the East African Customs Management Act, 2004.

Foreign currency translation

Functional and presentation currency

Items included in the financial statements of the Bank are measured using the currency of the primary economic environment in which the Bank operates ("the functional currency"). The financial statements are presented in Tanzanian Shillings, which is the Bank's functional and presentation currency and all values are rounded to the nearest thousand (TZS'000) except where otherwise indicated.

Transactions and balances

Foreign currency transactions are translated into Tanzanian Shillings using the exchange rates prevailing at the dates of the transactions.

Foreign exchange gains and losses resulting from the settlement of such transactions during the year and from the translation of monetary assets and liabilities denominated in foreign currencies at year-end are recognized in profit or loss.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Foreign exchange revaluation reserve under the legal framework

The realised foreign exchange gains and losses are separated from the unrealised. The unrealised part is excluded from computation of distributable profits for the year and is carried in foreign currency revaluation reserve until realised in subsequent years thereby becoming part of the distributable profits. These are determined as follows;

- (a) For each major currency USD, GBP, EUR, AUD, CNY and SDR; cash inflows and outflows are determined at yearly intervals.
- (b) Proportions of outflows against the inflows on a First in First out (FIFO) basis are determined for the year and this is assumed to be the proportion of realised gains or losses that have to be separated from the accumulated realized and unrealized amount in the Foreign Currency Revaluation Reserve.
- (c) The realised amounts are computed based on the proportions determined in (b) above.

Property and equipment

Property and equipment are initially recorded at construction, acquisition or purchase cost plus direct attributable cost. Where an item of property and equipment comprises major components having different useful lives, they are accounted for separately. Property that is being constructed or developed for future use to support operation is classified as Work in Progress (WIP) and stated at cost until construction or development is complete and is available for use, at which time it is reclassified as property and equipment in use.

Bank's immovable properties (buildings) are subsequently measured at fair value less accumulated depreciation on buildings and impairment losses recognised after the date of the revaluation. Valuation is performed by external independent valuers to ensure that the fair value of re-valued assets does not differ materially from its carrying amount.

Any revaluation surplus is recorded in other comprehensive income and hence, credited to the Asset Revaluation Reserve in equity, except to the extent that it reverses a revaluation decrease of the same asset previously recognised in the profit or loss, in which case, the increase is recognised in the profit or loss. A revaluation deficit is recognised in the profit or loss, except to the extent that it offsets an existing surplus on the same asset recognised in the asset revaluation reserve.

Revaluation of the Bank's immovable property is conducted after every five years. M/S EMACK Tanzania Ltd, professional and Independent valuers, carried out valuation of the Bank's immovable properties as at 30 June 2011. The valuation of Bank's immovable assets was made on the basis of open market values. However, where market data were not easily available, reliable depreciated replacement cost was adopted. This basis is in line with International Valuation Standards (IV No.1 and 2; 2005 and 2007 as amended in 2008).

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED) Property and equipment (Continued)

Depreciation is charged to profit or loss on a straight-line basis to write off the cost of property and equipment to their residual values over their expected useful lives. These residual values and expected useful lives are re-assessed on an annual basis and adjusted for prospectively, if appropriate. The review of residual values takes into account the amount that the Bank would currently obtain on disposal of the asset after deducting the estimated cost of disposal if the asset were already of the age and condition expected at the end of its useful or economic life (whichever is earlier). Depreciation rates applicable as at 30 June 2015 were as follows:

Asset classification	Annual depreciation rate	Useful life
Office Premises	1.0%	100 voore
		100 years
Staff Club Premises	1.5%	67 years
Residential Premises	1.5%	67 years
Computer Servers	25.0%	4 years
Computer Printers	25.0%	4 years
Personal Computers	25.0%	4 years
Network Equipment Bullion Trucks and Armoured Vehicles	25.0% 10.0%	4 years 10 years
Motor Vehicles	20.0%	5 years
Currency Processing Machines	10.0%	10 years
Machinery and Equipment	20.0%	5 years
Security Monitoring, Fire Detection and Fire Fighting Systems	25.0%	4 years
Office Furniture	20.0%	5 years

No depreciation charge is made to Capital Work-in-Progress. Property and equipment acquired during the year are depreciated from the date when they are available for use and cease to be depreciated at earlier of the date that the asset is classified as held for sale or the date that the assets are derecognised.

Property and equipment are derecognised when no economic benefits are expected from its use or disposal. The disposal methods applied include; sale, donation or scrapping. Gains or losses on disposal of property and equipment are determined by comparing net disposal proceeds if any with the carrying amount and are taken into account in determining operating profit or loss.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Intangible assets

Intangible assets consist of computer application software and computer application licence packages. Intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses.

Intangible assets are amortised over the useful economic life and assessed for impairment at the reporting date to ascertain if there is an indication that the intangible asset may be impaired. Generally, cost associated with developing computer software programmes are recognised as an expense when incurred. Intangible assets acquired are measured on initial recognition at cost. Internally developed intangible assets are not capitalised unless they meet certain criteria. Internally developed software products include direct cost incurred by the Bank and are recognised as intangible assets upon meeting the following criteria:

- It is technically feasible to complete the software product so that it will be available for use;
- Management intends to complete the software product and use it;
- There is ability to use the software product;
- It can be demonstrated how the software product will generate probable future economic benefits;
- Adequate technical, financial and other resources to complete the development and to use the software product are available; and
- The expenditure attributable to the software product during its development can be measured reliably.

The useful lives of intangible assets are assessed to be finite. Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The annual rate of amortisation, which has been consistently applied, is 25 percent. The amortisation period and the amortisation method for an intangible asset are reviewed at the reporting date. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the amortisation period or method, as appropriate, and treated as changes in accounting estimates. The amortisation expense on intangible assets is recognised in profit or loss. Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in profit or loss when the asset is derecognised.

Capital grant

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income over the period necessary to match the grant on a systematic basis to the cost that it is intended to compensate. When the grant relates to an asset, it is recognised as deferred income and released as income in equal instalments over the expected useful life of the related asset.

When the Bank receives non-monetary grants, the asset and the grant are recorded at gross amounts and released to the income statement over the expected useful life and pattern of consumption of the benefit of the underlying asset by equal annual instalments. When loans or similar assistance are provided by governments or related institutions with an interest rate below the current applicable market rate, the effect of this favourable interest is regarded as additional government grants.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Currency printing and minting expenses

Notes printing and coins minting expenses which include ordering, printing, minting, freight, carriage insurance and handling expenses cost are first deferred. Based on the currency issued into circulation, the respective proportional actual cost expenses incurred are released to profit or loss from the deferred currency expenses cost account.

Currency in circulation

Currency in circulation represents Tanzanian currency that has been issued into the Tanzanian economy by the Bank since inception. Currency in circulation is measured at the face value of notes and coins issued. Currency in Circulation is determined by netting off notes and coins issued against the balance held in the Bank of Tanzania vaults.

Impairment of non-financial assets

The Bank assesses at each reporting date whether there is an indication that a non-financial asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Bank makes an estimate of the asset's recoverable amount. The recoverable amount is the higher of an asset's or cash generating unit's fair value less cost to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Impairment losses of continuing operations are recognised in profit or loss in those expense categories consistent with the function of the impaired asset.

An assessment is made at each reporting date as to whether or not there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognised impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. If that is the case the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in profit or loss. After such a reversal the depreciation charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

Operating Lease

The Bank obtained long term leasehold (mainly 99 years) from the Government for the land owned. No significant payments are made in advance to the Government other than Government fees/rates normally paid on lease application and renewal based on Government rates that are published from time to time and which are insignificant and not related to the value of land or period of occupation.

The Bank provides houses to employees on seven-year lease contracts. The contracts are cancellable. They may be terminated by either party without charges or permission of the Bank. The lease is classified as operating lease since comparison of the lease period to the useful life of the leased houses gives the Bank a significant portion of the risks of ownership.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Sale and Repurchase Agreements (REPOs)

Repurchase agreements are contracts under which a party sells securities and simultaneously agrees to purchase the same securities at a specified future date at a fixed price. Resale agreements are contracts under which a party purchases securities and simultaneously agrees to resell the same securities at a future date at a fixed price.

It is the Bank's policy to take possession of securities purchased under resale agreements, which are primarily liquid government securities. The market value of these securities is monitored and, within parameters defined in the agreements, additional collateral is obtained when their fair value declines. The Bank also monitors its exposure with respect to securities sold under repurchase agreements and, in accordance with the terms of the agreements, requests the return of excess securities held by the counter party when fair value increases.

Repurchases and resale agreements are accounted for as collateralised financing transactions and recorded at the amount at which the securities were acquired or sold plus accrued interest.

REPOs continue to be recognised in the Statement of Financial Position and are measured in accordance with policies for financial liabilities.

The difference between sale and repurchase price is treated as interest income or expense and is recognized in profit or loss.

Financial assets measured at fair value through profit or loss

The Bank has designated marketable securities i.e. internally managed foreign securities and Reserve Advisory Management Program (RAMP) at fair value through profit or loss. Changes in fair value of these instruments are recognised through the profit or loss. Details have been provided under Note 20 of the account.

Foreign Exchange Equalization Reserve

The Bank has a policy whereby both net realized and unrealized foreign exchange gains and losses are firstly recognized in profit or loss in accordance with the requirements of IAS 21 (The Effects of Changes in Foreign Exchange Rates). The net realized foreign exchange losses for the year arising from daily revaluation of foreign assets and liabilities are transferred to the Foreign Exchange Equalisation Reserve. Where the balance in the Foreign Exchange Equalization Reserve is insufficient to absorb the net realised loss, the first recourse is the General Reserve. The net unrealised gains or losses are transferred to the Foreign Currency Revaluation Reserve. Effective 30 June 2009 the Board determines the amount from the distributable profit to be transferred to the Foreign Exchange Equalization Reserve.

Reserve for Dividend

This reserve accommodates the amount of proposed dividend to the Governments as at end of the accounting period or declared dividend if the declaration is made after end of the period but before the financial statements are signed. In accordance with Section 18 (5) of the Bank of Tanzania Act, 2006, the remainder of the net profits of the Bank is paid to the Governments as dividend. However, this is subject to the condition that if at the end of any financial year any of the Governments is indebted to the Bank, the Bank shall first apply the reminder of its net realized profits to the reduction or discharge of the Governments indebtedness.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Financial instruments - initial recognition and subsequent measurement

Date of recognition

Purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the marketplace are recognised on the trade date, that is the date that the Bank commits to purchase or sell the asset.

Initial recognition of financial instruments

All financial instruments are measured initially at their fair value plus, in the case of financial assets and financial liabilities not at fair value through profit or loss, any directly attributable incremental cost of acquisition or issue.

Classification of financial assets

Amortised cost

Debt instruments that meet the following conditions are subsequently measured at amortised cost less impairment loss (except for debt investments that are designated as at fair value through profit or loss on initial recognition).

The asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets measured at fair value through profit or loss (FVTPL)

Assets classified as FVTPL are measured at fair value. Gains and losses that arise as a result of changes in fair value are recognised in profit or loss, gains and losses that arise between the end of the last annual reporting period and the date an instrument is derecognised do not constitute a separate profit or loss on disposal. Such gains and losses will have arisen prior to disposal, while the item is still being measured at FVTPL, and are recognised in profit or loss when they occur. These are foreign currency marketable securities.

Fair Value through Other Comprehensive Income (FVTOCI)

On initial recognition, the Bank made an irrevocable election (on an instrument-by-instrument basis) to designate investments in equity instruments as at FVTOCI. These are equity investment in AFREXIM Bank and Society for Worldwide Interbank Financial Telecommunication (SWIFT).

Effective Interest Rate method

The effective interest rate method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction cost and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition. Income is recognised on an effective interest basis for debt instruments measured subsequently at amortised cost.

Interest income is recognised in profit or loss. This includes Government Securities, Loans and Advances, Escrow and Items in course of settlement.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Financial liabilities

This represents issued financial instruments or their components, which are not held at fair value through profit or loss, financial liabilities that arise when a transfer of financial asset does not qualify for de-recognition or when the continuing involvement approach applies, commitments to provide a loan at below market interest rate and hedged items are classified at amortised cost. The Bank's financial liabilities are measured at amortised cost using the effective interest rate method.

De-recognition of financial assets and financial liabilities

Financial assets

A financial asset (or, where applicable a part of a financial asset or part of a Bank of similar financial assets) is derecognised where:

- the rights to receive cash flows from the asset have expired; or
- the Bank has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a pass-through arrangement; and
- Either
 - (a) the Bank has transferred substantially all the risks and rewards of the asset, or
 - (b) the Bank has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Bank has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Bank's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Bank could be required to repay. Where continuing involvement takes the form of a written and/or purchased option (including a cash-settled option or similar provision) on the transferred asset, the extent of the Bank's continuing involvement is the amount of the transferred asset that the Bank may repurchase, except that in the case of a written put option (including a cash-settled option or similar provision) on an asset measured at fair value, the extent of the Bank's continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price.

Financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de-recognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in profit or loss. These include currency in circulation; deposits from government, banks, financial institutions and other financial institutions; BOT liquidity papers; poverty reduction and growth facility; IMF liabilities; and repurchase agreements.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Offsetting of financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount reported on the statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis only when permitted under IFRS, or for gains and losses arising from a group of similar transactions such as in the Bank's trading activity.

Determination of fair value

The fair value for financial instruments traded in active markets at reporting date is based on their quoted market price or dealer price quotations (bid price for long positions and ask price for short positions), without any deduction for transaction cost.

For all other financial instruments not listed in an active market, the fair value is determined by using appropriate valuation techniques. Valuation techniques include net present value techniques, comparison to similar instruments for which market observable prices exist, options pricing models and other relevant valuation models.

Impairment of financial assets

The Bank assesses at each reporting date whether or not there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated.

Evidence of impairment may include indications that the borrower or a group of borrowers is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganisation and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

Government Securities

The Bank assesses Government Securities investments individually to confirm whether or not there is objective evidence of impairment. If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the assets carrying amount and the present value of estimated future cash flows using the original effective interest rate.

The carrying amount of the asset is reduced and the amount of the loss is recognised in profit or loss. If, in a subsequent year, the amount of the estimated impairment loss decreases because of an event occurring after the impairment was recognised, any amounts formerly charged are credited to the 'Impairment losses on financial investments'.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED) Impairment of financial assets (Continued)

Due from banks and supranational institutions, loans and advances

Amounts due from banks, loans and advances are carried at amortised cost. The Bank first assesses individually whether or not there is objective evidence of impairment that exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If the Bank determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment.

Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognised are not included in a collective assessment of impairment.

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the assets' carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in profit or loss. Interest income continues to be accrued on the reduced carrying amount based on the original effective interest rate of the asset. Loans together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realised or has been transferred to the Bank. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognised, the previously recognised impairment loss is increased or reduced by adjusting the allowance account. If a future write-off is later recovered, the recovery is credited to the 'Impairment of loans and advances'.

The present value of the estimated future cash flows is discounted at the financial asset's original effective interest rate. If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate.

The calculation of the present value of the estimated future cash flows of a collateralised financial asset reflects the cash flows that may result from foreclosure less cost for obtaining and selling the collateral, whether or not foreclosure is probable. For the purpose of a collective evaluation of impairment, financial assets are grouped on the basis of the Bank's internal credit grading system that considers credit risk characteristics such as asset type, industry, geographical location, collateral type, past-due status and other relevant factors.

Future cash flows on a group of financial assets that are collectively evaluated for impairment are estimated on the basis of historical loss experience for assets with credit risk characteristics similar to those in the group. Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect the years on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not exist currently. Estimates of changes in future cash flows reflect, and are directionally consistent with, changes in related observable data from year to year (such as changes in unemployment rates, property prices, commodity prices, payment status, or other factors that are indicative of incurred losses in the Bank and their magnitude). The methodology and assumptions used for estimating future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Other liabilities

Other liabilities are stated at their nominal value/cost, which approximates fair value due to the short term nature of the obligation.

Other assets

Other assets are measured at carrying amounts which approximates their fair value.

Cash and Cash equivalent

Cash and cash equivalent comprise of demand and time deposit with central banks and commercial banks and holding of notes denominated in foreign currency. Cash and cash equivalent is carried at amortised cost in the statement of financial position. Due to their short term nature, the carrying amount approximates the fair value.

Escrow Accounts

These represent funds held by the Bank in foreign exchange, as funds deposited by the United Republic of Tanzania following a memorandum of economic and financial policies arrangement pending agreement with creditors.

The escrow fund is both an asset and a liability in the Bank's books. However, the accounts cannot be netted against each other because they must be visible as both asset and liability according to accounting standards

Periodically the BoT Escrow balance is reviewed to ensure that sufficient funds will be available when payments are due.

Initially these funds are measured at fair value. Subsequently, they are measured at amortised cost. Details of the accounts have been shown under **Note 17** of the accounts.

Derivatives

A derivative is a financial instrument or other contract within the scope of IFRS with all three of the following characteristics:

- Its value changes in response to the change in a specified variable such as interest rate, financial instrument price or foreign exchange rate.
- It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.
- It is settled at future date.

Derivatives are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at their fair value. Fair values are obtained from market observable prices including recent market transactions, or valuation techniques which incorporate market observable input, such as discounted cash-flow models. Generally the best evidence of the fair value of a derivative at initial recognition is the transaction price (ie the fair value of the consideration given or received). All derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative.

The Bank uses derivatives mostly for hedging in risk management and liquidity support in monetary implementation. The Bank does not apply the optional hedge accounting rules of IFRS 9.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

International Monetary Fund (IMF) related balances

Relationship

The Bank is the fiscal and depository agent of United Republic of Tanzania for transactions with the International Monetary Fund (IMF). Financial resources availed to Tanzania by the Fund are channeled through the Bank. Repayment of the IMF loans as well as charges is the responsibility of the Bank.

Currency of Transactions with the IMF

Borrowings from and repayments to the IMF are denominated in Special Drawings Rights (SDRs). The SDR balances in IMF accounts are translated into TZS and any unrealised gains or losses are accounted for in profit and loss account in accordance with IAS 21 – Effects of changes in foreign exchange rates.

Quota in IMF, Interest and Charges

Borrowings from the related Tanzania's quota are non interest bearing with no stated maturity, while borrowings from the General Resources Account of the IMF bears interest at rates set by the IMF on a weekly basis and are repayable according to the repayment schedules of the agreement. The interest rate as at 30 June 2015 was 0.8 percent (2014: 0.8 percent). A total of SDR 198.9 million equivalent to TZS 552,275.0 million (2014: SDR 198.9 million equivalent to TZS 507,635.0 million) is Tanzania's quota in the IMF representing the reserve tranche held with the IMF. On a quarterly basis, the IMF pays remuneration (interest) to those members who have a remunerated reserve tranche position at a 1.9 percent to 2.33 percent annual floating rate.

Participation in the HIPC Initiative

The United Republic of Tanzania enjoys a debt relief program under the Highly Indebted Poor Countries (HIPC) initiative. Accordingly, the IMF administers a donor-contributed Fund in the form of a PRGF-HIPC Trust Umbrella Account for Tanzania. The facility is used to settle part of Tanzania's PRGF Loans as and when they fall due. As at 30 June 2015, the facility had a nil balance.

Inventories

The Bank owns all inventories stated in the statement of financial position. Inventories are valued at the lower of cost and net realizable value. Cost is determined using the weighted average cost method. Net realizable value is the estimated selling price in the ordinary course of business less estimated cost necessary to make the sale. Writing down of values of inventories is made for slow moving and obsolete stocks.

Credit Guarantee Schemes

These are schemes operated in accordance with the rules governing them and administered by the Bank on behalf of the URT Government as stipulated in their respective agency agreements. The primary objective of the schemes is to facilitate access to the credit facilities by guaranteeing loans granted by the participating financial institutions to small and medium enterprises, exporters and development projects.

The rules of the schemes include a requirement for the financial institutions to properly assess the projects' viability, as to adequacy of loan security and approve the loan prior to applying for the guarantee. Because of the nature of the loan transactions, contingent liabilities exist in respect of possible default.

4. SIGNIFICANT ACCOUNTING JUDGEMENT AND ESTIMATES

The preparation of financial statements in conformity with IFRS requires the use of estimates and judgment that affect the reported amounts of assets, liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on the directors' best knowledge of current events and actions, actual results ultimately may differ from those estimates. The estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods. The most significant use of judgement and estimates are as follows:

(a) Going concern

The Bank's management has made an assessment of the Bank's ability to continue as a going concern. The management is satisfied that the Bank has resources to continue in operation for the foreseeable future. Furthermore, the management is not aware of any material uncertainties that may cast significant doubt upon the Bank's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on a going concern basis.

(b) Impairment of assets carried at amortised cost

Impairment losses on items in Cash and balances with central banks, Escrow account, Items in course of settlement, Holdings of Special Drawing Rights (SDR), Quota in International Monetary Fund (IMF) Government securities, Advances to the Government, loans and receivables and other asset

The Bank reviews its financial assets measured at amortised cost at each reporting date to assess whether an impairment loss should be recognized in profit or loss. In particular, judgement by the directors is required in the estimation of the amount and timing of future cash flows when determining the level of impairment loss required. Such estimates are based on the assumptions about a number of factors and actual results may differ, resulting in future changes in the impairment.

The Bank makes judgment as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows in an individual asset in that portfolio. This evidence may include observable data indicating that there has been an adverse change in the payment status of borrowers, or national or local economic conditions that correlate with defaults on assets. Management uses estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when scheduling its future cash flows. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss incurred.

(c) Impairment of marketable securities

Marketable securities are measured at fair value. As a result there is no impairment of marketable securities as all instruments are measured at fair value through profit or losses are not impaired.

4. SIGNIFICANT ACCOUNTING JUDGEMENT AND ESTIMATES (CONTINUED)

(d) Impairment of other financial assets

The Bank adopted an incurred loss approach to impairment. Impairment losses are incurred only if there is objective evidence of impairment as a result of occurrence of one or more past events since initial recognition.

Impairment exists when the carrying amount exceeds its recoverable amount and the asset is written down to the recoverable amount. Future cash flows on a group of financial assets that are collectively evaluated for impairment are estimated on the basis of historical loss experience for assets with characteristics similar to those in the group. Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect the years on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not exist currently.

Estimates of changes in future cash flows reflect, and are directionally consistent with, changes in related observable data from year to year (such as changes in unemployment rates, property prices, commodity prices, payment status, or other factors that are indicative of incurred losses in the Bank and their magnitude). The methodology and assumptions used for estimating future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

(e) Fair value of financial instruments

Where the fair values of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of mathematical models. The input to these models is taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. The judgements include considerations of liquidity and model inputs such as correlation and volatility for longer dated derivatives and discount rates. Details have been provided under **Note 45** to these accounts.

(f) Useful lives of property and equipment

Pursuant to the requirements of IAS 16 (Property, Plant and Equipment) and IAS 8 (Accounting Policies, Changes in Accounting Estimates and Errors) the Bank makes accounting estimation of the useful lives of assets based on the expected pattern of consumption of the future economic benefits and reviews its depreciation rates at each reporting date.

(g) Retirement benefits

Under IAS 19 measurement of scheme liabilities must be calculated under the projected unit credit method, which requires certain demographic, financial and future salary growth assumptions. A degree of judgement is required in establishing market yields, long term expectations, the notional contribution rate and other inputs used in the actuarial valuation. Details have been provided under **Note 48** to these accounts.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

5. INTEREST INCOME

Interest income from foreign operations relates to interest earned from investments in foreign fixed income securities, money market operations and foreign deposits.

Interest on domestic investments relates to interest earned from investments in United Republic of Tanzania government bonds, stocks and discounted treasury bills.

7. FOREIGN EXCHANGE REVALUATION GAINS

During the year, realized and unrealized net foreign exchange revaluation gains amounted to TZS 634,054.5 million (2014: TZS 249,856.9 million). This amount has been included in the statement of profit or loss in determining the Bank's net operating profit for the year in order to comply with the requirements of IAS 21 - Accounting for the Effects of Changes in Foreign Exchange Rates. Out of the total net foreign exchange revaluation gains, an amount of TZS 358,240.9 million (2014: TZS 37,221.2 million) relating to unrealised gain is not available for payment of dividend and according to the Bank of Tanzania Act 2006 has been transfered to the foreign exchange revaluation reserve (refer to **Note 43 (i)**).

Analysis of foreign exchange valuation	30.06.2015 TZS '000	30.06.2014 TZS '000
Net realized foreign exchange revaluation gains during the year	275,813,616	212,635,740

	Bank of Tanzania Escrow	9,607,422	8,033,971

This account was opened under the memorandum of economic and financial policies arrangement of the United Republic of Tanzania Government. Under the arrangement it was agreed to establish an external escrow account into which the URT Government would pay a significant portion of the estimated debt service due to the relevant group of non-Paris creditors. The URT Government deposits the funds into the account pending agreement with creditors. In line with the arrangement, the funds are available to confirmed creditors.

The Government deposited funds into this account once in March 2003 of USD 5.0 million that was equivalent to TZS 5,256.0 million. Some of the funds were utilized to settle due obligations before financial crises. The balance on the account earns interest. As at 30 June 2015, the account had a balance of USD 4.9 million equivalent to TZS 9,607.4 million. (2014: USD 4.9 million equivalent to TZS 8,034.0 million)

Investment in equity are designated at fair value through other comprehensive income (FVTOCI):		
Equity investment in Afreximbank	27,730,437	8,324,558
Equity investment in SWIFT	468,119	443,964
	28,198,556	8,768,522

Equity investment in Afreximbank: TZS 27,730.4 million

The African Export-Import Bank (Afreximbank) is a supranational institution, established on 27 October 1993. The Bank holds an investment in the equity of Afreximbank. Afreximbank is a grouping of regional central banks and financial institutions designed to facilitate intra and extra African trade. The Bank's equity interest in Afreximbank is 709 ordinary shares (2014:313) of par value of USD 10,000 each. As at 30 June 2015, the Bank's equity aggregated to USD 2,836,000 representing two fifth of the Bank's paid up shares in Afreximbank (2014: USD 1,252,000). The proportion of the Banks equity interest to the total holding in this bank is 0.7 percent. These shares are measured at fair value through other comprehensive income.

Equity Investment in SWIFT: TZS 468.1 million

Society for Worldwide Interbank Financial Telecommunications (SWIFT) (the "Company") is a company founded in Brussels in 1973 to provide a network that enables financial institutions worldwide to send and receive information related to financial transactions in a secure, standardised and reliable environment.

SWIFT members hold interest in the cooperatives through shares. The Company manages the shares through the reallocation principle defined in its Bylaws and general membership rules.

The number of shares allocated to each member is determined at least after every three years according to the Bylaws of the Company and is proportional to the annual contributions paid for the network based services to the Company. The members have the obligation to give up or take up the resulting change in shares. The Bylaws of the Company state that shares are only reimbursed when a member resigns, or when a member has to give up shares following reallocation. This investment is measured at fair value through other comprehensive income.

During the year, under review the Bank acquired additional 15 shares at a price of EUR 3,430. As at 30 June 2015, the Bank had a total of 62 shares (2014:47 shares).

22. GOVERNMENT SECURITIES

Held to maturity securities:	30.06.2015 TZS '000	30.06.2014 TZS '000
Stocks	51,333,308	51,333,308

	1,524,681,781	1,448,268,603
Accrued interest	33,850,341	32,963,182
	1,558,532,122	1,481,231,785

The Bank holds various government fixed and variable income securities issued by the United Republic of Tanzania Government. Treasury special stocks and bonds are issued at face value, discount or premium. Treasury stocks are issued at a fixed coupon.

Stocks

Advances granted to the Government which were to be repaid at the end of financial year 1994 were converted into five years 25% Special Stock 1993/98 of TZS 42,243.0 million. Thereafter in 1999, the stock plus the earned interest were restructured into two stocks namely 15% Special Treasury Stock 2018/19 with face value of TZS 51,333.3 million.

Treasury Bills

This represents treasury bills discounted by commercial banks to the Bank. The increase is a result of tight monetary policy implemented during the period. As at 30 June 2015, the value of treasury bills discounted was TZS 83,836.4 million (2014:TZS 5,233.2 million).

Special Treasury Bonds

Treasury Special Bonds are long-term coupon instruments issued at fixed and variable coupon for Government financing. These include;

The 10 Year Special Government Bonds 2009/2019 with a face values of TZS 150,000.0 million and TZS 323,000.0 million were issued on 2nd June 2009. The issue was made in accordance with Section 34, 35 and 69 of the Bank of Tanzania Act, 2006. The bonds carry an annual coupon of 8.0 percent payable semi annually. The purpose of the bond was to bridge Government revenue shortfall mainly attributed to the impact of the global financial crisis to the economy.

The 5 year special bond of TZS 155,000.0 million with floating interest rate based on the prevailing average yield to maturity with a cap of 14.92 percent issued by the Government to finance horticultural expansion project in Arusha.

The 5 years Special Government bond 2010/2015 with face value of TZS 1,095.0 million was rolled over from 5 years Government Bond with face value of TZS 36,500.0 million which matured in December 2010 and partially settled. This bond bears floating interest rate based on the prevailing average yield maturity for 5 years with cap of 14.92%. The bond will be reedemed in full on 28 December 2015.

22. GOVERNMENT SECURITIES (CONTINUED)

Special Treasury Bonds (Continued)

The Government issued a 10 year bond of face value 85,188.8 million which was rolled over from Loan Advances Realisation Trust (LART) Bonds on 30 June 2011. It carries 11 per cent interest payable semi-annually on 30 June and 31 December.

On 12 October 2012, the Government issued a 10-Year 2012/2022 Special Bond with a face value TZS 469,484.4 million with interest of 11.44 percent payable semi annually. The bond aimed at redressing the accumulated deficit position of the United Republic of Tanzania Government as at 30 June 2012.

During the year under review partial redemption and maturity of special bonds amounted to TZS 2,190.0 million and TZS 3.5 million respectively. The value of Special Bonds as at 30 June 2015 was TZS 1,183,768.2 million (2014:TZS 1,185,958.2 million).

Treasury EPA Stock

Treasury EPA Stocks represent External Payment Arrears (EPA) that date back to 1980's when the defunct National Bank of Commerce (NBC) had external commercial obligations that were in arrears for lack of foreign exchange. These were later on transferred to the Bank to facilitate their administration and control. According to the arrangement of sharing such obligations, the externalization of EPA obligations is done on the basis of agreed exchange rates. The exchange rate differential between the TZS exchange rate prevailing when the beneficiaries are paid and the rate ruling when the funds were initially deposited to the commercial banks resulted into exchange losses, which are recoverable from the Government. However, as the Government could not in the short term raise the required levels of TZS to compensate the Bank for the losses, the Government had given approval to convert the reported amount of EPA losses into EPA stocks.

The Government effective from 1 August 2008 reissued two EPA Special Stocks namely EPA Special Stock 2002/2052 and EPA Special Stock 2005/2055 with values of TZS 4,352.8 million and TZS 65,646.1 million and replaced them with EPA Special Stock 2008/28 and EPA Special Stock 2008/23 respectively. Their tenures were reviewed from 50 years and 55 years to 10 years and 15 years with annual coupons of 7.5 percent and 8.0 percent payable semi-annually respectively. Furthermore, on 1 August 2008 the Government issued EPA Special Stock with face value of TZS 135,745.1 million to accommodate external payment arrears exchange losses incurred up to 31 December 2007. The stock has a maturity of 20 years with annual coupon of 8.5 percent payable semi annually. As at 30 June 2015, the aggregate position of Special EPA stocks was TZS 205,743.9 million (2014:TZS 205,743.9 million).

23. ADVANCES TO THE GOVERNMENT

30.06.2014	30.06.2015	
TZS '000	TZS '000	
439,600,431	69,953,767	Advances to the Government (URT) - Note 33

As at 30 June 2015, the overall United Republic of Tanzania (URT) Government position ended with a net deficit balance of TZS 69,953.8 million as summarised under **Note 33**. This position was attributable to overdrawn URT Government voted accounts. Advances were made in line with Section 34 of the Bank of Tanzania Act, 2006 and were solely for the purpose of providing temporary financial accommodation to the URT Government. Such advances bear interest at rates equivalent to the weighted average yield of short term maturities as determined by the Bank in accordance with the Bank of Tanzania Act, 2006 and are repayable within one hundred and eighty days. Interest charged on advances amounted to TZS 91,980.3 million (2014: TZS 73,002.7 million).

24. LOANS AND RECEIVABLES (CONTINUED)

The Bank did not pledge any loans and receivables as securities against liabilities in 2015 and 2014.

a) Accounts Receivable: TZS 338,689.6 million

Accounts receivable represent short term claims and which are expected to be recovered within a period not exceeding twelve months and outstanding transactions made on trade date. As at 30 June 2015, the account had a balance of TZS 338,689.6 million (2014: TZS 267,522.2 million). Major components under Accounts Receivable include the following:-

(i) Liquidity Management Cost Receivable: TZS 77,529.2 million.

Included under accounts receivable is TZS 77,529.2 million (2014: TZS 27,364.4 million) relating to 2014/15 URT Government share in respect of liquidity management costs. The URT Government and Bank of Tanzania share of liquidity management cost is based on the formula contained in the Memorandum of Understanding in force.

(ii) Interest Receivable on overdrawn Government accounts: TZS 145,077.2 million.

During the year, the URT Government net position was overdrawn by TZS 69,953.8 million (2014: TZS 439,600.4 million). Pursuant to Section 34 of the Bank of Tanzania Act, 2006, an amount of TZS 91,980.3 million (2014: TZS 73,002.7 million) was charged to the Government as interest on overdrawn position. Accordingly, interest aggregating to TZS 145,077.2 million is outstanding as at 30 June 2015 (2014: TZS 53,430.5 million).

(iii) Standby credit facility: (TZS 44,169.5 million).

The commercial banks have access to the stand by credit facility with a maturity of one day order to settle their obligations in their clearing balances to avoid systematic risk when their balances are not sufficient but expect maturity of various instruments. Such facility is available at market rate prevailing on that particular date. At 30 June 2015, such facility had an outstanding balance of TZS 44,169.5 million (2014: TZS 101,017.0 million).

b) Staff Loans and Advances: TZS 51,257.9 million.

Employees of the Bank are entitled to loans and advances as approved in accordance with the Bank's Staff Bylaws and Financial Regulations in force. Staff loans are granted to employees to assist them in acquisition of residential houses, motor vehicles, computers and furniture. Staff advances are financial accommodation granted to employees to meet short term financial obligations. The advances/loans are granted at preferential rates of interest determined by the Bank presently at 5 percent fixed over the period of the loan. These loans and advances are recovered from the employees' salaries on a monthly basis. The facilities are secured against the borrowers' employment and terminal benefits. As at 30 June 2015, the balance of staff loans and advances was TZS 51,257.9 million (2014: TZS 41,375.1 million).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

25. INVENTORIES

	30.06.2015	30.06.2014
The inventory balance consists of the following:	TZS '000	TZS '000
Currency machine spare parts	4,975,213	2,112,133
Building, machinery and maintenance consumables	952,411	760,629
Stationery	549,867	397,295
Drugs and medicines	115,651	112,637
Copier parts and consumables	376,754	307,721
Inventory in Transit	346,393	2,536
Cheque books	703,939	434,119
ICT accessories and consumables	426,402	457,070
	8,446,630	4,584,140

All inventories held by the Bank as at 30 June 2015 were for the internal consumption and not intended for sale.

26. INVESTMENT IN ASSOCIATE COMPANY

In June 2013, the Bank recovered its holdings of 3,000 unquoted ordinary shares of Mwananchi Gold Company Limited each with a par value of USD 40 which were impaired in 2006/07. Holding was equivalent to 35 percent of the total MGC Ltd shares.

Mwananchi Gold Company Limited was a Limited liability locally registered company whose principal activities include to:

- Establish precious metals refinery plant's in Tanzania.
- Buy unrefined and/or refined precious metals.
- Keep in safe custody unrefined and refined precious metals.
- Sell directly as broker of refined metals.

Following unsatisfactory performance by the MGC Limited, the operations ceased in 2007.

Since its cessation efforts to revamp the company failed, the Board of the company agreed in principle, to pursue a scheme of arrangement with a view of bringing the operations of the company to an end in order to minimise further losses. The company has been placed under voluntary liquidation. The Bank realised it's equity and its investment. Currently, the liquidation process is expected to be completed before the end of financial year 2015/16 after addressing remaining issues with relevant authorities.

27. DEFERRED CURRENCY COST

The balance under this account represents deferred notes printing and coins minting expenses relating to costs of printed notes and minting coins that have not yet been released in circulation. During financial year 2014/15, the movement on deferred currency cost balance was as follows:

	30.06.2015 TZS '000	30.06.2014 TZS '000
Balance as at the beginning of the year Add: Cost of currency received during the year	85,302,787 28,161,085	138,446,612 5,731,261
Less: Cost of currency issued in circulation (Note 12)	(76,423,319)	(58,875,086)
Balance as at the end of the year	37,040,553	85,302,787

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

Movement in provision for impairment During the year, there was no additional impairment relating to other assets. The movement of impairment is indicated below:		
Balance at the beginning of the year Write off	-	44,753 (44,753)
Balance as at the end of the year		

(i) Staff Benefits Fund Investment: TZS 80,054.8 million

This represents the investments in treasury bills of TZS 23,855.3 million (2014: TZS 28,324.3 million), bonds TZS 52,343.3 million (2014:TZS 49,281.6 million) and accrued interest made by the Staff Benefits Fund amounting to TZS 3,856.2 million (2014: TZS 3,583.5 million).

(ii) Export Credit Guarantee Investment Account: TZS 76,890.4 million

The balance represent funds invested in Treasury Bills in respect of Export Credit Guarantee Scheme fund. As at 30 June 2015 the account had a balance of TZS 76,890.4 million (2014:TZS 67,481.3 million).

(iii) Prepayment: TZS 40,155.5 million

The balance under prepayment for the year ending 30 June 2015 mainly covers TZS 3,019.5 million paid to De la Reu as advance payment in respect of notes printing, TZS 5,900.0 million paid to National Housing Corporation for construction of Staff Houses at Mtwara Municipality, advance payment paid to CRANE AB in respect of bank notes printing of TZS 8,894.1 million, advance payment paid to Royal mint in respect of currency spare part machines TZS 4,578.7 million and payment made to Ireland Ltd in respect of coins minting TZS 1,835.7 million.

(iv) Reverse repo: TZS 79,500.0 million

The balance represents funds advanced to commercial banks under reverse REPO contracts. Under the agreements commercial banks sell securities to the Bank and simultaneously agree to purchase the same securities at a specified future date at a fixed price. The difference between sale and repurchase price is treated as interest income and is recognized in profit or loss. As at 30 Jun 2015 the balance of reverse REPO contracts was TZS 79,500 million (2014: Nil).

Defined Benefit Reserves	7,562,690	7,562,690
	1,678,048,523	1,173,164,202

(a) General Reserve

In accordance with Section 18(1) of the Bank of Tanzania Act, 2006, the Bank is required to maintain a General Reserve Fund. The amount maintained in this account relates to annual appropriation of distributable profits determined by virtue of Section 18(2) of the aforesaid Act. The Act requires the Bank to transfer to the General Reserve Fund twenty five percent of the net profits until such time that the total capital of the Bank reach a sum equivalent to at least ten per centum of the total assets of the Bank less its assets in gold and foreign currencies. Thereafter, the Bank is required to transfer not less than ten percent of profits to the General Reserve Fund. As at 30 June 2015 the reserve had a balance of TZS 298,329.0 million (2014: TZS 273,047.3 million).

(b) Capital Reserve

The Capital Reserve was established on 30 June 2002. On an annual basis the amount spent to finance capital projects from the Reserve for Projects account is transferred to this reserve. The reserve is permanent in nature and can only be available for enhancement of share capital when need arises. As at 30 June 2015, the reserve had the same balance as it was on 30 June 2014 of TZS 99,262.9 million.

(c) Equalisation Reserve

The reserve was established on 30 June 2006 as foreign exchange equalisation reserve and amended on 30 June 2015 to include cushion for future losses on fair value movements on securities. The reserve acts as a cushion against any significant future losses, which may arise from significant appreciation of Tanzanian Shilling compared to other international currencies, and unfavourable movement in market prices of financial instruments measured at fair value.

The justification for the establishment of the aforesaid reserve as part of the equity of the Bank centres on the requirement of the Bank, among other business entities requiring management to ensure preservation of capital, in terms of mitigating risks that can cause capital impairment or impairment of the entity's assets. As at 30 June 2015, the total amount standing at the credit of the Equalization Reserve amounted to TZS 395,107.8 million (2014: TZS 340,571.6 million).

43. RESERVES (CONTINUED)

(d) Reserve for Projects

This reserve was established by a resolution of the Bank's Board of Directors on 30 June 1992. The purpose of the reserve is to provide funds for financing major capital projects of the Bank. On an annual basis, the Board determines the amount to be appropriated from the distributable profit to the reserve. As at 30 June 2015, the reserve had a balance of TZS 180,000.0 million (2014: TZS 150,000.0 million).

(e) Staff Housing Fund

The Staff Housing Fund was established by a resolution of the Board of Directors on 30 June 1990. The purpose of this fund is to finance housing loans to Bank's employees. On an annual basis, the Board appropriates five percent of the distributable profit to the fund. As at 30 June 2015, the fund had a balance of TZS 58,741.6 million (2014: TZS 44,425.1 million) that include interest on fund's investments.

(f) Assets Revaluation Reserve

The Bank maintains Assets Revaluation Reserve to account for revaluation surpluses or deficits. To ensure compliance with requirement of International Accounting Standard (IAS 16), Property, Plant and Equipment if an asset-carrying amount increases as a result of revaluation, the increase is credited directly to other comprehensive income. However, this amount is not available for distribution. Accordingly, it is retained in the asset revaluation reserve. If an asset's carrying amount decreases on account of revaluation, the decrease is recognized in profit or loss to the extent that it exceeds credit balance existing in the asset revaluation reserve in respect of that asset. As at 30 June 2015, the reserve had a balance of TZS 119,776.2 million (2014: TZS 119,776.2 million).

(g) Financial Sector Development Fund.

This is a Fund established by the Board on 30 June 2015 pursuant to Section 18(1)(d) of the Bank of Tanzania Act, 2006 to foster execution of the Bank's mandate on financial sector development. The fund complements donor funds directed towards financial sector reforms. The Board has determined the appropriation of TZS 30,000.0 million from net surplus for the period ended 30 June 2015.

(h) Securities Revaluation Reserve

The Bank maintains Securities Revaluation Reserve to account for unrealised gains and losses arising from changes in fair value of financial instruments measured at fair value. As at 30 June 2015 the reserve had a balance of TZS 1,027.5 million (2014: TZS 28,843.2 million).

(i) Foreign Exchange Revaluation Reserve

In accordance with Section 18(4) of the Bank of Tanzania Act, 2006, unrealized gains or losses on foreign exchange are transferred to this reserve account. In accounting for unrealised gains or losses the Bank complies with the requirements of both IFRS and the Bank of Tanzania Act (2006). Pursuant to the requirements of the International Accounting Standard (IAS – 21) the Effects of Changes in Foreign Exchange Rates, all realized and unrealized foreign exchange valuations should be taken to the profit or loss.

43. RESERVES (CONTINUED)

(i) Foreign Currency Revaluation Reserve (Continued)

Both realized and unrealized gains and losses are therefore taken to profit or loss for purposes of computation of profit or loss for the year. Until such gains or losses are realized, they are not available for distribution; in the interim, the unrealized amounts are reflected in the Foreign Currency Revaluation Reserve. The separation of realized from unrealized exchange gains and losses is done by use of an "inventory accounting for foreign exchange net assets and liabilities". During the year the Bank operations generated foreign exchange revaluation gains of TZS 634,054.5 million (2014: TZS 249,643.1 million). Net unrealised gains amounted to TZS 358,240.9 million (2014: TZS 37,221.2 million) and have been transferred to foreign currency revaluation reserve. The balance of TZS 275,813.6 million (2014: TZS 275,813.6 million)related to realised gains forms part of the distributable profit for the year ending 30 June 2015. As at 30 June 2015 the reserve had a balance of TZS 358,240.9 million (2014: TZS 37,221.2 million)

(j) Reserve for Dividend

This reserve accommodates the amount declared as dividend payable to the Governments after end of the accounting period. As at 30 June 2015, the reserve had a balance of TZS 130,000.0 million (2014: TZS 72,454.1 million).

(k) Defined Benefit Reserve

This reserve was established in June 2013 in order to accommodate re-measurements arising from change in actuarial assumptions to ensure compliance with International Accounting standard (IAS 19 as revised in 2011)- Employee Benefits. As at 30 June 2015 the reserve had a balance of TZS 7,562.7 million (2014: TZS 7,562.7 million).

45. RISK MANAGEMENT

45.1 Introduction

The Bank is exposed to most of financial risks (market, credit and liquidity) while fulfilling its legal obligations, such as implementing monetary and exchange rate policies, managing foreign exchange reserves and rendering banking services to the banking sector and the Government of the United Republic of Tanzania.

Bank's activities necessitate the use of financial instruments which include both assets and liabilities. The instruments related to assets comprise of; foreign exchange deposits, foreign currency marketable securities, holding of special drawing rights (SDR), equity investments and Government securities. The Bank holds foreign exchange reserves for the purposes of servicing foreign debts and other Government obligations as a fiscal agent of the Government of the United Republic of Tanzania and for servicing its own foreign exchange obligations. The Bank also holds foreign exchange reserves for implementation of monetary and exchange rate policies and providing confidence to the financial markets. In view of the Bank's priorities of safety, liquidity and return, as stipulated by the Bank of Tanzania Act, 2006, the Bank with a prudent approach, subjects its foreign exchange reserves to investments in international markets.

The liabilities instruments include; currency in circulation, bank deposits from financial institutions and the Governments and IMF related liabilities. It also accepts or places short-term funds/securities through open market operations in order to achieve the reserve target and influence the short-term interest rates; the primary tool of monetary policy to establish price stability.

The financial risk management focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the Bank.

The Bank's risks are measured to reflect both the expected loss likely to arise in normal circumstances and unexpected losses, which are an estimate of the ultimate actual loss based on quantitative factors. The quantitative factors use models which make use of probabilities derived from historical experience, adjusted to reflect the economic environment. The Bank also runs worst-case scenarios that would arise in the event that extreme events which are unlikely to occur do, in fact, occur.

The financial risk is analysed and reported on timely basis. This information is presented to the investment management committee, management risk committee, management and finance and investment committee of the Board. As part of its financial risk management, the Bank uses various limits specified in the policies and guidelines to manage exposures to various risks.

45.2 Risk management structure

Risk management is integral to all aspects of the Bank's activities and is generally the responsibility of all employees. Heads of business units have a particular responsibility to evaluate their risk environment, to put in place appropriate controls and monitor the effectiveness of these controls. The Bank identifies, assesses and manages risk at both Corporate ('top-down') and business ('bottom-up') level. Controls put in place to manage the Bank's risk environment are carefully assessed to ensure they are well developed and implemented effectively. The role of each stakeholder is summarised below:-

45. RISK MANAGEMENT (CONTINUED)

45.2 Risk management structure (Continued)

(a) Board of Directors

The Board of Directors is responsible for:

- Overall oversight authority of corporate risk management in the Bank.
- Approving the Corporate Risk Management framework, policy, guide, benchmarks, tolerance limits, risk appetite and key risk indicators.
- Providing sufficient resources to support risk management function.

(b) Finance and Investment Committee of the Board

The Finance and Investment Committee of the Board is responsible for::

- Review and recommend approval of the Corporate Risk Profile, associated mitigation strategies and other reports on Risk Management.
- Assist the Board in reviewing implementation reports of risk management initiatives in the Bank.
- Advise the Board on all Risk Management undertakings in the Bank.
- · Give directives to Management on issues related to Risk management.

(c) Management

The Management is responsible for::

- Establishing, implement and maintain risk management system in accordance with the Corporate Risk Management and Investment Management Policies
- Formulate the Framework, Policy and recommend the risk limits and tolerance.
- Report to the Finance and Investment Committee of the Board on implementation process of the Policy.

(d) Management risk committee (MRC)

It is responsible for:

- · Guiding Management on issues related to risk management.
- Recommending approval of corporate risk profile to the Management.
- Reviewing risk mitigation plans and recommend for approval to Management Reviewing and
- · Recommending periodical risk management reports to Management.

(e) Risk Management Function

Risk Management function is responsible for:

- Coordinating the implementation of CRM Policy and related framework.
- Facilitating and coordinating periodic assessment of risks programmes.
- · Maintaining corporate risk register and Coordinating corporate risk profile reviews
- · Promoting risk management culture to employees.
- Providing Management with risk related reports.
- Maintaining incident register and disseminate information to relevant risk owners.
- · Communicating changes to all stakeholders
- · Administering and Custodian of the policy;
- Consolidating proposals of benchmarks, risk appetite, tolerance limits, and submit to MRC for review and subsequently to the Board for approval.

45. RISK MANAGEMENT (CONTINUED)

45.2 Risk management structure (Continued)

(f) Internal audit function

The Internal Audit function is responsible for providing an independent evaluation of risk management; implementation and reviewing corporate risk profile.

45.3 Financial risks

(a) Credit risk

In its financial operations, the Bank is exposed to credit risk, defined as the probability of a complete or partial failure of a counterpart to fulfil its obligations arising from a financial transaction. Credit risk basically originates from the open market operations carried out in order to provide short term liquidity to banks within the framework of monetary policy implementation and from the investments made during foreign exchange reserve management.

Although the credit risk faced during the implementation of monetary policy is an inevitable risk, such risks are managed by securing the entire transaction amount, also including a certain margin by assets that have high credit quality and are tradable in the secondary markets.

The management of the credit risk that the Bank is exposed to in the foreign exchange reserve management is based on the principal of minimizing default probabilities of the counter parties and the financial loss in case of default. The Bank confines its investment to leading international financial institutions and debtors that meet the minimum rating criteria specified in the Investment Policy based on credit ratings given by the International Credit Rating Agencies. The specified minimum rating criteria depends on whether the investment is short or long term in nature.

Accordingly, for short term investments, the Bank takes on exposure to issuers/issues having at least F2, A-2 and P-2 according to Fitch, Standard and Poor's (S&P) and Moody's with a maturity up to one year. The Bank can also invest in securities issued or directly guaranteed by foreign governments and Supranational which have a long-term rating of at least 'A' according to the above stated credit rating agencies. The average maturity of the long term investments is guided by the Investment Guidelines which is reviewed and approved by the Investment Committee once a year. By settling this overall credit risk limit within the scope of Investment Guidelines, the Bank aims to prevent credit risk from exceeding its risk tolerance.

The institutions eligible for transactions are chosen among those institutions meeting the minimum credit rating limitation set in the guidelines. In all transactions executed with these institutions, credit risk exposure amounts that are calculated on the basis of transactions type are immediately reflected on their limits, and the use of these limits are regularly monitored and reported.

Overall, the credit risk assumed during reserve management operations remain at quite low levels as a great portion of reserves are invested in assets issued or directly guaranteed by the respective governments as well as by supranational institutions such as the World Bank, the European Investment Bank and Bank for International Settlements.

Total assets of the Bank exposed to credit risk as of 30 June 2015 and 30 June 2014 are presented in the table below according to the classification of assets (classification according to external credit rating is done based on credit ratings published by Standard and Poor's).

The Bank does not hold collateral for financial liabilities pledged as security.

Note 24.

45. RISK MANAGEMENT (CONTINUED)

45.3 Financial risks (Continued)

(b) Credit quality per class of financial assets (Continued)

Individually assessed allowances:

The Bank determines the allowances appropriate for each individually significant loan or advance on an individual basis. Items considered when determining allowance amounts include the sustainability of the counterparty's business plan, its ability to improve performance once a financial difficult has arisen, projected receipts and the expected pay-out should bankruptcy ensure, the availability of other financial support, the realisable value of collateral and timing of the expected cash flows. Impairment allowances are evaluated at each reporting date, unless unforeseen circumstances require more careful attention.

	30.06.2015 Gross Maximum Exposure TZS '000	30.06.2014 Gross Maximum Exposure TZS '000
Cash and cash equivalents	2,626,532,630	1,950,086,406

The Bank's maximum exposure to credit risk for each class of recognised financial assets, other than derivatives, is the carrying amount of those assets as indicated in the balance sheet. The maximum exposure to credit risk for derivatives at the reporting date is detailed below. Unlike futures, swaps will be settled on gross terms but recorded on net basis. The net value of derivatives are as follows

	Asset
	TZS '000
2015	
Futures	441,975
Swaps	199,637
2014	
Futures	293,984

45. RISK MANAGEMENT (CONTINUED)

45.3 Financial risks (Continued)

(c) Liqudity risk

This arises from inability of the Bank to meet its own foreign exchange and government obligations without incurring huge price concession.

Due to its nature of business (externalization of the government obligations), a huge amount of expected foreign cash flows is not reflected in the Statement of Financial Position. As a result, assets-liabilities management may not be effective. Thus to manage this risk, the Bank divides its foreign exchange reserves into Liquidity, Investment and Stable tranches. The liquidity tranche is intended to meet both anticipated and unanticipated monthly cash outflows requirements thus matching both on and off Statement of Financial Position foreign assets and liabilities. The tranche is monitored on a daily basis. It is comprised of highly liquid short term financial instruments.

The table below analyses the assets and liabilities of the Bank into relevant maturity based on the remaining period at Statement of Financial Position date to contractual maturity date.

45. RISK MANAGEMENT (CONTINUED)

45.3 Financial risks (Continued)

(d) Interest risk

The interest rate risk is the exposure to possible adverse movements in interest rates. The parallel changes in the level of interest rates account for about 90 percent of the total interest rate risk. The remainder resulted from the changes in the shape which is steepening or flattening and curvature of the interest rate curves. The interest rate risk is managed through duration targeting. Duration measures sensitivity of a portfolio value to movements in market yields.

The policy target duration is 2.22 years with deviation allowance of \pm 0.25 years. As of 30 June 2015 portfolio duration stood at 2.22 years while that of 30 June 2014 was 2.2 years.

The Bank uses both price value of one basis point (PVO1) and Value at Risk (VaR) measures to assess and monitor interest rate risk. The PVO1 measures approximate change in value of the portfolio for a one basis point (0.01 percent) change in yield. The use of PVO1 has limitations. Firstly, it is a good measure when the term structure is flat. Secondly, it assumes the movements in yield are parallel across maturity spectrum. Thus the Bank compliments it with VaR.

VaR is a probability-based measure of risk, which provides an estimate of the potential loss in value of the Bank's positions due to adverse interest rate movements over a defined time horizon with a specified confidence level. For the VaR numbers reported below, a one month time horizon and a 95 percent confidence level were used. This means that there is a 5 percent chance that the monthly income would fall below the expected monthly income by an amount at least as large as reported VaR. Historical data were used to estimate the reported VaR numbers. To better reflect current asset volatilities, the Bank weighted historical data to give greater importance to more recent observations. Because of such reliance on historical data, VaR is most effective in estimating risk exposures in markets in which there are no sudden fundamental changes in market conditions.

The table below shows various risk measured parameters.

45.3 Financial risks (Continued)

(d) Interest risk (Continued)

Although VaR is an important tool for measuring market risk, the assumptions on which the model is based do give rise to some limitations, including the following:

- A 95 percent confidence level does not reflect losses that may occur beyond this level. Even within the model used there is a 1 percent probability that losses could exceed the VaR.
- A one month holding period assumes that it is possible to hedge or dispose of positions within that period. This may not be realistic in a situation where there is severe market illiquidity.
- VaR data is calculated on an end-of-day basis and does not reflect exposures that may arise on positions during the day.
- The model uses historical data from 1 July 2012 to 30 June 2015 as a basis for determining the
 possible ranges of outcomes and may not always cover all possible scenarios, especially those
 of an exceptional nature.

The Bank back tests its VaR by comparing actual profit or loss to the VaR estimation. The results of the back-testing process are one of the methods by which the Bank monitors the ongoing suitability of its VaR model.

The Bank also undertakes stress tests on positions on its statement of financial position. The results of the stress testing complement the VaR measure in informing management about financial risk on the statement of financial position.

The Bank invests in some securities, which trade on spread to the foreign government treasuries. To assess the relative risk of spread products, the Bank measures Credit Risk of one basis point (CR01). The CR01 measures changes in the value of spread product for a one basis point widening of spread. A spread is a difference in yield to maturity between government and spread securities of the same characteristics.

The table next page indicates the spread risks for comparative period in each of the three major currencies.

Cash flow and fair value interest rate risk

Interest sensitivity of assets and liabilities

For accounting purposes, cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates, both in the United Republic of Tanzania and abroad. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. Based on the sensitivity of the ten per cent deviation of the exchange rate against major currencies the impact on the Banks profit and equity was TZS 446,845.5 million. The deviation for 2014 was 4% and the impact in both equity and profit was TZS 11,945.6 million.

(e) Currency risk

The exchange rate risk (or currency risk) refers to the loss of the portfolio value or purchasing power of the portfolio occasioned by adverse foreign exchange rate movements. The Bank foreign reserves portfolio is denominated in a number of currencies whose exchange rates are subject to fluctuation on international foreign exchange market.

The Bank is exposed to this risk in the context of its holding of foreign exchange reserves, intervention in the local inter-bank foreign exchange market (IFEM) and foreign exchange transactions in the international foreign exchange market. Often, currency exposures are not out rightly hedged, but the currency risk is controlled through a target currency composition whose criteria are specified in the Foreign Exchange Reserves Policy and stated in the Investment Guidelines. The currency positions of the Bank as of 30 June 2015 and 2014 which provides the Bank's assets, liabilities and equity at carrying amounts, categorized by currency is summarized below.

45. RISK MANAGEMENT (CONTINUED)

45.4 Non-financial risks

Operational risk

Operational risk is the risk of loss in both financial and non-financial resulting from inadequate systems, management failures, ineffective internal control processes, fraud, theft and human errors.

The Bank addresses this risk inter alia through ensuring existence of Business Continuity Management (BCM) and sound internal control system which includes: operational and procedural manuals, ICT security policies, back up facilities, contingency planning, and independent internal audit function. Managing operational risk in the Bank is an integral part of day-to-day operations by the management. Risk management function, Risk Management Committee, Internal Audit Function, Management, Finance and Investment Committee of the Board and the Board, closely monitor this risk.

The Bank has taken various measures such as segregation of duties, instituting codes of conduct and ethics and setting out benchmark limits. The Bank understands the fact that the lower the human intervention, the lower the operational risk. In view of this fact, the Bank has automated most of its major operations.

Human resource risk

The particular nature of the activities of the Bank necessitates specialized knowledge in many areas. The Bank ensures that there is an adequate knowledge base for all specialized job requirements by investing significantly in human resource development in terms of capacity building and practical exposure. The Bank also organizes workshops, seminars, conferences and job attachments to its staff as an effort to improve its human resource requirements. It also revises its staff retention scheme to compete with the prevailing labour market.

Legal risk

Legal risk arises from any uncertainty of enforceability, whether through legal or judicial processes, of the obligations of the Bank's clients and counter parties. The Bank aims at minimizing such uncertainties through continuous consultations with all relevant parties.

In mitigating this type of the risk, the Bank ensures that all business agreements are contracted under Standard Industry Contracts, e.g. ISDA, ISMA, etc. Where new contracts and substantive changes to existing contracts are entered to, external lawyers are contracted. The Bank has in place procedures for delegation of responsibilities. Also Code of Conduct and Ethics is used to minimize chances of causing legal disputes between the Bank and its counterparts.

Reputational risk

The Bank has an obligation to ensure that it performs its functions and maintains its reputation as a Central Bank in line with requirements of the provision of Section 5(1) of the Bank of Tanzania Act, 2006, Public Procurement Act, 2011 and Public Procurement Regulations, 2013.

In view of the above, the management ensures that to the best of Bank's ability fulfils its fiduciary responsibilities. The Bank adheres to the best practices and applies principle of sound corporate governance. It also ensures that all relevant employees have clear understanding of the appropriate processes in respect of the best practices and principals of good governance.

45. RISK MANAGEMENT (CONTINUED)

45.4 Non-financial risks (Continued)

Reputational risk

The Bank therefore sets out policies and guidelines that govern sound functional operations within the Bank. The performance of these policies and guidelines are periodically reported to different levels of the Bank's management for control and compliance monitoring.

The top management of the Bank has the necessary freedom and discretion to exercise central banking functions. However, this freedom is exercised within the context of fiduciary duties of good governance and by ensuring a proper balance between accountability and the best interests of the Bank and its various stakeholders.

The function of the Bank of overseeing and ensuring the integrity of the country's banking system exposes it to severe criticism whenever there is an incident of bank failure or systemic difficulty. The responsibilities of the Bank regarding monetary policy, the national payment system and the issuing of notes and coins also expose the Bank to significant reputation risk. The Bank adheres to international best practice and, to this end, maintains close liaison with international peers. The Bank strives towards full compliance with the principles for effective banking supervision as well as the core principles for systemically important payment systems.

CLASSIFICATION OF FINANCIAL ASSETS AND LIABILITIES 46.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

Financial assets and financial liabilities are measured on an ongoing basis either at fair value or amortised cost. A summary of significant accounting policies in Note 3 describes how classes of financial instruments are measured and how income and expenses, including fair value

47. DETERMINATIONS OF FAIR VALUE AND FAIR VALUE HIERARCHY

Financial instruments recorded at fair value

Estimated fair value is the amount at which an instrument could be exchanged in a current transaction between willing parties other than enforced or liquidation sale. The following is a description of how fair values are determined for financial instruments that are recorded at fair value using valuation techniques. These incorporate the Bank's estimate of assumptions that a market participant would make when valuing the instruments.

Foreign currency marketable securities

The marketable securities are quoted in actively traded markets which is the best evidence of fair value. The valuation techniques employ only observable market data.

Fair value of derivatives

The Bank values over the counter derivative instruments like swaps using a valuation technique with market-observable inputs. Swap models use present value calculations and include market determined foreign exchange rates. For listed derivatives like futures, the Bank uses prices quoted in the active markets.

Long dated derivative contracts are valued using a valuation technique with significant non-market-observable. These derivatives are valued using models that calculate the present value and incorporate various non-observable assumptions that include market rate volatilities.

Unquoted equities securities.

These Investments are valued using the market approach. The inputs to this methodology are observable inputs based on recent transactions. The data used were from recently published accounts of these entities. These were then corroborated to arrive at the fair values at the reporting date.

Fair value of financial assets and liabilities not carried at fair value

Below are the methodologies and assumptions used to determine fair values for those financial instruments which are not recorded at fair value in the financial statements:

Assets and liabilities for which fair value approximates carrying value

For financial assets and financial liabilities that have a short term maturity (less than three months) it is assumed that the carrying amounts approximate their fair value. This assumption is also applied to cash and cash equivalent, escrow accounts, Items in course of settlements, deposits, repurchase agreements and BoT liquidity papers and other liabilities without a specific maturity.

Government securities

The fair value of Government securities carried at amortised cost is estimated by using the interest rates that discount future cash flows to zero.

47. DETERMINATIONS OF FAIR VALUE AND FAIR VALUE HIERARCHY (CONTINUED)

Fair value of financial assets and liabilities

Financial instruments are grouped into 3 levels based on the degree to which fair value data / input is observable.

- Level 1 fair value measurements: are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities. This level includes listed debt instruments on exchanges for example Foreign Currency Marketable securities.
- Level 2 fair value measurements: are those derived from inputs other than quoted prices that
 are observable for the asset or liability, either directly (i.e. as a price) or indirectly (i.e. derived
 from prices). Input data for this category is sourced mainly from Bloomberg and the Dare salaam
 Securities Exchange.
- Level 3 fair value measurements: are those derived from valuation techniques that include inputs that are not based on observable market data (unobservable inputs).

Fair value hierarchy

The following table analyses within the value hierarchy the Bank are measured at fair value as at:

30.06.2015

Description	Level 1 TZS '000	Level 2 TZS '000	Level 3 TZS '000
Foreign currency marketable securities Equity investments	5,672,736,269 	- 28,189,556_	- -
Total	5,672,736,269	28,189,556	
30.06.2014			
Description	Level 1 TZS '000	Level 2 TZS '000	Level 3 TZS '000
Foreign currency marketable securities Equity investments	5,296,183,128	8,768,522	-
Total	5,296,183,128	8,768,522	

There were no transfers between levels 1, 2 and 3 in the period.

The following table gives information about how the fair value of these financial assets and liabilities are determined following table

If below observable inputs to valuation model were 10 per cent higher or lower while other variables were held constant, carrying amount of TZS 5,672,777.6 million and TZS 28,198.6 million Foreign Currency Marketable Securities and Equity Investments would have been higher or lower by TZS 567,277.8 million and TZS 2,819.9 million respectively. Swap and Futures would change by 20.0 million and 44.2 million respectively.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

47. DETERMINATIONS OF FAIR VALUE AND FAIR VALUE HIERARCHY (CONTINUED)

The following table gives information about how the fair value of these financial assets and liabilities are determined

Fair value at				Valuation	Significant	Relationship of
	2015 TZS '000	2014 TZS '000	Hierarchy	techniques and key	unobservable inputs	unobservable input to fair value
Foreign currency	125 000	125 '000		inputs	inputs	input to fair value

		10,593,155,412		10,593,155,412

48. RETIREMENT BENEFIT PLAN DEFINED BENEFIT PLAN

The Bank maintains funded retirement benefit plan. Under the plan employees are entitled to benefits upon meeting requirements as stipulated in the Bank's Financial Regulations, 2011 and Staff Bylaws, 2011.

The plan typically exposes the Bank to actuarial risks such as: investment risk, interest rate risk, longevity risk and salary risk.

Investment Risk	The present value of the defined benefit obligations is calculated using a discount rate determined by the yield on long term Government bond. The higher the discount rate the higher the defined benefits obligations payable by the Bank.
Interest Rate Risk	A decrease in the long term government bond interest will increase the plan liability.
Longevity Risk	The present value of the defined benefits obligations is calculated by reference to the best estimate of the mortality rate of plan members both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.
Salary Risk	The present value of the defined benefits obligations is calculated by reference to the future salaries of the members. As such an increase/decrease in the salary of the members will increase the plan's liability.

The principle assumptions used for the purposes of the actuarial valuation included disc Discount rate, Expected return on scheme assets, Future salary increase, Mortality rate, Withdrawals, Ill-Health and Compulsory Retirement Age.

Movements in the present value of defined benefit obligation in the current year were as follows;

	30.06.2015	30.06.2014
	TZS '000	TZS '000
One that have fit at the start	04 004 740	00 004 004
Opening benefit obligation	81,631,712	88,934,981
Interest from investments	3,204,253	
Benefits paid	(2,909,640)	(7,303,269)
Closing benefits obligation	81,926,325	81,631,712

48. RETIREMENT BENEFIT PLAN

Sensitivity analysis

The results of the actuarial valuation are more sensitive to changes in the financial assumptions than changes in the demographic assumptions. In preparing the sensitivity analysis of the results to the discount used, we have relied on the duration of the liability. Based on this methodology, the one percent change in the discount rate will result into an increase in the defined benefits obligations to TZS 82,578.3 million (2014: TZS 81,631,7 million).

Since the bulk of benefits payable under the arrangement are salary related, the sensitivity of a liability to a change in the salary escalation assumption is not expected to be materially different. However, the impact of a change in salary escalation is expected to be less than the impact of a change in the discount rate as a portion of the liability. In this case long service awards would not be affected by a change in the salary escalation rate.

Effect on Bank's cash flow

The benefits arrangement is unfunded and the Bank pays benefits from the defined benefit obligation as and when they arise. The timing of the benefit payments from the arrangement will be influenced by the age at which employees leave the Bank.

Duration

Weighted average duration of the liability as at 30 June 2015 is 4.5 years (2014: 4.5 years).

49. CAPITAL

Section 17 of the Bank of Tanzania Act, 2006 states that "the authorized capital of the Bank shall be one hundred billion shillings, provided that it may be increased by such amount as may be determined by the Board, and authorized by the Minister, by Notice published in the Government Gazette."

The capital of the Bank is subscribed and held only by the Government of the United Republic of Tanzania. The equity of the Bank includes share capital and reserves. During the year, movement of equity is as shown below and further details are provided in the statement of changes in *owners'* equity on page 24.

	30.06.2015	30.06.2014
	TZS '000	TZS '000
Capital	100,000,000	100,000,000
Reserves	1,678,048,523	1,173,164,202
Total	1,778,048,523	1,273,164,202

The Bank is not subject to any capital adequacy regulatory requirements concerning the level of capital in relation to assets it holds, although the Bank of Tanzania Act, 2006 sets out how the statutory annual net profit for the year shall be allocated. The principal source of capital increase is through appropriations of annual profits to various reserves.

The Bank is not for profit organization, nor does it seek profit maximization. Instead it seeks to make profit commensurate with normal market returns in areas where it conducts normal commercial operations.

49. CAPITAL (CONTINUED)

Capital is not actively managed and the relative low risk nature of most of the Bank's activities means that it is not capital intensive. Its purpose is to cover unexpected losses. The most significant unexpected losses are likely to rise out of the support operations and the Bank's role as the lender of last resort, or from losses on price movements and changes in exchange rates on the Bank's foreign investments.

50. CONTINGENT LIABILITIES

Contingent liabilities arise in the normal course of the Bank's business activities. In order to meet the financial needs of the government, the Bank enters into various irrevocable commitments and contingent liabilities. Even though these obligations may not be recognised on the statement of financial position, they do contain credit risk and are therefore part of the overall risk of the Bank.

(a) Outstanding legal matters

In the ordinary course of business the Bank is subject to threatened or actual legal proceedings. All such material cases are periodically reassessed to determine the likelihood of the Bank incurring a liability. In those instances where it is concluded that it is more likely that a payment will be made, a provision is established to management's best estimate of the amount required to settle the obligation at the relevant statement of financial position date. In some cases it will not be possible to form a view, either because the facts are unclear or because further time is needed to properly assess the merits of the case and no provisions are held against such cases. However the Bank does not currently expect the final outcome of any such case to have a material adverse effect on its financial position.

Pursuant to the Bank of Tanzania Act, 2006 the Bank of Tanzania is a Banker to the Government of the United Republic of Tanzania. Arising from that responsibility there is a legal dispute relating to a transaction involving the Government of the United Republic of Tanzania and D.P. Valambhia in which the Bank was involved in its capacity as a Banker to the Government of the United Republic of Tanzania. A Garnishee Order was issued by the High Court of Tanzania on 4 June 2001 ordering the Bank of Tanzania to pay a decree holder USD 55,099,117.66 from funds of the Government of the United Republic of Tanzania in the custody of the Bank of Tanzania.

Pursuant to the Order, the Government instituted court proceeding against the decree holder and the Bank on the same matter. The assets/properties of the Bank and the Government under the custody of the Bank are granted immunity against execution and attachment, subject to the provisions of the Act.

The Bank features as 2nd Defendant in the Court proceedings in which the Attorney General is challenging regularity of the Garnishee Order issued by the High Court of Tanzania, immobilizing Government accounts in satisfaction of a decree passed in favour of D.P. Valambhia (1st Defendant). The prayers sought against the Bank are declaratory, and key among them is that the Bank should not, in anyway whatsoever, act on the impugned Garnishee Order.

This matter is awaiting delivery of judgment and there is no financial implication should the Court issue any adverse decision against the Bank.

On the basis of the above facts, it is the opinion of the directors that the assets/properties of the Bank are well safeguarded. Accordingly, there are no other significant legal cases requiring disclosure.

50. CONTINGENT LIABILITIES (CONTINUED)

(b) External payment arrears deposit account

During the 1970s and 1980s there was a serious shortage of foreign currencies in the country, which required the Government to control and prioritise foreign payments (forex). Tanzania importers were required to remit equivalent amount of TZS with the then National Bank of Commerce (NBC) for the required amount of forex and subject to availability of forex and priority, the forex amount would be remitted to the intended overseas suppliers.

However due to the forex shortage not all funds deposited with the then NBC by private and public importers were remitted to the overseas suppliers' accounts.

In 1985, the Government of the United Republic of Tanzania formally assumed the responsibility of handling liabilities arising from External Payment Arrears deposit account (EPA) from the then NBC. The Bank was given the responsibility to manage EPA liabilities on behalf of the Government of the United Republic of Tanzania. As at 30 June 2015 the balance in this liability account has remained at the same level as it was in the previous year of TZS 2,288.4 million since the Bank has suspended all transactions relating to EPA pending reconciliation and resolution of the remaining external payment arrears. In order to undertake reconciliation and resolution of the remaining balance, on 14 April 2009 the Bank engaged a consultant, M/S Lazard Freres's & CIE to assist in the process.

The objectives of the exercise were:

- (i) To ascertain how the remaining debt as at 2004 has been handled.
- (ii) To compile and establish the current stock of the remaining EPA debts.
- (iii) To develop, jointly with the Ministry of Finance and Economic Affairs and Bank of Tanzania, a strategy and action plan to handle the unsettled claims.

The Consultant submitted an inception report in August 2009 which was not accepted by the Bank.

Further, the original contract expired on 14 January 2010 while the consultant was yet to provide the expected contract deliverables. Subsequent follow ups on the matter with the consultant's assignment proved futile. Due to non-responsiveness of the consultant to the Bank's subsequent follow ups, on 25 July 2011, the Bank wrote to the World Bank to seek for their advice on the way forward, which was not provided.

On 25 August 2011, the consultant wrote to the Bank demanding renewal of the expired contract; to include:

- Upward revision of the price of the contract to USD 843,700 from the original amount of USD 663,950;
- Implicitly complaining for not being paid initial fee amounting to USD 175,000 after submitting inception report; and
- Revising some items on the original contract.

Based on the original contract, the consultant would have been paid initial fee after submitting an inception report that is acceptable to the client. However, the earlier submitted report fell short of the required standard and the consultant was notified.

On 14 April 2012, the Bank officially informed the consultant about the expired contract and that the Bank had no intention to renew the same.

50. CONTINGENT LIABILITIES (CONTINUED)

(b) External payment arrears deposit account (Continued)

The consultant was further informed that since the inception report that was submitted in August 2009 was not accepted by the client, there is no any accrued liability to the Bank.

The Bank's further efforts to solicit detailed information from the World Bank on work that was done by M/S Lazard Freres during the Debt Buyback Scheme that ended in year 2004 have proved futile. The efforts were aimed at obtaining information that would have paved way for another consultant to be engaged to perform the assignment. The Bank later sought legal advice on how to bring EPA to a close. On the basis of legal advice that was obtained, and following a Board of Directors Resolution, on 20th November 2012 the Bank officially wrote to the Minister for Finance to transfer operations and management of the External Payment Arrears Account and public debt back to the Ministry of Finance. The transfer was in line with the Bank's program for shedding-off non-core activities

(c) Export credit guarantee scheme (ECGS)

The Bank is an agent of the Government on the operationalization of the Export Credit Guarantee Scheme. The scheme is charged with the responsibility of considering guarantee applications from financial institutions, and on behalf of the Principal, issue guarantees to financial institutions covering short and long term finance to exporters as long as the capital funds in the ECGS accounts are not leveraged more than 1:5. As a result there is a contingent liability under this scheme in respect of guarantees, limited to five times the balance of the Fund in accordance with the agency agreement in force.

As at 30 June 2015, outstanding guarantees aggregated to TZS 439,834.4 million (2014: TZS 444,334.4 million) while the balance of the Fund as at 30 June 2015 was TZS 82,976.4 million (2014: TZS 71,072.1 million). The movement of the Fund during the year is as summarized below:

	30.06.2015	30.06.2014
	TZS '000	TZS '000
Balance of funds		
Capital	26,155,514	24,580,514
Surplus	56,820,903	46,491,581
Total	82,976,417	71,072,095

(d) Small & medium enterprises - credit guarantee schemes

The Bank operates this scheme by issuing guarantees on behalf of the Government to financial institutions covering medium and long-term finance to SMEs on a pilot as long as the capital funds in the CGS-SME accounts are not leveraged more that 1:3. There is a contingent liability under this scheme in respect of guarantees, limited to three times the balance of the Fund in accordance with the Agency agreement in force. As at 30 June 2015, outstanding guarantees had a nil balance (2014: had a nil balance) while the balance of the fund as at 30 June 2015 was TZS 4,549.8 million (2014: TZS 7,594.6 million).

51. OUTSTANDING COMMITMENTS

UNCALLED AND UNPAID CAPITAL TO AFREXIM BANK

The Afrexim bank was established on 27 October 1993. The major function of the bank is to finance and facilitate trade among African countries and between Africa and the rest of the world. The Bank's equity interest in Afreximbank is 616 ordinary shares of par value of USD 10,000 each (2014:313). As at 30 June 2015 the Bank's equity aggregated to USD 2,464,000 representing two fifth of the Bank's shares in Afreximbank (2014: USD 1,252,000). The proportion of the Banks equity interest to the total holding in this bank is 0.7 percent.

As at 30 June 2015, the Bank had a commitment of USD 3.7 million in respect of three instalments of uncalled and unpaid capital attached to its shareholding in the Afrexim bank.

CAPITAL COMMITMENTS

As at 30 June 2015, the Bank's capital commitments in respect of, Property and Equipment, Intangible Assets and major capital projects aggregated to TZS 69,630.0 million (2014: 61,573.8 million). The major capital expenditure commitments item is as reflected herewith below:

	30.06.2015	30.06.2014
Particulars	TZS '000	TZS '000
Office buildings	16,074,459	8,921,800
Residential buildings	2,644,663	10,836,965
Machinery and equipment	10,953,617	11,297,900
Information, communication and technology (ICT)	2,054,393	2,199,629
Motor vehicles	9,518,000	4,634,000
Furniture and fittings	1,654,150	1,076,345
Intangible assets	1,880,930	4,341,987
On-going projects	24,849,774	18,265,200
Total	69,629,986	61,573,826

The above commitments have been included and approved for payment in accordance with the 2014/2015 Approved Budget Estimates.

POST EMPLOYMENT BENEFITS

Effective July 2008, the Bank has a medical insurance arrangement, which covers retired employees and their spouses. At the reporting date the Bank had insurance commitment amounting to TZS 145.7 million (2014: TZS 137.7 million) involving retired staff with their spouses who retired since financial year 2009/10.

52. RELATED PARTY DISCLOSURES

In the course of its operations, the Bank enters into transactions with related parties, which include the Government of the United Republic of Tanzania, the ultimate shareholder of the Bank, the Deposit Insurance Fund and key management personnel. The related party transactions during the year are as follows:

Loans and emoluments to key management personnel

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Bank. The Bank's key management personnel are the Governor, Deputy Governors', Non-Executive Directors and Directors.

The Bank extends loan facilities to the Governor, the Deputy Governors and its members of staff. Loans and advances (Note 24) included advances to employees that as at 30 June 2015 amounted to TZS 51,257.9 million (2014: TZS 41,375.1 million). The advances are granted at preferential rates of interest determined by the Bank presently at 5 percent fixed over the period of the loan. The following is the breakdown of loans and emoluments granted to key management personnel except Non-Executive directors.

		30.06.2015	30.06.2014
		TZS '000	TZS '000
i	Loans to Senior Management		
	(i.e. Governor, Deputy Governors and Directors)		
	At start of the year	178,586	391,486
	Loans granted during the year	1,069,968	495,605
	Loans repaid during the year	(883,032)	(708,505)
	Balance end of the year	365,522	178,586
ii	Emoluments to Senior Management Personnel (Governor, Deputy Governors and Directors)		
	Salaries, allowances and benefits	4,731,075	3,788,442
	Post-employment benefits	1,281,000	1,281,000
	Total	6,012,075	5,069,442

In accordance with Section 15 of the Bank of Tanzania Act, 2006, remuneration of the Governor and Deputy Governors is determined by the President of the United Republic of Tanzania. The Board determines remuneration of directors including Secretary to the Bank. As at 30 June 2015, the number of key management personnel was 29 (2014: 29).

Directors' remunerations

During the year ending 30 June 2015, emoluments paid to the members of the Board amounted to TZS 1,237.7 million (2014: TZS 1,220.3 million). These emoluments include benefits of Non - Executive directors. Non-Executive Directors are not entitled to loans and advances. As of 30 June 2015 and 30 June 2014 there were no related party transactions with Non-Executive Directors of the Board.

52. RELATED PARTY DISCLOSURES (CONTINUED)

Government of the United Republic of Tanzania

Transactions entered into with the Government include:

- (a) No interest and no Bank charges on Government deposits accounts;
- (b) Cost sharing of liquidity management cost arising from issue and redemption of liquidity papers and Repurchase Agreements in accordance with the memorandum of understanding in force.
- (c) Settlement of foreign currency denominated obligations;
- (d) Financial accommodation on temporary short falls in Government revenue;
- (e) Other duties including agency of the Government as provided under the Bank of Tanzania Act, 2006.

As at the close of business on 30 June 2015, the following balances, which are included in the statement of financial position in various categories, were outstanding:

	30.06.2015 TZS '000	30.06.2014 TZS '000
Due from Governments of Tanzania (Note 23 and 33)	69.953,767	439,600,431
IMF funds on-lent to the Government (Note 19)	552,274,969	507,635,007
Deposits - Revolutionary Government of Zanzibar (Note 33)	4,822,379	10,198,233
Investments in Government Securities (Note 22)	1,558,532,122	1,481,231,785
Structured Financing Facility (Note 34)	71,794,026	73,594,055
Export Credit Guarantee Fund (Note 34)	82,976,417	71,072,095
Small and Medium Enterprises Guarantee Fund (Note 34)	12,383,223	10,515,754

The above Schemes are administered by the Bank on behalf of the Government of the United Republic of Tanzania. Funds are deposited with the Bank and no interest is paid on these balances.

The Governments of Republic of Tanzania (URT) and Revolutionary Government of Zanzibar (RGZ) deposits are governments funds held by the Bank as Governments' bank.

Deposit Insurance Fund Board

The Bank has a close working relationship with the Deposit Insurance Fund Board, an entity incorporated under the Banking and Financial Institution Act, 1991 (as amended 2006). The Bank provides it with staff, subvention and office accommodation.

During the year the Bank made contributions to the Deposit Insurance Fund Board amounting to TZS 251.7 million (2014: TZS 257.0 million). The balance outstanding from the Fund and included under Deposit Others as at 30 June 2015 was TZS 1,226.7 million (2014: TZS 519.9 million).

52. RELATED PARTY DISCLOSURES (CONTINUED)

Bank of Tanzania Training Institute - Mwanza

Bank of Tanzania Training Institute – Mwanza is operated as a branch and the results of its operations are incorporated in the financial statements of the Bank.

Mwananchi Gold Company Limited

The Bank had investments of 3,000 unquoted ordinary shares in Mwananchi Gold Company Limited each with a par value of USD 40. The shareholding was equivalent to 35 percent of the total MGC Ltd shares

Following unsatisfactory performance of the MGC Limited, the operations ceased in 2007 and the Bank impaired its share of investments. The company has been placed under voluntary liquidation and the Bank has realised its equity and its investment.

As at 30 June 2015, the company maintains its deposit accounts with a total balance of TZS 334.7 million (2014: TZS 572.0 million).

53. EVENTS AFTER THE REPORTING DATE

Value Added Tax Act, 2014

Effective 1 July 2015, the Bank is required to pay Value Added Tax (VAT) on goods or services provided to the Bank for implementing its primary functions at a rate of 18 percent of the value of goods and service as provided by the Value Added Tax Act, 2014.

From 1 July 2012 to 30 June 2015, the Bank was required to pay Value Added Tax (VAT) on goods or services provided to the Bank for implementing its primary functions at a rate of 18 percent of 55 percent of the value of goods and service.

In effect, the Bank will pay 18 percent of 45 percent more VAT after 1 July 2015.

Besides change in VAT, there were no other events after reporting period that would have material impact to the financial statements.

Dissolution of Mwananchi Gold Company Limited

The Bank held equivalent to 35 percent of the total MGC Ltd shares which was recovered in June 2013. The company was placed under voluntary liquidation following its unsatisfactory performance Note 26. The return of the final meeting was filed on 19th June, 2015 therefore, the company is deemed dissolved in September 2015 on expiration of three months as per the Companies Act, 2002. Any residual after settlements of claims is transferred to shareholders.

PART IV

CALENDAR OF IMPORTANT MONETARY AND ECONOMIC POLICY EVENTS, JUNE 2011 TO JUNE 2015

June 2015: The range of government securities than can be pledged by banks as collateral in accessing standby facilities at the Bank of Tanzania was broadened to include securities that mature within 91 days to 180 days from the date of acquisition.
