1.0 InflationDevelopments

Inflation slightly increased in December 2005

nnual headline inflation rose to 5.0 percent in December 2005 from 4.8 percent in the preceding month, mainly due to increase in the average prices of some food items. On month-to-month basis, the headline inflation turned to 0.3 percent in December 2005 from – 0.2 in the preceding month, as prices of consumer items particularly food went up. The increase in consumer prices during the month was mainly explained by an increase in prices owing to food shortages and increase in cost of fuel .The seasonal behaviour associated with end of year festivities, could be a contributory factor.

Food inflation went up to 7.2 percent in the year ending December 2005, up by 0.5 percentage points compared to the level recorded in the preceding month, owing to increases in the average prices of some food items. During December alone, food inflation increased to 0.4 percent from 0.1 percent in the preceding month, on account of increases in the average prices of rice, maize grain and maize flour, bananas, vegetables, fruits, beef, legumes and groundnuts. The increase in prices of food is largely caused by drought related supply shortfall in some parts of the country, as well as food shortages in neighbouring countries, particularly in Malawi and Zambia, which made some traders sell foodstuffs across the borders.

Annual non-food prices increased, albeit at a slightly lower rate of 3.6 percent in December 2005 compared to a rate of 3.7 percent recorded in the preceding month. For the month of December, non-food prices increased by 0.1 percent following increases in the average prices of kerosene, diesel, petrol, vehicle services and school items. **(Table 1.1 and Chart 1.1).**

Chart 1: Tanzania: Annual Headline, Food and Non-food Inflation

Food Supply Situation

During December 2005, drought related food shortages existed in some parts of the country. Accordingly, the government distributed food relief to 34 districts in Arusha, Manyara, Dodoma, Kilimanjaro, Lindi, Iringa, Mara, Mwanza, Shinyanga, Singida and Tabora regions. About 924 tons of maize were distributed, leading to cumulative amount of 1,651 tons of since October 2005 when the exercise started.

Prices of foodstuffs increased during December 2005, reflecting the food shortages in the country. Also, the selling of food by some traders to neighbouring countries, particularly Kenya, Malawi and Zambia, reduced domestic supply.

Strategic Grain Reserve (SGR) Stock

By the end of December 2005, the SGR stock stood at 93,051 tons from 106,428 tons recorded at end of November 2005 owing to the distribution of food relief by the government to deficit areas and sales to private traders through tender system. During the same period, the SGR department purchased 46 tons of maize from surplus regions, leading to a cumulative purchase of 1,771 tons out of 44,000 tons planned for 2005/06-crop season.

2.0 Monetaryand Financial Developments

Money Supply and Credit

midst increased inflationary pressure, a tightening of monetary policy continued in December and interest on treasury bills and bonds remained high. The rise in interest rates follows expansionary fiscal policies that have necessitated increased mopping up requirements by the Bank.

In the year to December 2005, the growth rate of extended broad money supply (M3), reached a high of 38 percent, far above the 19.3 percent recorded in December 2004 and 37.1 percent in November 2005 (Chart 2.1). The expansion in money supply was partly on account of substantial increase in domestic credit associated with expansionary fiscal policies which called for increase in borrowing from the banking system. Meanwhile, broad money supply, M2, grew by 36.6 percent, significantly higher than 19.2 percent recorded in December 2004 and 34.2 percent in November 2005.

Chart 2.1: Tanzania: Annual Growth Rates of Monetary Aggregates

Between November and December 2005, M3 increased by TZS 13 billion to TZS 3,927.3 billion, while broad money supply increased significantly by TZS 57 billion.

The relative low increase in M3 is due to decline in foreign currency deposits following foreign payments by corporate customers, coupled with exchange rate appreciation—the shilling gained value against dollar from TZS 1,195.12 per USD at end November 2005 to TZS 1,165.51 per USD in December 2005. Meanwhile, the expansion in M2 resulted primarily from increases in currency outside banks, as well as time and savings deposits. The observed increase in currency in circulation was a manifestation of seasonal pattern, as it always reaches its peak in December, the festive month, while the sizeable increase in local time and savings deposits is largely associated with banks' continued initiatives in deposit mobilisation. Meanwhile, local currency demand deposits declined by about TZS 23 billion in December 2005 following transfer of TRA end of quarter revenue collection (Table 2.1).

Credit Developments

Credit creation process has seen steady expansion reaching an annual growth rate of 34.4 percent in December 2005 up from 32.9 percent in the previous month and 29.7 percent registered in the same month a year earlier. The sustained expansion in credit is accompanied by the expansion in various economic activities mainly in mining, construction, tourism, manufacturing, trade, and agriculture. The outstanding stock of private sector credit increased from TZS 1,411.5 billion in November 2005 to TZS 1,425.1 billion (**Table 2.1**).

In December 2005, ratio of bank credit private sector credit to bank deposit liabilities stabilised at 43 percent, as it was in the preceding month (Chart 2.2), and so was the banks' holding of government securities that stood at 33 percent of total deposits same level recorded in the previous month.

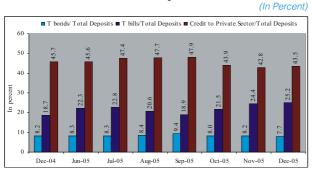

Chart 2.2: Tanzania: Commercial Banks Intermediation

Financial Markets

During December 2005, money market continued to experience upward pressure on interest rates. In the overnight inter-bank cash market, rates increased from 4.1 percent in November 2005 to 5.8 percent in December 2005, whereas overall weighted average yield on Treasury bills rose to 14.8 percent from 13.6 percent a month earlier. As for Treasury bonds the overall rate stabilised at around 17 percent. Given the higher rate of return in government securities, commercial banks have maintained their portfolio investment in government securities, holding about 33 percent of their total deposits liabilities, same level recorded in the preceding month (Chart 2.3).

Chart 2.3: Tanzania: Shares of Selected Assets of Banks to Deposits

Treasury Bills Market

In December 2005, demand for Treasury bills was TZS 269.3 billion compared with TZS 419 billion demanded in the previous month. The relative low demand in Treasury bills is associated with limited room for the banks to use their deposit liabilities during the month as most of the corporate customers had obligations to meet including the end of quarter tax payments and payment of shareholders dividends. In this regard the Bank managed to sell only TZS 187.6 billion against the offered amount worth TZS 280.0 billion. As a result, the overall weighted average yiled rose to 14.8 percent from 13.6 percent in the previous month.

In December 2005, bids in the Treasury bond market improved significantly to TZS 22.3 billion from TZS 15.2 billion in November 2005. But some of the bids were outliers for which the Bank intervened and accepted bids with cost value of TZS 18.6 billion against the offered amount of TZS 12.0 billion. Following these market developments, overall weighted average yield (WAY) remained unchanged at 17 percent. In particular, the WAY for 2-year bond stabilised at 16.9 percent, while that of 5-year edged upwards to 17 percent from 16.8 percent in the preceding month. As for 7-year bond the yield stood at 18.3 percent up from 18.1 percent, where as for 10 year bond the WAY closed at 17 percent from 16.7 percent.

Repurchase Agreements

During the month under review, the Bank continued to employ repurchase agreements with commercial banks for fine tuning the level of liquidity in the economy. Repos worth TZS 31.8 billion were transacted during the month under review at an avarege rate of 6.0 percent. In the preceding month repos amounting to TZS101.8 billion were traded at an avarage rate of 5.28 percent.

Foreign Exchange Market Operations

During December 2005, the total volume traded in the Inter-bank Foreign Exchange Market (IFEM) went down substantially to USD 70.50 million, partly on account of low demand for foreign exchange for corporate financing. On net basis, commercial banks purchased USD 35.85 million, while the Bank of Tanzania and non-banks financial institutions sold USD 32.1 million and USD 3.75 million, respectively. The weighted average exchange rate of the shilling depreciated slightly to TZS 1,168.79 per USD in December 2005, from TZS 1,169.25 per USD recorded in November 2005 (Chart 2.4).

Chart 2.4: Tanzania: Inter-bank Exchange Rate Movement and Volume of Transactions

Transactions in Bureaux de Change System

During December 2005, the volume of transactions conducted by Bureau de Change system increased substantially to USD 83.66 million, largely as the result of both the increase in sales and purchases of foreign exchange. The increase in outflow was largely due to high demand for foreign exchange for payments of travelling allowances owing to the fact that people mostly travel for holidays. On the other hand, the increase in purchases of foreign exchange was largely driven by the increase in foreign exchange earnings from tourism.

The buying and selling rate appreciated slightly to TZS 1,161.00 per USD and TZS 1,182.00 per USD from TZS 1,168 per USD and TZS 1,199 per USD respectively, recorded in November 2005.

Interest Rates in Commercial Banks

Interest rates offered by commercial banks moved in line with the developments of yields in the Treasury bills market though at a slower pace. In December 2005, overall weighted average rate on time deposits rose to 5.3 percent from 5.2 percent in the preceding month, whereas negotiated deposit rate closed at 10.6 percent up from 9.3 percent in the same period. As for savings deposits, the rate stabilised at 2.6 percent. On the other hand, overall weighted average lending rate charged by banks declined to 15.0 percent in December 2005 from 15.5 percent in November 2005, while negotiated lending rate eased to 11.1 percent from 11.5 percent. In the same period, the weighted average yield on Treasury bills improved to 14.8 percent from 13.6 percent (Table 2.3).

3.0 Government

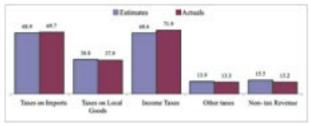

Budgetary Operations

During the month of December 2005, government budgetary operations recorded a deficit of TZS 66.0 billion. Total resources that were available for the month from domestic revenue and grants amounted to TZS 257.9 billion, whilst expenditure amounted to TZS 323.9 billion. The deficit was financed through government borrowing from both foreign and domestic sources.

Total revenue collected during the period was slightly below the target of TZS 199.3 billion by TZS 1.0 billion. Tax revenue collections amounted to TZS 185.1 billion, slightly above the target by TZS 1.3 billion. The good performance in tax revenue collections came from income taxes and taxes on imports mainly due to improvement in tax administration. Specifically, TRA has improved tax audit procedures and techniques including close monitoring of non-filers by issuing automatic assessments. Also, more efforts have been directed towards collection of tax arrears (Chart 3.1).

Chart 3.1: Tanzania: Government Revenue Performance in December 2005

During the month under review, total government expenditure (excluding amortization) amounted to TZS 323.9 billion, out of which recurrent expenditure was TZS 259.9 billion, while development expenditures amounted to TZS 64.0 billion.

Cumulative from July to December 2005, government expenditure was largely on target at TZS 2,030.2 billion, compared to the cumulative estimate of TZS 2,041.8 billion.

The actual expenditure up to the end of December 2005 comprised of TZS 1.401.1 billion in recurrent expenses and TZS 629.2 billion in development.

4.0 External Sector Performance

Current Account Strengthens

he current account deficit narrowed to USD 91.4 million for the month of December 2005 from a deficit of USD 136.9 million recorded in the previous month, largely due to an improved export performance.

During the year 2005, the current account balance worsened to a deficit of USD 790.6 million compared with a deficit of USD 426 million in 2004, mainly due to higher import bill than exports and decline in official current transfers (**Table 4.1**)

Note: -- = Very large number P = Provisional **Source:** Bank of Tanzania

During 2005, Tanzania exported goods and services worth about USD 2,604 million, which was an improvement of 14.2 percent over the previous year's performance. Gold and travel (tourism) dominated by accounting for about 54 percent of total annual export earnings. Traditional exports maintained an upward trend for the past four years, reaching at USD 354.6 million in 2005 up from USD 206.1 million recorded in 2002 (Chart 4.1).

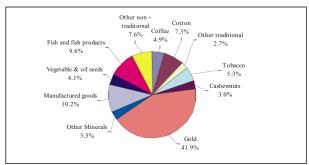

Chart 4.1: Tanzania: Contribution of Selected Exports to Total Export Goods and services

The performance in traditional exports was dominated by coffee and cotton. However, gold remained the dominant export category followed by manufactured exports as depicted on Chart 4.2. During 2005, the growth of manufactured exports was largely driven by an increase in exports of textile, glass and glassware, footwear, plastic articles, iron and steel.

Chart 4.2: Tanzania: Contribution of Selected Items to Total Exports of Goods

Note:

- 1. Other non-traditional include horticultural products and other exports
- 2. Other traditional exports include sisal, tea and cloves
- Other minerals include Tanzanite, rubies, sapphires, emeralds, copper, silver and other precious stones

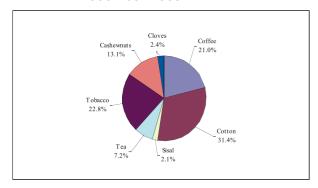

Traditional Exports

In December, traditional exports earned about USD 62 million compared to USD 40 million recorded in the previous month. A remarkable improvement was recorded in cashew, whose export volume rose from 12,700 tons in November to 43,911 tons, while its value was USD 33.1 million up from USD 8.9 million. The increase in cashew exports was largely explained by the willingness of the buyers to offer the price of between TZS 600 and TZS 480 per kilogram for higher and lower grades, respectively, set by stakeholders in September 2005.

During 2005, foreign exchange earnings from traditional exports amounted to USD 354.5 million, which was an improvement of about 19 percent from previous year's performance. A notable improvement was recorded in export volumes of coffee, cotton and tobacco as a result of favourable weather and timely usage of agricultural inputs - pesticides for cotton and fertilizers for tobacco

(Chart 4.3)

Chart 4.3: Contribution to total traditional exports for the year ending December 2005

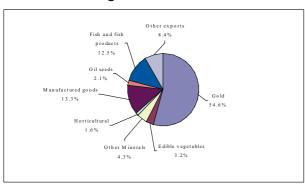

Non-Traditional Exports

Exports of non-traditional goods decreased by 10.3 percent to USD 91.7 million in December 2005. Export of manufactured goods declined significantly to USD 12.7 million from USD 29.6 million recorded in November 2005. However, the performance in November was unusually high because Tanzania exports of sugar to the European Union (EU) under the preferential treatment are normally made once a year. Under this arrangement, Tanzania has a quota of exporting a total of 20,200 tons of sugar per year to EU.

During 2005, non-traditional exports went up by 13.3 percent to USD 1,176.3 million. Gold led the list by accounting for over 50 percent of total due to improved prices in the world market and increase in production. A new gold mining company, Tulawaka Gold mining company, started production in early 2005 and its first export was done in March 2005.

During the year under review, exports of manufactured goods and other exports improved. The former was partly attributed to the on-going rehabilitation and establishment of new industries while the later was on account of a rise in exports of textile apparels, footwear, plastic items, iron and steel **(Chart 4.4).**

Chart 4.4: Contribution to total nontraditional exports for the year ending December 2005

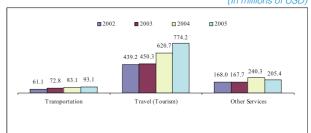

Services Export

During December 2005, export of services decreased to USD 85.1 million from USD 87.2 million in the previous month following the decrease in travel (tourism), transportation and other business services receipts.

On annual basis, services receipts increased to USD 1,072.7 million during 2005 from USD 944.1 million recorded in the previous year on account of a rise in travel and transportation services receipts. Foreign exchange from travel (tourism) increased by 24.7 percent to USD 774.2 millions, partly on account of increased tourism related activities and improvement in infrastructure. In view of the potential for tourism growth, British Airways launched two new products namely Club World and World Traveller Plus, which aim at providing better customers services. It is anticipated that more visitors from the European Countries will fly directly to Tanzania (Chart 4.5).

Chart 4.5: Tanzania: Service Receipts 2002 - 2005

(In millions of USD)

Note: 'Other Services' include: Communication, Construction, Insurance, Financial, Computer Information, Government, Royalties, Personal and Other business services

Goods Imports

During December 2005, the import bill of goods (f.o.b) was USD 239.4 million, which was about 17 percent less than that of previous month. Decreases in imports were recorded in all major goods with the exception of food and foodstuffs (Table 4.2). The volume of oil imports declined slightly to 92,000 tons from 93,254 tons recorded in the previous month. The increase in importation of food and foodstuff was on account wheat, which rose to 77,404 tons during the review month from 64,492 tons in the previous month.

Source: Bank of Tanzania and Tanzania Revenue Authority

During 2005, Tanzania's import bill stood at USD 2,661.5 million, which is an increase of about 14 percent over the previous year. This development is explained by substantial increase in imports of capital and intermediate goods in line with the growth in manufacturing, mining and tourism activities. Also, imports of pharmaceutical products, books and plastic articles increased. On the other hand, imports of food and foodstuffs declined to USD 93.1 million from USD 170.9 million recorded in 2004. The decline was marked in imports of maize and rice following improved domestic production (Charts 4.6 and 4.7).

Chart 4.6: Tanzania: Contribution to total imports during 2005

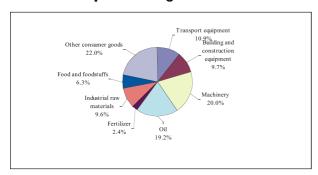

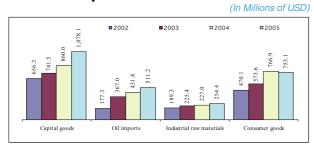

Chart 4.7: Tanzania: Total Merchandise Imports: 2002-2005

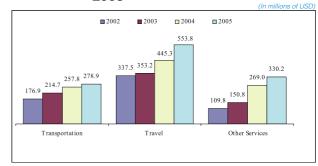

Services Imports

During the month under review, services payments decreased to USD 99.1 million from USD 108.9 million, mainly on account of the fall in payments for transportation, government and construction services. However, travel payments increased by 14.6 percent to USD 53.6 million reflecting the December seasonal pattern.

On annual basis, services payments also increased by 19.6 percent to USD 1,162.9 million, largely on account of increases in payments for construction, freight charges, travel and government services. The rise in freight payments reflected the increase in merchandise imports, while that of construction is associated with the expansion in construction activities in the country. Travel payments increased due to increase in number of travellers on education, business and medical grounds (Chart 4.8).

Chart 4.8: Tanzania: Service Payments 2002 - 2005

Note: 'Other Services' include: Communication, Construction, Insurance, Financial, Computer Information, Government, Royalties, Personal and Other business services

World Commodity Prices

During December 2005, the price of Arabica coffee decreased slightly while that of Robusta coffee increased, largely due to a surge in demand, associated with winter in the Northern Hemisphere. The prices of other agricultural commodities remained stable during the reporting month except tea, which increased (Table 4.3). The price of sisal has remained stable at around USD 885.0 per metric ton for about a year in line with recommendations by FAO Committee on Commodity Problems held in Rome in December 2004 that the indicative price for East African UG fibre should range from USD 840 to USD 900 per ton instead of USD 700 to USD 750 per ton.

The prices of crude oil and white petroleum products went up slightly during the month after having declined in the previous month. Gold prices rose by 7.0 percent to USD 510.00 per troy ounce, largely due to the high demand for gold in Japan, Europe and the Asian countries during the festive season.

On annual basis, the average prices of coffee increased substantially in 2005 when compared with the previous year following a surge in demand coupled with constraints on supply. The decline in supply was partly attributable to the effects of the Hurricanes on coffee growing regions in Central America and drought conditions in Vietnam.

During the same period, prices of tea and cotton declined, while those of sisal and cloves increased. The increase in the price of cloves was largely on account of a shortfall in production as the result of unfavourable weather conditions in Madagascar.

The prices of crude oil and white petroleum products increased in 2005, partly due to supply disruptions in Nigeria, Russia and the Middle East, as well as surge in demand from the United States, India and China. The price of gold in 2005 rose by 8.7 percent to USD 444.80 per troy ounce, partly driven by a surge in demand for gold as investors diversified from investing in stocks, bonds because of global security concerns.

5.0 National Debt Developments

Overview

The national debt stock (external and domestic) at the end of December 2005 was USD 9,383.9 million, representing a small increase from USD 9,303.1 million registered at the end of November 2005. The increase is mainly attributed to exchange rates fluctuations, accumulation of arrears and new borrowing to finance Government budget. During the same period, HIPC debt relief amounting to USD 5.9 million was realized in the form of debt service reduction from multilateral institutions.

External Debt

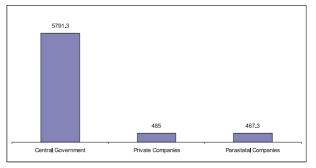

External debt committed as at the end of December 2005 amounted to USD 8,153.7 million, representing an increase of USD 14.8 million (0.2 percent) from USD 8,138.9 million recorded at the end of November 2005. Out of committed debt, USD 6,743.6 million (82.7 percent) was disbursed outstanding debt (DOD) and USD 1,410.1 million (17.3 percent) was committed undisbursed debt. Likewise, external debt stock increased by 52.4 million (0.7 percent) from USD 7,879.4 million recorded at the end November 2005 to USD 7,931.8 million at the end of December 2005. The increase in external debt is mainly explained by exchange rates fluctuations and accumulation of arrears.

Profile of Disbursed Outstanding Debt (DOD)

Analysis of disbursed outstanding debt by borrower category indicates that Central Government remained the largest borrower with a total debt of USD 5,791.3 million (85.9 percent) followed by the private sector with USD 485.0 million (7.2 percent). Parastatal companies held debts worth USD 467.3 million, representing 6.9 percent of the total debt (Chart 5.1).

Chart 5.1: The DOD By Borrower Category as at end of December 2005

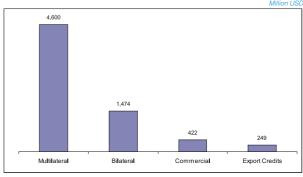

Analysis of disbursed outstanding debt by creditor category shows that USD 4,599.6 million (68.2 percent) is owed to multilateral institutions and USD 1,473.6 million (21.9 percent) to bilateral creditors. The remaining debts amounting to USD 421.6 million (6.3 percent) and USD 248.8 million (3.7 percent) were commercial and export credits respectively (Chart 5.2).

Chart 5.2: DOD by Creditor Category as at end of December 2005

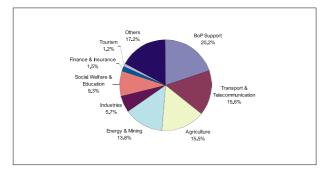

The disbursed outstanding debt by use of funds indicates that USD 1,363.4 million (20.2 percent) was disbursed in the form of Balance of Payments Support. Transport & Telecommunication accounted for USD 1,049.6 million (15.6 percent), Agriculture USD 1,042.5 million (15.5 percent) and Energy & Mining USD 930.7 million (13.8 percent). Social Welfare & Education, Industries, Finance & Insurance and Tourism accounted for USD 627.6 million (9.3 percent), USD 387.1 million (5.7 percent), USD 101.9 million (1.5 percent) and USD 79.5 million (1.2 percent) of the total debt respectively. The remaining USD 1,163.9 million (17.3 percent) was absorbed by other activities (Chart 5.3).

Chart 5.3: DOD By Use of Funds as at end of December 2005

External Debt Service Payments

Actual debt service payments during the month under review amounted to USD 11.0 million against the scheduled amount of USD 23.9 million. Lower debt service payments were a result of HIPC debt relief and accumulation of arrears on non-serviced debts (Table 5.1).

HIPC Debt Relief Multilateral Debt Relief

During the month under review Tanzania realised HIPC debt relief amounting to USD 5.9 million, out of which, USD 4.8 million was from IDA, USD 0.8 million from IMF, 0.1 million from NODF and USD 0.2 million was from EIB and IFAD.

Bilateral Debt Relief

Debt relief received from Paris Club bilateral creditors as at the end of December 2005, remained at the same level of USD 858.7 million. Likewise, debt relief received from Non Paris Club bilateral creditors remained unchanged at the level of USD 184.6 as reported in the previous month (Table 5.2).

Domestic Debt

Domestic debt stock at the end of December 2005 stood at TZS 1,692.5 billion equivalent to USD 1,452.1 million. This represents an increase of TZS 8.1 billion from TZS 1,684.4 billion registered at the end of November 2005. The increase was due to Government financing.

Out of the total domestic debt stock, Government securities amounted to TZS 1,675.8 billion (99.0 percent), out of which, Government Bonds, Treasury bills, Government stocks and Tax Reserve Certificates were TZS 802.0 billion. TZS 693.8 billion, TZS 180.0 billion and TZS 0.1 billion respectively. Other debts amounted to TZS 16.5 billion (1.0 percent) (Chart 5.4).

Chart 5.4: Government Domestic Debt by Instruments as at end of December 2005

Billion TZS

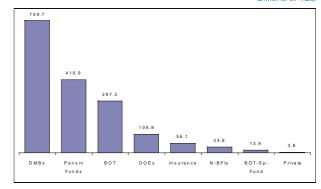

Domestic Debt by Creditor Category

Commercial banks remained the leading government creditors by holding 44.9 percent of total domestic debt followed by Pension Funds with 24.8 percent, Bank of Tanzania 17.6 percent, Other Official Entities 6.3 percent, Insurance companies 3.3 percent, Non-Bank Financial Institutions 2.1 percent, BOT Special Funds and private sector altogether held the remaining 1.0 percent (Chart 5.5).

Chart 5.5: Government Domestic Debt by Creditor Category as at end of **December 2005**

Billions of TZS

Domestic Debt Service

During the month under review TZS 118.6 billion fell due for payment. Out of this amount TZS 17.4 billion, being interest, was paid out of government revenue, while principal amounting to TZS 101.2 billion was rolled over.

6.0 Economic

Developments in Zanzibar

Budgetary performance

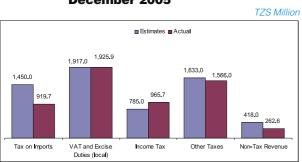

During December 2005, the Zanzibar Government budgetary performance recorded an overall deficit of TZS 2.2 billion on cheques issued basis and a deficit of TZS 1.8 billion on cheques cleared. The budget deficit was exclusively financed by the donor funds to the tune of TZS 1.8 billion.

Revenue Performance

During December 2005 revenue outturn amounted to TZS 5.6 billion, below the target amount of TZS 6.2 billion. The under performance was on account of decline in revenue from import duties, other taxes category and non-tax revenue. Tax revenue reached TZS 5.4 billion against the target of TZS 5.8 billion, while non-tax revenue amounted to TZS 0.2 billion below the target TZS 0.4 billion. Revenue performance by category is shown in Chart 6.1.

Cumulatively, total revenue collection from July 2005 to December 2005 amounted to TZS 32.7 billion, below the target of TZS 33.9 billion.

Chart 6.1: Government Revenue by Source December 2005

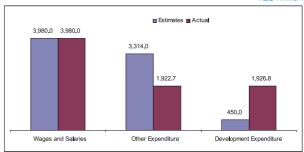

Expenditure performance

During December 2005, expenditure for the Zanzibar Government amounted to TZS 7.8 billion, slightly higher than the ceiling of TZS 7.7 billion, due to inclusion of expenditures on donor funded development projects. Out of the total expenditure, recurrent expenditure amounted to TZS 5.9 billion and the balance was went to development projects. Wages and salaries were in line with target, amounted to TZS 4.0 billion, accounting for 67.8 percent of total recurrent expenditure or 50.9 percent of total expenditure.

On cumulative basis, during July to December 2005, Government expenditure amounted to TZS 56.0 billion, against the projected ceiling of TZS 53.9 billion due to consideration of expenditure pertaining to donor funded development expenditure (**Chart 6.2**).

Chart 6.2: Government Expenditure by Components-December 2005

Debt Developments

Slight decrease in Public Debt

Zanzibar total debt as at end-December 2005, stood at TZS 175.3 billion; having declined marginally by 1.5 percent, from TZS 177.9 billion recorded in November 2005. The decline was mainly attributed to partial payment of amounts due to pensioners. The total debt represented 50.9 percent of GDP.

External debt was the largest component, amounted to TZS 105.6 billion, accounting for 60.2 percent of total debt, while domestic debt amounted to TZS 69.7 billion, representing 39.8 percent of total debt.

Domestic Debt

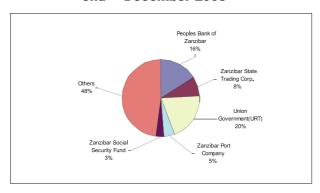

During the period under review, domestic debt increased marginally by 0.2 percent to TZS 69.7 billion from TZS 69.5 billion recorded in the previous month; on account of new debts and arrears due to pensioners and new retirees.

Domestic Debt by Creditor

Analysis of domestic debt by creditor reveals that, the Union Government debt stood at TZS 13.6 billion, representing 19.5 percent of total domestic debt. Claims by Peoples Bank of Zanzibar (PBZ), Zanzibar State Trading Company (ZSTC), and Zanzibar Port Company (ZPC) amounted to TZS 11.4 billion, TZS 5.2 billion and TZS 3.3 billion, accounting for 16.4 percent, 8.1 percent and 4.7 percent of total domestic debt, respectively. Debt due to Zanzibar Social Security Fund (ZSSF) amounted to TZS 2.2 billion or 3.1 percent of total domestic debt, while claims by Other domestic creditors (domestic suppliers and pensioner's claims) amounted to TZS 33.5 billion representing 48.1 percent of total domestic debt (Chart 6.3).

Chart 6.3: Domestic debt by Creditor as at end – December 2005

Domestic Debt by instruments

The profile of domestic debt by instruments depicts that long-term loans and Government stocks remained at TZS 11.4 billion and TZS 5.9 billion, representing 16.4 percent and 8.5 percent of total domestic debt respectively. Treasury bills remained at TZS 6.0 billion representing 8.6of total domestic debt, while treasury bonds stood at 8.8 billion or 12.7 percent. Other debt instruments (suppliers credits, pensioners claims) increased by 0.5 percent to TZS 37.4 billion or 53.7 percent of total domestic debt, due to new debts and accruing arrears of government creditors mainly pensioners.

Domestic debt by maturity

Debt maturing in less than a year remained at TZS 20.7 billion or 29.7 percent of total domestic debt same as recorded in previous month. Debt with maturity of between 1 to 2 years stood at TZS 8.8 billion, accounting for 12.7 percent of total domestic debt, while debt maturing between 2 - 5 years remained at TZS 1.3 billion or 1.9 percent of total domestic debt. Debts with "undetermined maturity" (gratuity, pension claims, and domestic suppliers' claims)

amounted to TZS 38.9 billion, representing 55.7 percent of the total domestic debt.

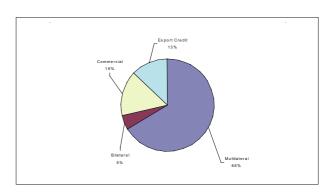

External Debt

Zanzibar's external debt remained stagnant; stood at TZS 105.6 or USD 90.7 million at end December 2005; same as was in previous month. However, in local currency the debt decreased by 2.6 percent due appreciation of local currency

External Debt by Creditor Category

During the period under review, debt due to multilateral creditors stood at TZS 69.8 billion or USD 60.0 million, representing 66.1 percent of total external debt. Bilateral and commercial debts recorded TZS 5.4 billion or USD 4.6 million and TZS 16.2 billion or USD 14.5 million accounting for 5.1 percent and 16.0 percent of total external debt, respectively. Export credit amounted to TZS 13.5 billion or USD 11.6 million, accounting 12.9 percent of total external debt (Chart 6.4).

Chart 6.4: External debt by Creditor as at end
- December 2005

External Debt by Maturity

The composition of external debt by maturity shows that, debts maturing beyond 20 years period was dominant and amounted to USD 56.4 million or 62.1 percent of total external debt. Debt maturing between 5 to 10 years ranked second and stood at USD 29.5 million, accounting for 32.5 percent of external debt, while debts maturing between 10 to 20 years amounted to USD 4.9 million or 5.4 percent.

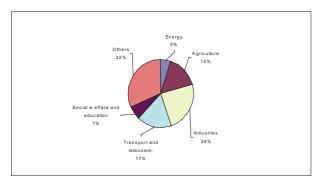

External debt - Disbursements by Use of Funds

During the review period, the disbursed external debt funds show that USD 21.7 million was channelled in industrial sector, USD 5.2 million in Transport and telecommunications,

USD 14.0 millions in agriculture, USD 4.8 in energy, where as Other uses and Social welfare utilized USD 28.8 and USD 6.0 millions respectively. The position was as per **Chart 6.5.**

Chart 6.5: External debt by Use of Funds as at end – December 2005

Trade Developments External Trade Performance

During December 2005, Zanzibar's trade balance (goods and services) improved to a deficit of USD 5.64 million, from USD 6.76 million registered in the preceding month due to improved performance in export of goods and services, coupled with the decrease in imports of goods. During 2005, the trade balance deficit worsened by 16.3 percent over the previous year position mainly on account of increase in import bill (Table 6.1).

Exports Performance

During the month under review, export proceeds from goods and services increased to USD 7.7 million from USD 7.2 million registered in the previous month. On annual basis, export earnings improved remarkably to USD 85.3 million during 2005 from USD 57.9 million in the previous year. The improvement was on account of higher services inflows, which surged to as high as USD 73.6 million from USD 44.5 million, representing 86.3 percent of total export earnings. Exports of cloves fetched USD 8.9 million, accounting for 10.5 percent of total exports, while seaweeds realised USD 1.1 million, accounting for 1.3 percent of total exports.

Imports Performance

Zanzibar goods imports (c.i.f) during December 2005 declined to USD 8.2 million from USD 9.8 million recorded in the preceding month, largely on account of a decrease in importation of capital and intermediate goods. Capital goods imports decreased following temporary slack in construction activities, while the decline in intermediate goods was marked in the importation of oil products due to supply logistics bottlenecks.

During 2005, the Zanzibar import bill increased to USD 78.6 million from USD 75.1 million of the previous year on account of increase in building, construction and machinery imports to cater for the expanding construction industry. The hike in world oil prices also contributed to the increase in import bill during the year (Table 6.2).

Services Account

Zanzibar services account balance (net) registered a lower surplus of USD 0.5 million in December 2005 compared with USD 1.4 million recorded in the previous year, largely due to decline in services receipts from tourism sector coupled with an increase in foreign payments. Specifically, service payments increased by 15.4 percent to USD 5.8 million from USD 5.0 million, while services receipts declined by 0.8 percent to USD 6.3 million from USD 6.4 million. On annual basis, as at end of December 2005, the services account recorded a surplus of USD 17.3 million as opposed USD 18.4 million registered in the previous corresponding period.

Notes:

- 1) Imports data (f.o.b) for 2001 have been revised using new ratios for freight and insurance services.
 2) Following changes in the ratios of freight and insurance services to the total imports (c.i.f),

- 2) Following changes in the ratios of freight and insurance services to the total imports (c.i.f), figures for service account have consequently been revised.
 3) GDP-Gross Domestic Product, mp-Market price, CAB-Current Account Balance, p = provisional 4) p = provisional data, subject to revision
 5) Net capital account has changed following the removal of the debt forgiveness.
 The exceptional financing has changed following the inclusion of the reschuled and forgiven debt. The changes are according to the requirement of the BPM5.

NB. Multilateral*: multilateral arrears represents private sector arrears 1) During the period (2) End of December 2005 cummulative.

GLOSSARY

Average Inflation Rate

This is calculated as the average of the inflation rates during the fiscal year or the calendar year

Currency in Circulation Outside Banks

Notes and coin accepted as legal tender in the domestic economy, excluding amounts held by the banking system.

Discount Rate

The rate of interest the Bank of Tanzania charges on Loans it extends to Deposit Money Banks and government overdraft. It is derived from the weighted average yield of Treasury bills of all maturities plus five-percentage points

Exchange Rate

This is the price at which one currency can be purchased with another currency, e.g. TZS per USD.

Lombard Facility

The Bank introduced Lombard facility on 1st December 2003, as an overnight facility to enable commercial banks to borrow at their own discretion, through pledging of eligible government securities as collateral.

Lombard Rate

This is the rate payable for the use of the Lombard Facility, which is also used as signalling mechanism for the Bank of Tanzania's monetary policy stance. The rate is based on prevailing discount rate, REPO or inter-bank rates, depending on whichever is higher.

Money Supply, M

The sum of currency in circulation outside the banks and deposits of Depository Corporations, are defined in various concepts of money supply in the narrower and broader sense, i.e., narrow money (M1), broad money (M2), and extended broad money (M3).

M1, Narrow Money,

Consists of currency in circulation outside banks and demand deposits.

M2, Broad Money

Is equivalent to narrow money (M1) plus time deposits and savings deposits.

M3, Extended Broad Money

Consists of broad money (M2) plus foreign currency deposits.

Nominal Exchange Rate

It is the price at which actual transactions in foreign exchange markets occur.

Non-Food or Underlying Inflation Rate

This is a measure of price movements caused by factors other than food prices. It is an important measure, which provides better indication of the effectiveness of monetary policy on inflation since price movements in these items are caused largely by monetary policy.

Repurchase Agreement (REPO)

These are agreements to purchase/sale by the BoT government securities from/to financial institutions at agreed rate for a specified period, with an understanding that the financial institutions will repurchase/resell the securities to the BoT at the end of the period.

Reserve Money (M0)

The Central Bank's liabilities in the form of: (1) currency in circulation outside the Bank of Tanzania and (2) deposit money banks' deposits with the BoT are referred to as Base money, or reserve money.

Seasonally Adjusted Indicators

Seasonal movements or seasonal variations, refer to identical, or almost identical, patterns, which a time series appears to follow during corresponding months (quarters) of successive years. Such movements are due to recurring events, which take place annually, e.g. the harvest season. Seasonally adjusted indicators show the impact of non-seasonal influences on a time series.

Weighted Annualised Yields of Treasury Bills of all Maturities

This is the average yield of Treasury bills, which is weighted by the volume sold of 91-day, 182-day, and 364-day Treasury bills, expressed in percentage per year.

Bring your investment into the ideal growth environment
