1.0 Global Economic Situation

Recent review of global economic condition made by the IMF has raised growth prospects in 2025 due to front-loading ahead of tariffs, lower than projected effective tariff rates, improved financial conditions, and fiscal expansion in some economies. Recent diplomatic efforts and provisional agreements also appear to have eased trade tensions, thereby supporting an improved outlook. In July 2025, the IMF raised global growth projections to 3.0 percent for 2025 from 2.8 percent made in April, and to 3.1 percent for 2026 from 3.0 percent¹. The report indicates variations in growth projections across regions, with advanced economies expected to grow by 1.9 percent in 2025, while growth in emerging and developing economies is projected to slow to 4.1 percent from 4.3 percent. Although global policy uncertainty has declined, the World Trade Uncertainty Index remains elevated (Chart 1.1a and Chart 1.1b).

Inflation continued easing in June 2025. In most advanced and emerging markets, inflation was within central bank target ranges, reflecting underlying economic resilience (Chart 1.2). However, risks persist in the event trade agreements unravel, potentially reigniting tariff conflicts. In the EAC and SADC regions, inflation trends have generally aligned with regional benchmarks, though a few member states experienced elevated inflation due to rising food prices (Chart 1.3 and Chart 1.4).

Chart 1.1b: Trade Policy Uncertainty Index

Source : <https://www.policyuncertainty.com/trade>

Commodity prices exhibited varied trends in June 2025. Crude oil prices rose amid heightened geopolitical tension in the Middle East, while gold prices surged, largely due to increased safe-haven demand linked to geopolitical risks and uncertainty surrounding the expiration of the United States tariff freeze in July 2025². Agricultural and related commodities also showed mixed performance: fertilizer prices spiked on strong global planting activity and risk premiums in the Middle East; palm oil prices edged up, supported by firm demand and rising edible oil prices; and wheat prices increased on strong demand. In contrast, cotton and sugar prices remained stable, while Arabica and Robusta coffee prices declined due to ample supply during

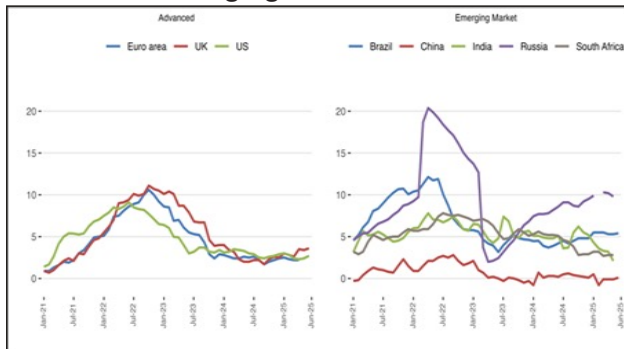

² *The reinstatement of U.S. tariffs, initially scheduled for implementation on 9th July 2025, was subsequently postponed to 1st August 2025. <https://www.whitehouse.gov/fact-sheets/2025/07/fact-sheet-president-donald-j-trump-continues-enforcement-of-reciprocal-tariffs-and-announces-new-tariff-rates/>

2.0 Domestic Economic Performance

2.1 Inflation

Inflation remained low albeit with a slight uptick on account to an increase in prices of food and non-alcoholic beverages. Twelve-month headline inflation was 3.3 percent in June 2025 compared with 3.2 percent in the preceding month (Table 2.1.1). The outturn aligns with both national target and regional convergence benchmarks set by SADC and EAC (Chart 2.1.1).

Source: National Bureau of Statistics and Bank of Tanzania computations

Food inflation (food and non-alcoholic beverages) rose to 7.3 percent in June 2025, from 5.6 percent in May 2025. Much of the increase was attributed to rising prices of some staple and alternative foods (Chart 2.1.2a and Chart 2.1.2b). The increase was notable in maize flour, millet flour, beef and fish. To ease price pressures, the National Food Reserve Agency (NFRA) released a net total of 32,414 tonnes of maize during the month. This action reduced food reserves slightly from 509,990 tonnes in May 2025 to 477,923 tonnes in June 2025. Despite the decrease, the stock level remained well above the 340,479 tonnes recorded during the same period in 2024 (Table 2.1.2).

While core inflation continued to ease, inflation for unprocessed foods surged to 8.6 percent in June 2025, from 5.5 percent in the previous month (Chart 2.1.3). Notably, unprocessed food remained the primary driver of headline inflation, highlighting the influence of food prices on overall inflation trends (Chart 2.1.4).

Chart 2.1.3: Twelve-Month Inflation

Source: National Bureau of Statistics and Bank of Tanzania computations

Chart 2.1.4: Contribution to Overall Inflation

Source: National Bureau of Statistics and Bank of Tanzania computations

Inflation for energy, fuel, and utilities decelerated to 2.1 percent in June 2025, from 6.1 percent in the previous month. The decline was primarily attributed to the continued softening of wood charcoal prices. In addition, prices of key petroleum products—including petrol, diesel, and kerosene—have been on a downward trend since April 2025, in line with global oil market developments (Chart 2.1.5). This moderation has played a significant role in stabilizing overall headline inflation.

2.2 Monetary policy

Bank of Tanzania Monetary Policy Framework

The Bank of Tanzania is mandated to formulate and implement monetary policy, among others. Monetary policy involves actions or decisions taken to influence the amount of money circulating in the economy, which contributes to the determination of interest rates banks and financial institutions offer to customers, thereby affecting inflation and output growth.

Monetary policy's objectives are to maintain price stability, defined as a low and stable inflation rate over time, and to support economic growth. Inflation is measured as an annual change in the consumer price index, expressed as a percentage. In the medium term (up to 5 years), the inflation target is 3-5 percent.

To fulfil these objectives, the Monetary Policy Committee (MPC) assesses economic conditions and determines the policy rate—Central Bank Rate (CBR)—which is consistent with maintaining low and stable inflation and supporting economic growth. The Bank of Tanzania implements monetary policy by steering the 7-day interbank interest rate, which is the operating target variable, along the CBR.

To align the operating target with the policy rate, the Bank uses a variety of monetary policy instruments. The main instruments are repurchase agreements (repo and reverse repo), 35-day and 91-day Treasury bills, statutory minimum reserve requirement ratio (SMR), and sale or purchase of foreign currency in the interbank foreign exchange market. There are also standing lending facilities—intraday and Lombard loans—that are granted to all banks on demand to facilitate smooth and efficient settlement of payments.

In implementing the Policy, the Bank exercises a high degree of transparency in its actions and decisions. The decisions of the MPC, which include setting policy rates, are communicated to banks through post-MPC meetings with the Chief Executive Officers of banks and the public through the media. In addition, the Bank publishes MPC meeting statements, the Monetary Policy Report, and other periodic reports containing outcomes of monetary policy implementation, monetary policy stance, decisions on policy rate, and the performance of the economy at large. The reports are available on the Bank of Tanzania website (www.bot.go.tz).

During June 2025, the Bank continued to implement the monetary policy in line with the April 2025 Monetary Policy Committee (MPC) decision to maintain the Central Bank Rate (CBR) at 6 percent for the quarter ending June 2025. This decision aimed to cushion the domestic economy against adverse spillover effects from elevated trade tariffs and ongoing geopolitical tensions, while simultaneously ensuring sufficient liquidity to sustain private sector credit growth and anchor

inflation expectations within the 3-5 percent target range.

Despite adequate overall liquidity, the 7-day interbank rate remained persistently near the upper band of the CBR corridor, reflecting segmentation in the money market (Chart 2.2.1). The ongoing reforms on the collateral management framework and interbank market structure are expected to improve liquidity allocation and reduce interbank disparities.

Chart 2.2.1: 7-Day IBCM Interest Rate

Source: Bank of Tanzania and banks

Extended broad money supply (M3) recorded an annual growth of 18.7 percent in June 2025, slightly above the 18.3 percent recorded in May 2025, reflecting sustained expansion in credit to the private sector (Chart 2.2.3, Chart 2.2.4, and Table 2.2.1). The growth of private sector credit moderated to 15.9 percent in June, from a peak of 17.1 percent in May 2025, partly associated with low demand for credit due to end of financial year obligations mainly tax payments (Chart 2.2.6).

Credit extended to agricultural activities recorded the highest annual growth at 30.2 percent, reflecting a strong demand within the sector. Building and construction, along with transport and communication, followed closely, each registering growth rates of 25.7 percent (Table 2.2.2).

In terms of composition, personal loans remained the largest component of private sector credit, accounting for 35.3 percent of the total. These loans are primarily extended to micro, small, and medium-sized enterprises for productive purposes and continue to be a major contributor to overall credit expansion. Trade and agriculture sectors accounted for 13.6 percent and 14 percent of total private sector credit, respectively (Chart 2.2.6).

2.3 Interest Rates

Interest rates remained broadly stable during the month. The overall lending rate averaged 15.23 percent in June 2025, slightly increasing from 15.18 percent in May (Table 2.3.1). Lending rates to prime customers (negotiated rates) declined marginally to 12.68 percent, down from 12.99 percent.

On the deposit side, interest rates exhibited a mild uptick. The overall deposit rate rose to 8.74 percent, compared to 8.58 percent in the previous month. Negotiated deposit rates increased to 11.21 percent, up from 10.64 percent in May. This reflects stronger demand for liquidity during the month, driven by rising credit needs and end-of-financial-year obligations. As a result, the short-term interest rate spread between lending and deposit rates narrowed to 5.90 percentage points in June 2025, down from 6.49 percentage points recorded in June 2024.

2.4 Financial Markets

Government Securities Market

The Bank successfully conducted auctions for 20-year and 25-year Treasury bonds, attracting a combined tender size of TZS 638.7 billion. The proceeds were primarily for financing government budgetary operations. The auctions were significantly oversubscribed, attracting bids worth TZS 1,232.9 billion, of which TZS 322.4 billion were accepted. Driven by strong market demand, the weighted average yields declined to 14.50 percent for the 20-year bond and 14.80 percent

for the 25-year bond. Having met the domestic financing requirements for the 2024/25 fiscal year, the Bank refrained from issuing any short-term instruments. Thus, no Treasury bill auctions were held in June 2025.

Interbank Cash Market

The interbank cash market (IBCM) remained active in facilitating liquidity distribution among banks. During the review month, total market turnover reached TZS 2,873.9 billion, down from TZS 3,267 billion in May, but significantly higher than TZS 1,277.6 billion recorded in June 2024 (Chart 2.4.2). The market activities were dominated by overnight placements, accounting for 37.3 percent of total trades, followed closely by the 7-day tenor, at 26.5 percent. The overall IBCM interest rate slightly eased to 7.93 percent, compared to 7.98 percent in May 2025, reflecting market stability for short-term funding.

Chart 2.4.2: Interbank Cash Market Transactions

Source: Bank of Tanzania

Note: LHS denotes left-hand scale; and RHS, right-hand scale

Interbank Foreign Exchange Market

Liquidity conditions in the Interbank Foreign Exchange Market (IFEM) continued to improve in June 2025, supported by the onset of seasonal inflows from cash crops and an increase in gold exports. Owing to improved foreign exchange liquidity, the Bank's intervention which is in accordance with the Foreign Exchange Intervention Policy, declined to USD 6.3 million,

from USD 53 million in the previous month. Total IFEM turnover rose to USD 121.50 million, compared to USD 110.8 million in May and USD 9.2 million in June 2024 (Chart 2.4.3).

The Tanzanian Shilling strengthened against major currencies, trading at an average of TZS 2,631.56 per USD in June, up from TZS 2,698.42 per USD in the previous month. Accordingly, the annual depreciation rate of the Shilling slowed significantly to 0.21 percent, compared to 3.82 percent in May and 12.5 percent in June 2024.

Chart 2.4.3: Developments in the IFEM

Source: Bank of Tanzania

Note: LHS denotes left-hand scale; and RHS, right-hand scale

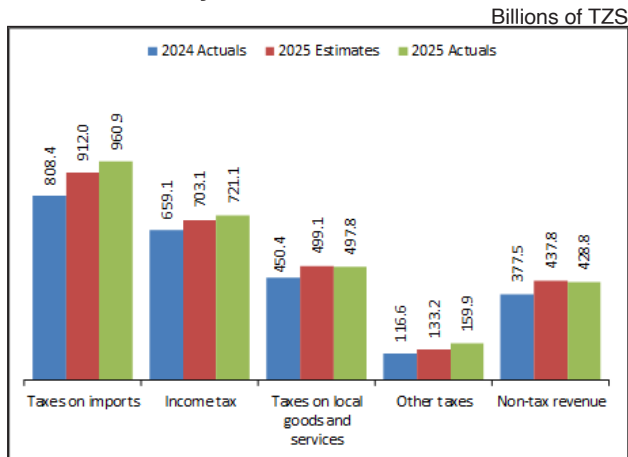

2.5 Government Budgetary Operations

In May 2025, revenue collections outperformed the monthly target. Total government revenue amounted to TZS 2,880.2 billion, surpassing the target by 3.1 percent. Of this amount, the Central Government contributed TZS 2,768.5 billion, accounting for 96.1 percent of total domestic revenue and surpassing the target of TZS 2,685.2 billion.

Tax revenue continued to demonstrate strong performance, reaching TZS 2,339.7 billion, which was 4.1 percent above the monthly target. This outcome reflects the positive impact of sustained efforts in enhancing tax administration. Meanwhile, non-tax revenue totaled TZS 428.8 billion, falling short of the target of TZS 437.8 billion (Chart 2.5.1).

Chart 2.5.1: Central Government Revenue in May

Source: Ministry of Finance and Bank of Tanzania calculations
Note: Actual figures for 2025 are provisional

The Government continued to align its expenditures with available resources. In May 2025, total expenditure amounted to TZS 3,150.4 billion, of which TZS 2,213.1 billion was recurrent spending and TZS 937.3 billion was allocated to development projects (Chart 2.5.2).

Chart 2.5.2: Central Government Expenditure in May

Note: Actual figures for 2025 are provisional

2.6 Debt Developments

The national debt stock stood at USD 46,586.6 million at the end of June 2025, a 1 percent higher compared with the stock recorded at the end of May 2025. Of the total debt stock, 70.7 percent was external debt.

External Debt

The external debt stock (public and private) recorded a monthly increase of 0.1 percent to USD 32,955.5 million at the end of June 2025. Of the total amount, 85.4 percent constituted public debt, while the remaining portion was attributed to private sector debt (Table 2.6.1). External loan disbursed during the month amounted to USD 868.4 million, primarily directed to the central government. External debt service payments amounted to USD 234.4 million, of which USD 173.6 million was allocated to principal repayments, while the remainder covered interest payments.

The composition of external debt by creditor remained largely unchanged from both the previous month and the corresponding period in 2024, with multilateral institutions continuing to hold the largest share, followed by commercial lenders (Table 2.6.2). Transportation and telecommunications sectors remained the largest holders of disbursed outstanding debt. In terms of currency composition, the US dollar continued to dominate, followed by the Euro (Tables 2.6.3 and 2.6.4).

Table 2.6.1: External Debt Stock by Borrowers

Domestic Debt

As of the end of June 2025, the stock of domestic debt stood at TZS 35,502.8 billion, a monthly increase of 0.9 percent (Chart 2.6.1). The increase was primarily driven by the issuance of government securities, which exceeded redemptions. Treasury bonds continued to dominate the domestic debt portfolio, with commercial banks and pension funds remaining the main domestic creditors to the Government (Tables 2.6.5 and 2.6.6).

During June 2025, the Government raised a total of TZS 845.9 billion from the domestic market through the issuance of Government bonds to finance the budget shortfall (Chart 2.6.2). Meanwhile, the Government spent a total of TZS 936.96 billion on domestic debt service, of which TZS 660.13 billion was principal repayments and TZS 276.8 billion was interest payments.

Chart 2.6.2: Issued Government Securities for Financing Purposes

2.7 External Sector Performance

The external sector continued to show improvement in the year ending June 2025, as evidenced by a reduction in the current account deficit to USD 2,117.6 million from USD 2,797.7 million in the corresponding period of 2024 (Table 2.7.1). The improvement was primarily driven by a larger trade surplus, resulting from a stronger increase in exports of goods and services relative to imports.

Foreign exchange reserves increased to USD 5,971.5 million at the end of June 2025, from USD 5,345.5 million recorded in the same period of 2024. This level of reserves is adequate to cover 4.8 months of projected imports of goods and services, surpassing both national and EAC adequacy benchmarks (Chart 2.7.1).

Exports

During the year ending June 2025, exports of goods and services rose markedly by 17.7 percent to USD 16,926.4 million compared to USD 14,380.2 million in the corresponding period of 2024. This growth was largely driven by increased exports of gold exports, along with significant expansion in travel (tourism) and transportation services.

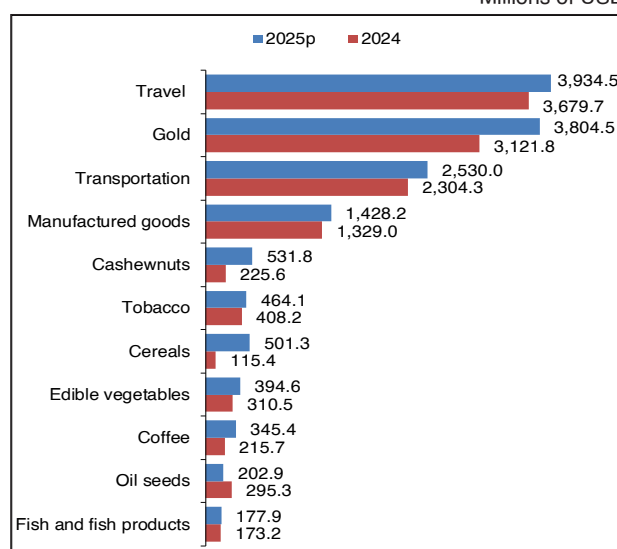

Exports of goods, which accounted for 57.9 percent of total exports of goods and services, rose to USD 9,816.1 million in June 2025, up from USD 7,801.5 million in June 2024 (Chart 2.7.2). This growth was largely driven by increased exports of gold, cashew nuts, tobacco, horticultural products, and coffee. Gold exports alone increased to USD 3,804.5 million from USD 3,121.8 million,

supported by favourable global market prices and purchases by the Bank of Tanzania.

Traditional exports grew to USD 1,461.7 million compared to USD 1,036 million, driven by higher export volumes of cashew nuts, tobacco, and coffee. Manufactured exports also recorded gains, particularly in iron and steel, edible oil, and fertilizer. Notably, cereal exports—led by maize and rice—more than tripled to USD 501.3 million from USD 115.4 million, driven by rising demand from neighbouring countries. On a monthly basis, goods exports were USD 618.3 million in June 2025, compared with USD 697 million in June 2024, with gold and tobacco remaining the key contributors.

Chart 2.7.2: Exports of Goods and Services

Millions of USD

Source: Tanzania Revenue Authority and Bank of Tanzania computations

Note: p denotes provisional data

Service receipts rose to USD 7,110.4 million in the year ending June 2025, from USD 6,578.7 million in the corresponding period of 2024. The growth was primarily driven by increased activity in travel (tourism) and transport services. The rise in travel receipts was largely attributed to a 10 percent increase in international tourist arrivals, which reached 2,193,322—up from 1,994,242 in the corresponding period of 2024—reflecting a global rebound in tourism across all regions (Chart 2.7.3).

Chart 2.7.3: Services Receipts by Category
Millions of USD

Note: Other services include construction, insurance, financial, telecommunication, computer and information, charges for the use of intellectual property, government, personal and other business services

Imports

Import of goods and services rose to USD 17,603.1 million in the year ending June 2025, from USD 16,144.9 million in the corresponding period of 2024 (Chart 2.7.4). The increase was primarily driven by greater inflows of industrial transport equipment and raw materials, alongside a rise in freight-related payments. Notably, oil imports, which account for approximately 17 percent of total goods imports, declined to USD 2,517.1 million from USD 2,802.2 million, mainly due to easing global prices. On a monthly basis, goods imports stood at USD 1,277.6 million in June 2025, compared to USD 1,008 million in June 2024.

Chart 2.7.4: Import of Goods and Services
Millions of USD

Source: Tanzania Revenue Authority and Bank of Tanzania computations

Note: p denotes provisional; o/w, of which; and * Include adjustment for unrecorded exports

Service payments increased to USD 2,894 million in the year ending June 2025, from USD 2,359.5 million recorded in 2024, largely attributed to increased freight payments (Chart 2.7.5). On a monthly basis, service payments reached USD 250.1 million in June 2025, compared to USD 189.3 million in June 2024.

Chart 2.7.5: Service Payments
Millions of USD

Source: Banks and Bank of Tanzania computations

Note: Other services include construction, insurance, financial, telecommunication, computer and information, government, personal and other business services

The primary income account recorded a deficit of USD 1,949.6 million in the year ending June 2025, up from USD 1,653.9 million in the previous year. This increase was mainly attributed to higher payments of income on equity and interest to non-residents. On a monthly basis, the primary income account registered a deficit of USD 132.9 million

in June 2025, slightly lower than the USD 145.6 million recorded in June 2024

The secondary income account recorded a surplus of USD 508.7 million, compared with USD 620.9 million in the corresponding period in 2024, due to a decrease in personal transfers. On a monthly basis, the surplus amounted to USD 30.7 million in June 2025 compared with USD 38.3 million in June 2024.

3.0 Economic Performance in Zanzibar

3.1 Inflation

Annual headline inflation eased to 4.1 percent in June 2025, from 4.2 percent and 5.7 percent recorded in the previous month and in the similar month of 2024, respectively (Table 3.1.1). The moderation was mainly attributed to a decline in food inflation, driven by lower prices of sugar, rice, fish, and flour—reflecting adequate food supply in the market. On a monthly basis, headline inflation was 0.5 percent in June 2025, from -0.1 percent in May 2025, but lower than 0.6 percent recorded in June 2024.

3.2 Government Budgetary Operations

In June 2025, the Government's domestic revenue and grants reached TZS 185.0 billion, surpassing the target by 26.1 percent. Of this total, 88.8 percent was domestic revenue, while the remainder comprised grants. Tax revenue amounted to TZS 162.2 billion, above the target by 33.1 percent, with all tax categories outperforming expectations. Non-tax revenue stood at TZS 20.5 billion, equivalent to 87.5 percent of the target (Chart 3.2.1).

Chart 3.2.1: Government Resources

Billions of TZS

Note: Other taxes include hotel and restaurant levies, tour operator levy, revenue stamps, airport, and seaport service charges, road development fund and petroleum. Levy

Government expenditure was TZS 431.6 billion in June 2025. Of this amount, TZS 160.8 billion was allocated to recurrent expenditure, while TZS 270.8 billion was directed toward development spending, reflecting the continued Zanzibar's Government commitment to the implementation of infrastructure projects (Chart 3.2.2).

Exports

Exports of goods and services grew by 19.3 percent to USD 1,200.4 million, from USD 1,006.6 million recorded in the year ending June 2024. This strong performance was largely driven by a surge in service receipts, particularly from tourism, which grew by 23.9 percent to USD 1,167.1 million, fuelled by a rise in tourist arrivals. The number of tourist arrivals increased to 798,605 from 663,444 recorded in the year ending June 2024 (Table 3.3.2). In contrast, the value of clove exports declined by 88.1 percent to USD 3.5 million from USD 28.9 million, reflecting the crop's cyclical production pattern. On monthly basis, exports of goods and services increased to USD 89.1 million from USD 74.9 million recorded in June 2024.

Imports

Imports of goods and services in the year ending June 2025 rose to USD 615.9 million, from USD 593.4 million in June 2024 (Table 3.3.1). The increase was mainly driven by a 21 percent rise in consumer goods imports to USD 69.1 million, particularly non-industrial transport equipment, and food and beverages. Likewise, import of capital goods rose by 11.3 percent to USD 68.9 million, on account of increased imports of machinery and mechanical appliances (Table 3.3.3). On monthly basis, imports of goods and services slightly increased to USD 47.5 million from USD 47.3 million recorded in June 2024.

Note: Multilateral arrears are those owed by the private sector; ¹ denotes debt flows during the period; ² stock position at the end of period; r, revised data; and p, provisional data

Glossary

Broad money (M2)

A definition of money that comprises narrow money (M1) plus domestic currency time and savings deposits of residents with banks in the country.

Central bank rate

Means the interest rate set by the Monetary Policy Committee and used by the Bank to implement or signal its monetary policy stance.

Core inflation

This measures the rate of change in prices of goods and services other than energy, utilities and unprocessed food, over a specified period. The unprocessed food items, energy and utilities are excluded since they are volatile and hence may be affected by non-monetary events, which do not constitute the underlying monetary inflation.

Currency in circulation outside banks

Notes and coins of Tanzanian shillings circulating outside the banking system, i.e., outside the Bank of Tanzania and other depository corporations.

Disbursed outstanding debt

This is the amount of a loan or credit that has already been disbursed to the borrower and has not yet been repaid or forgiven.

Discount rate

Means the rate of interest that the Bank of Tanzania charges to counterparties wishing to discount their Treasury bills for liquidity purposes. It uses the Bank policy rate, as a base, plus a loaded factor, which shall be determined and approved by the MPC from time to time depending on the liquidity situation in the economy.

Exchange rate

The price at which one unit of a currency can be purchased with another currency, for instance, TZS per US dollar.

Extended broad money (M3)

A definition of money that consists of broad money (M2) plus foreign currency deposits of residents with banks in the country.

External debt stock

The stock of a country's debt that is borrowed from foreign lenders through private commercial banks, foreign governments, or international financial institutions. It is the sum of public, publicly guaranteed, and private non-guaranteed long-term debt, use of IMF credit, and short-term debt, which includes all debt having an original maturity of one year or less and interest in arrears on long-term debt.

Food inflation

This is a measure of the rate of change in the price of food, both processed and unprocessed.

Gross official reserves

Gross official reserves consist of external assets that are readily available to and controlled by the Bank of Tanzania for direct financing of balance of payments, and for indirectly regulating the magnitude of balance of payments imbalances through intervention in foreign exchange markets. Gross official reserves comprise the Bank of Tanzania's holdings of monetary gold, Special Drawing Rights (SDRs), reserve position in the International Monetary Fund, and foreign exchange resources available to the Bank of Tanzania for meeting external financing needs.

Inflation

The rate at which the average level of prices of a basket of selected goods and services in an economy is increasing over a period. It is often expressed as a percentage. Inflation indicates a decrease in the purchasing power of a nation's currency.

Interbank cash market

A money market in which banks extend loans to one another for a specified term. Each transaction represents an agreement between the banks to exchange the agreed amounts of currency at the specified rate on a fixed date.

Interest rate-based monetary policy

This is a monetary policy approach used by central banks to control the level of inflation and economic growth by influencing the interest rates in the economy. In this approach, the Bank of Tanzania sets the policy rate (central bank rate) on quarterly basis to influence the cost and availability of credit in the economy and uses various instruments, such as open market operations, statutory minimum reserve requirements to affect the level of the liquidity in the economy.

Lombard facility

An overnight facility was established to enable banks to borrow from the Bank of Tanzania at their own discretion, by pledging eligible government securities as collateral.

Lombard rate

The Lombard rate is the interest rate charged by the Bank of Tanzania on loans extended to banks through the Lombard facility. It is set at the upper band of the Central Bank Rate (CBR) corridor.

Money supply

The sum of currency circulating outside the banking system and deposits of residents with banks is defined at various levels of aggregation. In Tanzania, three aggregates of money supply are compiled and reported, namely: narrow money (M1), broad money (M2), and extended broad money (M3).

Non-food inflation

This is a measure of price movements caused by factors other than food prices.

Narrow money (M1)

Consists of currency in circulation outside the

banking system plus demand deposits (cheque account) of residents with banks in the country.

National debt

Total national debt obligations that include public debt and private sector external debt.

Public debt

Debt payable or guaranteed by the Government. Tanzania's public debt has two main components, domestic debt (which is incurred principally to finance fiscal deficit) and external debt (which is raised primarily to finance development projects). It comprises the debt central government owes to foreign creditors and external obligations of government departments and agencies that are guaranteed for repayment by the Government).

Primary income account

It comprises income from compensation of employees, interest income, dividends and retained earnings from capital investments, rental income from the use of natural resources and other types of primary income including those that relate to insurance policy holders and pension funds.

Secondary income account

It entails transfers between residents and non-residents that correspond to the provision of a good, service, financial asset, or other non-produced asset with no corresponding return of an item of economic value.

Overnight interbank cash market

The component of the money market involving the shortest-term loan. Lenders agree to lend borrowers funds only "overnight" i.e. the borrower must repay the borrowed funds plus interest at the start of business the next day.

Repurchase agreements (repo)

An arrangement involving the sale of securities at a specified price with a commitment to repurchase the same or similar securities at a fixed price on a specified future date.

Reverse repo

An arrangement involving the buying of securities at a specified price with a commitment to re-sale the same or similar securities at a fixed price on a specified future date.

Reserve money (M0)

The Bank of Tanzania's liabilities in the form of currency in circulation outside the banking system, cash held by banks in their vaults and deposits of banks kept with the Bank of Tanzania in national currency. Reserve money is also referred to as base money, or monetary base or high-powered money.

Weighted yields of Treasury bills

This is the average yield of Treasury bills, which is weighted by the volume sold of 35-day, 91-day, 182-day, and 364-day Treasury bills, expressed in percentage per year.
