SUMMARY OF ECONOMIC DEVELOPMENTS

Real Gross Domestic Product (GDP) grew by year-on-year rate of 7.9 percent in the second quarter of 2015 compared with 10.1 percent in the corresponding quarter of 2014. Activities that recorded high growth rates were electricity production, information and communication, professional and support services, as well as construction.

Food supply situation was generally adequate in the quarter ending September 2015. The stock of food held by National Food Reserve Agency decreased by 11.5 percent from the corresponding period in 2014. Annual headline inflation averaged 6.3 percent in the quarter ending September 2015 compared with an average of 6.6 percent recorded in the corresponding quarter in 2014.

Extended broad money supply (M3) recorded an annual growth rate of 16.5 percent compared to 14.7 percent recorded in the corresponding quarter in 2014, mainly driven by increase in net foreign assets of the banking system and credit growth to private sector. Notably, credit to the private sector by banks grew by 24.7 percent compared with 20.7 percent recorded in corresponding period previous year. Meanwhile, time deposits rate increased marginally, while lending rates decreased slightly. The spread between the one-year deposit and lending rates narrowed to an average of 3.69 percent from an average of 4.08 percent registered in corresponding quarter in 2014. The foreign exchange market was characterized by high demand for foreign exchange, driven largely by external factors; notably the strengthening of the US dollar, which was reflected in a depreciation of the shilling as was for many other currencies across the world.

On government fiscal front, revenue and grants amounted to TZS 3,103.9 billion during the quarter ending September 2015, while total expenditure (including expenditure float) amounted to TZS 3,340.0 billion. External debt increased by USD 25.6 million to USD 15,320.1 million from the level recorded at the end of June 2015, mainly on account of new disbursements.

The current account recorded a deficit of USD 954.5 million compared to a deficit of USD 941.4 million recorded in the corresponding period of 2014. The widening of the deficit was

mainly driven by decline in foreign inflows; particularly official transfers, as well as an increase in net factor income abroad (deficit in the primary income account).

In Zanzibar, real GDP expanded by 6.1 percent in the first quarter of 2015, significantly lower compared with a growth of 13.9 percent in the corresponding period of 2014. Annual headline inflation rose to 7.8 percent from 5.9 percent in the corresponding quarter in 2014, largely driven by increase in prices of food. Government budgetary operations registered a deficit of TZS 2.8 billion, after grants and adjustment to cash. The current account improved to a deficit of USD 43.3 million from a deficit of USD 58.2 million. The improvement was mainly on account of a decrease in goods imports, coupled with an increase in export of goods and services.

Inflation rates in EAC countries were within the convergence criteria of not more than 8.0 percent. The average inflation was 5.5 percent. In SADC countries, with the exception of Malawi, Angola, Zambia, Tanzania and Swaziland; all other countries managed to achieve the convergence criteria level of inflation rate of less than 5.0 percent.

1.0 OUTPUT AND PRICES

Output Performance

During the second quarter of 2015, real gross domestic product (GDP) grew by a year-on-year rate of 7.9 percent compared with 10.1 percent in the corresponding quarter of 2014. Strong growth was registered in electricity production at a rate of 18.5 percent, information and communication (17.4 percent), professional and support services (13.6 percent), and construction by 13.6 percent. The sturdy growth in construction activity was mainly attributed to infrastructural projects and residential and non-residential buildings. Growth in electricity emanated from increase in hydro and gas electricity generation, while that of information and communication was due to increased use of mobile services, particularly increase in airtime and expansion of broadcasting and internet services in the country. Growth in professional, scientific and technical activities was due to increase in other professional, legal and accounting activities.

Chart 1.1: Year-on-Year Real GDP Growth Rates

Sectoral Performance

Procurement of Traditional Export Crops

Procurement of the six major traditional export crops (cotton, tobacco, cashew nuts, coffee, sisal, and tea) increased in the quarter ending September 2015 compared to similar period in 2014 (**Table 1.1**). Procurement of coffee and tobacco increased while that of cotton, sisal and tea declined. The increase in procurement of coffee was attributed to favorable weather condition in main coffee growing areas of Mbeya, Kagera and Ruvuma coupled with bumper crop cycle. On the contrary, procurement of cotton and tea decline as a result of unfavorable

weather and low farm gate prices, while low leaf potential affected production of sisal. There were no procurement of cashew nuts as it was an off season.

Table 1.1: Procurement of Traditional Export Crops

Type of crop	Quarter ending		Percentage change
	Sep-14	Sep-15	
Cashew nuts	off season		0.0
Coffee	14,723.0	37,214.0	152.8
Cotton lint	66,810.0	49,046.0	-26.6
Sisal	7,546.9	7,258.6	-3.8
Tobacco	55,664.1	58,836.9	5.7
Tea	4,984.6	3,225.9	-35.3

Production of Gold and Diamond

During the quarter ending September 2015, the value of gold and diamond produced by large scale miners declined by 3.9 percent to USD 330.6 million from USD 344.0 million recorded in corresponding quarter in 2014. The fall in value was on account of a decline in volume of both gold and diamond. Production of gold declined to 8,998.6 kilograms compared to 9,448.7 kilograms recorded in the quarter ending September 2014 while that of diamond declined to 52,471.5 carats from 59,621.0 carats of the corresponding period in 2014 (**Table 1.2**).

Table 1.2: Production of Gold and Diamond

Mineral	Unit	Quarter ending			Percentage change	
		Sep-14	Jun-15	Sep-15	Jul-15 to Sep-15	Sep-14 to Sep-15

	Value (USD Million)	24.1	8.7	12.2	41.2	-49.1
Total	Value (USD Million)	344.0	315.2	330.6	4.9	-3.9

Source: Respective Mining Companies

Food Supply Situation

Food supply in the country was generally adequate during the quarter under review, as reflected by a sizeable food stock held by the National Food reserve Agency (NFRA) relative to corresponding periods in the recent years. The stock of food held by NFRA was 265,046 tonnes at the end of September 2015 (**Table 1.3**). The food stock comprised of maize,

sorghum and paddy. It is worth noting that in an effort to ensure food availability, NFRA sold 88,543.3 tonnes of maize and 112.8 tonnes of sorghum during the quarter under review, of which about 94.0 percent was sold to millers and private traders, World Food Programme (3.4 percent) and Disaster Coordination Unit of the Prime Minister’s Office (2.6 percent).

Table 1.3: Food Stock Held by NFRA

Prices of Major Food Crops

Prices of major food crops (maize, rice, round potatoes, beans, sorghum, and finger millet) were higher in the quarter ending September 2015 than in the corresponding quarter in 2014 (**Table 1.4**). The moderate increase in prices was attributed to a decrease in supply following lower production in 2014/15 crop-season relative to the preceding two years.

Table 1.4: Wholesale Prices Major Food Crops

Inflation Developments

Annual headline inflation averaged 6.3 percent in the quarter ending September 2015 compared with 5.3 percent recorded in the preceding quarter and 6.6 percent recorded in the corresponding quarter in 2014. Inflation for food and non-alcoholic beverages was 10.1 percent compared with 8.6 percent recorded in the preceding quarter while that for non-food was 1.8 percent compared with 1.3 percent (**Chart 1.1**).

2.0 MONETARY AND FINANCIAL MARKETS

Money Supply and Credit

Annual growth of extended broad money (M3) averaged 16.5 percent in the quarter ending September 2015 compared with 14.7 percent in the corresponding quarter 2014. This was contributed by increase in foreign assets (NFA) of the banking system and credit to private sector.

The NFA of the banking system grew by year-on-year rate of 35.9 percent in the quarter ending September 2015 compared with a contraction of 4.8 percent recorded in the corresponding period a year earlier, largely on account of valuation gains resulting from depreciation of the shilling against US dollar, as well as increase in foreign currency deposits by banks. Credit to the private sector grew by 24.7 percent year-on-year, compared with a growth of 20.7 percent recorded in the year ending September 2014. Net government borrowing from the banking system grew significantly less (9.0 percent) compared with the corresponding period in 2014 (71.3 percent), following a substantial decrease in holding of government securities by banks. **Chart 2.1** and **Table 2.1** show the evolution of money supply and its major components.

Credit by banks to major economic activities remained strong in the quarter ending September 2015. Activities that recorded high growths in credit were transport and communication whose credit grew by 31.2 percent, personal credit (25.1 percent), and trade at 25.0 percent (**Chart 2.2**). In terms of share of outstanding credit to total, trade activity remained dominant by accounting for 21.6 percent, followed by personal activities (17.1 percent) and manufacturing activities at 11.5 percent (**Chart 2.3**).

Interest Rates Developments

During the quarter under review, overall deposit rate increased slightly to an average of 9.09 percent from 8.17 percent in corresponding quarter in 2014, while the lending rate decreased to 16.12 percent from 16.15 percent. The interest rate offered to 12-month deposits averaged 10.62 percent compared with 10.34 percent, while the lending rate decreased to 14.31 percent from 14.42 percent. As a result, the interest rate spread between one-year deposit and lending rates narrowed to 3.69 percent from 4.08 percent in corresponding quarter in 2014 (**Table 2.2**).

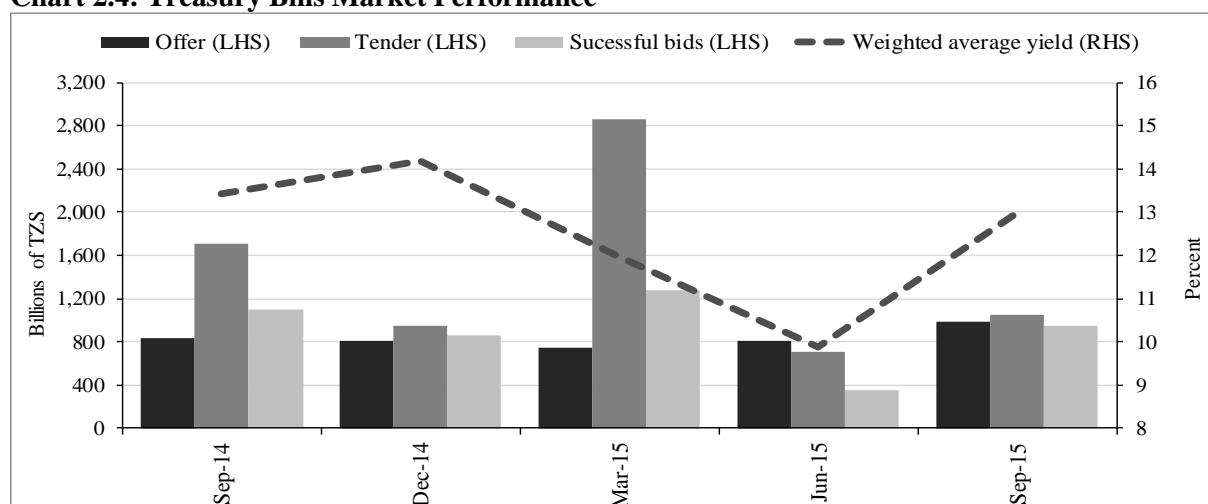

Table 2.2: Selected Banks' Interest Rates (Quarterly Average)

Financial Markets

During the quarter ending September 2015, Treasury bills worth TZS 990.0 billion were offered compared with TZS 835.0 billion in the corresponding quarter in 2014. The tendered amount was valued at TZS 1,043.60 billion compared with TZS 1,704.61 billion recorded in similar quarter a year before. Bids worth TZS 951.7 billion were successful compared with TZS 1,100.1 billion recorded in the corresponding quarter in 2014. The overall weighted average yield averaged 12.98 percent compared with 13.43 percent (**Chart 2.4**).

Chart 2.4: Treasury Bills Market Performance

Note: LHS denotes Left Hand Scale and RHS, Right Hand Scale

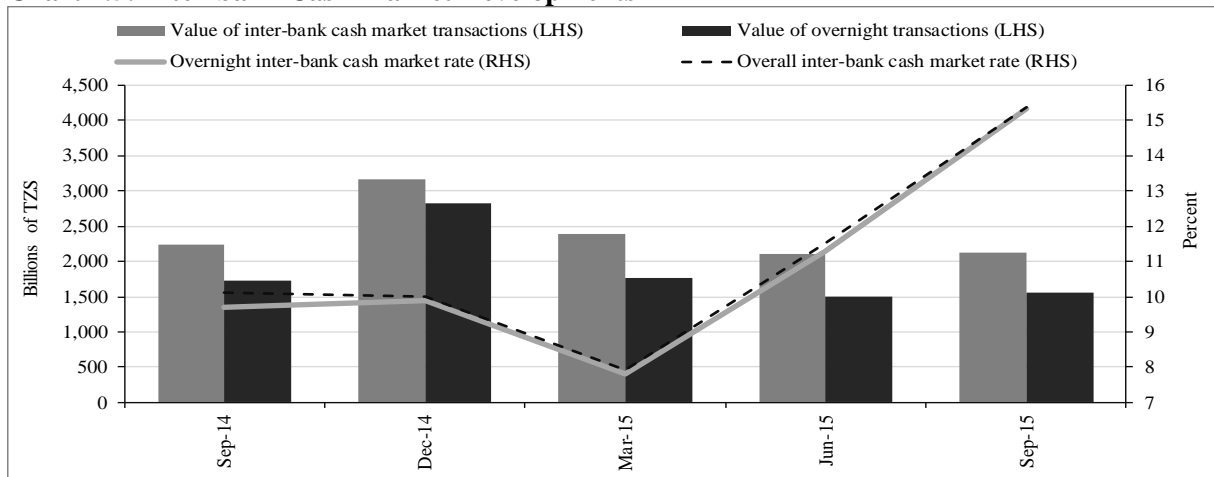

Source: Bank of Tanzania

In the Treasury bonds market, bonds of different maturities worth about TZS 430.4 billion were offered for sale compared with TZS 307.0 billion in the corresponding period 2014. Bids received amounted to TZS 272.2 billion compared with TZS 350.6 billion, while successful bids amounted to TZS 170.3 billion compared with TZS 239.9 billion.

Inter-bank cash market transactions amounted TZS 2,131.5 billion compared with TZS 2,236.29 billion the in quarter ending September 2014, with overnight transactions accounting for about 73.1 percent of the total transactions. The overall interbank rate averaged 15.37 percent compared to 10.11 percent recorded in the corresponding quarter in 2014, partly indicating a relatively tight liquidity in the market (**Chart 2.5**).

During the quarter under review, the Bank of Tanzania conducted repurchase agreements (repo) with banks worth TZS 433.0 billion compared with TZS 366.5 billion in the corresponding quarter in 2014. The repo rate was substantially high at an average of 13.43 percent compared with 3.97 percent recorded in the corresponding quarter in 2014 reflecting tight liquidity conditions prevailing in the quarter under review (**Chart 2.6**).

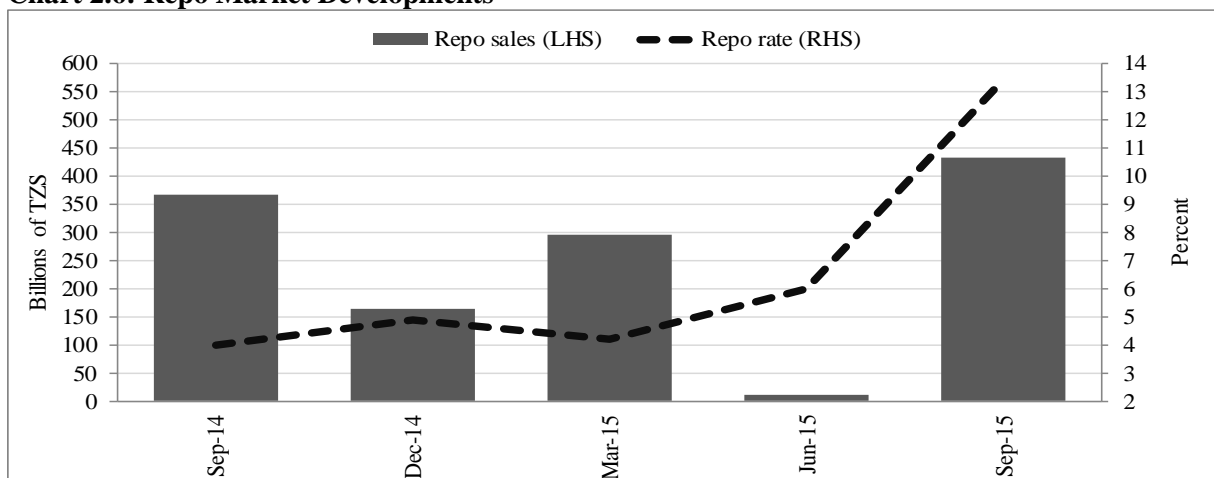

Chart 2.5: Inter-bank Cash Market Developments

Transactions in the interbank foreign exchange market (IFEM) amounted to USD 588.5 million compared with USD 516.5 million traded in the corresponding quarter in 2014. The Bank of Tanzania participated in the IFEM, selling USD 164.8 million for liquidity management compared with USD 263.3 million sold in the corresponding quarter in 2014. The Shilling depreciated to an average rate of TZS 2,137.6 per US dollar from TZS 1,666.5 per US dollar in the corresponding quarter in 2014 (**Chart 2. 7**). The higher exchange rate occurred as a result of fast depreciation of the shilling recorded in the preceding two quarters that was largely due to strengthening of the US dollar against many currencies across the world.

3.0 PUBLIC FINANCE

During the quarter ending September 2015, revenue and grants amounted to TZS 3,103.9 billion, while expenditure (including expenditure float) amounted to TZS 3,340.0 billion. Revenue collections amounted to TZS 2,952.6 billion, equivalent to 93.2 percent of the target for the quarter. Tax revenue amounted to TZS 2,803.2 billion or 96.9 percent and accounted for 91.8 percent of total revenue. Foreign grants received from development partners amounted to TZS 48.9 billion against the projection of TZS 192.6 billion (**Chart 3.1**). Expenditure amounted to TZS 3,273.7 billion or 70.3 percent of budget estimate, of which recurrent expenditure was TZS 2,670.4 billion and development expenditure was TZS 603.3 billion, equivalent to 75.6 percent and 53.8 percent of estimates, respectively (**Chart 3.2**). The

budgetary operations resulted to an overall deficit of TZS 828.0 billion, which was financed through domestic and foreign borrowing. Foreign net financing amounted to TZS 60.7 billion whereas net domestic borrowing was TZS 767.3 billion.

National Debt

External debt stock reached USD 15,320.1 million at the end of September 2015, an increase of USD 25.6 million from the end of the preceding quarter, on account of new disbursements. Disbursed outstanding debt accounted for 90.8 percent of the external debt stock and the balance was interest arrears.

Central government external debt increased by USD 66.5 million during the quarter, while on annual basis, the debt increased by USD 1,188.6 million. Table 3.1 summaries amount and shares of external debt by borrower. The profile of external debt by creditor shows that during the quarter under review the debt stock increased across all creditor categories, except commercial creditors (Table 3.2). The increase was due to new disbursements.

New loans worth USD 69.1 million were contracted, all by private sector. For the year ending September 2015, external debt contracted amounted to USD 995.0 million, of which USD 500.0 million was contracted by the central government and the balance by private sector. New disbursements amounted to USD 131.8 million, out of which USD 98.2 million was received by the central government and the balance by private sector. On annual basis, disbursement amounted to USD 2,000.7 million, of which USD 1,802.7 million was received by the government in the form of cash and equipment, and the balance of USD 198.0 million was received by private sector.

External debt service amounted to USD 94.4 million during the quarter, out of which USD 71.3 million was interest payment and the balance of USD 23.1 million was principal repayments. For the year ending September 2015, debt service was USD 403.6 million, comprising of principal repayment amounting to USD 201.9 million and the balance of USD 201.7 million was interest and other charges.

The stock of domestic debt reached TZS 7,826.2 billion at the end of September 2015, an increase of TZS 231.5 billion from the end of the preceding quarter. On annual basis, the stock of domestic debt increased by TZS 299.8 billion from TZS 7,526.9 billion recorded at the end of the corresponding period in 2014. Treasury bonds constituted the largest part of the debt, as in the preceding quarter (**Table 3.3**). The largest proportion of domestic debt was owed to commercial banks, accounting for 50.2 percent of domestic debt; followed by the Bank of Tanzania by 19.0 percent (**Table 3.4**).

During the quarter, the Government raised TZS 1,154.8 billion from domestic market, comprising of Treasury bills worth TZS 993.6 billion bonds amounting to TZS 161.2 billion. Redemption amounted to TZS 1,037.2 billion, out of which principal of TZS 840.3 billion was rolled over and interest component of TZS 196.9 billion was paid out.

4.0 EXTERNAL SECTOR PERFORMANCE

Current Account

In the quarter ending September 2015, the current account recorded a deficit of USD 954.5 million compared to a deficit of USD 941.4 million recorded in the corresponding quarter in 2014. The widening of the current account was mainly on account of decline in inflows; particularly official current transfers, as well as increase in net primary income payment.

Exports value of goods amounted to USD 1,364.6 million compared to USD 1,337.3 million recorded in the preceding quarter, following good performance in non-traditional commodities. Non-traditional exports increased by 8.8 percent to USD 1,087.6 million; with exports of minerals, re-exports and other exports constituting most of the increase (**Table 4.2**).

The value of imports goods declined on account of decrease in oil, food and foodstuff, industrial raw materials, and building and construction equipment (**Table 4.3**). The decline in value of oil imports was as a result of continued fall in oil prices in the world market and lower volume of imported oil during the quarter under review.

Table 4.3: Goods Import

Services and Primary Income Account

Services account recorded a net surplus of USD 270.2 million which is 0.8 percent less than the level of surplus recorded in the corresponding quarter in 2014. This change was as a result of increased payments associated with transportation particularly freight payment. Net deficit in the income account is due to increase in payments that were recorded at USD 233.3 million compared to USD 208.3 million recorded in the quarter ending September in 2014 (**Table 4.4**).

Table 4.4: Services and Primary Income Account

World Commodity Prices

During the quarter ending September 2015, average world market prices of coffee (Arabica), tea, sisal and cloves increased, while that of coffee (Robusta) cotton, oil and gold declined relative to the preceding quarter (**Table 4.5**). The increase in the prices of tea and sisal was mainly on account of improved global demand. The decrease in the price of coffee (Robusta) was largely due to a rise in expectations about increase production in Brazil and Vietnam during 2015/16 crop-season following favorable weather.

Average world market prices of crude oil and white petroleum products declined mainly on account of an increase in oil production from non-OPEC, particularly by the USA. The decline in gold price was mainly a result of a weak demand for gold as safe investment, following the strengthening of US dollar against major currencies, coupled with increased global production.

Table 4.5: World Commodity Prices

5.0 ECONOMIC DEVELOPMENTS IN ZANZIBAR

Output Performance

During the first quarter of 2015, the growth of real Gross Domestic Product (GDP) moderated to 6.1 percent year-on-year compared with growth rate of 13.9 percent recorded in the corresponding quarter in 2014. The main activities which contributed to the relative decline in output growth was agriculture, whose value added went up by 2.9 percent, lower than 3.2 percent in first quarter in 2014. The slump in agriculture sector is associated with adverse weather for some crops, which led to a 4.5 percent decline in production crops.

The main sectors which contributed to the growth of output during the quarter under review were construction, mining and quarrying, which expanded by 44.8 percent and 37.1 percent, respectively. The growth in these activities was on account of increase in quarrying products for construction purposes. Accommodation and food grew strongly by 41.8 percent compared with 8.2 percent recorded in the corresponding period in 2014.

Table 5.1: Quarterly Growth of Gross Domestic Product by Activity in Percent

Procurement of Export Crops

During the quarter ending September 2015, procurement of cloves decreased to 1,301.0 tonnes from 1,311.3 tonnes in the corresponding quarter in 2014, on account of cyclical nature of the crop. Likewise, seaweed procurement decreased to 3,200.0 tonnes from 3,483.7 tonnes, due to decrease of prices in the world market and lower production associated with disease.

Chart 5.1 shows quarterly procurement of major export crops in the past three years.

Chart 5.1: Quarterly Procurement of Major Export Crops

Source: Office of Chief Government Statistician

Manufacturing Activity

Production of soft drinks and mineral water increased by 2.5 percent and 3.3 percent respectively, from the corresponding quarter in 2015. On the other hand, production of noodles decreased by 13.1 percent from the corresponding quarter in 2014 on account of decreased demand (**Table 5.2**).

Table 5.2: Zanzibar Production of Selected Manufactured Commodities

Inflation Developments

Headline inflation averaged 7.8 percent compared with 5.9 percent in the corresponding quarter in 2014. The higher inflation was largely driven food sub-group. Non-food inflation rate decreased to 5.3 percent from 6.7 percent. Average food inflation rose sharply to 9.8 percent from 5.4 percent recorded in the corresponding quarter in 2014, mainly due to increases in the prices of wheat flour and sugar.

Table 5.3: Zanzibar Quarterly Average Inflation

Government Budgetary Operations

Government budgetary operations registered a deficit of TZS 2.6 billion after grants and adjustment to cash. Total resources (revenue and grants) amounted to TZS 93.8 billion, out of which TZS 91.6 billion were sourced domestically and the balance was grants. Tax revenue amounted to TZS 84.2 billion, or 9.4 percent below the target, while non-tax revenue was above the target by 3.0 percent. Total grants disbursed during the period amounted to TZS 2.2 billion or 9.6 percent above the projections for the period. **Chart 5.2** summarizes revenue collections by sources.

Chart 5.2: Zanzibar Government Revenue Collections by Source

Source: Ministry of Finance Zanzibar

During the quarter under review, tax on imports accounted for the largest share of government revenue, followed by VAT and excise duties (local) (**Chart 5.3**).

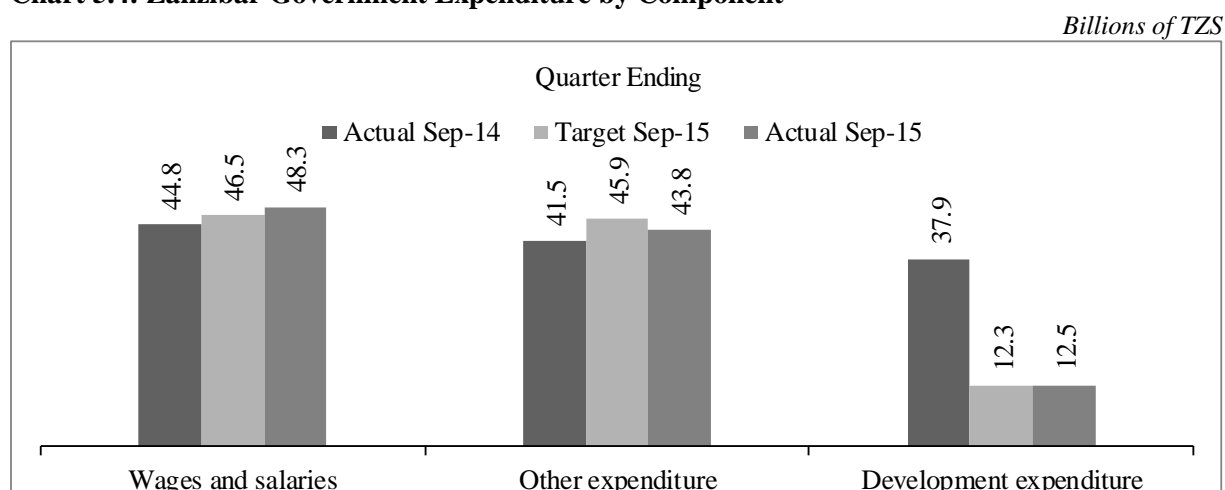

Chart 5.3: Zanzibar Government Revenue Collections by Source - Percentage Shares

Source: Ministry of Finance – Zanzibar

Government expenditure during the quarter ending September 2015, amounted to TZS 104.5 billion, out of which TZS 92.0 billion was recurrent expenditure and the balance was development expenditure (**Chart 5.4**). Development expenditure was TZS 12.5 billion slightly above the estimates for the quarter, mainly on account of higher disbursement of donor funds for development projects.

Chart 5.4: Zanzibar Government Expenditure by Component

Source: Ministry of Finance - Zanzibar

Zanzibar Debt Developments

The debt stock reached TZS 366.2 billion as at end September 2015 from TZS 350.2 billion recorded at the end of June 2015. External debt—the largest share of the total debt (71.1 percent)—amounted to USD 122.8 million, nearly the level recorded at the end of June 2015. Debt guaranteed by the Union Government accounted for 87.3 percent of the total external debt and the balance was non-guaranteed debt. Debt owed to multilateral creditors was dominant by 61.4 percent, followed by bilateral creditors by 26.6 percent and the remaining was commercial and export credit.

Debt maturing beyond 20 years dominated the profile of external debt, followed by debt maturing in less than 10 years (**Table 5.4**). In terms of use of the borrowed funds, transport and telecommunications activities received the largest share, followed by social welfare and education. Agricultural sector was the least recipient (**Table 5.5**).

Domestic debt stock amounted to TZS 102.3 billion at the end of September 2015, nearly the same recorded at the end of the preceding quarter. A large part of the debt was in the form of government securities which accounted for 45.1 percent. Debt owed to the Zanzibar Social Security Fund was 20.2 percent of total domestic debt, government pensioners (12.4 percent), suppliers credit (10.5 percent), and the balance was owed to the People's Bank of Zanzibar, Zanzibar Port Company. Classifications of domestic debt by maturity indicate that, debt stock maturing between two to ten years was the largest, followed by undetermined debt stock. **Table 5.6** shows Zanzibar domestic debt by instruments. **Table 5.7** indicates domestic debt by maturity profile.

External Sector Performance

During the quarter ending September 2015, current account recorded a deficit of USD 43.3 million compared with a surplus of USD 10.7 million recorded in the corresponding quarter in 2014. The worsening was mainly on account of a decrease in exports of goods and services, coupled with an increase in value of imports of goods and services (**Table 5.7**).

Table 5.8: Current Account*Millions of USD*

The value of exports of goods and services was USD 35.7 million, up from USD 31.2 million recorded in the previous quarter, (**Tables 5.7** and **5.8**). Meanwhile, the value of imported goods and services declined by 14.8 percent from USD 94.7 million. Specifically, value of

goods imports fell to USD 67.0 million from USD 80.8 million, while payments for services decreased to USD 13.7 million from USD 13.8 million. The decline in merchandise imports occurred mostly in consumer and intermediate goods (**Table 5.9**). The services account recorded a surplus of USD 19.0 million compared with a surplus of USD 15.7 million registered during the preceding quarter (**Table 6.0**). The improvement was mainly attributed to increase in receipts from tourism related activities.

6.0 ECONOMIC DEVELOPMENTS IN THE EAC AND SADC

During the quarter ending September 2015, inflation rates in East African Community (EAC) region averaged 5.5 percent compared with 5.3 percent in the preceding quarter (**Table 6.1**). With the exception of Kenya and Burundi, inflation rates in other EAC countries went up. The increase in inflation rates in Tanzania, and Uganda was mainly as a result of a rise in prices of food. In Rwanda, the increase was largely due to a surge in prices of locally produced goods particularly ‘food, alcoholic and non-alcoholic beverages, tobacco,’ housing, water, electricity, gas and other fuels. Conversely, the decrease in inflation rate in Kenya and Burundi was mainly driven by satisfactory food crops production which resulted in the fall in food prices in the local markets. Inflation in all EAC Partner States was within the convergence criterion of not more than 8.0 percent.

Inflation rates in the SADC region was 5.6 percent compared with 4.8 percent recorded in the previous quarter (**Table 6.1**). Inflation rates increased in all SADC member countries, with exception of Botswana and Zimbabwe. The decline in inflation rate in Botswana was due to lower fuel prices and low domestic demand whereas in Zimbabwe it was mainly due to a fall in prices of food and non-alcoholic beverages, clothing and footwear, water, electricity and gas. Conversely, the increase in inflation rates in Mozambique, Seychelles, South Africa and Angola was largely on account of a rise in prices of food items. In Namibia the increase was mainly attributed to a rise in prices of alcohol beverages and tobacco, transport and housing, water, electricity gas and other fuels. During the quarter under review, inflation rate in South

Africa, Botswana, Lesotho, Mauritius, Mozambique, Namibia, Seychelles and Zimbabwe were within the SADC convergence criterion of less than 5.0 percent. Notably, Malawi and Angola were the only SADC countries with inflation rates above 10 percent.

Notes: 1) Headline Inflation

2) Underlying Inflation

* Adjusted for seasonal movements or seasonal variations, which refer to identical, or almost identical, patterns that time series appears to follow during the corresponding months (quarters) of successive years. Such movements are due to recurring events, which take place annually, for example the increase of food prices during Ramadhan.

8.0 GLOSSARY

Average Inflation Rate

Inflation is defined as the rate at which the average level of domestic prices is increasing over a period of time.

Currency in Circulation outside Banks

Notes and coin accepted as legal tender in the domestic economy, excluding amounts held by the banking system.

Bank Rate

The Central Bank Rate which is determined by the Monetary Policy Committee for signaling the direction of the monetary policy.

Discount Rate

The interest rate Bank of Tanzania charges on loans it extends to banks and to the Government. It uses Bank rate as a base plus a loaded factor, which change from time to time depending on the liquidity situation in the market.

Exchange Rate

The price at which one currency can be purchased with another currency, e.g. TZS per US dollar.

Lombard Facility

An overnight facility introduced by the Bank on 1st December 2003 to enable commercial banks to borrow at their own discretion, by pledging of eligible government securities as collateral.

Lombard Rate

The rate payable for the use of the Lombard Facility. The rate is based on the prevailing weighted average yield of 35-day T-bill, Repo (7 days) or overnight inter-bank rate whichever is higher in the market plus 20 percent.

Money Supply, M

The sum of currency in circulation outside the banking system and deposits of residents with banks defined in various levels of aggregation. In Tanzania, three aggregates of money supply are compiled and reported, namely: narrow money (M1), broad money (M2), and extended broad money (M3).

Narrow Money (M1)

This consists of currency in circulation outside banking system and demand deposits.

Broad Money (M2)

This is equivalent to narrow money (M1) plus time (fixed) and savings deposits.

Extended Broad Money (M3)

It consists of broad money (M2) plus residents' foreign currency deposits.

Transferable Deposits

Comprise of all deposits that are immediately convertible into currency and directly usable for making payments by cheques, draft, giro order, direct debit/credit or other payment facility without any kind of significant restriction or penalty.

Non-transferable Deposits

Include all claims reflecting evidence of deposit other than transferable deposits. Typical examples are saving deposits and time deposits.

Non-Food Inflation Rate

This is a measure of price movements caused by factors other than food prices.

Repurchase Agreement (REPO)

These are agreements to purchase/sale by the BoT government securities from/to financial institutions at agreed rate for a specified period, with an understanding that the financial institutions will repurchase/resell the securities to the BoT at the end of the period.

Reserve Money (M0)

The Bank of Tanzania's liabilities in the form of: currency in circulation outside the banking system, cash held by banks in their vault and deposits of banks kept with the Bank of Tanzania in national currency. Reserve money is also referred to as base money or high powered money.

Weighted Annualized Yields of Treasury Bills of all Maturities

This is the average yield of Treasury bills, which is weighted by the volume sold of 35-day, 91-day, 182-day, and 364-day Treasury bills, expressed in percentage per year.
