1.0 Global Economic Situation

Global economic growth remained resilient in September 2025. In its October 2025 World Economic Outlook, the IMF revised its 2025 growth forecast upward to 3.2 percent from 3.0 percent in July, while keeping the 2026 projection unchanged at 3.1 percent. This revision reflects favourable trade developments resulting from non-retaliatory measures, new bilateral agreements, and selective tariff exemptions. The IMF's outlook aligns with the OECD's September 2025 forecast, which also raised its 2025 estimate to 3.2 percent from 2.9 percent in June, while keeping the 2026 forecast unchanged at 2.9 percent¹. However, underlying risks remain, particularly from renewed protectionist pressures, widening fiscal deficits, and tighter global financial conditions, the risks that are depicted in the elevated policy and trade uncertainty (Charts 1.1a and 1.1b).

Global inflation remained moderate and is projected to decline to 4.2 percent in 2025—still above the target in the United States, but relatively low across many regions. In emerging market economies, inflation continued to ease, with China and India registering rates below their respective central bank targets (Chart 1.2). Similarly, inflationary pressures in East African Community (EAC) and Southern African Development Community (SADC) economies showed signs of cooling (Charts 1.3 and 1.4). As inflation recedes, most central banks opted to hold or gradually reduce policy rates, signaling a shift toward a more neutral or accommodative monetary stance. Nonetheless, upward risks to

inflation persist, driven by trade protectionism and rising unemployment pressures.

Commodity prices displayed mixed movements in September 2025. Crude oil prices declined, driven by subdued global demand and rising supply from non-OPEC+ producers. Wheat prices also fell, reflecting increased output from key producing nations, while fertilizer prices dropped amid abundant supply and lower input costs. In contrast, gold prices remained elevated, supported by sustained central bank purchases, heightened safe-haven demand, and expectations of interest rate cuts that weakened the US dollar. As noted in the previous month, the prices of arabica and robusta coffee continued to rise due to adverse weather conditions in Brazil and reduced exports from Vietnam. Similarly, palm oil prices rose, fueled by stronger demand linked to higher prices of alternative edible oils (Table A8 in the Appendix and Chart 1.5).

2.0 Domestic Economic Performance

2.1 Output performance

The domestic economy maintained strong growth momentum in the second quarter of 2025, supported by sustained investment from both the public and private sectors. Real GDP in mainland Tanzania expanded by 6.3 percent, from 5.1 percent recorded in the corresponding quarter of 2024, with the performance largely contributed by agriculture, mining and quarrying, construction and financial and insurance services (Charts 2.1a and 2.1b). The economy is projected to grow by 6 percent in 2025, driven primarily by a reliable power supply, strong export performance, and prudent implementation of fiscal and monetary policies.

2.2 Inflation Developments

Inflation remained stable and low at 3.4 percent in September 2025, unchanged from the previous month and within the target range of 3–5 percent. The rate is also consistent with the EAC and SADC convergence criteria, which set ceilings of not more than 8 percent and 3–7 percent, respectively (Table 2.2.1; Charts 2.2.1 and 2.2.2). The stability in inflation was mainly driven by a decline in some food prices, which offset increases in non-food prices. Core inflation remained the main contributor to overall

inflation, followed by unprocessed food and energy-related components (Chart 2.2.3).

Food inflation eased to 7.0 percent in September 2025, from 7.7 percent in August 2025, largely reflecting price moderation in key food items including sorghum, round potatoes, plantains, and cooking oil. The decline in food prices was mainly attributed to the adequate domestic supply of these crops (Charts 2.2.4a and 2.2.4b). However, on an annual basis, prices of some staple foods, particularly rice and maize increased, driven mainly by higher demand, especially in regions bordering neighbouring countries.

Chart 2.2.4: Annual Change in Wholesale Prices

b. Alternative Food Crops

Source: Ministry of Industries and Trade, and Bank of Tanzania computations

Core inflation rose to 2.2 percent in September 2025, from 2.0 percent in August 2025, largely driven by higher prices of household equipment and transport services. Inflation in the energy, fuel, and utilities category decreased to 3.7 percent compared to 11.5 percent in the corresponding month in 2024, largely associated with easing global oil prices. The downward trend in international oil prices is mirrored in lower prices of major petroleum products, including diesel and petrol (Chart 2.2.5). Looking ahead, inflation is projected to remain low and stable, within the target range of 3–5 percent, supported by adequate food supplies and exchange rate stability.

Note: White products denote and average World market oil prices

Food stocks held by the National Food Reserve Agency (NFRA) increased to 570,519 tonnes following purchases of 39,590.34 tonnes. During the same period, 6,641.87 tonnes were released to traders and the World Food Programme (Table 2.2.2).

2.3 Monetary Policy

The Bank continued to implement monetary policy to maintain the 7-day interbank interest rate within the target band of 3.75 to 7.75 percent. The Central Bank Rate (CBR) for the

third quarter of 2025 was 5.75 percent—set to support low and stable inflation while fostering economic growth.

Monetary policy implementation successfully maintained sufficient liquidity in the interbank market, as evidenced by the 7-day interbank rate remaining within the policy corridor—occasionally dipping below the CBR (Chart 2.3.1). Liquidity management was primarily conducted through main and fine-tuning reverse repo operations (Chart 2.3.2).

Chart 2.3.1: Developments in 7-Day IBCM Interest Rate against the CBR Corridor

Source: Bank of Tanzania and banks

Chart 2.3.2: Reverse Repo Transactions

Source: Bank of Tanzania and banks

Improved liquidity conditions also influenced broader monetary aggregates. The extended broad money supply (M3) grew by 20.8 percent in the year ending September 2025, broadly unchanged from the level in the previous month,

driven mainly by strong credit expansion to the private sector (Chart 2.3.3 and Table 2.3.1). Credit to the private sector maintained robust growth of 16.1 percent, almost the same as in the preceding month (Charts 2.3.4 and 2.3.5).

Mining and quarrying recorded the highest credit growth, expanding by 32.4 per cent, outpacing agriculture, which recorded 27.6 per cent growth, and trade, which recorded 24.8 percent growth (Table 2.3.2). Personal loans—mainly used to finance micro, small, and medium-sized enterprises—continued to benefit the lion's share of private sector credit, accounting for 36.7 percent, trailed by trade and agriculture at 13.6 percent and 12.9 percent, respectively (Chart 2.3.6).

2.4 Interest Rates

Lending and deposit interest rates exhibited general stability, albeit with minor fluctuations across maturity spectrums. The average lending rate edged to 15.18 percent, from 15.07 percent in the preceding month (Table 2.4.1). Similarly, negotiated lending rates for prime customers increased marginally to 12.84 percent from 12.72 percent in August 2025. The overall deposit interest rate decreased slightly to 8.50 percent from 8.61 percent in the previous month, while the negotiated deposit rate remained almost unchanged at around 11 percent. The spread between one-year lending and deposit rates narrowed to 5.69 percentage points, from 6.55 percentage points in September 2024.

2.5 Financial Markets

Government Securities Market

During the month under review, the Bank conducted one Treasury bill auction with a tender size of TZS 80.7 billion, mainly for financing government budgetary operations, and a small portion for facilitating price discovery in the short end of the yield curve. The auction was oversubscribed, reflecting adequate liquidity in the economy, with received bids amounting to TZS 194.7 billion, of which TZS 80.7 billion were successful (Chart 2.5.1). The overall weighted average yield decreased to 6.03 percent, from 6.83 percent recorded in the preceding month.

Chart 2.5.1: Performance in Treasury Bills Auctions

Source: Bank of Tanzania

Note: LHS denotes left-hand scale; and RHS, right-hand scale

The Bank also conducted auctions for 5-, 20-, and 25-year Treasury bonds, with tender sizes of TZS 136.2 billion, TZS 271.1 billion, and TZS 293.7 billion, respectively. The 5-year Treasury

bond auction was undersubscribed, while the 20- and 25-year bonds were oversubscribed, indicating investors' continued preference for instruments with longer maturities. Collectively, the auctions received bids amounting to TZS 2,271.5 billion, of which TZS 784.9 billion were accepted. Weighted average yields eased to 12.48 percent, 13.55 percent, and 13.19 percent for the 5-, 20- and 25-year bonds, respectively.

Interbank Cash Market

The Interbank Cash Market (IBCM) continued to facilitate the redistribution of shilling liquidity among banks, thereby supporting the transmission of monetary policy. In September 2025, total transactions in the market reached TZS 3,261.6 billion, up from TZS 2,374.5 billion recorded in the preceding month (Chart 2.5.2). The 7-day transactions accounted for the largest share, at over 64.6 percent of total market turnover. In line with adequate liquidity in the banking system, the overall IBCM interest rate eased slightly to 6.45 percent from 6.48 percent in August 2025.

Chart 2.5.2: IBCM Transactions

Source: Bank of Tanzania

Note: LHS denotes left-hand scale; and RHS, right-hand scale

Interbank Foreign Exchange Market

Foreign exchange liquidity remained adequate, supported by inflows from the export of gold, cash

crops, and tourism activities. Accordingly, the Interbank Foreign Exchange Market (IFEM) remained active with total transactions amounting to USD 93.8 million, slightly lower than USD 101.5 million recorded in the preceding month. Banks accounted for 88.3 percent of the total transactions. The Bank participated in the market, selling USD 11 million on a net basis, in line with the Foreign Exchange Intervention Policy (Chart 2.5.3). The Tanzanian Shilling strengthened against the U.S. dollar, averaging TZS 2,471.69 per USD in September 2025, compared to TZS 2,490.16 in August 2025. On an annual basis, the shilling appreciated by 9.4 percent, compared with 7.6 percent in the preceding month and a depreciation of 10.1 percent in the corresponding period in 2024.

Chart 2.5.3: Developments in the IFEM

Note: LHS denotes left-hand scale; and RHS, right-hand scale

2.6 Government Budgetary Operations

In August 2025, government revenue, including local government authorities' collections, amounted to TZS 3,048.0 billion, equivalent to 106.3 percent of the month's target. The Central Government contributed TZS 2,915.9 billion, with TZS 2,492.0 billion from tax revenue and TZS 423.9 billion from non-tax revenue. Revenue from taxes on imports, local goods and income taxes surpassed their targets, largely due to improved compliance (Chart 2.6.1).

Chart 2.6.1: Central Government Revenue in August 2025

Source: Ministry of Finance and Bank of Tanzania computations

Note: Actual figures for 2025 are provisional

The Government successfully aligned its expenditures with available resources, with total spending reaching TZS 3,900.7 billion in August 2025. This expenditure was composed of TZS 2,433.9 billion in recurrent spending and TZS 1,466.8 billion for development projects (Chart 2.6.2).

Note: Actual figures for 2025 are provisional

2.7 Debt Developments

The national debt stock at the end of September 2025 was USD 50,772.4 million, 1.4 percent higher than the stock at the end of the preceding month. Of the debt stock, 69.8 percent was external debt.

External Debt

The external debt stock (public and private) recorded a monthly increase of 1.2 percent to USD 35,438.3 million at the end of September 2025. Of this amount, 81.8 percent was public debt, and the remainder was private sector external debt (Table 2.7.1). External loans disbursed during the month amounted to USD 443.3 million, mainly to the government, whereas external debt service payments totalled USD 130.6 million, of which USD 75.3 million was for principal repayments.

The composition of external debt by creditor remained broadly unchanged from the preceding month and corresponding month in 2024, with multilateral institutions continuing to account for the largest share of the stock at 57.0 percent, followed by commercial lenders (Table 2.7.2). Balance of payments and budget support activities were the largest holders of the disbursed outstanding debt, followed by transport and telecommunication activities (Table 2.7.3). The US dollar continued to dominate the currency composition of external debt, followed by the Euro (Tables 2.7.4).

Domestic Debt

As of the end of September 2025, domestic debt amounted to TZS 37,459 billion, a 0.9 percent increase from the preceding month (Chart 2.7.1). This growth

was driven by the net issuance of Treasury bonds. The domestic debt portfolio remains concentrated in long-term instruments, particularly Treasury bonds, with nearly three-quarters held by commercial banks, pension funds, and the Bank of Tanzania (Tables 2.7.5 and 2.7.6).

In September 2025, the Government secured TZS 764.5 billion from the domestic market to support budgetary requirements, with TZS 689.5 billion sourced through Treasury bonds and TZS 75 billion through Treasury bills (Chart 2.7.2). Domestic debt servicing amounted to TZS 370.4 billion, including TZS 134 billion in principal and TZS 236.5 billion in interest payments.

2.8 External Sector Performance

The external sector continued to strengthen despite trade and policy shifts, reflecting resilience and adaptability. Robust export growth and favorable movements in global commodity prices largely drove the improvement. Consequently, the current account deficit narrowed to USD 2,234.9 million for the year ending September 2025, a notable reduction from USD 3,043.8 million recorded in the same period of 2024 (Table 2.8.1).

At the end of September 2025, foreign exchange reserves stood at USD 6,664.2 million, adequate to cover more than five months of projected imports of goods and services, surpassing both national and EAC benchmarks (Chart 2.8.1).

Exports

Export of goods and services rose to USD 17,094.2 million in the year ending September 2025, from USD 14,896.3 million in the same period in 2024. The growth was largely driven by increased service receipts and stronger performance in the export of gold, manufactured goods, and traditional exports, particularly cashew nuts and tobacco.

Goods exports amounted to USD 10,120.3 million, a notable increase from USD 8,229.2 million recorded in the previous year. The increase was due to higher exports of gold, manufactured goods, cashew nuts, cereals, and tobacco (Chart 2.8.2). Gold exports surged by 35.8 percent to USD 4,431.2 million, compared to USD 3,263.9 million, primarily due to elevated global gold prices. Traditional exports improved to USD 1,483.9 million, marking a 38.3 percent increase, largely attributed to strong exports of cashew nuts and tobacco supported by both price and volume effects. Cereal exports also saw significant growth, rising to USD 340.6 million from USD 194.2 million, spurred by heightened demand from neighbouring countries. On a monthly basis, exports of goods increased to USD 1,020.4 million in September 2025, from USD 934.2 million in

September 2024, largely driven by gold and manufactured goods.

Chart 2.8.2: Exports of Goods and Services

Source: Tanzania Revenue Authority and Bank of Tanzania Calculations

Note: p - denotes provisional, o/w.

Service receipts amounted to USD 6,973.9 million for the year ending September 2025, higher than USD 6,667.1 million in the same period of 2024. The growth was mainly driven by increased earnings from travel and transport services. The rise in travel receipts reflects the continued strong performance of the tourism sector, with tourist arrivals increasing by 11.9 percent to 2,315,637. Transport earnings, primarily freight, amounted to USD 2,535.4 million compared to USD 2,283.6 million the previous year. On a monthly basis, service receipts stood at USD 576 million in September 2025, down from USD 584.7 million in September 2024.

Chart 2.7.3: Services Receipts by Category

Millions of USD

Note: Other services include construction, insurance, financial, telecommunication, computer and information, charges for the use of intellectual property, government, personal, and other business services

Imports

For the year ending September 2025, import of goods and services rose to USD 17,728.7 million from the USD 16,759.4 million recorded in the same period in 2024. Significant increases were observed in industrial supplies, industrial transport equipment, parts and accessories, and machinery and mechanical appliances (Chart 2.8.4). Oil import, which account for 16.8 of total imports, saw a notable decline to USD 2,469.6 million, largely on account of price effect. On a monthly basis, goods imports amounted to USD 1,503.4 million in September 2025, higher than USD 1,251.9 million in September 2024.

Chart 2.8.4: Import of goods and Services

Millions of USD

Source: Tanzania Revenue Authority and Bank of Tanzania calculations

Note: p - denotes provisional, o/w, of which* Include adjustment for unrecorded exports

Service payments amounted to USD 3,089.5 million in the year ending September 2025, up from USD 2,604.2 million in the same period in 2024. This increase was driven by higher freight payments, in line with the increase in import bill (Chart 2.8.5). Month-on-month, service payments were USD 288.2 million in September 2025, up from USD 270.8 million in September 2024.

Chart 2.8.5: Service Payments

Millions of USD

Source: Banks and Bank of Tanzania calculations

Note: Other services include construction, insurance, financial, telecommunication, computer and information, government, personal, and other business services

For the year ending September 2025, the primary income account recorded a deficit of USD 2,071.5 million, higher than USD 1,765.9 million recorded in same period in 2024. Payment of income on equity and interest abroad explains the development in the primary income account. On a monthly basis, the primary account deficit amounted to USD 221.2 million in September 2025, up from USD 159.5 million in September 2024.

The secondary income account recorded a surplus of USD 471.2 million, down from USD 585.2 million in the corresponding period in 2024, mainly supported by personal transfers. On a monthly basis, the surplus was USD 18.4 million in September 2025, a decrease from USD 40.7 million in September 2024.

3.0 Economic Performance in Zanzibar

3.1 Inflation

Annual headline inflation continued to ease, declining to 3.5 percent from 3.9 percent and 4.8 percent recorded in the preceding month in 2025 and similar month in 2024, respectively (Table 3.1.1 and chart 3.1.1). The outturn was mainly associated with a decrease in food inflation to 4.1 percent, from 4.2 percent in the preceding month and 7.3 percent in the same month a year earlier. The moderation in food prices was primarily attributed to lower prices of key food items, including Thai rice, basmati rice, maize, wheat flour, fish, and sugar. On a monthly basis, headline inflation was 0.2 percent compared to 0.6 percent in September 2024.

3.2 Government Budgetary Operations

Zanzibar's fiscal performance was satisfactory, with domestic revenue and grants totalling TZS 240.2 billion, exceeding the target by 6.6 percent. Of this total, domestic revenue was TZS 204.0 billion, equivalent to 90.6 percent of the target, and the balance were grants. Tax revenue reached TZS 186.2 billion, equivalent to 99.1 percent of the target, while non-tax revenue amounted to TZS 17.8 billion, equal to 47.6 percent of the target (Chart 3.2.1).

Chart 3.2.1: Government Resources

Source: President's Office, Finance and Planning, Zanzibar

Note: Other taxes include hotel and restaurant levies, tour operator levy, revenue stamps, airport, and seaport service charges, road development fund and petroleum Levy

Government expenditure amounted to TZS 420.1 billion in September 2025. Out of this, recurrent spending amounted to TZS 170.0 billion, while development expenditure reached TZS 250.1 billion, of which 78.4 percent was from domestic sources. The overall deficit of TZS 180.0 billion was financed through domestic borrowing (Chart 3.2.2).

Chart 3.2.2: Government Expenditure

Source: President's Office, Finance and Planning, Zanzibar

Note: Other recurrent expenditure includes transfers, domestic debt interest payments, consolidated fund service and other charges

3.3 External Sector Performance

Current account surplus grew by 34.7 percent to USD 836.6 million from a surplus of USD 621.2 million, recorded in the year ending September 2024. The improvement was largely driven by higher service receipts, especially from tourism-related activities (Table 3.3.1).

Exports

Exports of goods and services grew by 27.3 percent to USD 1,473.9 million, compared to the amount recorded in the year ending September 2024. This performance was mainly ascribed to increased service receipts, particularly from tourism, which rose by 36.4 percent to USD 1,503.9 million (Table 3.3.1). Tourist arrivals rose by 28.2 percent to 885,385 visitors in the year ending September 2025. In contrast, the value of clove exports declined by 76 percent to USD 6.3 million, with the performance explained mainly by the crop's production cycle (Table 3.3.2). On a monthly basis, exports of goods and services declined to USD 146.1 million from USD 151.7 million recorded in September 2024.

Computations

Imports

Imports of goods and services rose by 18.9 percent to USD 658.4 million in the year ending September 2025, compared to the amount recorded in the same period in 2024 (Table 3.3.1). This increase was largely due to heightened imports of goods, particularly capital and consumer goods. Imports of capital goods increased by 84.7 percent to USD 73.6 million, mainly attributed to increased imports of industrial transport equipment. As for consumer goods, the increase was mainly driven by imports of non-industrial transport equipment (Table 3.3.3). On a month-to-month basis, imports of goods and services rose to USD 54.3 million from USD 44 million recorded in September 2024.

Note: Multilateral arrears are those owed by the private sector; ¹ denotes debt flows during the period; ² stock position at the end of period; r, revised data; and p, provisional data

Glossary

Broad money (M2)

A definition of money that comprises narrow money (M1) plus domestic currency time and savings deposits of residents with banks in the country.

Central bank rate

Means the interest rate set by the Monetary Policy Committee and used by the Bank to implement or signal its monetary policy stance.

Core inflation

This measures the rate of change in prices of goods and services other than energy, utilities and unprocessed food, over a specified period. The unprocessed food items, energy and utilities are excluded since they are volatile and hence may be affected by non-monetary events, which do not constitute the underlying monetary inflation.

Currency in circulation outside banks

Notes and coins of Tanzanian shillings circulating outside the banking system, i.e. outside the Bank of Tanzania and other depository corporations.

Disbursed outstanding debt

This is the amount of a loan or credit that has already been disbursed to the borrower and has not yet been repaid or forgiven.

Discount rate

Means the rate of interest that the Bank of Tanzania charges to counterparties wishing to discount their Treasury bills for liquidity purposes. It uses the Bank policy rate, as a base, plus a loaded factor, which shall be determined and approved by the MPC from time to time depending on the liquidity situation in the economy.

Exchange rate

The price at which one unit of a currency can be purchased with another currency, for instance, TZS per US dollar.

Extended broad money (M3)

A definition of money that consists of broad money (M2) plus foreign currency deposits of residents with banks in the country.

External debt stock

The stock of a country's debt that is borrowed from foreign lenders through private commercial banks, foreign governments, or international financial institutions. It is the sum of public, publicly guaranteed, and private non-guaranteed long-term debt, use of IMF credit, and short-term debt, which includes all debt having an original maturity of one year or less and interest in arrears on long-term debt.

Food inflation

This is a measure of the rate of change in the price of food, both processed and unprocessed.

Gross official reserves

Gross official reserves consist of external assets that are readily available to and controlled by the Bank of Tanzania for direct financing of balance of payments, and for indirectly regulating the magnitude of balance of payments imbalances through intervention in foreign exchange markets. Gross official reserves comprise the Bank of Tanzania's holdings of monetary gold, Special Drawing Rights (SDRs), reserve position in the International Monetary Fund, and foreign exchange resources available to the Bank of Tanzania for meeting external financing needs.

Inflation

The rate at which the average level of prices of a basket of selected goods and services in an economy is increasing over a period. It is often expressed as a percentage. Inflation indicates a decrease in the purchasing power of a nation's currency.

Interbank cash market

A money market in which banks extend loans to one another for a specified term. Each transaction represents an agreement between the banks to exchange the agreed amounts of currency at the specified rate on a fixed date.

Interest rate-based monetary policy

This is a monetary policy approach used by central banks to control the level of inflation and economic growth by influencing the interest rates in the economy. In this approach, the Bank of Tanzania sets the policy rate (central bank rate) on quarterly basis to influence the cost and availability of credit in the economy and uses various instruments, such as open market operations, statutory minimum reserve requirements to affect the level of the liquidity in the economy.

Lombard facility

An overnight facility was established to enable banks to borrow from the Bank of Tanzania at their own discretion, by pledging eligible government securities as collateral.

Lombard rate

The Lombard rate is the interest rate charged by the Bank of Tanzania on loans extended to banks through the Lombard facility. It is set at the upper band of the Central Bank Rate (CBR) corridor.

Money supply

The sum of currency circulating outside the banking system and deposits of residents with banks is defined at various levels of aggregation. In

Tanzania, three aggregates of money supply are compiled and reported, namely: narrow money (M1), broad money (M2), and extended broad money (M3).

Non-food inflation

This is a measure of price movements caused by factors other than food prices.

Narrow money (M1)

Consists of currency in circulation outside the banking system plus demand deposits (cheque account) of residents with banks in the country.

National debt

Total national debt obligations that include public debt and private sector external debt.

Public debt

Debt payable or guaranteed by the Government. Tanzania's public debt has two main components, domestic debt (which is incurred principally to finance fiscal deficit) and external debt (which is raised primarily to finance development projects). It comprises the debt central government owes to foreign creditors and external obligations of government departments and agencies that are guaranteed for repayment by the Government).

Primary income account

It comprises income from compensation of employees, interest income, dividends and retained earnings from capital investments, rental income from the use of natural resources and other types of primary income including those that relate to insurance policy holders and pension funds.

Secondary income account

It entails transfers between residents and nonresidents that correspond to the provision of a good, service, financial asset, or other nonproduced asset with no corresponding return of an item of economic value.

Overnight interbank cash market

The component of the money market involving the shortest-term loan. Lenders agree to lend borrowers funds only “overnight” i.e. the borrower must repay the borrowed funds plus interest at the start of business the next day.

Repurchase agreements (repo)

An arrangement involving the sale of securities at a specified price with a commitment to repurchase the same or similar securities at a fixed price on a specified future date.

Reverse repo

An arrangement involving the buying of securities at a specified price with a commitment to re-sale the same or similar securities at a fixed price on a specified future date.

Reserve money (M0)

The Bank of Tanzania's liabilities in the form of currency in circulation outside the banking system, cash held by banks in their vaults and deposits of banks kept with the Bank of Tanzania in national currency. Reserve money is also referred to as base money, or monetary base or high-powered money.

Weighted yields of Treasury bills

This is the average yield of Treasury bills, which is weighted by the volume sold of 35-day, 91-day, 182-day, and 364-day Treasury bills, expressed in percentage per year.
