1.0 Global Economic Situation

The global economic environment remains characterised by a complex interplay of moderating growth dynamics and persistent structural uncertainties. A temporary easing in trade tensions is expected to stabilize near-term supply chain expectations and increase consumers' confidence. Nevertheless, a fear of a global growth recession remains following the 10 percent tariff on all imports imposed by the US¹. Global growth is forecast to slow to 2.8 percent in 2025 from 3.3 percent projected in January 2025².

Inflation has moderated globally, driven by softer demand, and enhanced supply-side resilience. However, residual cost-push factors linked to prior tariff adjustments and fragmented trade frameworks continue to inject volatility into pricing dynamics. In major advanced economies, central banks remain cautious, prioritizing data-dependent adjustments to interest rates amid uncertain growth signals.

On commodity prices, the gold price surged to USD 3,000 per troy ounce in April 2025 from USD 2,983.25 in the preceding month, fueled by safe-haven demand amid geopolitical conflicts and sustained central bank purchases. Tea and sugar prices rose by 8.2 percent and 3.9 percent, respectively, due to supply-demand imbalances, while crude oil price decreased by 6.7 percent due to subdued demand and trade uncertainties. Prices of agricultural commodities such as coffee and wheat also recorded a decline following improved production forecasts. Palm oil prices

softened due to elevated supply and currency-related export headwinds.

2.0 Domestic Economic Performance

2.1 Inflation

Overall, domestic inflation remained moderate. Headline inflation was 3.2 percent in April 2025 compared with 3.3 percent in the preceding month and 3.1 percent in the corresponding period in 2024. The change was largely attributed to an increase in food prices (Table 2.1.1 and Charts 2.1.2a and 2.1.2b). Notably, inflation remained within EAC and SADC's national target and regional benchmarks (Chart 2.1.1).

Table 2.1.1: Inflation Developments

Chart 2.1.1: Headline Inflation and Targets

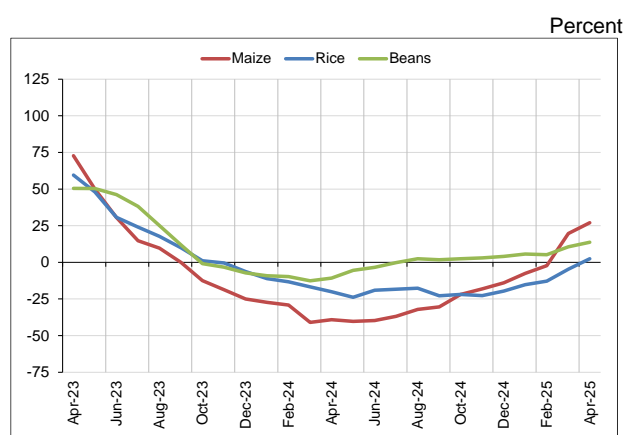

Source: National Bureau of Statistics and Bank of Tanzania calculations

Food inflation rose to 5.3 percent in April 2025, from 1.4 percent in the corresponding period in 2024 (Table 2.1.1). The increase largely stemmed from high staple food crop prices, which have remained above the levels observed a year earlier, amplified by weather-induced supply volatility and logistics (Chart 2.1.2).

Chart 2.1.2: Annual Change in Wholesale Prices of Select Food Crops.

The National Food Reserve Agency (NFRA) maintained sufficient food stocks. The stock increased to 557,228 tonnes by the end of April 2025, from 340,102 during the same period in 2024. NFRA released 29,834 tonnes of maize to local traders to stabilize the domestic supply (Table 2.1.2).

Core inflation declined to 2.2 percent in April 2025 from 3.9 percent in April 2024 (Chart 2.1.3), reflecting easing underlying price pressures, particularly in non-food categories. Despite moderation, core inflation remained the dominant driver of overall inflation (2.1.4). The contribution of unprocessed food inflation softened during the period, indicating some stabilization in food price

pressures. Energy inflation showed minimal variation, with a limited impact on headline inflation.

Energy, fuel, and utilities inflation eased to 7.3 percent year-on-year in April 2025 from 9.3 percent in a similar period in 2024, reflecting broad-based disinflation across petroleum products and utilities, particularly petrol and diesel (Chart 2.1.5).

2.2 Monetary policy

In April 2025, the Monetary Policy Committee maintained the Central Bank Rate (CBR) at 6 percent—the rate applicable for the quarter ending June 2025. The decision aimed at maintaining inflation within the medium-term target of 3-5 percent, smoothing exchange rate volatility while supporting the growth of economic activities.

Bank of Tanzania Monetary Policy Framework

The Bank of Tanzania is mandated to formulate and implement monetary policy, among others. Monetary policy involves actions or decisions taken to influence the amount of money circulating in the economy, which contributes to the determination of interest rates banks and financial institutions offer to customers, thereby affecting inflation and output growth.

Monetary policy's objectives are to maintain price stability, defined as a low and stable inflation rate over time, and to support economic growth. Inflation is measured as an annual change in the consumer price index, expressed in percentage. In the medium term (up to 5 years), the inflation target is 5 percent.

To fulfil these objectives, the Monetary Policy Committee (MPC) assesses economic conditions and determines the policy rate—Central Bank Rate (CBR)—which is consistent with maintaining low and stable inflation and supporting economic growth. The Bank of Tanzania implements monetary policy by steering the 7-day interbank interest rate, which is the operating target variable, along the CBR.

To align the operating target with the policy rate, the Bank uses a variety of monetary policy instruments. The main instruments are repurchase agreements (repo and reverse repo), 35-day and 91-day Treasury bills, statutory minimum reserve requirement ratio (SMR), and sale or purchase of foreign currency in the inter-bank foreign exchange market. There are also standing lending facilities—intraday and Lombard loans—that are granted to all banks on demand to facilitate smooth and efficient settlement of payments.

In implementing the Policy, the Bank exercises a high degree of transparency in its actions and decisions. The decisions of the MPC, which include setting policy rates, are communicated to banks through post-MPC meetings with Chief Executive Officers of banks and the public through the media. In addition, the Bank publishes MPC meeting statements, Monetary Policy Report, and other periodic reports containing outcomes of monetary policy implementation, monetary policy stance, decisions on policy rate, and the performance of the economy at large. The reports are available on the Bank of Tanzania website (www.bot.go.tz).

The implementation of monetary policy during the month therefore aimed at maintaining the 7-days interbank rate within the band of 4 to 8 percent, thereby ensuring adequate liquidity to support private sector credit expansion. Notwithstanding the adequacy levels of the liquidity, the 7-day interbank rate hovered near the upper band of the Central Bank Rate (CBR), due to tight liquidity in some few banks resulting from market segmentation (Chart 2.2.1).

Chart 2.2.1: 7-Day IBCM Interest Rate

Source: Bank of Tanzania and banks

Chart 2.2.2: Reverse Repo Transactions

Source: Bank of Tanzania and banks

In line with the adequate level of liquidity in the economy, the growth of extended broad money supply (M3) was high at 20.9 percent, compared with 17.1 percent in the preceding month, partly driven by growth of credit to the private sector (Chart 2.2.3, Chart 2.2.4, and Table 2.2.1). Private sector credit maintained its upward trajectory, growing at 14.9 percent in April 2025, from 14.0 percent in the previous month (Chart 2.2.5).

Credit allocation to building and construction activities exhibited the highest growth, registering a rate of 39.2 percent, followed by agriculture at 29.8 percent, and transport and communication at 23.8 percent (Table 2.2.2). Personal loans, predominantly extended to micro, small, and medium-sized enterprises, continued to constitute the largest proportion of total private sector credit, serving as the primary driver of credit expansion. Credit to the agriculture and trade sectors represented 13.0 percent and 12.6 percent of the total private sector credit, respectively (Chart 2.2.5).

2.3 Interest Rates

During the reviewed month, lending and deposit interest rates remained largely unchanged. The overall lending rate averaged 15.16 percent, slightly below the 15.50 percent recorded in the previous month (Table 2.3.1). A similar trend was observed on the lending rates charged on the prime customers (negotiated rates), which decreased marginally to 12.88 percent from 12.94 percent. The overall deposit rates declined marginally to 7.82 percent in April 2025, from 8.10 percent recorded in the previous month, reflecting improved liquidity conditions. In contrast, negotiated deposit rates edged up slightly to 10.52 percent from 10.35 percent. Meanwhile, the short-term interest rate spread between lending and deposit rates narrowed to 6.88 percentage points, compared to 7.72 percentage points recorded in April 2024.

Table 2.3.1: Lending and Deposit Interest Rates

2.4 Financial Markets

Government Securities Market

In April 2025, Government securities auctions were generally oversubscribed, reflecting the adequate level of liquidity in the banking system and increased investors awareness and stable macroeconomic conditions.

The Bank conducted two Treasury bill auctions with a total tender size of TZS 218 billion, mainly to cater for government budget financing and a small portion to facilitate price discovery for short-term financial instruments. Total bids amounted to TZS 275 billion, of which TZS 208.2 billion were successful (Chart 2.4.1). Consistently, the overall weighted average yield decreased to 8.86 percent from 10.10 percent in the preceding month.

Chart 2.4.1: Performance in Treasury Bills Auctions

Source: Bank of Tanzania

Note: LHS denotes left-hand scale; and RHS, right-hand scale

The Bank offered 2-, 10- and 20-year Treasury bond auctions with a total tender size of TZS 481.7 billion, mainly for government financing. All three

auctions were oversubscribed, attracting bids worth TZS 1,076.7 billion, of which TZS 519.6 billion were successful. The weighted average yield for the 2- and 20-year bonds eased to 12.08 percent and 15.11 percent, respectively, while that of the 10-year bond increased slightly to 14.26 percent.

Interbank Cash Market

The interbank cash market (IBCM), which facilitates the distribution of shilling liquidity among banks, continued to operate smoothly in the reviewed month. Total transactions in the market increased to TZS 2,611.1 billion, from TZS 1,757.7 billion in the preceding month (Chart 2.4.2). The 7-day transactions continued to account for the largest share of total transactions at 40.7 percent, while overnight transactions were around 15.2 percent. The overall IBCM interest rate decreased slightly to 8.00 percent from 8.12 percent in March 2025.

Chart 2.4.2: Interbank Cash Market Transactions

Source: Bank of Tanzania

Note: LHS denotes left-hand scale; and RHS, right-hand scale

Interbank Foreign Exchange Market

In April 2025, liquidity conditions in the Interbank Foreign Exchange Market (IFEM) remained subdued, similar to the preceding month in line with the seasonal decline in foreign exchange inflows from cash crop exports. The Bank participated in the market to support import demand, selling USD

6.25 million, in accordance with the Foreign Exchange Intervention Policy. Total transactions in the IFEM amounted to USD 12.9 million, compared with USD 70.1 million in the previous month and USD 72 million in the corresponding period of 2024 (Chart 2.4.3). The Shilling traded at an average rate of TZS 2,684.41 per USD, compared with TZS 2,650.24 per dollar in March 2025. This was equivalent to an annual depreciation of 3.9 percent, compared with a depreciation of 3.4 percent recorded in the previous month.

Chart 2.4.3: Developments in the IFEM

Source: Bank of Tanzania

Note: LHS denotes left-hand scale; and RHS, right-hand scale

2.5 Government Budgetary Operations

Revenue collection performance remained strong in March 2025, with the Government collecting a total of TZS 3,090.8 billion, 3.1 percent, below the target for the month. Of this amount, the central government collected TZS 2,953.8 billion, representing 95.6 percent of the total revenue, but slightly below its target of TZS 3,074 billion³.

Tax revenue continued to perform robustly, amounting to TZS 2,603.3 billion—2 percent above the target—largely driven by income tax collections, which exceeded the target by 11.6 percent. This

³ Data for April 2025 are not yet released.

strong tax revenue performance was largely attributed to the Government's ongoing initiatives to enhance revenue collection, including sustained efforts in tax administration. Non-tax revenue amounted to TZS 350.5 billion, falling short of the target of TZS 522.4 billion (Chart 2.5.1).

Chart 2.5.1: Central Government Revenue in March

Source: Ministry of Finance and Bank of Tanzania calculations
Note: Actual figures for 2025 are provisional

The Government continued to align its expenditure with available resources. In March 2025, total government spending amounted to TZS 3,375.1 billion, including TZS 1,968.4 billion for recurrent expenditures and TZS 1,406.7 billion for development expenditures, including infrastructure and social services (Chart 2.5.2).

Chart 2.5.2: Central Government Expenditure in March

Source: Ministry of Finance and Bank of Tanzania calculations
Note: Actual figures for 2025 are provisional

2.6 Debt Developments

The national debt stock recorded a monthly increase of 0.5 percent, reaching USD 48,479.9 million at the end of April 2025.

External Debt

As at the end of April 2025, the external debt stock (comprising both public and private sector debt) amounted to USD 35,505.9 million, representing 73.2 percent of the total national debt stock—an increase of 0.5 percent compared with the stock recorded at the end of the preceding month. Of the total external debt, 76.7 percent was attributable to the public sector (Table 2.6.1). External loans disbursed during April 2025 amounted to USD 109.9 million, while external debt service totalled USD 80.9 million. Of the debt service amount, USD 73.5 million was for principal repayments and the balance covered interest obligations.

The composition of external debt by creditor remained unchanged, with multilateral institutions continuing to hold the largest share (Table 2.6.2). Transportation and telecommunications activities remained the main beneficiary of external loan inflows, while the United States dollar continued to dominate the external debt portfolio by currency (Tables 2.6.3 and 2.6.4).

Domestic Debt

Domestic debt stock amounted to TZS 34,759.9 billion at the end of April 2025, representing a monthly increase of 1.5 percent (Chart 2.6.1). The increase was primarily driven by the issuance of Treasury bonds, which significantly outweighed

redemptions, as well as the government's utilization of the overdraft facility. Long-term instruments—government stocks and Treasury bonds—continued to dominate the domestic debt portfolio, with commercial banks and pension funds remaining the principal domestic creditors of the Government (Tables 2.6.5 and 2.6.6).

During April 2025, the Government mobilized TZS 625.5 billion from the domestic market to finance its budget, of which TZS 421.7 billion was raised through Treasury bonds and TZS 203.8 billion through Treasury bills (Chart 2.6.2). Meanwhile, the Government spent a total of TZS 640 billion to service the domestic debt, comprising TZS 356.3 billion in principal repayments and TZS 283.7 billion in interest payments.

2.7 External Sector Performance

The external sector performance continued to improve, with the current account deficit narrowing to USD 2,224.9 million compared with USD 2,733.4 million in the year ending April 2024 (Table 2.7.1). The performance was largely attributed to stronger growth in exports of goods and services relative to imports.

Foreign exchange reserves were USD 5,307.7 million at the end of April 2025, adequate to cover 4.3 months of projected imports of goods and services. The reserves were above the country benchmark of 4 months (Chart 2.7.1).

Exports

Exports of goods and services grew by 16.8 percent to USD 16,684.3 million, from USD 14,281.7 million in the year ending April 2024. The increase was driven by exports of gold, travel (tourism), agricultural products, and transportation services (Chart 2.7.2).

Exports of goods, which accounted for 58.4 percent of the total exports of goods and services, rose to USD 9,743.5 million from USD 7,815.8 million during the year ending April 2024. The increase was driven by exports of gold, cashew nuts, coffee, tobacco and horticultural products (Chart 2.7.2). Gold exports increased to USD 3,900.7 million compared with USD 3,133.3 million in 2024, owing to favourable prices in the world market. Traditional exports also rose, with much of the increase registered in cashew nuts, coffee and tobacco. However, export of manufactured products declined due to a slowdown in the exports of fertilizers, cement and ceramic products. On a monthly basis, exports of goods were USD 708.6 million in April 2025, up from USD 556.4 million in April 2024, driven by gold and cashew nuts.

Chart 2.7.2: Exports of Goods and Services

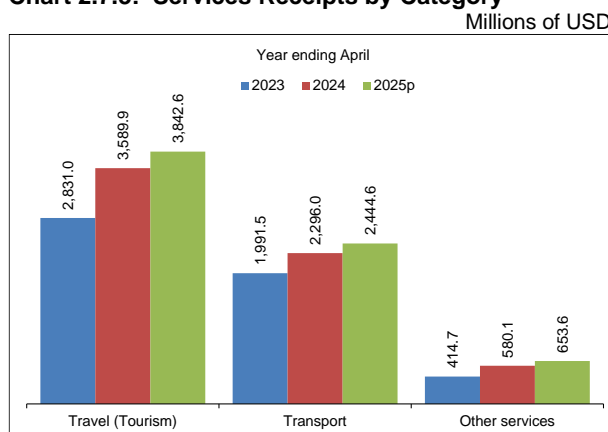

Source: Tanzania Revenue Authority and Bank of Tanzania Calculations

Note: p denotes provisional data

During the review period, service receipts rose by 7.3 percent to USD 6,940.8 million, from USD 6,466.0 million in 2024, owing to an increase in travel (tourism) receipts. Travel receipts accounted for 56 percent of the total service receipts. The increase in travel receipts was largely explained by a surge in international arrivals to 2,162,487 in the year to April 2025 from 1,938,875 in the corresponding period in 2024 (Chart 2.7.3).

Chart 2.7.3: Services Receipts by Category

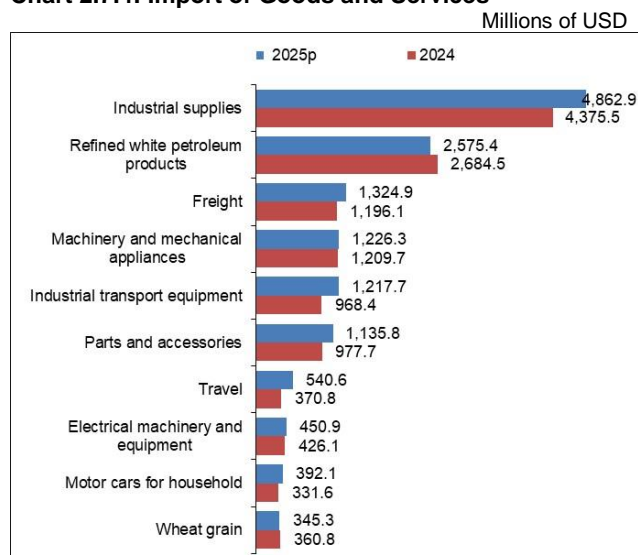

Source: Banks and Bank of Tanzania calculations

Note: Other services include construction, insurance, financial, telecommunication, computer and information, charges for the use of intellectual property, government, personal and other business services

Imports

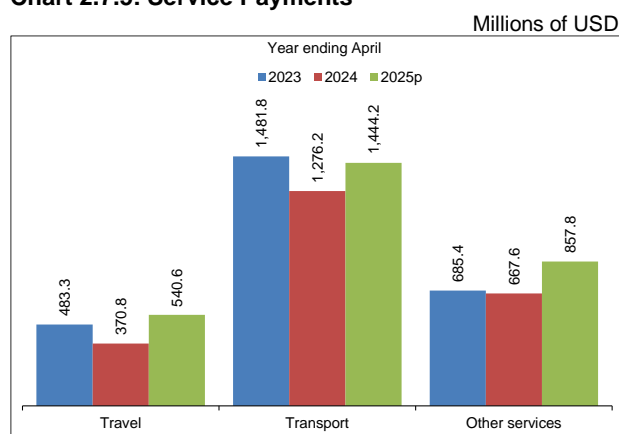

Imports of goods and services were USD 17,560.4 million during the year ending April 2025, up from USD 16,110.2 million in the corresponding period in 2024. The increase was driven by imports of industrial transport equipment and supplies and freight payments (Table 2.7.4). Month-on-month, imports of goods decreased to USD 1,579.1 million in April 2025, from USD 1,166.8 million in April 2024.

Chart 2.7.4: Import of Goods and Services

Source: Tanzania Revenue Authority and Bank of Tanzania calculations

Note: p denotes provisional; o/w, of which; and * Include adjustment for unrecorded exports

Services payments increased by 22.8 percent to USD 2,842.6 million, from USD 2,314.6 million buoyed by high freight payments, which accounted for 53.3 percent of total services payments (Chart 2.7.5). On a monthly basis, service payments rose by 48.7 percent to USD 258.8 million in April 2025, compared with USD 174.1 million in April 2024.

Chart 2.7.5: Service Payments

Source: Banks and Bank of Tanzania calculations

Note: Other services include construction, insurance, financial, telecommunication, computer and information, government, personal and other business services

The primary income account deficit widened to USD 1,881.5 million, up from USD 1,572.7 million in 2024, owing to increased payment of income on equity and interest abroad. On a monthly basis, the

deficit narrowed to USD 196.9 million in April 2025 from USD 202.1 million in April 2024.

The secondary income account recorded a surplus of USD 532.7 million, down from USD 667.8 million in the corresponding period in 2024, due to a decrease in personal transfers. On monthly basis, the surplus amounted to USD 5.8 million in April 2025 compared with USD 3.9 million in April 2024.

3.0 Economic Performance in Zanzibar

3.1 Inflation

Annual headline inflation eased to 4.3 percent in April 2025 from 5.1 percent and 4.9 percent recorded in March 2025 and April 2024, respectively. The outturn was mainly attributed to a decline in food inflation to 4.1 percent in April 2025 from 6.4 percent in the preceding month and 8 percent in April 2024 (Table 3.1.1 and Chart 3.1.1). The decrease in prices was observed in major food items including yellow cooking banana, sugar, Mbeya rice and Maize flour. On a monthly basis, headline inflation rose to 1 percent compared to 0.2 percent in March 2025 and down from 1.8 percent recorded in April 2024.

3.2 Government Budgetary Operations

Government's resource envelope for April 2025 stood at TZS 145.4 billion, of which, domestic revenue was TZS 142.9 billion, above the target by 4.3 percent, and grants was TZS 2.5 billion equivalent to 33.1 percent of the target. Tax revenue was TZS 125.6 billion, exceeding the target by 6.3 percent on account of improved efficiency in Tax administration while non-tax revenue was TZS 17.3 billion, equivalent to 91.4 percent of the target (Chart 3.2.1).

3.3 External Sector Performance

Current Account

During the year ending April 2025, Zanzibar current account surplus increased by 32.4 percent to USD 547.7 million from a surplus of USD 413.7 million,

recorded in the corresponding period in 2024. This development was associated with an increase in services receipts in particular tourism. (Table 3.3.1).

Exports

Exports of goods and services, during the year ending April 2025 grew by 14 percent to USD 1,135.3 million, from USD 996.2 million recorded in the corresponding period in 2024, owing to an increase in service exports. During the review period, services receipts in particular tourism, which accounted for 97 percent of the total export of goods and services, rose by 18.2 percent to USD 1,101.5 million, following an increase in tourist arrivals (Table 3.3.1). Cloves export in value terms, decreased by 88.4 percent from USD 28.8 million, recorded in the corresponding period in 2024, due to cyclical nature of the crop. On month-to-month basis, exports of goods and services increased to USD 54.3 million in April 2025 compared to USD 43.0 million in April 2024, due to increase in service receipts.

Imports

Imports of goods and services during the period increased by 2.7 percent to USD 612.4 million, from the amount recorded in the corresponding period in 2024 (Table 3.3.1). The increase was mainly driven by import of intermediate and consumer goods. Imports of Intermediate goods increased by 5.3 percent to USD 391.2 million, mainly attributed to increase in imports of food and beverage for industrial uses and industrial supplies. Similarly, import of consumer goods rose by 18.5 percent to USD 69.1 million, mainly due to increase in import of food and beverages for household consumption and non-industrial transport equipment (Table 3.3.3). Month-to-month imports of goods and services slightly declined to USD 46.6 million in April 2025, compared to USD 46.5 million in April 2024.

Note: Multilateral arrears are those owed by the private sector; ¹ denotes debt flows during the period; ² stock position at the end of period; r, revised data; and p, provisional data

Glossary

Broad money (M2)

A definition of money that comprises narrow money (M1) plus domestic currency time and savings deposits of residents with banks in the country.

Central bank rate

Means the interest rate set by the Monetary Policy Committee and used by the Bank to implement or signal its monetary policy stance.

Core inflation

This measures the rate of change in prices of goods and services other than energy, utilities and unprocessed food, over a specified period. The unprocessed food items, energy and utilities are excluded since they are volatile and hence may be affected by non-monetary events, which do not constitute the underlying monetary inflation.

Currency in circulation outside banks

Notes and coins of Tanzanian shillings circulating outside the banking system, i.e. outside the Bank of Tanzania and other depository corporations.

Disbursed outstanding debt

This is the amount of a loan or credit that has already been disbursed to the borrower and has not yet been repaid or forgiven.

Discount rate

The rate of interest that the Bank of Tanzania charges on loans it extends to banks. It uses Treasury bills rate as a base plus a loaded factor, which can be changed from time to time depending on the liquidity situation in the market.

Exchange rate

The price at which one unit of a currency can be purchased with another currency, for instance, TZS per US dollar.

Extended broad money (M3)

A definition of money that consists of broad money (M2) plus foreign currency deposits of residents with banks in the country.

External debt stock

The stock of a country's debt that is borrowed from foreign lenders through private commercial banks, foreign governments, or international financial institutions. It is the sum of public, publicly guaranteed, and private non-guaranteed long-term debt, use of IMF credit, and short-term debt, which includes all debt having an original maturity of one year or less and interest in arrears on long-term debt.

Food inflation

This is a measure of the rate of change in the price of food both processed and unprocessed.

Gross official reserves

Gross official reserves consist of external assets that are readily available to and controlled by the Bank of Tanzania for direct financing of balance of payments, and for indirectly regulating the magnitude of balance of payments imbalances through intervention in foreign exchange markets. Gross official reserves comprise the Bank of Tanzania's holdings of monetary gold, Special Drawing Rights (SDRs), reserve position in the International Monetary Fund, and foreign exchange resources available to the Bank of Tanzania for meeting external financing needs.

Inflation

The rate at which the average level of prices of a basket of selected goods and services in an economy is increasing over a period. It is often expressed as a percentage. Inflation indicates a decrease in the purchasing power of a nation's currency.

Interbank cash market

A money market in which banks extend loans to one another for a specified term of not more than 90 days. Each transaction represents an agreement between the banks to exchange the agreed amounts of currency at the specified rate on a fixed date.

Lombard facility

An overnight facility was established to enable banks to borrow from the Bank of Tanzania at their own discretion, by pledging eligible government securities as collateral.

Lombard rate

The rate of interest that the Bank of Tanzania charges on overnight loans it extends to banks. This rate uses the Central Bank Policy Rate as a base plus a loaded factor, which can be changed from time to time depending on the supply of shilling liquidity in the economy

Money supply

The sum of currency circulating outside the banking system and deposits of residents with banks is defined at various levels of aggregation. In Tanzania, three aggregates of money supply are compiled and reported, namely: narrow money (M1), broad money (M2), and extended broad money (M3).

Non-food inflation

This is a measure of price movements caused by factors other than food prices.

Narrow money (M1)

Consists of currency in circulation outside the banking system plus demand deposits (cheque account) of residents with banks in the country.

National debt

Total national debt obligations that include public debt and private sector external debt.

Public debt

Debt payable or guaranteed by the Government. Tanzania's public debt has two main components, domestic debt (which is incurred principally to finance fiscal deficit) and external debt (which is raised primarily to finance development projects). It comprises the debt central government owes to foreign creditors and external obligations of government departments and agencies that are guaranteed for repayment by the Government).

Primary income account

It comprises income from compensation of employees, interest income, dividends and retained earnings from capital investments, rental income from the use of natural resources and other types of primary income including those that relate to insurance policy holders and pension funds.

Secondary income account

It entails transfers between residents and non-residents that correspond to the provision of a good, service, financial asset, or other non-produced asset with no corresponding return of an item of economic value.

Overnight interbank cash market

The component of the money market involving the shortest-term loan. Lenders agree to lend borrowers funds only "overnight" i.e. the borrower must repay the borrowed funds plus interest at the start of business the next day.

Repurchase agreements (repo)

An arrangement involving the sale of securities at a specified price with a commitment to repurchase the same or similar securities at a fixed price on a specified future date.

Reverse repo

An arrangement involving the buying of securities at a specified price with a commitment to re-sale the same or similar securities at a fixed price on a specified future date.

Reserve money (M0)

The Bank of Tanzania's liabilities in the form of currency in circulation outside the banking system, cash held by banks in their vaults and deposits of banks kept with the Bank of Tanzania in national currency. Reserve money is also referred to as base money, or monetary base or high-powered money.

Weighted yields of Treasury bills

This is the average yield of Treasury bills, which is weighted by the volume sold of 35-day, 91-day, 182-day, and 364-day Treasury bills, expressed in percentage per year.
