1.0 Prices and Food Stocks

1.1 Inflation

Headline inflation stabilized at 3.3 percent in August 2020 when compared with the preceding month, and was lower than 3.6 percent in August 2019 (Chart 1.1 and Table 1.1). The developments were driven by subdued food prices due to adequate food supply, stability of exchange rate, as well as prudent monetary and fiscal policies. On month-to-month, headline inflation was negative 0.5 percent in August 2020, same as in the corresponding month in 2019. Inflation is projected to remain low in 2020/21, ranging from 3.0 percent to 5.0 percent.

Chart 1.1: Twelve-month Inflation Rates

Source: National Bureau of Statistics and Bank of Tanzania computations

Twelve-month food and non-alcoholic beverages inflation eased to 3.7 percent in August 2020 from 3.8 percent in the preceding month, due to slowdown in prices of some food items following adequate food supply across the country. Similarly, non-food inflation slightly eased to 3.1 percent in August 2020 from 3.2 percent in the preceding month, due to moderation in prices of some items under clothing and footwear as well as housing equipment groups.

Energy and fuel inflation increased to 5.9 percent from 5.7 percent in July 2020. However, the rate was lower than 6.3 percent recorded in August 2019, largely associated with the slowdown in global economic activities following measures taken to contain spread of COVID-19. Core inflation¹ was 2.5 percent compared with 2.6 percent in the preceding month and 2.9 percent in August 2019.

1.2 Food Stocks

The stock of food held by the National Food Reserve Agency (NFRA) increased to 92,990.9 tonnes at the end of August 2020 from 90,255.0 tonnes held at the end of the preceding month. The increase was on account of purchases, consistent with seasonal harvests across the country. The stock was 35.9 percent higher than the amount held in the corresponding period in 2019 (Table 1.2). During August 2020, NFRA purchased 2,807.8 tonnes of maize and paddy to replenish its stocks and sold 71.9 tonnes of maize to Prisons

¹ Inflation of consumer goods and services excluding food and energy.

Department. The food stock comprised of maize grain, paddy and sorghum.

1.3 Prices of Food Crops

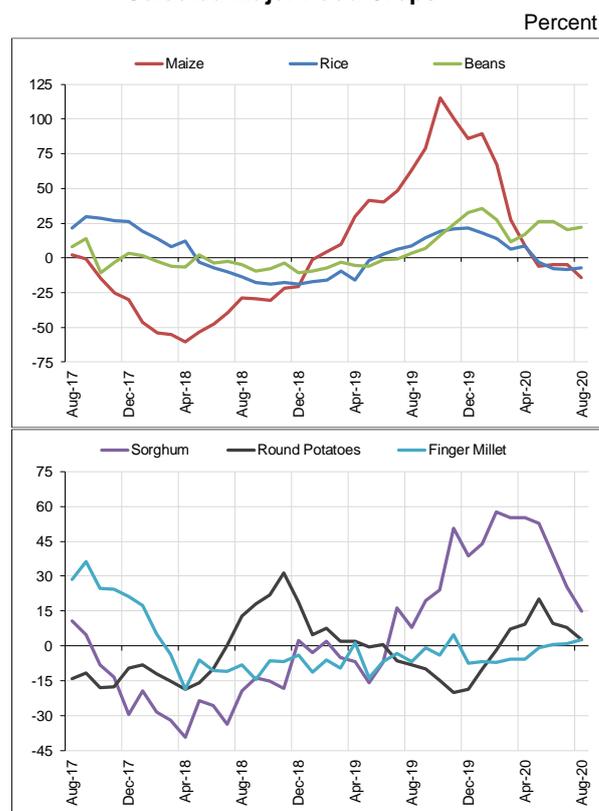

Average wholesale prices of all major food crops² decreased in August 2020 when compared to the preceding month, except for beans. This was on account of inflow of food to the market from the 2019/20 crop harvests (Table 1.3). Chart 1.2 depicts trends of prices of selected major food crops in the past three years.

Table 1.3: Wholesale Prices of Major Food Crops

Food crop	TZS per 100kg					
	Aug-19	Apr-20	May-20	Jun-20	Jul-20	Aug-20
Maize	66,110.5	59,845.0	55,707.2	56,914.0	58,362.0	56,560.1
Rice	158,675.4	181,636.0	162,682.9	152,259.0	148,991.7	147,143.9

1.4 Fuel Prices

In August 2020, average domestic pump prices of petroleum products were relatively low compared with the corresponding month in 2019, reflecting the decline in prices of oil in the world market due to slowdown in global economic activities occasioned by the outbreak of COVID-19. Domestic prices of petrol, diesel and kerosene declined by 15.2 percent, 15.5 percent and 15.9 percent, respectively, compared with the corresponding month in 2019. On month-to-month basis, domestic pump prices of all petroleum products were higher than in the preceding month attributed to increase in the world market oil prices and transportation costs. Chart 1.3 presents movements of petroleum products prices in the past three years.

² They include maize, rice, beans, sorghum, round potatoes and finger millet

Chart 1.3: Domestic Pump Prices

2.0 Money and Credit

2.1 Money Supply

Annual growth of money supply remained strong consistent with sustained accommodative monetary policy pursued by the Bank to support expansion of credit to various economic activities and ultimately economic growth. In the year ending August 2020, extended broad money supply (M3) grew by 10.5 percent, up from 8.5 percent in August 2019. Broad money supply (M2)—that excludes foreign currency deposits grew by 10.2 percent in the year ending August 2020, compared with 11.4 percent in August 2019 (Table 2.1 and Chart 2.1).

Chart 2.2: Annual Change in Major Sources of Money Supply

Source: Bank of Tanzania, banks and Bank of Tanzania computations

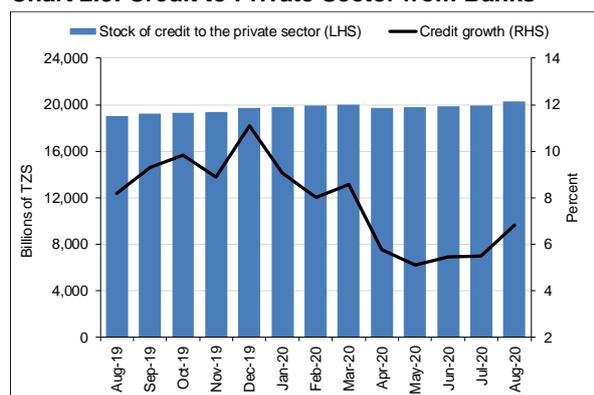

Note: NFA denotes net foreign assets

Foreign assets (net) of the banking system recorded an annual growth of 3.0 percent compared with a contraction of 1.5 percent in August 2019. The recorded growth was attributed to the increase in claims of banks to non-residents following increase in exports of goods, mainly from the mining sector.

Private sector credit recorded a strong growth, consistent with the Bank's effort to boost liquidity in the banking system. Credit to the private sector grew by 6.8 percent in the year ending August 2020, picking-up from 5.5 percent in preceding month (Chart 2.3). The increase in growth of credit to the private sector reflects a gradual normalization of economic activities from the

effects of COVID-19, coupled with re-opening of the economies of our main trading partners.

Chart 2.3: Credit to Private Sector from Banks

Source: Bank of Tanzania, banks and Bank of Tanzania computations

Note: LHS denotes left hand scale; and RHS, right hand scale

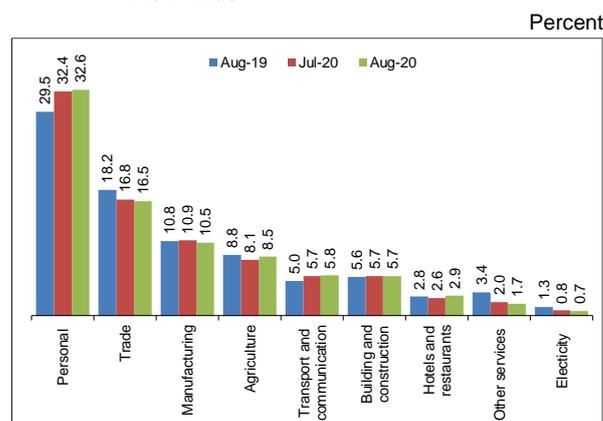

Economic activities that recorded strong credit growth include, transport and communication, personal loans often used for small and medium enterprises and hotels and restaurants. It is worth noting that hotels and restaurants recorded a positive growth of credit, bouncing back from a consecutive contraction recorded in the past two years (**Table 2.2**). In terms of share of outstanding credit, personal loans, trade and manufacturing continued to dominate, accounting for 32.6 percent, 16.5 percent and 10.5 percent, respectively (**Chart 2.4**).

Table 2.2: Annual Growth of Credit to Selected Economic Activities

Note: Other services include fishing, forest, hunting, financial intermediaries, mining and quarrying, real estate, mortgage, leasing, tourism, warehousing and storage, gas, water, education and health

2.2 Interest Rates

Banks' lending and deposit interest rates continued to ease in August 2020, responding to the impact of accommodative monetary policy and macro prudential measures that led to increase in loanable funds in the banking system. Overall lending rate averaged 16.58 percent in August 2020, a decrease of 19 basis points from the rate registered in August 2019. One-year lending rate decreased to an average of 15.30 percent from 16.34 percent. Overall time deposit rate averaged 6.38 percent compared with 7.03 percent, while one-year deposit rate was 8.35 percent compared with 8.87 percent (**Chart 2.5**). Consequently, the spread between one-year lending and deposit rates decreased to 6.69 percentage points in August 2020 from 7.47 percentage points in the corresponding month in 2019.

Chart 2.5: Selected Banks' Average Lending and Deposits Interest Rates

Source: Banks and Bank of Tanzania computations

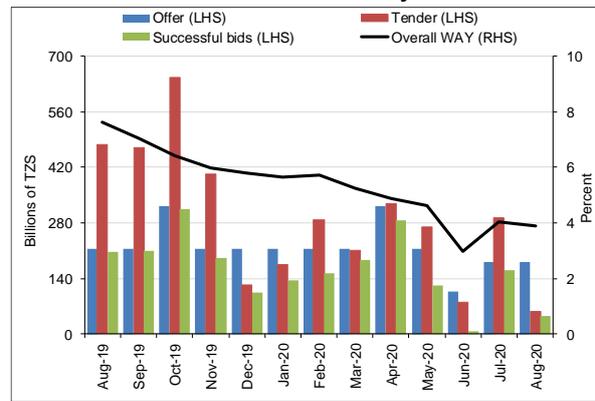

2.3 Financial Markets

In August 2020, liquidity in the banking system remained adequate in line with the ongoing accommodative monetary policy measures. Money market interest rates eased in tandem with the level of liquidity, while government securities auctions were oversubscribed in the longer-end of the maturity spectrum. Liquidity in the interbank foreign exchange market continued to improve owing to increase in foreign exchange proceeds mainly from exports of gold and cross-border trade.

2.3.1 Treasury Bills Market

In August 2020, the Bank of Tanzania conducted two Treasury bills auctions for government financing needs and market development. The tender size was TZS 90.3 billion per auction, in line with the 2020/21 Government Issuance Plan. Both auctions were undersubscribed, receiving bids worth TZS 56.0 billion, while successful bids amounted to TZS 45.5 billion. In line with liquidity condition in the economy, the overall Treasury bills yield declined to 3.88 percent in August 2020 from 4.04 percent in the preceding month (**Chart 2.6**).

Chart 2.6: Performance in Treasury Bills Market

Source: Bank of Tanzania

Note: LHS denotes left hand scale; and RHS, right hand Scale

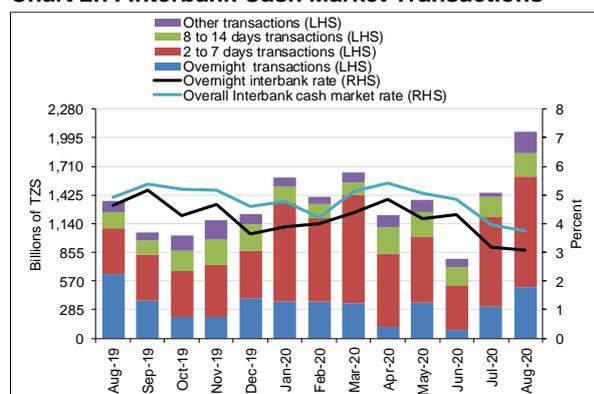

2.3.2 Treasury Bonds Market

The Bank of Tanzania conducted two Treasury bonds auctions in August 2020, on behalf of the Government for budgetary operations. The Treasury bonds offered for sale were 2- and 10-year maturity worth TZS 123.0 billion and TZS 110.5 billion, respectively. The auctions were highly oversubscribed recording bids worth TZS 425.7 billion and TZS 267.7 billion, respectively. Successful bids amounted to TZS 165.8 billion for 2-year bond and TZS 130.0 billion for 10-year bond. Weighted average yields to maturity were 7.09 percent for the 2- year Treasury bond and 11.49 percent for the 10-year Treasury bond.

2.3.3 Interbank Cash Market

The interbank cash market (ICBM) remained active characterized by increased demand for liquidity among banks, following the continuation of the crops purchasing season. Total transactions (market turnover) in the IBCM increased to TZS 2,051.2 billion from TZS 1,446.4 billion traded in the preceding month. Transactions of 2 to 7 days' tenure maintained its dominance, accounting for 53.8 percent of total transactions. Overnight and overall IBCM interest rates declined to an average of 3.09 percent and 3.74 percent from 3.20 percent and 3.97 percent in the preceding month, respectively (**Chart 2.7**).

Chart 2.7: Interbank Cash Market Transactions

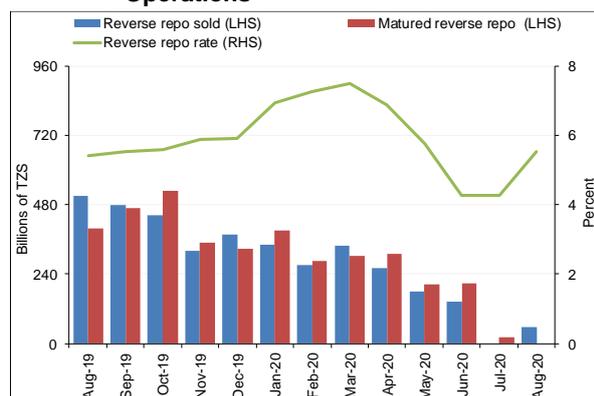

Source: Bank of Tanzania
 Note: LHS denotes left hand scale; and RHS, right hand scale

2.3.4 Repurchase Agreements

The Bank of Tanzania auctioned reverse repurchase agreement (reverse repo) as part of the measures to fine-tune short-term liquidity needs in the banking system, consistent with accommodative monetary policy stance. In this regard, reverse repo worth TZS 55.2 billion were conducted in August 2020, at an average rate of 5.54 percent.

Chart 2.8: Reverse Repurchase Agreements Operations

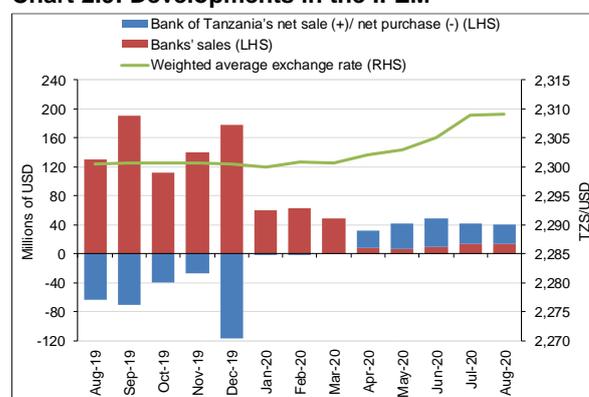

Source: Bank of Tanzania
 Note: LHS denotes left hand scale; and RHS, right hand scale

2.3.5 Interbank Foreign Exchange Market

The interbank foreign exchange market (IFEM) remained active in August 2020, as a result of gradual recovery of activities in the market following increase of foreign inflows from exports of gold and cross-border trade. Total volume of transactions in the IFEM amounted to USD 40.7

million, out of which the Bank sold USD 27.1 million. The shilling remained stable against the US dollar trading at an average of TZS 2,309.12 per US dollar from TZS 2,308.96 per US dollar in the preceding month. On annual basis, the shilling recorded a mild depreciation of 0.37 percent from TZS 2,300.52 per US dollar in August 2019 (**Chart 2.9**).

Chart 2.9: Developments in the IFEM

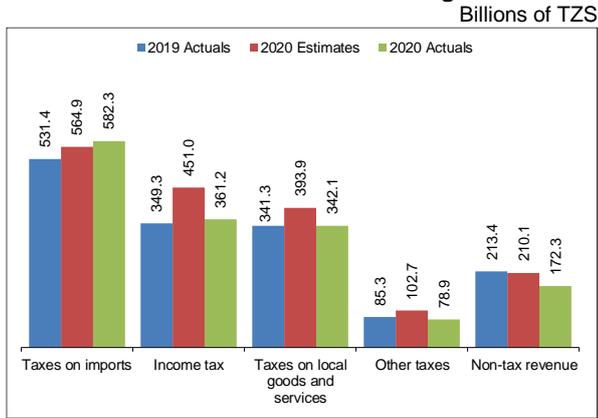

Source: Bank of Tanzania
 Note: LHS denotes left hand scale; and RHS, right hand Scale

3.0 Government Budgetary Operations

Total domestic revenue amounted to TZS 1,574.0 billion in August 2020, of which revenue collection by the central government was TZS 1,536.8 billion and the balance was local government own source collections. Tax revenue was TZS 1,364.5 billion, an increase of 4.4 percent from the amount recorded in the corresponding month in 2019. Central government revenue sources are captured in **Chart 3.1**.

Chart 3.1: Government Revenue in August

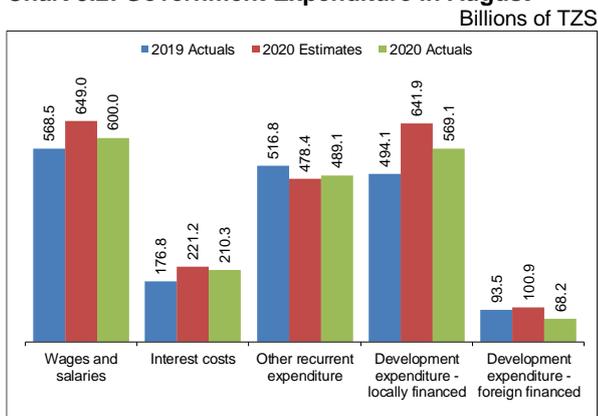

Source: Ministry of Finance and Planning, and Bank of Tanzania computations

Note: 2020 actuals are provisional

During the month, the Government spent TZS 1,936.9 billion on recurrent activities and development projects. Recurrent expenditure amounted to TZS 1,299.5 billion and development expenditure was TZS 637.4 billion (**Chart 3.2**). Out of the development expenditure, 89.3 percent was financed by domestic resources.

Chart 3.2: Government Expenditure in August

Source: Ministry of Finance and Planning, and Bank of Tanzania computations

Note: 2020 actuals are provisional

4.0 Debt Developments

4.1 External Debt

The stock of external debt was USD 23,353.1 million at the end of August 2020, an increase of USD 186.9 million and USD 1,087.9 million from the stocks recorded at the end of the preceding month and corresponding month of 2019, respectively. The month-on-month increase was

mainly on account of exchange rate fluctuations and new disbursements that outweighed principal repayments. The share of the central government to total external debt was 77.6 percent (**Table 4.1**). The structure of external debt by creditor category remained unchanged with debt owed to multilateral institutions continuing to account for the largest share of 47.5 percent, followed by debt from commercial sources at 32.4 percent (**Table 4.2**).

Source: Ministry of Finance and Planning, and Bank of Tanzania

Note: DOD denotes disbursed outstanding debt; and BOP balance of payments

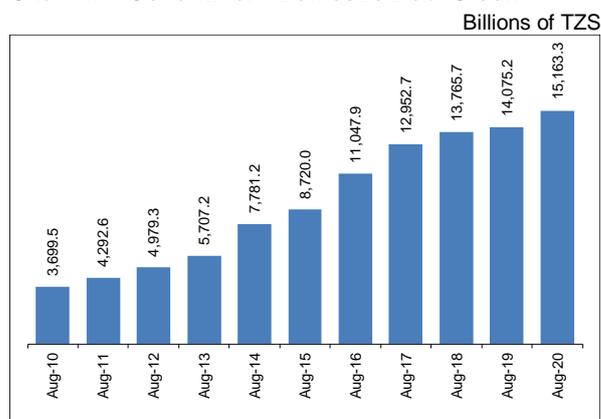

During the month, external loans worth USD 57.4 million were disbursed, of which USD 57.1 million was in favour of the central government. Debt service was USD 33.9 million, of which USD 4.5 million was principal repayment and USD 29.4 million was interest payment.

4.2 Domestic Debt

The stock of domestic debt at the end of August 2020 was TZS 15,163.3 billion, an increase of TZS 51.5 billion and TZS 1,474.7 billion from the end of the preceding month and corresponding month of 2019, respectively (**Chart 4.1**).

Investors' preference has gradually inclined to longer maturities as reflected by the share of Treasury bonds to total domestic debt that keeps on increasing. This is in line with the Medium-Term Debt Management Strategy of reducing refinancing risk by lengthening the maturity of debt portfolio (**Table 4.4**).

During the month under review, government securities issued for budgetary operations amounted to TZS 347.0 billion, of which treasury bonds was TZS 283.5 billion and the balance was treasury bills (**Chart 4.2**).

In August 2020, domestic debt service, excluding government overdraft from the Bank of Tanzania, amounted to TZS 407.7 billion, of which TZS 261.3 billion was principal repayment that was rolled over and the balance was interest payment.

Chart 4.2: Government Securities for Financing Purposes

5.0 External Sector Performance

External sector continued to improve as the intensity of COVID-19 pandemic and restrictions on global economic activities fades. Current account deficit narrowed to USD 772.2 million from a deficit of USD 1,764.0 million recorded in the year ending August 2019, on account of higher export of goods coupled with decrease in imports (**Table 5.1**). As a result, the overall balance of payments deficit remained moderate amounting to USD 150.0 million in the year ending August 2020, compared with a deficit of USD 117.9 million in the year ending August 2019.

Foreign exchange reserves amounted to USD 5,124.4 million at the end of August 2020 compared with USD 5,298.9 million recorded at the end of August 2019 (**Chart 5.1**). The reserve was sufficient to cover 5.9 months of projected imports of goods and services excluding foreign direct investment related imports. The import cover was above the country benchmark of not less than 4.0 months. Foreign assets of banks

amounted to USD 1,018.7 million at the end of August 2020 compared to USD 1,052.4 million at the end of August 2019.

5.1 Exports

The value of exports of goods and services amounted to USD 9,300.2 million in the year ending August 2020 compared with USD 8,972.7 million in the corresponding period in 2019, owing to increase in goods exports. On monthly basis, the value of exports of goods and services was USD 689.3 million in August 2020 compared with USD 973.8 million recorded in August 2019, owing to decrease in service receipt.

The value of traditional exports almost doubled to USD 995.6 million in the year ending August 2020 from USD 512.5 million recorded in the corresponding period in 2019, explained by increased exports value for cashew nuts, cotton, cloves and sisal. Sisal exports rose on account of increase in both volume and unit prices. Export values for cashew nuts, cotton and cloves rose due to improved export volumes, supported by improved production. By contrast, export values for coffee and tea declined on account of low export volume and unit prices. On month-to-month, the value of traditional good exports declined to USD 23.1 million from USD 44.0 million, largely explained by low export of cashew nuts. The price movements of traditional exports were broadly in line with developments in the world market prices.

The value of non-traditional exports increased to USD 4,888.5 million in the year ending August 2020 from USD 3,836.0 million in the corresponding period in 2019, mainly on account of increase in exports value of minerals and manufactured goods. Gold accounted for 55.9 percent of non-traditional exports and increased by 42.9 percent to USD 2,734.6 million resulting from increase in volume and unit price. On month-to-month, the export value of gold increased to USD 276.5 million in August 2020 from USD 270.6 million in the corresponding month in 2019, owing to increase in gold prices as a result of continued weakening of financial asset prices attributable to COVID-19 pandemic. **Chart 5.2** summarises the performance of goods exports for the past three years.

Chart 5.2: Exports of Goods

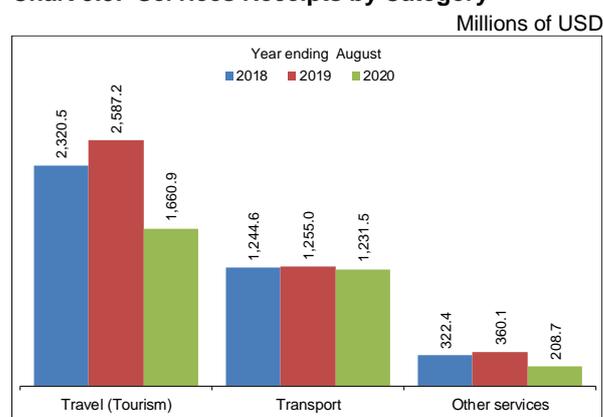

Source: Tanzania Revenue Authority and Bank of Tanzania computations

Note: Other minerals mainly include mineral concentrates and diamond; and other** includes oil seeds, cereals, cocoa, raw hides and skins, and woods

Service receipts amounted to USD 3,101.1 million in the year ending August 2020, lower than USD 4,202.2 million recorded in the year ending August 2019, owing to decrease in travel receipts. Travel receipts declined by 35.8 percent to USD 1,660.9 million due to decrease in number of tourist arrivals attributable to COVID-19 pandemic. Travel receipts during August 2020, dropped to USD 43.8 million from USD 268.6 million in August 2019, following suspension of international flights and lockdowns in major tourist source markets. Nevertheless, travel receipts remained significant accounting for 53.6 percent of total services receipts for the year ending August 2020 (**Chart 5.3**).

Chart 5.3: Services Receipts by Category

Source: Banks and Bank of Tanzania computations

Note: Other services include construction, insurance, financial, telecommunication, computer and information, charges for the use of intellectual property government, personal and other business services

5.2 Imports

Import bill for goods and services decreased to USD 9,480.3 million in the year ending August 2020 from USD 10,226.5 million in the corresponding period a year earlier, largely driven by a decrease in import of capital and intermediate goods. With the exception of transport equipment, machinery and oil, all other categories of imports increased (**Table 5.2**). The value of oil imports, which accounted for 18.7 percent of goods import declined by 14.3 percent to USD 1,485.1 million consistent with a decline in oil prices in the world market. On monthly basis, import bill for goods decreased to USD 680.5 million in August 2020 from USD 767.1 million recorded in the corresponding month in 2019.

Table 5.2: Goods Imports

Items	Millions of USD					Percentage contribution, year ending
	Aug-19	Jul-20	Aug-20	2019	2020 ^p

Source: Tanzania Revenue Authority and Bank of Tanzania computations

Note: ¹ includes pharmaceutical products, paper products, plastic items, optical/photographic materials, and textile apparels; and p denotes provisional data

Services payment amounted to USD 1,520.3 million in year ending August 2020, lower than USD 1,728.8 million in year ending August 2019. This outturn was driven by decrease in travel payment by 36.6 percent to USD 391.5 million (**Chart 5.4**). On monthly basis, services payment declined by 40.4 percent to USD 92.5 million in August 2020 from the amount recorded during the corresponding month in 2019. This was explained by low travel payments associated with the outbreak of COVID-19 and containment measures

that include travel restrictions and flight cancellations.

Chart 5.4: Service Payments

Source: Banks and Bank of Tanzania computations

Note: Other services include construction, insurance, financial, telecommunication, computer and information, charges for the use of intellectual property government, personal and other business services

Primary income account, which comprises income from capital related transactions and compensation of employees, recorded a deficit of USD 968.5 million, widening from USD 887.4 million, largely due to increase in direct investment related payments including dividends. Likewise, on monthly basis, deficit in the primary income account widened by 13.2 percent to USD 94.3 million in August 2020 compared with the corresponding month in 2019.

Secondary income account—that captures unilateral current transfers—remained broadly the same, recording a surplus of USD 376.5 million. On month-to-month basis, the secondary income account recorded a surplus of USD 0.8 million in August 2020 from a surplus of USD 31.9 million during the corresponding month in 2019, mainly due to decrease in official inflows.

5.3 World Commodity Prices

During August 2020, prices of all selected commodities in the world market rose, with much of the increase registered in tea (Mombasa auction) (**Table 5.3**). Recovery of oil prices was

subdued, associated with the second wave of COVID-19 pandemic. Gold price rose to USD 1,968.6 per troy ounce in August 2020, as uncertainty in the global financial markets remain amidst the COVID-19 pandemic. The gold price is anticipated to remain stable, as the new approach to monetary policy in the US give gold better prospects because the periods of low inflation are usually followed by periods of high inflation tolerance, thereby reducing the yields on bonds. The increase in coffee price was partly due to weaker US dollar relative to Brazilian Real³, while that of cotton was on account of rising demand in emerging markets and developing economies particularly in China.

On annual basis, all other commodity prices declined, save for gold, Arabica coffee and tea (average) prices. The weaker prices were driven by a more negative impact of COVID-19 pandemic in the first six months of 2020; with a gradual price recovery between June and August 2020.

Table 5.3: World Commodity Prices

6.0 Economic Performance in Zanzibar

6.1 Inflation

Annual headline inflation eased to 2.4 percent in August 2020 from 3.6 percent in the preceding month, but was slightly higher than 2.1 percent recorded in the corresponding period in 2019 (**Table 6.1** and **Chart 6.1**). This development was mainly driven by decrease in non-food inflation, as a result of decline in prices of cement by 4.0 percent, and petroleum products (kerosene, diesel and petrol) whose prices dropped by an average of 18.7 percent. On monthly basis, there was a deflation of 0.4 percent in August 2020 compared to a deflation of 0.2 percent in the preceding month and an inflation of 0.8 percent in August 2019.

Table 6.1: Inflation Developments

6.2 Government Budgetary Operations

In August 2020, government resources amounted to TZS 43.1 billion, of which domestic revenue was TZS 42.9 billion equivalent to 51.3 percent of the target for the month, while grants were 0.1 billion. This performance was attributed to the effects of outbreak of COVID-19 pandemic on major tax sources, in particular trade and tourism activities. Tax revenue was TZS 39.1 billion, equivalent to 49.7 percent of the estimate, while non-tax revenue was TZS 3.8 billion, equivalent to 76.6 percent of estimates (**Chart 6.2**).

Chart 6.2: Government Resources in August

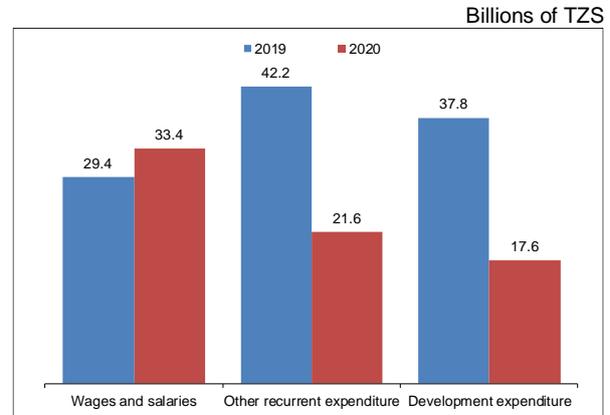

Source: Ministry of Finance and Planning, Zanzibar

Note: Other taxes include hotel and restaurant levies, tour operator levy, revenue stamps, airport and seaport service charges, road development fund and petroleum levy.

Government expenditure was TZS 72.6 billion, of which recurrent expenditure was TZS 55.0 billion and TZS 17.6 billion was for development projects.

Local financing of development projects was TZS 7.0 billion, equivalent to 76.5 percent of the target, while foreign financing amounted to TZS 10.6 billion, below the target by 6.4 percent (**Chart 6.3**). Deficit after grants and adjustment to cash and other items was TZS 30.5 billion, financed by domestic borrowing and program loans.

Chart 6.3: Government Expenditure in August

Note: Other recurrent expenditure includes transfers, domestic debt interest payments, consolidated fund service and other charges

6.3 External Sector Performance

6.3.1 Current Account

Current account deficit widened to USD 67.8 million in the year ending August 2020 from a deficit of USD 51.5 million registered during the corresponding period in 2019. This development was largely attributed to increase in imports, relative to exports (**Table 6.2**).

Table 6.2: Current Account

6.3.2 Exports

In the year ending August 2020, export earnings from goods and services increased by 12.5 percent to USD 222.3 million from USD 197.6 million in the year ending August 2019 (Table 6.2). The outturn was occasioned by increased cloves and seaweeds exports. Cloves exports earning rose more than seven-fold to USD 17.5 million compared to USD 2.3 million earned in the year ending August 2019, while seaweeds export earnings increased by 31.2 percent to USD 5.4 million (Table 6.3).

Note: Other exports mainly include souvenirs and spices; p, denotes provisional data; and "---", change that exceeds 100 percent

6.3.3 Imports

Imports of goods and services amounted to USD 413.0 million in the year ending August 2020 compared with USD 304.4 million in the corresponding period in 2019 (Table 6.2). This development was largely explained by increase in imports of capital and consumer goods. Most of the imported capital goods were machinery including boilers and electrical equipment, followed by building and construction materials such as cement, iron bars and iron sheets. On month-to-month basis, imports (f.o.b) rose to USD 47.4 million in August 2020 compared to USD 40.0 million in July 2020 and USD 20.7 million in August 2019. Imports were mainly machinery and non-food consumer items (Table 6.4).

Note: Multilateral arrears are those owed by the private sector. ¹ denotes debt flows during the period; ² denotes stock position at the end of period; r Debt position is revised and p Debt position is provisional

Glossary

Broad money (M2)

A definition of money that comprises of narrow money (M1) plus domestic currency time and savings deposits of residents with banks in the country.

Currency in circulation outside banks

Notes and coins of Tanzanian shillings circulating outside the banking system, i.e., outside the Bank of Tanzania and other depository corporations.

Core inflation

This is a measure of price movements caused by factors other than food and energy prices over a specified period of time. It provides better indication of the effectiveness of monetary policy.

Disbursed outstanding debt

This is the amount of debt that has been disbursed but yet to be paid back or forgiven.

Discount rate

The rate of interest that the Bank of Tanzania charges on loans it extends to banks. It uses Treasury bills rate as a base plus a loaded factor, which can be changed from time to time depending on the liquidity situation in the market.

Exchange rate

The price at which one unit of a currency can be purchased with another currency, for instance TZS per US dollar.

Extended broad money (M3)

A definition of money that consists of broad money (M2) plus foreign currency deposits of residents with banks in the country.

External debt stock

The stock of a country's debt that is borrowed from foreign lenders through private commercial banks, foreign governments, or international financial institutions. It is the sum of public, publicly guaranteed, and private non-guaranteed long-term debt, use of IMF credit, and short-term debt, which includes all debt having an original maturity of one year or less and interest in arrears on long-term debt.

Food inflation

This is a measure of price movements caused by food prices.

Gross official reserves

Gross official reserves consist of external assets that are readily available to, and controlled by the Bank of Tanzania for direct financing of balance of payments, and for indirectly regulating the magnitude of balance of payments imbalances through intervention in foreign exchange markets. Gross official reserves comprise the Bank of Tanzania's holdings of monetary gold, special drawing rights (SDRs), reserve position in the International Monetary Fund, and foreign exchange resources, available to the Bank of Tanzania for meeting external financing needs.

Inflation

The rate at which the average level of prices of a basket of selected goods and services in an economy is increasing over a period of time. It is often expressed as a percentage. Inflation indicates a decrease in the purchasing power of a nation's currency.

Interbank cash market

A money market in which banks extend loans to one another for a specified term of not more than 90 days. Each transaction represents an agreement between the banks to exchange the agreed amounts of currency at the specified rate on a fixed date.

Lombard facility

An overnight facility established to enable banks to borrow from the Bank of Tanzania at their own discretion, by pledging eligible government securities as collateral.

Lombard rate

The rate that the Bank of Tanzania charges a bank for borrowing through the use of a Lombard Facility. This rate is computed based on the prevailing weighted average yield of 35-day T-bill, repo or overnight inter-bank rate, whichever is higher in the market plus a margin.

Money supply

The sum of currency circulating outside the banking system and deposits of residents with

banks defined in various levels of aggregation. In Tanzania, three aggregates of money supply are compiled and reported, namely; narrow money (M1), broad money (M2), and extended broad money (M3).

Non-food inflation

This is a measure of price movements caused by factors other than food prices.

Narrow money (M1)

Consists of currency in circulation outside banking system plus demand deposits (cheque account) of residents with banks in the country.

National debt

Total national debt obligations that include public debt and private sector external debt.

Public debt

Debt payable or guaranteed by the Government. Tanzania's public debt has two main components, domestic debt (which is incurred principally to finance fiscal deficit) and external debt (which is raised primarily to finance development projects. It comprises of the debt central government owes to foreign creditors and external obligations of government departments and agencies that are guaranteed for repayment by the Government).

Overnight interbank cash market

The component of the money market involving the shortest-term loan. Lenders agree to lend borrowers funds only "overnight" i.e. the borrower must repay the borrowed funds plus interest at the start of business the next day.

Repurchase agreements (repo)

An arrangement involving sale of securities at a specified price with commitment to repurchase the same or similar securities at a fixed price on a specified future date.

Reverse repo

An arrangement involving buying of securities at a specified price with commitment to resale the same or similar securities at a fixed price on a specified future date.

Reserve money (M0)

The Bank of Tanzania's liabilities in the form of currency in circulation outside the banking system, cash held by banks in their vaults and deposits of banks kept with the Bank of Tanzania in national currency. Reserve money is also referred to as base money, or monetary base or high-powered money.

Weighted yields of Treasury bills

This is the average yield of Treasury bills, which is weighted by the volume sold of 35-day, 91-day, 182-day, and 364-day Treasury bills, expressed in percentage per year.
