### 1.0 Inflation and Food Supply Situation

### 1.1 Inflation Developments

Annual headline inflation slowed down to 5.6 percent in December 2013 from 6.2 percent recorded in November 2013 mainly on account of decrease in prices of some items under food, non-food and non-energy sub-groups. Month-to-month headline inflation was 1.3 percent compared to 0.6 percent recorded in November 2013 (Table 1.1).

Food and non-alcoholic beverages inflation decreased to 6.0 percent in during the year ending December 2013 from 7.2 percent recorded in the year ending November 2013. However, month-to-month food inflation increased to 2.0 percent in December 2013 from 1.1 percent recorded in the preceding month mainly due to rise in prices of cassava flour, rice, vegetables, chicken, meat, sardines, fish, coconut, beans and round potatoes.

During December 2013, **annual non-food inflation** was 5.5 percent compared with 5.7 percent recorded in the preceding month mainly attributed to slowdown in prices of items under furnishing, housing equipment and routine maintenance of the house sub-group. **Month-to-month non-food inflation** increased to 0.6 percent from 0.1 percent recorded in November 2013.

Annual inflation rate which excludes food and energy (proxy for core inflation) eased to 4.5 percent in December 2013 from 5.3 percent recorded in the preceding month. Meanwhile, month-to-month rate slightly increased to 0.2 percent from 0.1 recorded in November 2013.

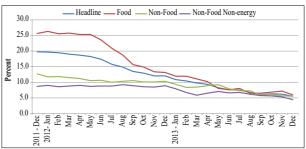

Annual inflation for energy and fuels increased to 12.8 percent from 10.0 percent recorded in November 2013 following rise in prices of gas, charcoal and kerosene. Month-to-month energy and fuels inflation was 2.7 percent compared to negative 0.4 percent recorded in November 2013.

The stock of maize and sorghum held by the National Food Reserve Agency (NFRA) decreased to 232,963 tonnes in December 2013, from 234,145 tonnes recorded in the preceding month (Table 1.2). No purchases were made during the month as NFRA have surpassed the purchase target of 200,000 tonnes for 2013/14 since September 2013. From July to December 2013, NFRA purchased a total of 218,905 tons of maize and 493 tons of sorghum. Meanwhile, NFRA sold a total of 15,107 tonnes of food mainly to Prison Department and Disaster Coordination Unit under the Prime Minister's Office during the period.

### 2.0 Monetary and Financial **Market Developments**

### **Money Supply and Credit** 2.1 **Developments**

During the year ending December 2013, extended broad money supply (M3) grew by 10.0 percent compared with 12.5 percent recorded in the corresponding period in 2012.

This development was mainly on account of slowdown in the growth of Net Domestic Assets (NDA) of the banking system. Net claims on the government grew by 26.5 percent compared to 37.3 percent recorded in the year ending in December 2012, while credit to the private sector grew by 15.3 percent from 18.2 percent. Meanwhile, Net Foreign Assets (NFA) of the banking system recorded an annual growth of 2.8 percent in December 2013 compared to 2.0 percent recorded in the corresponding period in 2012 following increase in NFA of the Bank of Tanzania (Chart 2.1 and Table 2.1).

**Chart 2.5: Inter-bank Cash Market Transactions** 

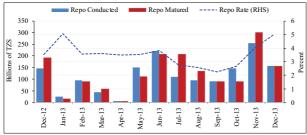

Note: RHS = Right Hand Scal

### 2.3.3 Repurchase Agreements

During December 2013, the Bank conducted **repurchase agreements** (**repos**) with commercial banks worth TZS 157.6 compared to TZS 255.0 billion transacted in the preceding month. Repo rate increased to 5.04 percent from 4.03 percent registered in November 2013 (**Chart 2.6**).

**Chart 2.6: Repo Transactions** 

### 2.3.4 Interbank Foreign Exchange **Market**

In December 2013, total transactions in the Interbank Foreign Exchange Market (IFEM) amounted to USD 175.76 million compared to USD 145.56 million traded in the preceding month. The Bank participated in the market for liquidity management by selling USD 43.8 million compared to USD 79.7 million sold in November 2013. The Shilling recorded a 0.6 percent appreciation against the US Dollar (USD), trading at an average of TZS 1,603.2 per USD in December 2013 from TZS 1,612.60 recorded in the preceding month. On annual basis, the Shilling depreciated by 1.6 percent from an average of TZS 1,578.4 per USD recorded in December 2012 (Chart 2.7).

**Chart 2.7: Inter-bank Foreign Exchange Market Transactions** 

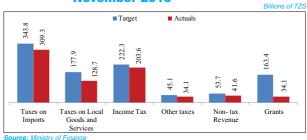

### Government 3.0 **Budgetary Operations**

During the first five months of 2013/14, Government budgetary operations recorded an overall deficit of TZS 757.8 billion, which was financed by both domestic and foreign borrowing. Central Government revenue (i.e excluding Local Government Authorities own sources) was TZS 3,762.6 billion or 85.6 percent of the target for the period with tax revenue accounting for 93.5 percent of total revenue. Grants received amounted to TZS 737.8 billion against TZS 1,217.8 projected for the period. Total expenditure amounted to TZS 4,736.4 billion, of which 75.2 percent was recurrent expenditure and the balance was development expenditure.

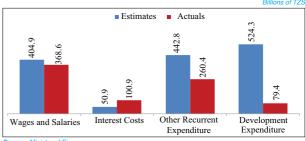

In November 2013, domestic revenue (excluding Local Government Authorities own sources) amounted to TZS 717.3 billion or 85.1 percent of the target for the month. Tax revenue amounted to TZS 675.6 billion or 85.6 percent of the target and accounted for 94.2 percent of the domestic revenue. Grants disbursed were TZS 34.1 billion against the projection of TZS 163.4 billion (Chart 3.1). The underperformance in revenue collection was partly explained by delays in implementation of measures relating to excise duty on money transfer and SIM Card.

**Chart 3.1: Government Resources, November 2013** 

Total Government expenditure for November 2013 amounted to TZS 809.2 billion, equivalent to 56.9 percent of estimates for the month. Recurrent expenditure amounted to TZS 729.8 billion, or 81.2 percent of the estimate, while development expenditure was 15.1 percent of the estimate (Chart 3.2).

**Chart 3.2: Government Expenditure, November 2013** 

### **External Sector** 4.0 **Performance**

### 4.1 Balance of Payments

During 2013, overall balance of payments recorded a surplus of USD 498.4 million compared to a surplus of 326.1 million registered in the preceding year. This development was partly explained by increase in official capital inflows, non-concession loans and foreign direct investments. Gross official reserves amounted to USD 4,678.8 million as at the end of December 2013, sufficient to cover 4.4 months of projected imports of goods and services excluding those financed by foreign direct investment. Meanwhile, gross

foreign assets of banks stood at USD 867.3 million.

The current account recorded a deficit of USD 4,671.8 million in 2013 compared to a deficit of USD 3,499.3 million registered in 2012. This outturn was largely explained by a decline in exports of goods and services coupled with an increase of imports and decrease in official current transfers (Table 4.1).

### 4.2 Exports of Goods and Services

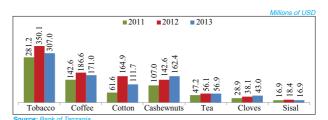

The value of **exports of goods and services** declined to USD 8,519.1 million, from USD 8,675.6 million recorded in 2012 due to a decrease in the value of goods exports, except that for manufactured goods. **Chart 4.1** depicts export performance of selected goods and services for the last three years.

Chart 4.1: Export Performance of Selected Goods and Services

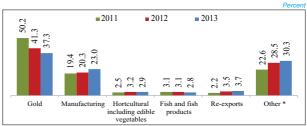

In 2013, the value of **traditional exports** was USD 868.9 million compared to USD 956.7 million recorded in the preceding year. The recorded decline was on account of decrease in export volumes for cotton, sisal and tobacco, coupled with a fall in export unit prices of most traditional crops save those for cotton, cashewnuts and tobacco. Declines in export volumes were largely associated with lower production during the year. The performance of traditional exports for the past three years is depicted in **Chart 4.2**.

### **Chart 4.2: Performance of Traditional Exports**

The value of **non-traditional exports** declined by 9.2 percent from the amount recorded in 2012 to USD 3,782.3 million in 2013, mainly on account of low export value of gold. The value of gold exports declined following a fall in both export volume and unit price. Despite the decline, gold continued to dominate non-traditional exports, followed by manufactured goods **(Chart 4.3)**.

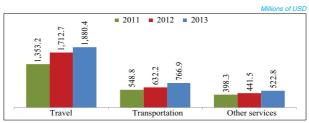

Chart 4.3: Percentage Share to Total Non-Traditional Exports

Note: Other\*-include other minerals (excluding gold), oil seeds, cereals, cocoa, hides and skins

Service receipts increased by 13.8 percent from the amount recorded in 2012 to USD 3,170.2 million in 2013. The increase was mainly driven by travel and transportation receipts following an increase in the number of tourist arrivals and volume of transit goods. During 2013, transit goods grew by 18.8 percent to about 1.4 million tonnes with Zambia, DRC and Rwanda being major destinations. Travel and transport receipts accounted for 59.3 percent and 24.2 percent of total services receipts, respectively. Chart 4.4 presents a three year performance of services receipt by categories.

### 4.3 Import of Goods and Services

During 2013, the value of **imports of goods and services** increased to USD 13,616.9 million from USD 12,678.0 million recorded in the preceding year. Much of the increase originated from oil imports, which grew by 27.4 percent when compared to the amount recorded in 2012 on account of

increase in volume and price. The volume of imported oil grew by 25.1 percent to 4.4 million tonnes due to rising demand for thermo power generation, while prices in the world market rose by 4.6 percent. The performance of goods imports is summarised in **Table 4.2** and **Chart 4.5**.

**Service payments** amounted to USD 2,573.1 million compared to USD 2,358.9 million recorded in 2012. Payments under transportation which constitutes the largest share under the services payment grew by 6.3 percent consistent with the increase in goods imports. **Chart 4.6** illustrates a three year performance of major services payment categories.

### 4.4 World Commodity Prices

During December 2013, average world market prices for selected commodities increased save those for **gold** and **sisal (Table 4.4)**. Price of **cotton** rose largely due to high demand, mainly from India textile manufacturers, while stock piling in Vietnam largely explained increase in price of **Robusta coffee**. **Cloves** price also increased on account of

demand factors following decrease in stocks in consuming countries particularly India and Indonesia. The prices of crude oil (Average and Dubai f.o.b) and white petroleum products increased largely on account of low supply from Libya. Meanwhile, price of gold declined mainly on account of India's action to restrict importation of gold in efforts to control its current account deficit.

In 2013, average world market prices for selected commodities declined with the exception of those for **cotton** and **cloves**. Price of **cloves** rose following low production in major growing countries; Indonesia, Madagascar and the Comoros. Meanwhile, **coffee** (Arabica and Robusta) production increased following bumper harvests in Brazil, Colombia, Vietnam and Indonesia, which drove prices down. Price of **sisal** declined mainly on account of low global demand. The decline in prices of **tea** (Average and Mombasa auction) was attributed to increase in tea production in Kenya, India and Australia coupled with a decline in global demand.

Prices of **crude oil** (Average and Dubai f.o.b) and **white petroleum products** decreased largely due to increase in oil production in North Sea, while that of **gold** declined on account of change in investor's preference in favour of more attractive equities and shares.

### 6.0 **Economic Developments** in Zanzibar

### 6.1 Inflation Developments

Annual headline inflation decelerated to 3.8 percent in December 2013 from 6.0 percent recorded in the preceding month, mainly due to decline in prices of rice, maize flour, wheat flour and sugar owing to developments in both domestic and world markets. Month-to-month headline inflation also declined to negative 1.3 percent from 0.2 percent recorded in November 2013 on account of decrease in prices of some food items (Table 6.1).

Similarly, the month-to-month food inflation declined to negative 2.6 percent in December 2013 from 0.1 percent registered in November 2013, mainly attributed to a decline in the prices of fish, banana, sugar, maize flour and sorghum.

Annual non-food inflation eased to 8.8 percent in December 2013 from 8.9 percent registered in the year ending November 2013, mainly on account of decreases in the prices of cement, petrol, diesel and kerosene. The month-to-month non-food inflation also declined to 0.2 percent from 0.4 percent recorded in November 2013 following easing of cement and fuel prices.

Revenue collection during the month amounted to TZS 27.0 billion or 95.6 percent of the target for the month with tax revenue accounting for 93.3 percent of total collections (Chart 6.2).

**Chart 6.2: Government Domestic Revenue by Sources** 

In terms of contribution to total revenue, tax on imports accounted for the largest share followed by VAT and Excise Duties (local) (Chart 6.3).

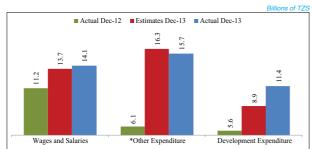

**Chart 6.3: Government Revenue by Source** 

During the month under review, **Government expenditure** amounted to TZS 41.3 billion, out of which 72.3 percent was recurrent expenditure and the balance was development expenditure **(Chart 6.4)**. Development expenditure was exclusively foreign funded and surpassed expenditure estimates for the month by 29.2 percent following fast tracking completion of some capital projects in preparation of historic celebration of 50 years of Zanzibar revolution.

### **6.3 External Sector Developments**

### **6.3.1 Current Account**

Zanzibar current account recorded a deficit of USD 121.1 million in 2013 compared with a deficit of USD 46.4 million recorded in 2012. This outturn was mainly explained by decline in services receipts and current transfer inflows coupled with an increase in current transfer outflows (Table 6.2).

Nevertheless, value of goods exports increased by 16.9 percent from USD 51.5 million recorded in 2012, mainly on account of an increase in the volume of cloves exports **(Table 6.3)**.

During 2013, the value of **imports of goods and services** declined by 4.4 percent to USD 300.2 million following decrease in services payments. The value of goods imports rose to USD 211.1 million from USD 203.3 million registered in 2012, mainly due to an increase in the value of capital and consumer goods **(Table 6.4)**.

During 2013, **services account** recorded a surplus of USD 30.2 million, compared to a surplus of USD 35.0 million recorded in the preceding year. This outturn was mainly on account of a decline in tourism receipts (Table 6.5).
