1.0 Global Economic Situation

Global economic conditions are increasingly recovering, with easing inflation and favourable monetary policies, which support stronger activity, particularly in the services sector in advanced economies. Emerging markets display varied growth patterns, with China benefiting from export-driven industrial growth despite moderate domestic demand¹. As for Sub-Saharan Africa, growth remained stable, fuelled by private consumption and investment. According to the IMF World Economic Outlook of October 2024, global growth is forecasted to stabilize at 3.2 percent through 2024 and 2025.

Inflation continued to moderate in many advanced economies, albeit above or close to the target in some regions, partly due to low or negative energy and food inflation². In Sub-Saharan Africa, inflation continued aligning with the target levels following stabilization of global commodity prices, and improved supply chain and currency stability³. Upside risks to economic recovery remain, emanating from rising debt obligations, climate-related disasters, and potential escalation of conflicts, which are likely to disrupt the global supply chain.

2.0 Domestic Economic Performance

2.1 Output

The economy continues to demonstrate strong performance, recording a growth rate of 5.3 percent in the second quarter of 2024, higher compared to

²Organisation for Economic Co-operation and Development. (2024, September). *OECD economic outlook, interim report: Turning the corner.*

4.7 percent in the corresponding period of 2023 (Chart 2.1.1). Growth was largely driven by trade, 19.8 percent; financial and insurance, 11.4 percent; and transport and storage, 8.6 percent (Chart 2.1.2). The structure of the economy in terms of shares remained unchanged, with agriculture, construction, mining, and guarrying dominating (Chart 2.1.3).

2.2 Inflation

Twelve-month headline inflation was 3.1 percent, and core inflation was 3.2 percent—both similar to the rates recorded in August 2024. Non-core inflation experienced a slight decline to 3 percent (Table 2.2.1 and Chart 2.2.1). Core and energy groups continued to be the primary drivers of inflation (Chart 2.2.2).

Food inflation decreased to 2.5 percent in September 2024 from 2.8 percent in August 2024 (Table 2.2.1). The decrease was attributable to a sufficient supply of food in markets, with some food items, including round potatoes and rice registering a price decline (Chart 2.2.3 and Table 2.2.2)⁴.

Food stock held by the National Food Reserve Agency (NFRA) increased to 651,403 tonnes in September 2024 from 489,187 tonnes in August 2024 (Table 2.2.3). This development resulted from acquisition of 169,590.93 tonnes of paddy and maize. In the review month, the Agency released 7,375.75 tonnes of maize and paddy to traders.

Source: National Food Reserve Agency

The inflation rate for energy, fuel, and utilities rose to 11.5 percent in September 2024, up from 11.2 percent in August 2024, primarily due to higher firewood and wood charcoal prices.

The global price of white products was stable, reflecting steady conditions in international markets. Domestically, pump prices for petrol and diesel remained largely unchanged relative to August 2024 and September 2023. Meanwhile, kerosene prices registered a modest increase on a year-on-year basis from September 2023, indicative of seasonal adjustments in demand and supply dynamics (Chart 2.2.4).

Source: National Bureau of Statistics

Note: White products denote average world market oil prices

2.3 Monetary Policy

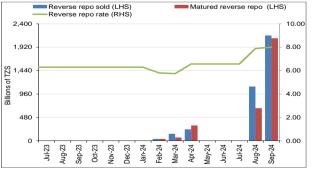

The Bank continued its monetary policy operations during the review month, maintaining the 7-day Interbank Cash Market (IBCM) rate within a corridor of +/-200 basis points around the Central Bank Rate (CBR) of 6 percent set for the guarter ending September 2024. Liquidity remained relatively tight in September 2024 due to seasonal demand associated with the crop purchasing cycle, which increased cash requirements. As a result, the 7-day IBCM rate averaged 8.58 percent, slightly above the previous month's 8.17 percent and the upper limit of the CBR corridor of 8.0 percent (Charts 2.3.1). To address these conditions, the Bank injected liquidity amounting to TZS 2,160 billion through reverse REPO, compared to TZS 1,113.1 billion injected in the previous month (Chart 2.3.2).

Chart 2.3.1: 7-Day IBCM Interest Rate

Source: Bank of Tanzania and banks

Chart 2.3.2: Reverse REPO Transactions

Meanwhile, broader monetary aggregates recorded a slight growth in September 2024 relative to

the preceding month. The extended broad money supply (M3) increased by 11.4 percent, up from 10.6 percent in August 2024, but below the 14.5 percent growth in September 2023 (Chart 2.3.3 and Table 2.3.1).

Private sector credit growth remained strong, rising to 17.5 percent from 16.7 percent in the preceding month. The level was, however, lower than the 19.5 percent growth registered in the similar period in 2023 (Chart 2.3.4). Agriculture continued to register the highest credit growth, at 34.8 percent, on the back of the ongoing government efforts to improve productivity, followed by trade, at 12.7 percent and building and construction, at 21.8 percent (Table 2.3.2). As for the share of credit allocation, the structure remained unchanged, with personal loans

dominating the outstanding loan portfolio at 37.2 in September 2024, followed by trade and agriculture at 12.7 percent and 11.8 percent, respectively (Chart 2.3.5).

2.4 Interest Rates

Bank interest rates on loans showed a marginal uptick in September 2024 compared to the preceding month. The overall lending rate rose to 15.53 percent, from 15.26 percent in August 2024,

while negotiated lending rates increased to 12.92 percent from 12.79 percent. Deposit rates also experienced a slight increase, with the average overall deposit rate rising to 8.20 percent from 7.98 percent in the prior month. As a result, the spread between short-term lending and deposit rates narrowed to 6.49 percentage points, from 7.02 percentage points recorded in the same period in 2023. This reflects evolving market conditions and increased competition among banks (Table 2.4.1).

2.5 Financial Markets

Government Securities Market

The government securities auctions registered a mixed performance in September 2024, investors maintaining their preferences for instruments with longer maturities. The Bank conducted one Treasury bills auction with a tender size of TZS 126.2 billion, mainly to cater for government financing and a small amount to price discovery. The auction undersubscribed, receiving bids worth TZS 82.9 billion, of which TZS 73.8 billion were successful. The weighted average yield increased to 10.85 percent from 10.61 percent recorded in the preceding month (Chart 2.5.1).

Chart 2.5.1: Performance in Treasury Bills Market

Source: Bank of Tanzania

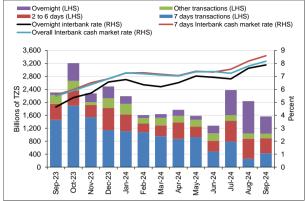

Note: LHS denotes left-hand scale; RHS, right-hand scale; and WAY, weighted average yield.

The Bank also re-opened 15-, 20- and 25-year Treasury bond auctions, with a combined tender size of TZS 574.9 billion for government financing. The auctions attracted bids worth TZS 674.8 billion, of which TZS 520.3 billion were successful. The weighted average yields to maturity for the auctioned Treasury bonds (15-, 20- and 25-year) increased slightly to 15.35 percent, 15.45 percent, and 15.42 percent, respectively.

Interbank Cash Market

The interbank cash market (IBCM) continued to facilitate the distribution of shilling liquidity across banks. In September 2024, total transactions amounted to TZS 1,564.7 billion, lower than TZS 2,038.8 billion traded in the preceding month (Chart 2.5.2). Overnight transactions remained dominant, accounting for 34 percent of total market turnover, while 7-day transactions accounted for 27.3 percent. This reflects banks' preference for shorter-tenure lending, driven by higher demand for shilling liquidity in the market. The overall IBCM interest rate increased to 8.16 percent from 7.79 percent in the previous month.

Chart 2.5.2: Interbank Cash Market Transactions

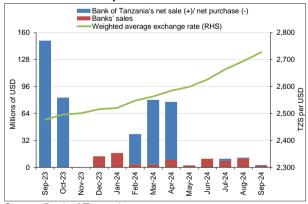

Source: Bank of Tanzania

Note: LHS denotes left-hand scale; and RHS, right-hand scale

Interbank Foreign Exchange Market

The Foreign exchange conditions continued to recover in September 2024, as reflected by the increase in the volume of transactions in the Interbank Foreign Exchange Market (IFEM). Transactions amounted to USD 8.35 million, up from USD 4.61 million in August 2024. The Bank's participation in the IFEM declined to a net sale of USD 0.75 million from USD 1 million in the preceding month (Chart 2.5.3). Consequently, the shilling remained stable, trading at an average of TZS 2,727.41 per US dollar, compared with TZS 2,694.25 per US dollar in the preceding month. On an annual basis, the shilling depreciated by 10.1 percent compared with 10.3 percent in the year ending August 2024.

Chart 2.5.3: Developments in the IFEM

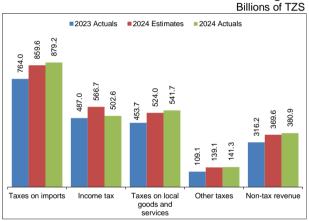

Source: Bank of Tanzania

Note: LHS denotes left-hand scale; and RHS, right-hand scale

2.6 Government Budgetary Operations

In August 2024, government revenue, including local government authorities' collections, amounted to TZS 2,539.3 billion, equivalent to 98.8 percent of the target for the month. The central government contributed TZS 2,445.6 billion, with TZS 2,064.8 billion from tax revenue and TZS 380.9 billion from non-tax revenue. All major tax categories, except income tax, and non-tax revenue surpassed their targets, largely due to continued enhancement of tax administration and compliance (Chart 2.6.1).

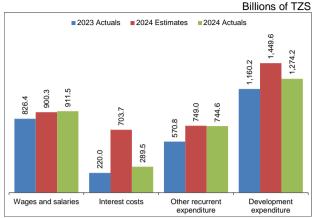

Chart 2.6.1: Central Government Revenue in August

Source: Ministry of Finance and Bank of Tanzania calculations Note: Actual figures for 2024 are provisional

The government remained committed to fiscal consolidation, allocating funds based on available resources and prioritizing essential spending. In August 2024, recurrent expenditure amounted to TZS 1,945.6 billion, while development expenditure was TZS 1,274.2 billion (Chart 2.6.2).

Chart 2.6.2: Central Government Expenditure in August

Source: Ministry of Finance and Bank of Tanzania calculations Note: Actual figures for 2024 are provisional

2.7 Debt Developments

The national debt stock was USD 45,051 million at the end of September 2024, an increase of 0.4 percent from the level registered at the end of the preceding month. The increase is attributable to external debt flows. Total external debt constituted 73 percent of the national debt stock.

External Debt

The stock of external debt at the end of September 2024 was USD 32,890 million, higher than the stock at the end of the preceding month by 0.6 percent. During the month, external loans worth USD 212.8 million were disbursed, mainly to the central government. Meanwhile, external debt service totalled USD 105.4 million, of which USD 45.9 million was principal repayment and USD 59.5 million was interest payments.

The composition of external debt by borrower and creditor remained largely unchanged from both the previous month and September 2023. External debt continued to be predominantly held by the central government, with multilateral institutions remaining the largest creditors (Table 2.7.1 and Table 2.7.2).

Transportation and telecommunications continued to account for the largest portion of disbursed outstanding external debt, followed by social welfare and education (Table 2.7.3). The outstanding external debt retained its currency composition, with the US dollar holding the largest share, at 67.9 percent (Table 2.7.4).

Domestic Debt

Domestic debt stock at the end of September 2024 was TZS 32,615.7 billion, lower than the stock at the end of the preceding month by TZS 144.5 billion (Chart 2.7.1). This decrease was largely associated with the Government's moderate use of the overdraft facility at the Bank. The domestic debt portfolio continued to be dominated by Treasury bonds, which accounted for 78.9 percent of the total stock, while commercial banks and pension funds remained the major domestic creditors of the Government (Table 2.7.5 and Table 2.7.6).

Government securities worth TZS 592.8 billion were issued by the Government during the month to finance various projects. Of this amount, TZS 500.9 billion were Treasury bonds, and TZS 92 billion were Treasury bills (Chart 2.7.2). Meanwhile, a principal amount of TZS 266.3 billion was rolled over, and interest totalling TZS 177.5 billion was paid out.

Chart 2.7.2: Issued Government Securities for Financing Purposes

Source: Bank of Tanzania

The outstanding domestic debt of State-Owned Enterprises (SOEs) at the end of September 2024 was TZS 75.7 billion, a decrease of TZS 0.3 billion from the previous month's position (Table 2.7.7). This decrease is due to the Tanzania Railway Corporation's reduction in the utilization of the overdraft facility and the Dar es Salaam Water and Sewerage Authority's repayment of a TZS 16.3 million bank loan.

2.8 External Sector Performance

The performance of the external sector continued to improve in line with the recovery of the global economic conditions. The current account deficit narrowed to USD 2,363.2 million in the year ending September 2024, compared with USD 3,385.4 million during the corresponding period in 2023

(Table 2.8.1). The outturn ensued from continued export growth attributable to favourable global commodity prices. Foreign exchange reserves amounted to USD 5,413.6 million at the end of September 2024 sufficient to cover 4.4 months of projected imports of goods and services, and above the national benchmark of 4 months (Chart 2.8.1).

Exports

In the year ending September 2024, exports of goods and services amounted to USD 15,353.1 million, an increase of 13.4 percent, compared to USD 13,543.4 million in the preceding year. The growth was primarily driven by an increase in service receipts, particularly tourism, and exports of

gold, tobacco, cashew nuts, and horticultural products.

During the period, traditional exports increased to USD 1,072.7 million from USD 853.8 million in the year ending September 2023, following a rise in exports of tobacco and cashew nuts. Non-traditional exports rose to USD 6,834.9 million, compared with USD 6,371.3 million, mainly driven by gold exports, which accounted for 47.8 percent of non-traditional exports. Exports of horticultural products were USD 484 million, up from USD 378 million in the previous year, driven by vegetables (Chart 2.8.2). Month-onmonth, exports of goods rose to USD 1,018.8 million compared with USD 934.3 million in September 2023.

Chart 2.8.2: Exports of Goods

1,419.6

Manufactured goods

Source: Tanzania Revenue Authority and Bank of Tanzania calculations

Note: Other minerals include mineral concentrates, tanzanite and diamonds; and other non-traditional exports include oil seeds, beans, cocoa, raw hides and skins, and wood

Service receipts were USD 6,981.1 million, up from USD 5,894.2 million in the year ending September 2023, bolstered by travel (tourism) and transport earnings. Travel receipts increased to USD 3,826.4 million from USD 3,156.2 million in the year ending September 2023 (Chart 2.8.3). The performance was backed by growth in number of tourists, which increased by 21.2 percent to 2,068,856, reflecting the effectiveness of government and private sector initiatives in promoting Tanzania as a tourist destination. Transport earnings, mainly from freight

charges, rose to USD 2,579.1 million in the year ending September 2024, from USD 2,277.1 million in the same period in 2023, with the increase largely associated with continued improvement of ports operations and transport infrastructure. Services payments declined to USD 2,275.4 million from USD 2,426.9 million in the year ending September 2023 (Chart 2.8.4). On monthly basis, service receipts amounted to USD 622.7 million from USD 590.1 million in September 2023.

Note: Other services include construction, insurance, financial,
telecommunication, computer and information, charges for the
use of intellectual property, government, personal and other
business services

Imports

Imports of goods and services increased by 2.2 percent to USD 16,453.7 million for the year ending September 2024, from USD 16,103.1 million in 2023, mainly driven by imports of goods particularly refined white petroleum products, which accounted for 19.7 percent of goods imports. Other imports with notable increases were industrial-use sugar, iron and steel, and footwear (Table 2.8.2). On a monthly basis, goods imports amounted to USD 1,462.7 million in September 2024, compared to USD 1,468.3 million in similar month in 2023.

Chart 2.8.4: Service Payments

Source: Banks and Bank of Tanzania calculations
Note: Other services include construction, insurance, financial,
telecommunication, computer and information,
government, personal and other business services

The deficit in the primary income account widened to USD 1,816.3 million in the year ending September 2024, from USD 1,467.4 million in the previous year, owing to higher interest payments. On a monthly basis, the deficit was at USD 167.6 million, compared to USD 112.1 million in September 2023.

The secondary income account recorded a surplus of USD 553.7 million, lower than USD 641.6 million

in 2023, supported by personal transfers. During the month, the secondary income account surplus was USD 45.8 million, slightly lower than USD 48.6 million in September 2023.

World Commodity Prices

Commodity prices exhibited mixed developments, with prices of crude oil, rice and Arabica coffee decreased while those of gold, maize, sugar and robusta coffee increased. The price of crude oil fell to USD 72.42 per barrel in September 2024 from USD 78.12 per barrel in the preceding month. The downturn was driven by the contraction of oil demand by China and increased supply in Saudi Arabia—a major global oil producer. The increase in prices of maize and sugar was due to drought in the major producing countries including the US and Brazil, while that of Robusta coffee was on account of low yields following the destruction of some coffee plantations by a typhoon in Vietnam. Gold prices remained high during the month, driven by interest rate cuts by the Federal Reserve and geopolitical conflicts.

3.0 Economic Performance in Zanzibar

3.1 Inflation

Zanzibar's headline inflation decreased to 4.8 percent in September 2024 down from 5.1 percent in August 2024 and 7.5 percent in September 2023 (Table 3.1.1 and Chart 3.1.1). The decline was primarily attributed to a reduction in prices of some food items, particularly Mbeya rice, Thailand rice, Basmati rice, maize flour, and wheat flour. Conversely, non-food inflation increased to 2.8 percent in September 2024, compared to 2.3 percent in August 2024 and 2.7 percent in the same month of the preceding year. On a month-to-month

basis, headline inflation rose by 0.6 percent, compared to 0.3 percent in August 2024 and 1.0 percent in September 2023.

3.2 Government Budgetary Operations

Government resources, which include domestic revenue and grants were TZS 173.1 billion, of which, TZS 161.5 billion was domestic revenue and TZS 11.6 billion was grants. Tax revenue amounted to TZS 137.5 billion, above the target by 7 percent on account of improving compliance by taxpayers. Non-tax revenue was TZS 24 billion surpassing the target by 27.8 percent (Chart 3.2.1).

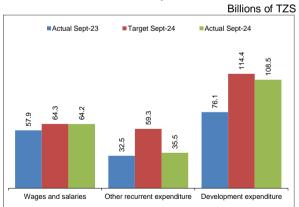

Chart 3.2.1: Government Resources

Source: President's Office, Finance and Planning, Zanzibar Note: Other taxes include hotel and restaurant levies, tour operator levy, revenue stamps, airport, and seaport service charges, road development fund and petroleum levy

Expenditure amounted to TZS 208.2 billion, of which, recurrent expenditure was TZS 99.7 billion and development expenditure was TZS 108.5 billion. Local financing for development expenditure was TZS 93.2 billion and the balance of TZS 15.2 billion was from foreign resources. The fiscal operations resulted in a deficit of TZS 84.8 billion, after accounting for grants and adjustments to cash and other items. This deficit was financed through program loans and domestic borrowing. (Chart 3.2.2).

3.3 External Sector Performance

Current Account

Zanzibar's current account surplus grew to USD 515.3 million, from a surplus of USD 363.7 million, in the year ending September 2023. The outturn was mainly associated with an increase in service receipts, particularly from tourism activities (Table 3.3.1).

Exports

Exports of goods and services reached USD 1,051.6 million from USD 987.1 million recorded in the year ending September 2023, owing to an increase in service receipts. Services receipts mainly from tourism rose by 7.9 percent to USD 996.6 million, following an increase in tourist arrivals (Table 3.3.1 and Table 3.3.2). Cloves export in value terms declined by 18.6 percent to USD 26.3 million due to the cyclical nature of the crop compared to the corresponding period in 2023. On month-to-month basis, exports of goods and services rose to USD 105.7 million in September 2024 compared to USD 88.4 million in September 2023.

Note: Other exports mainly include souvenirs and spices; and p denotes provisional data

Imports

Imports of goods and services, declined by 12.9 percent to USD 553.9 million in the year ending September 2024, with a notable decrease recorded in capital, intermediate, and consumer categories (Table 3.3.1). Capital goods, decreased to USD 39.9 million from USD 78.9 million, since most of the infrastructure development projects are in the final stages. Intermediate goods imports decline by 6.9 percent to USD 363 million, largely due to a decrease in imports of industrial supplies, fuel and lubricant, and food and beverage for industrial uses. Consumer goods imports decreased by 4.6 percent to USD 60.3 million, mostly influenced by food and beverage mainly for household consumption and non-industrial transport equipment categories (Table 3.3.3). Month-to-month imports of goods (f.o.b) and services amounted to USD 44 million in September 2024, compared to USD 67.4 million in September 2023.

Note: Multilateral arrears are those owed by the private sector; ¹ denotes debt flows during the period; ² stock position at the end of period; p, provisional data; and historical data from September 2023 have been revised based on updates obtained from the 2023/24 Private Sector External Debt Survey

Glossary

Broad money (M2)

A definition of money that comprises narrow money (M1) plus domestic currency time and savings deposits of residents with banks in the country.

Currency in circulation outside banks

Notes and coins of Tanzanian shillings circulating outside the banking system, i.e. outside the Bank of Tanzania and other depository corporations.

Core inflation

This measures the rate of change in prices of goods and services other than energy, utilities and unprocessed food, over a specified period of time. The unprocessed food items, energy and utilities are excluded since they are volatile and hence may be affected by non-monetary events, which do not constitute the underlying monetary inflation.

Disbursed outstanding debt

This is the amount of debt that has been disbursed but is yet to be paid back or forgiven.

Discount rate

The rate of interest that the Bank of Tanzania charges on loans it extends to banks. It uses Treasury bills rate as a base plus a loaded factor, which can be changed from time to time depending on the liquidity situation in the market.

Exchange rate

The price at which one unit of a currency can be purchased with another currency, for instance TZS per US dollar.

Extended broad money (M3)

A definition of money that consists of broad money (M2) plus foreign currency deposits of residents with banks in the country.

External debt stock

The stock of a country's debt that is borrowed from foreign lenders through private commercial banks, foreign governments, or international financial institutions. It is the sum of public, publicly guaranteed, and

private non-guaranteed long-term debt, use of IMF credit, and short-term debt, which includes all debt having an original maturity of one year or less and interest in arrears on long-term debt.

Food inflation

This is a measure of the rate of change in the price of food both processed and unprocessed.

Gross official reserves

Gross official reserves consist of external assets that are readily available to and controlled by the Bank of Tanzania for direct financing of balance of payments, and for indirectly regulating the magnitude of balance of payments imbalances through intervention in foreign exchange markets. Gross official reserves comprise the Bank of Tanzania's holdings of monetary gold, Special Drawing Rights (SDRs), reserve position in the International Monetary Fund, and foreign exchange resources, available to the Bank of Tanzania for meeting external financing needs.

Inflation

The rate at which the average level of prices of a basket of selected goods and services in an economy is increasing over a period of time. It is often expressed as a percentage. Inflation indicates a decrease in the purchasing power of a nation's currency.

Interbank cash market

A money market in which banks extend loans to one another for a specified term of not more than 90 days. Each transaction represents an agreement between the banks to exchange the agreed amounts of currency at the specified rate on a fixed date.

Lombard facility

An overnight facility was established to enable banks to borrow from the Bank of Tanzania at their own discretion, by pledging eligible government securities as collateral.

Lombard rate

The rate of interest that the Bank of Tanzania charges on overnight loans it extends to banks. This rate uses the Central Bank Policy Rate as a base plus a loaded factor, which can be changed from time to time depending on the supply of shilling liquidity in the economy

Money supply

The sum of currency circulating outside the banking system and deposits of residents with banks defined in various levels of aggregation. In Tanzania, three aggregates of money supply are compiled and reported, namely; narrow money (M1), broad money (M2), and extended broad money (M3).

Non-food inflation

This is a measure of price movements caused by factors other than food prices.

Narrow money (M1)

Consists of currency in circulation outside banking system plus demand deposits (cheque account) of residents with banks in the country.

National debt

Total national debt obligations that include public debt and private sector external debt.

Public debt

Debt payable or guaranteed by the Government. Tanzania's public debt has two main components, domestic debt (which is incurred principally to finance fiscal deficit) and external debt (which is raised primarily to finance development projects). It comprises the debt central government owes to foreign creditors and external obligations of government departments and agencies that are guaranteed for repayment by the Government).

Primary income account

It comprises income from compensation of employees, interest income, dividends and

retained earnings from capital investments, rental income from the use of natural resources and other types of primary income including those that relate to insurance policy holders and pension funds.

Secondary income account

It entails transfers between residents and non-residents that correspond to the provision of a good, service, financial asset, or other non-produced asset with no corresponding return of an item of economic value.

Overnight interbank cash market

The component of the money market involving the shortest-term loan. Lenders agree to lend borrowers funds only "overnight" i.e. the borrower must repay the borrowed funds plus interest at the start of business the next day.

Repurchase agreements (repo)

An arrangement involving sale of securities at a specified price with commitment to repurchase the same or similar securities at a fixed price on a specified future date.

Reverse repo

An arrangement involving buying of securities at a specified price with commitment to resale the same or similar securities at a fixed price on a specified future date.

Reserve money (M0)

The Bank of Tanzania's liabilities in the form of currency in circulation outside the banking system, cash held by banks in their vaults and deposits of banks kept with the Bank of Tanzania in national currency. Reserve money is also referred to as base money, or monetary base or high-powered money.

Weighted yields of Treasury bills

This is the average yield of Treasury bills, which is weighted by the volume sold of 35-day, 91-day, 182-day, and 364-day Treasury bills, expressed in percentage per year.
