Executive Summary

Headline inflation eased in all zones compared to the corresponding quarter in 2023, except for Dar es Salaam and Southern Highlands zones. The slowdown in inflation was largely driven by decrease in food prices owing to good harvests during 2023/24 crop season. The rise in headline inflation in Dar es Salaam zone was mainly attributed to increased prices of some items in personal care, social protection and miscellaneous goods and services sub-group, while in Southern Highlands was mainly driven by high prices of housing, water, gas and other fuels sub-group.

Performance of selected economic activities improved relative to corresponding quarter in 2023, save for cash crops and manufacturing. The volume of procured cash crops was lower than the quarter ending September 2023, except sisal. Procurement of seed cotton and tobacco decreased due to low harvests on account of excessive rainfall, while procured tea and coffee declined due to low demand and cyclical nature of the crop, respectively. In contrast, volume of procured sisal increased owing to high demand for sisal fiber in the world market. Meanwhile, livestock trade improved largely associated with demand factors, while the value of fish traded increased on account of the price effect.

The value of manufactured products decreased, mainly driven by cigarettes, mattresses, rolled steel, cement and beverages. In the mining sector, the value of mineral recovery increased, largely driven by recovery of diamond, gold, coal and building materials. The value of gold accounted for the largest share of mineral recovery and increased due to quantity and price effects. Moreover, tourism activity improved on account of government and private sector efforts to promote tourism. Furthermore, electricity generation increased largely associated with commencement of new hydroelectric power plants, increased capacity utilization at New Pangani falls and Nyumba ya Mungu Dam owing to rise in water levels, and expansion in economic activities. Electricity generation in Dar es Salaam zone significantly decreased due to reduction in capacity utilization of gas-fired power plants following increased production of less costly hydro powered electricity from Julius Nyerere Hydro Power Plant (JNHPP).

Central Government and Local Government Authorities' revenue collections in all zones were broadly in line with the target, attributable to expansion of economic activities, enhanced tax administration and compliance, usage of point-of-sale devices and good harvests during 2023/24 crop season.

Trade activities with neighboring countries improved, with trade surplus widening compared to the corresponding quarter in 2023, due to increased exportation of minerals and manufactured goods. Ports performance improved due to docking of large ships following completion of renovation and upgrading of port's infrastructure; and rise in exportation, particularly of coal and cement. Moreover, financial sector performance improved as a result of leveraging technology in deposits mobilization, agent banking innovations, and measures taken to promote growth of credit to private sector.

1.0 ECONOMIC DEVELOPMENTS

1.1 Inflation Developments

During the quarter ending September 2024, headline inflation eased in all zones relative to the corresponding quarter in 2023, save for Dar es Salaam and Southern Highlands zones (Table 1.1 and Chart 1.1). The slowdown in inflation was largely driven by a decrease in food prices owing to good harvests during 2023/24 crop season. The rise in headline inflation in Dar es Salaam zone was mainly attributed to increased prices of some items in personal care, social protection and miscellaneous goods and services sub-group, while in Southern Highlands was mainly attributed to high prices of housing, water, gas and other fuels sub-group.

1.2 Wholesale Prices of Selected Food Crops

Average wholesale prices of selected food crops were lower than in the corresponding quarter in 2023, except for wheat, with price of maize decreasing by 31.8 percent to TZS 68,724.7 per 100 kilograms (Table 1.2). The decline was associated with adequate food supply in the market, following good harvests during the 2023/24 crop season and low food demand from neighboring countries. The increase in price of wheat was partly associated with supply constraints in major producing countries due to unfavorable weather condition, coupled with ongoing geopolitical conflict in Eastern Europe.

1.3 Fuel Prices

Average domestic pump prices of petrol, diesel and kerosene increased compared to the corresponding quarter in 2023 attributable to global supply disruptions caused by ongoing geopolitical tensions in Eastern Europe and Middle East (Table 1.3 and Chart 1.2). However, prices of petrol and diesel decreased from the preceding quarter, consistent with the decrease in global oil prices following increased production by non-OPEC members and low demand from China.

2.0 FOOD SUPPLY SITUATION

Food supply across all zones remained satisfactory during the quarter ending September 2024, owing to good harvests during 2023/24 crop season; following favourable weather, timely provision of subsidized fertilizers and other agricultural inputs, and enhanced provision of extension services¹.

2.1 Food Reserves

Food stock held by the National Food Reserve Agency was 651,403 tonnes at the end of September 2024, higher than 244,168 tonnes at the end of September 2023 (Table 2.1)². The increase was attributed to adequate harvests as well as availability of funds for the purchase of food stock. During the quarter under review, the Agency purchased 320,792.2 tonnes of maize and released 9,951.6 tonnes to traders and districts that were severely affected by excessive rains. The stock of food held by Cereals and Other Produce Board for commercial purposes was 79,937.1 tonnes, with maize accounting for 54.8 percent of the stock.

Table 2.1: Stock of Food Held by National Food Reserve Agency

Source: National Food Reserve Agency

Note: The NFRA stock does not include the amount on transit; *, positive number means net transfer in, and negative number means net transfer out; and p denotes provisional data

¹ Food production in 2023/24 was 22,803,316 tonnes exceeding estimated requirements for 2024/25 by 5,049,327 tonnes.

² Food stock held by NFRA comprises maize, sorghum and paddy.

3.0 SECTORAL PERFORMANCE

3.1 Agriculture

3.1.1 Cash Crops Procurement

Volume of major cash crops procured was lower than in the corresponding quarter in 2023, save for sisal. The decrease in volume of procured seed cotton and tobacco was partly explained by low harvests on account of excessive rainfall that affected the crops. Likewise, volume of tea procured decreased owing to low global demand, while procurement of coffee was low due to various factors including unfavourable weather condition and cyclic nature of the crop. Conversely, the increase in volume of procured sisal was largely due to high demand for sisal fibre in the world market.

3.1.2 Livestock Trade

Livestock trade in registered markets in all zones improved relative to the quarter ending September 2023, mainly associated with demand factors. Value of livestock traded increased by 25.1 percent to TZS 711.1 billion from the amount traded in the corresponding quarter in 2023, with cattle accounting for 88.6 percent (Table 3.2). Central zone accounted for the largest share of the total value of livestock traded at 29.2 percent, followed by the Lake and Northern zones.

| Quarter | | | • | Dar es | | | South | Southern | |
|---------------------|----------------|--------------|-----------|-----------|-----------|-----------|----------|-----------|-----------|

3.1.3 Hides and Skins

The value of raw hides and skins traded grew by 54.3 percent to TZS 2,214.6 million in the quarter ending September 2024 from the corresponding quarter in 2023. This outturn was mainly associated with increased demand for raw hides in West African countries, especially Nigeria and Togo. Lake zone accounted for the largest share of the total value at 35 percent, followed by Northern zone (Table 3.3).

| Quarter | | | | Dar es | | | South | |

3.1.4 Fish Trade

Value of fish sold in registered markets increased by 29.6 percent to TZS 184.9 billion from the value recorded in the corresponding quarter in 2023, mainly due to price effects (Table 3.4). Central zone recorded the highest growth of value of fish sold partly on account of a rise in volume of water in rivers, lakes and dams following heavy rainfall, which had a positive impact on fish availability. In terms of shares, Lake zone accounted for the largest share of total value of fish sold, followed by Southern Highlands and South-Eastern zones (Table 3.4).

3.1.5 Forest Products Trade

Value of forest products traded decreased by 8.2 percent to TZS 252.8 billion from the value recorded in the corresponding quarter in 2023. The decrease was observed in all zones, save for South Eastern and Lake zones, partly due to use of alternative products such as iron bars for roofing and concrete electricity poles instead of timber and poles, respectively. Timber and poles accounted for 71.2 percent and 13.4 percent, respectively, of the total value of forest products. In the South Eastern zone, the increase was due to high demand of forest products in the market, while in Lake zone, the increase resulted from high supply of forest products following clearance of forest to pave way for construction of roads. Southern Highlands zone continued to account for the largest share of the total value of forest products at 95.8 percent.

3.2 Manufacturing

Value of selected manufactured products decreased by 17.8 percent to TZS 4,795.5 billion from the amount recorded in the quarter ending September 2023, driven by cigarettes, mattresses, rolled steel, cement and beverages (Table 3.6a and Table 3.6b). Dar es Salaam zone which accounted for 46.8 percent of the total value of manufactured products recorded notable decrease in the value (Chart 3.1). The value in South Eastern and Northern zones improved largely supported by increased domestic and external demand.

3.3 Mining

The value of mineral recovery increased by 24.3 percent to USD 1,004.3 billion in the quarter ending September 2024 from the minerals recovered in the corresponding quarter in 2023 (Table 3.7a and Table 3.7b). The increase was mainly contributed by increased recovery of diamond, gold, coal and building materials³. The value of gold, which accounted for 79.4 percent of total value of mineral recovery, increased by 27.8 percent driven by quantity and price effects. Likewise, the value of coal, increased by 11 percent owing to high demand, especially from India, Pakistan, Comoros, Kenya, Democratic Republic of Congo and Netherlands. As for diamond, the increase in value was due to production resumption by Williamson Diamond Mines⁴.

³ Building materials include aggregates, stones, sand, clay soil and morrum.

⁴ Williamson Diamond Mine resumed operations in July 2023 after closure in November 2022 due to operational challenges.

Regarding performance of mineral recovery by zones, all zones recorded increase in value, with considerable growth registered in Lake zone (Table 3.7b). Meanwhile, Lake zone accounted for the largest share of the total value of minerals at 63.4 percent, mostly driven by gold.

| Zone | Sep-23 | Jun-24 | Sep-24 ^P | Percentage change, Sep-23 to Sep-24 | Millions of USD Percentage share, Sep-24 |

Table 3.7b: Value of Mineral Recovery by Zone

Source: Mining Commission, Regional Resident Mines Offices and Mining Companies Note: p denotes provisional data

Value of minerals traded at minerals market centres increased by 38.9 percent to TZS 952.4 billion from the value traded in the corresponding quarter in 2023 (Table 3.8). The increase was attributed to higher price of gold in world market. Minerals traded at the market centres in all the zones increased, except for the Central zone that remained almost unchanged. Gold continued to account for the largest share of the total value of minerals trade at market centres at 96.5 percent.

3.4 Tourism

The performance of tourism activities was mixed in the reviewed quarter relative to the corresponding quarter in 2023. Number of visitors to national parks decreased by 4.6 percent, whereas earnings increased by 29.7 percent to TZS 526.6 billion in quarter ending September 2024. The increase in earnings was associated with relatively high number of non-resident visitors who normally pay high entry fees than resident visitors. This performance was backed by government and private sector initiatives in promoting tourism in Tanzania. All zones recorded increase in earnings from national parks except Southern Highlands zone. Northern zone continued to account for largest share of number of visitors and earnings at 44.1 percent and 33.2 percent, respectively (Table 3.9).

Table 3.9: Earnings and Number of Visitors to National Parks

| Zone | | Sep-23 | Jun-24 | Sep-24 ^P | Percentage change Sep-23 to Sep-24 |

3.5 Energy

Domestic electricity generation continued to improve due to commencement of operations at new hydroelectric power plants, ongoing rural electrification and expansion of economic activities. Specifically, electricity generation grew by 15.9 percent to 3,008 Gigawatt hours (GWh) from the quantity generated in the corresponding quarter in 2023; with notable increase experienced in South Eastern, Northern and Lake, zones (Table 3.11 and Table 3.12). Electricity generation in the South Eastern zone increased substantially following the commencement of power generation at Julius Nyerere Hydro Power Plant (JNHPP). In the Northern zone, the improved performance was due to increased capacity utilization at New Pangani falls and Nyumba ya Mungu dam, owing to rise in water levels; while the increase in power generation in Lake zone was driven by operationalization of Rusumo falls hydroelectric power plant⁵. Electricity imported from Uganda and Zambia grew by 94.5 percent to 67.6 GWh from the

⁵ Rusumo falls hydroelectric power plant has the capacity to generate 80 MWh shared equally between Tanzania, Rwanda and Burundi.

quantity imported in the corresponding quarter in 2023⁶. Much of the electricity imported from Uganda was to meet increased demand from Kagera Sugar factory.

In contrast, Dar es Salaam zone, which accounted for 36.2 percent of total electricity generation decreased by 40.7 percent due to reduction in capacity utilization of gas-fired power plants following increased production of less costly hydro powered electricity from JNHPP.

Note: p denotes provisional data; and N/A, not applicable

Production of natural gas from Songo Songo and Mnazi Bay fields decreased by 32.4 percent to 15,326.2 Million Standard Cubic Feet (MMSCF) from the volume produced in corresponding quarter in 2023 (Table 3.13 and Chart 3.2). The decline in gas production was largely explained by reduction in the use of natural gas for power generation after the commencement of power generation at JNHPP. Natural gas consumption decreased by 32.1 percent to 14,694.1 MMSCF with power-generating plants accounting for 78 percent, followed by industries at 21.5 percent.

4.0 GOVERNMENT REVENUE PERFORMANCE

4.1 Tax Revenue Collections

Tax revenue collections in all zones were broadly in line with the target for the quarter ending September 2024. Overall, tax revenue collected amounted to TZS 7,657.1 billion, above the target by 4.9 percent (Table 4.1). The performance was partly explained by expansion of economic activities as well as continued enhancement of tax administration and compliance. Dar es Salaam zone continued to dominate accounting for 84.8 percent of tax revenue⁷.

4.2 Local Government Revenue Collections

Local Government Authorities' revenue collections amounted to TZS 294.2 billion, equivalent to 24 percent of the target for 2024/25 (Table 4.3). The performance was mainly associated with expansion of economic activities, enhanced usage of point-of-sale devices, online marketing of some cash crops and good harvests during 2023/24 season. Lake, Central and Dar es Salaam zones accounted for the largest share of collections at 25.4 percent, 19.2 percent and 17.9 percent, respectively.

5.0 TRADE

5.1 Cross Border Trade

Trading activities with neighbouring countries improved relative to the corresponding quarter in 2023, with trade surplus widening by 24.8 percent to TZS 1,133.4 billion in the quarter ending September 2024 (Table 5.1). All zones registered trade surplus except for Northern zone. The widening of the trade surplus in the Lake zone was largely contributed by increased exportation of unrefined gold, rough diamond, fish and fish products, cosmetics, tiles and food items. The performance in South Eastern and Southern Highlands zones was due to a rise in exports of manufactured goods particularly cement, maize flour and juice. In the Northern zone, trade deficit increased to TZS 495.7 billion from TZS 93.4 billion in the quarter ending September 2023, contributed by increased importation of, among others, ethylene polymers, tractors, medicaments, vehicles, boxes, cases, crates and rubber.

5.2 Ports Performance

Volume of cargo handled at major sea and lake ports increased by 6 percent to 7.1 million tonnes from the volume handled in the quarter ending September 2023 (Table 5.2). The increase was mostly driven by cargo handled at Tanga and Mtwara ports. The performance of Tanga port was attributed to docking of large ships following completion of renovation and upgrading of the port's infrastructure. The increase in volume of cargo handled at Mtwara port was mainly due to a rise in exports of coal and cement⁸. Dar es Salaam port continued to account for the largest share at 84.1 percent.

⁸ Coal is largely exported through Mtwara port to India, Pakistan, Netherlands and Comoros while cement is exported to Comoros and Mozambique.

5.3 Airports Performance

The performance of airports generally improved in terms of number of flights, domestic passengers and volume of cargo handled, attributed to expansion of economic activities. The number of international and domestic flights increased by 5.3 percent and 7.1 percent, respectively. The volume of cargo handled also increased to 9,632.2 tonnes from 7,908 tonnes in the same period (Table 5.3).

6.0 FINANCIAL SECTOR DEVELOPMENTS

6.1 Bank Deposits and Loans

Deposits mobilized by banks improved across all zones. The deposits grew by 11.9 percent to TZS 33,944.3 billion from the amount deposited as at the end of September 2023 (Table 6.1). This outturn was mainly attributed to leveraging technology in deposits mobilization and agent banking innovations. Dar es Salaam zone remained dominant, accounting for 59.2 percent of the total deposits.

Table 6.1: Bank Deposits

Note: Data excludes Zanzibar; and p denotes provisional data

Bank loans to various economic activities grew by 18.8 percent to TZS 32,657.7 billion at the end of September 2024 (Table 6.2)9. The performance was largely attributed to improved business conditions and measures taken by the Bank of Tanzania to improve growth of credit to private sector, particularly for agriculture. Of the total bank loans, 74.8 percent were held by personal, agriculture, trade and manufacturing activities (Table 6.3).

⁹ Bank loans include loans and advances provided by banks in Mainland Tanzania only, and do not include accrued interest on loans and advances as well as other sources of financing to the private sector such as securities, shares and other equity as well as prepaid insurance premiums.

6.2 Agent Banking Transactions

Number of bank agents increased by 40.3 percent to 132,543 from the quarter ending September 2023, due to the efforts taken to promote agent banking and enhance financial inclusion in Tanzania (Table 6.4). Accordingly, volume of transactions for cash deposits and withdrawals through bank agents increased by 14.7 percent and 11.2 percent, in that order. Likewise, value of cash deposits and withdrawals grew by 22.3 percent and 25.2 percent, respectively, from the corresponding quarter in 2023.
