Mr. Omar S. Mussa Director

Mr. Yusto E. Tongola Secretary to the Board

SUMMARY OF ECONOMIC DEVELOPMENTS

Real Gross Domestic Product (GDP) grew by 6.5 percent in the first quarter of 2015 compared to a growth of 8.6 percent in the corresponding quarter of 2014. Highest growth rate was recorded in transport and storage, followed by Public administration, Electricity, and Finance and insurance.

Food supply situation was generally satisfactory. As a result, the stock of food held by National Food Reserve Agency was more than double that of the stock held at the end of the corresponding period in 2014. However, wholesale prices for most food crops were higher than in the corresponding quarter in 2014.

Annual headline inflation average 5.3 percent in the quarter ending June 2015 compared with an average of 6.4 percent recorded in the corresponding quarter in 2014. The decline in inflation was mainly on account of decrease in non-food, energy and fuel prices.

Extended broad money supply (M3) recorded an annual growth rate of 13.2 percent compared to 15.8 percent recorded in the year ending June 2014, mainly driven by decline in government borrowing from the banking system. Credit to the private sector by banks, grew by 21.6 percent compared with 21.4 percent recorded in corresponding period previous year. Overall time deposits rate increased slightly, while lending rates decreased marginally. The spread between one-year deposit and lending rates remained broadly unchanged. The interbank foreign exchange market was characterized by high demand for foreign exchange, driven largely by external factors, notably the strengthening of the US dollar, which was reflected in a depreciation of the shilling as was for many other currencies across the world.

Government domestic revenue and grants amounted to TZS 3,078.1 billion, during the quarter ending June 2015, while total expenditure including expenditure float amounted to TZS 4,573.1 billion. External debt stock increased by USD 795.9 million to USD 15,493.6 million from the level recorded at the end of March 2015, mainly on account of new disbursements.

Current account deficit narrowed to USD 1,135.5 million compared to a deficit of USD 1,437.6 million recorded in the corresponding period of 2014. The improvement was driven

by the increase in export of goods and services coupled with an increase in secondary income.

Zanzibar's real GDP, in the first quarter of 2015 grew by 6.1 percent compared to a growth of 13.9 percent recorded in the corresponding period of 2014. The increase was mainly attributed to the growth in construction, accommodation and food services, and mining and quarrying. Annual headline inflation slowed down to 2.6 percent in the quarter of June 2015 from 8.1 percent recorded in the corresponding quarter in 2014, largely driven by decrease in prices of fuel and some food items. Government budgetary operations registered a deficit of TZS 8.1 billion after grants and adjustment to cash. The current account balance recorded a deficit of USD 58.2 million compared to a deficit of USD 11.3 million, mainly on account of increase in good imports coupled with a decrease in exports of goods and services.

Real GDP growth in the East African Community (EAC) region rose to 5.8 percent in 2014 compared to 5.2 percent recorded in the preceding year, mainly driven by growth in Rwanda and Uganda. While, the average real GDP growth in the SADC region decline to 4.2 percent in 2014 from 5.2 percent recorded in 2013. Headline inflation in the East African Community countries averaged at 5.3 percent. The inflation rates in all EAC countries were within the convergence criteria of not more than 8.0 percent. With the exception of Malawi, Angola, Zambia, Tanzania and Swaziland the remaining SADC Member States managed to achieve the convergence criteria level of inflation rate of less than 5.0 percent during the quarter under review.

1.0 OUTPUT AND PRICES

Overall Economic Performance

Real GDP grew by 6.5 percent in the first quarter of 2015 compared to a growth of 8.6 percent recorded in the corresponding quarter of 2014 (**Chart 1.1**). The highest growth rate was recorded in transport and storage (12.9 percent), followed by public administration (12.0 percent), electricity (10.7 percent), and finance and insurance (9.1 percent).

Sectoral Performance

Procurement of Traditional Export Crops

Procurement of major traditional export crops (cotton, tobacco, cashew nuts, coffee, sisal, and tea) declined to 32,718.7 tonnes in the quarter ending June 2015 from 54,321.0 tonnes recorded in the quarter ending June 2014 (**Table 1.1**). Procurement of sisal and tobacco declined while that of tea increased. The increased procurement of tea was mainly associated with good weather experienced in most of tea producing areas. On the contrary, procurement of sisal declined mainly due to frequent breakdown of machinery and inadequate supply of electricity, while that of tobacco was attributed to late commencement of the marketing season. During the quarter under review, there were no procurement of cotton, coffee and cashew nuts as it was an off season for these crops.

Table 1.1: Procurement of Traditional Export Crops

			Tonnes

Production of Gold and Diamond

During the quarter ending June 2015, gold production was 9,783.1 kilograms compared to 8,376.8 kilograms recorded in the corresponding quarter in 2014, but its value fell by 5.7 percent mainly on account of decline in price in the world market. Meanwhile, production volume of diamond declined to 29,043.3 carats from 48,678.1 carats produced in the corresponding period in 2014 (**Table 1.2**).

Table 1.2: Production of Gold and Diamond

Food Supply Situation and National Food Reserve

Food supply situation in the quarter under review was generally satisfactory. The National Food Reserve Agency (NFRA) purchased 160.9 tonnes of maize and sold 96,307.8 tonnes of maize and sorghum to Prison Department and Disaster Coordination Unit of the Prime Minister's Office. The stock of food held by NFRA at the end of June 2015 was 353,702 tonnes, almost double of the stock held at the end of corresponding period in 2014 (**Table 1.3**).

Inflation Developments

Annual headline inflation averaged 5.3 percent in the quarter ending June 2015 compared with 6.4 percent recorded in the corresponding quarter in 2014. The decrease in inflation was

mainly on account of decline in non-food, energy and fuels prices. Inflation of non-food items was much lower at 1.3 percent compared with 4.6 percent. Inflation of food and non-alcoholic beverages was 8.6 percent compared with 8.1 percent recorded in the corresponding quarter (**Chart 1.1 and Table 1.5**).

2.0 MONETARY AND FINANCIAL MARKETS

Money Supply and Credit Developments

Developments in the second quarter of 2015 indicate slower growth of money supply when compared with the corresponding quarter of 2014. Year-on-year growth of extended broad money (M3) was 13.2 percent, compared with 15.8 percent recorded in the corresponding period of 2014. The slower growth of M3 was mainly driven by the deceleration in the growth of net domestic assets of the banking system, largely reflecting slowdown in government borrowing from the banking system. However, the growth of credit to the private sector remained strong at 21.6 percent (**Chart 2.1** and **Table 2.1**). Meanwhile, net foreign assets of the banking system increased, following valuation gains resulting from the depreciation of the Tanzanian shilling.

Interest Rates Developments

During the quarter under review, overall time deposit rate increased slightly to an average of 8.57 percent from 8.54 percent registered in corresponding quarter in 2014, while the overall lending rate decreased to an average of 16.13 percent from 16.50 percent. On the other hand, one - year deposit rate declined to an average of 10.55 percent from 10.81 percent, while that of one -year lending rate increased to an average of 16.13 percent from an average 15.97 percent. The spread between the one-year deposit and lending rate remained broadly unchanged (**Table 2.2**).

Financial Markets Developments

During the quarter ending June 2015, Treasury bills worth TZS 810.0 billion were offered, same as the amount offered in the corresponding quarter in 2014. The tendered amount was valued at TZS 702.01 billion compared with TZS 1,415.85 billion recorded in the similar quarter a year before. Due to deep discounting prices, only bids worth TZS 348.3 billion were successful compared with successful bids worth TZS 906.6 billion recorded in the corresponding quarter in 2014. The overall weighted average yield (WAY) averaged 9.89 percent compared to an average of 12.81 percent recorded in the similar period of 2014 (Chart 2.4).

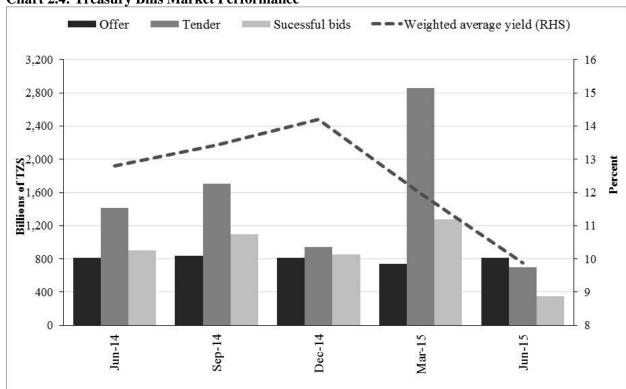

Chart 2.4: Treasury Bills Market Performance

Note: LHS denotes Left Hand Scale and RHS, Right Hand Scale

Source: Bank of Tanzania

In the Treasury bonds market, the Bank offered Treasury bonds of various maturities worth TZS 369.0 billion compared with TZS 246.8 billion issued in the similar quarter of 2014. Bids received amounted to TZS 424.5 billion compared with TZS 407.5 billion received in the similar quarter of 2014. Successful bids amounted to TZS 306.7 billion, compared with TZS 232.5 billion in the similar period of 2014.

The Inter-bank Cash Market recorded transactions worth TZS 2,100.9 billion compared with TZS 3,419.9 billion in the quarter ending June 2014. Overnight transactions amounted to TZS 1,499.15 billion or 80.20 percent of total transactions. Overall interbank rate averaged 11.27 percent compared to 8.30 percent recorded in the corresponding quarter in 2014, partly indicating the prevalence of tight liquidity conditions in the market (**Chart 2.5**).

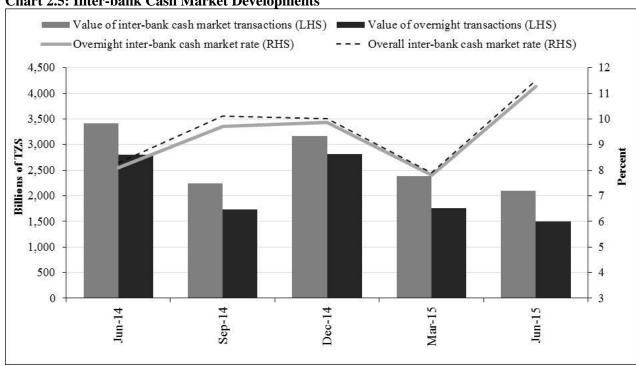

Chart 2.5: Inter-bank Cash Market Developments

Note: LHS denotes Left Hand Scale and RHS, Right Hand Scale

Source: Bank of Tanzania

During the quarter under review, the Bank conducted repurchase agreements (repo) with banks worth TZS 10.0 billion compared with TZS 149.0 billion sold in the corresponding quarter in 2014. The repo rate averaged 6.10 percent compared with 3.96 percent recorded in the corresponding quarter in 2014 (Chart 2.6).

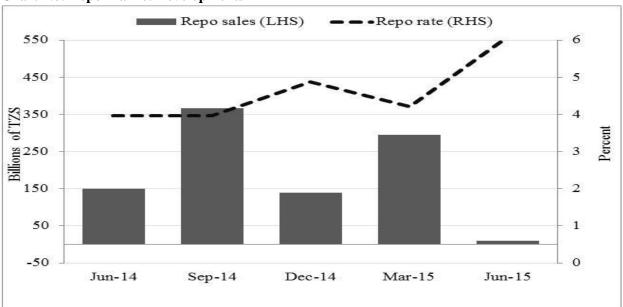

Chart 2.6: Repo Market Developments

Note: LHS denotes Left Hand Scale and RHS, Right Hand Scale

Source: Bank of Tanzania

Transactions in the Interbank Foreign Exchange Market (IFEM) amounted to USD 467.7 million compared with USD 416.7 million traded in the corresponding quarter in 2014. The Bank sold USD 280.3 million for liquidity management, compared with USD 282.5 million sold in the corresponding quarter in 2014. During the period, the Shilling depreciated to an average rate of TZS 1,951.7 per USD from an average of TZS 1,647.7 per USD in the corresponding quarter in 2014, representing an annual depreciation of 18.4 percent, the highest in the recent past (**Chart 2. 7**).

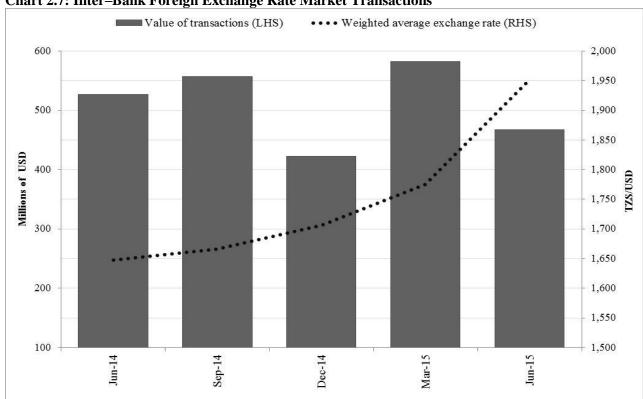

Chart 2.7: Inter-Bank Foreign Exchange Rate Market Transactions

Note: LHS denotes Left Hand Scale and RHS, Right Hand Scale

Source: Bank of Tanzania

Depreciation of the shilling against the USD in the quarter under review was driven by external and internal factors. In the second half of 2014 the US dollar strengthened against currencies across the world following improved economic performance in the US, which led to increased demand for US dollar as investors preferred investing in the US economy. This saw the annual depreciation of the shilling picking up from 2.5 percent in July 2014 to 9.0 percent in March 2015, a trend that was also observed between other currencies and the US dollar. From April 2015 onwards though, the depreciation of the shilling against the US dollar accelerated as it was compounded by domestic factors that included continued decline in receipts from some exports, particularly gold and cotton. This coincided with low season for receipts from tourism and agricultural exports and large payment of dividends to foreign investors. Meanwhile, delays in the disbursement of budgetary program assistance and external non-concessional borrowing, fuelled foreign exchange shortage psychology leading to an increase in speculation in the market. This behaviour contributed to the rapid depreciation of the exchange rate in April, May and June 2015.

In view of these developments, the Bank took several measures, which included increasing sales of foreign exchange in the market and tightening money supply by increasing the minimum reserve requirement. The Bank also lowered the net open position of banks and restricted them from transacting in foreign exchange derivative without evidence of an underlying economic activity to ensure orderly market practices. These measures contributed to some correction in the trend of exchange rate, especially towards the end of June 2015. With the coming of high season for tourism and agricultural exports, coupled with realization of some of the budgetary inflows, the exchange rate is expected to stabilize in the near-term.

3.0 PUBLIC FINANCE

Government Budgetary Operations

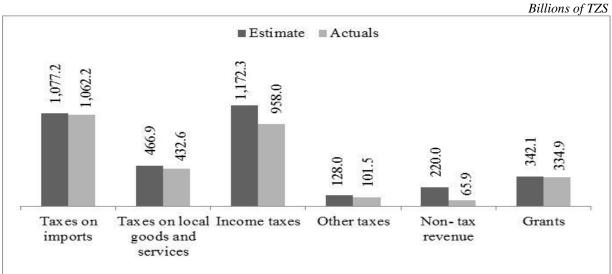

During the quarter ending June 2015, domestic revenue and grants amounted to TZS 3,078.1 billion, while total expenditure including expenditure float amounted to TZS 4,573.1 billion.

Revenue Performance

During the quarter under review, revenue collected by Central Government amounted to TZS 2,620.2 billion, which is 14.5 percent below the target. Tax revenue amounted to TZS 2,554.3 billion or 89.8 percent of the target for the quarter and accounted for 93.1 percent of total revenue.

Grants disbursed amounted to TZS 334.9 billion during the quarter, against the projection of TZS 342.1 billion (**Chart 3.1**).

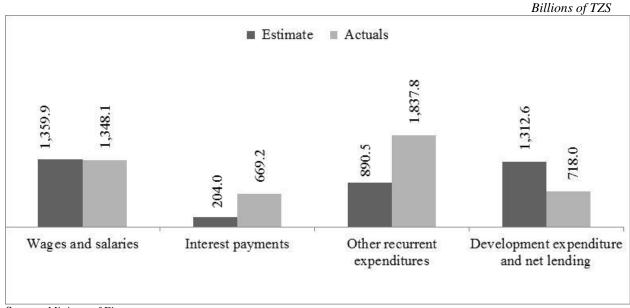

Source: Ministry of Finance

Expenditure

Expenditure for the fourth quarter of 2014/15 amounted to TZS 4,573.1 billion or 121.4 percent of budget estimate, out of which recurrent expenditure was TZS 3,855.1 billion and development expenditure was TZS 718.0 billion, equivalent to 54.7 percent and 39.9 percent of estimates, respectively (**Chart 3.2**).

National Debt

External debt stock reached USD 15,493.6 million at the end of June 2015, an increase of USD 795.9 million from the amount recorded at the end of preceding quarter. The increase was mainly on account of new disbursements. Disbursed outstanding debt accounted for 90.3 percent of the external debt stock and the balance was interest arrears.

In terms of borrower category, the external debt owed by the central government increased by USD 583.7 million from the level reached at the end of preceding quarter. On annual basis, the central government debt increased by USD 1,086.3 million. The summary of amount and shares with respect to borrower categories is as indicated in **Table 3.1**

The profile of external debt by creditor shows that during the quarter debt increased across all creditor categories due to new disbursements (**Table 3.2**). The increase in debt owed to multilateral creditors was, nevertheless, slower than the net flow on debt due to appreciation of USD against the Special Drawing Rights (SDR) on which large proportion of debt under this category is denominated.

During the quarter under review, new loans worth USD 441.3 million were contracted, out of which, USD 380.0 million were contracted by the Government. For the year ending June 2015, external debt contracted amounted to USD 1,026.6 million, out of which USD 680.0 million was contracted by the central government and the balance by private sector.

New disbursements during the quarter ending June 2015 amounted to USD 526.8 million, out of which USD 500.5 million was received by the Government and the balance was received by private sector. On annual basis a total of USD 2,241.1 million was disbursed, out of which USD 1,890.5 million was received by the government and USD 350.5 million by private sector.

External debt payments during the quarter amounted to USD 93.1 million, out of which USD 71.6 million was principal repayments and the balance of USD 21.5 million was interest payments and other charges. External debt service during the year ending June 2015 amounted to USD 403.3 million, out of which USD 213.6 million was principal repayment, and USD 187.6 million and USD 2.3 million were interest and other charges, respectively.

The stock of domestic debt at the end of June 2015 amounted to TZS 7,594.7 billion, a decrease of TZS 13.5 billion from the amount recorded at the end of the preceding quarter. The decrease was on account of redemption of short term loan facility. On annual basis,

domestic debt stock increased by TZS 1,059.2 billion from TZS 6,535.5 billion recorded at the end of the corresponding period in 2014. The increase was mainly on account of issuance of Government securities higher than the amount redeemed. Treasury bonds accounted for 72.2 percent followed by Treasury bills at 24.4 percent (**Table 3.3**).

During the quarter, the Government raised TZS 699.3 billion from domestic market, out of which TZS 321.1 billion was from Treasury bills and TZS 378.2 billion Treasury bonds. The amount that fell due for payment was TZS 1,036.0 billion, out of which principal amounting to TZS 711.0 billion was rolled over, while principal and interest amounting to TZS 100.0 billion and TZS 225.0 billion, respectively, were paid out of Government resources.

4.0 EXTERNAL SECTOR PERFORMANCE

Current Account

During the quarter ending June 2015, current account deficit narrowed to USD 1,135.5 million being 21.0 percent lower compared to a deficit that was recorded during the corresponding quarter in 2014. This out turn was mainly driven by the increase in exports of goods and services coupled with an increase in official transfers (**Table 4.1**).

Table 4.1: Current Account Balance

Exports

Exports of goods amounted to USD 1,225.7 million being 8.5 percent higher than the amount recorded in the quarter ending June 2014, due to improved performance in traditional as well as non-traditional commodities. The value of traditional exports during the review period, was USD 67.5 million compared to USD 50.0 million recorded during the corresponding quarter in 2014. Non-traditional exports increased by 7.1 percent to USD 998.3 million mainly on account of high values of re-exports and other exports (**Table 4.2**).

Table 4.2: Exports by Type of Commodity

Imports

The value of imported goods declined slightly on account of a fall in import bill of intermediate and consumer goods that declined by 14.7 percent and 10.6 percent respectively, compared to the value recorded in the corresponding period in 2014 (**Table 4.3**). The continued decline in the price of oil in the world market largely contributed to the low import bill of intermediate goods.

Table 4.3: Goods Import

Services and Primary Income Account

Services account recorded a net surplus of USD 216.0 million compared to USD 89.6 million recorded in the corresponding quarter in 2014 following increase in services receipts. Net deficit in the primary income account widened by 34.1 percent largely due to an increase in interest payments by more than three folds to USD 68.5 million compared to USD 19.8 million recorded in the corresponding quarter in 2014 (**Table 4.4**).

World Commodity Prices

During the quarter ending June 2015, average world market prices of cotton, tea, sisal, cloves and oil increased while that of coffee and gold declined, when compared with the levels recorded in the previous quarter (**Table 4.5**). The decline in prices of coffee was mainly due to increased crop prospects for Brazil, the world biggest producer. Cotton prices increased largely due to high demand from textile manufacturers in China while the rise in prices of tea, cloves, and sisal was mainly due to strong demand.

The average prices of crude oil and white petroleum products went up mainly due to the ongoing geopolitical tensions in Middle East. The fall in gold price was due to a rise in expectation that US interest rates will rise later in 2015, hence making the US dollar more attractive for investors than gold.

5.0 THE ZANZIBAR ECONOMY

Sectoral Performance

GDP Developments

During the first quarter of 2015, Gross Domestic Product (GDP) at constant prices grew by 6.1 percent year-on-year, compared to a growth of 13.9 percent recorded during the corresponding quarter in 2014. The main contributors to growth were construction, mining and quarrying which grew by 44.8 percent and 37.1 percent respectively. Meanwhile, accommodation and food grew by 41.8 percent from 8.2 percent recorded in the corresponding period in 2014, mainly associated with increase in tourist arrivals.

Procurement of Major Export Crops

During the quarter ending June 2015, procurement of cloves decreased to 17.5 tonnes from 82.4 tonnes registered in the corresponding quarter in 2014, mainly on account of cyclical nature of the crop. Similarly, seaweed procurement decreased to 3,321.7 tonnes from 3,363.8 tonnes recorded during the corresponding quarter in 2014, largely due to decrease in the world market prices which discouraged domestic production (**Chart 5.1**).

Manufacturing Activity

During the quarter ending June 2015, wheat flour production was 16,060.9 tonnes compared with 15,953.8 tonnes recorded in the corresponding period in 2014, mainly driven by increased demand. Similarly, production of noodles, soft drinks and breads increased during the quarter under review (**Table 5.2**).

Inflation Developments

Headline inflation during the quarter ending June 2015 decreased to an average of 2.6 percent compared with 8.1 percent recorded in the corresponding quarter of 2014; largely on account of decrease in prices of fuel and some food items. Similarly, non-food inflation rate averaged at 3.5 percent compared with 8.9 percent recorded in the corresponding quarter in 2014, mainly on account of decrease in fuel prices.

Meanwhile, food inflation rate dropped to an average of 1.8 percent compared with 7.4 percent recorded in the corresponding quarter in 2014, mainly due to decreases in the prices of foodstuff notably wheat flour and sugar (**Table 5.3**).

Government Budgetary Operations

During the quarter ending June 2015, Government budgetary operations recorded a deficit of TZS 8.1 billion after grants and adjustment to cash. Total resources amounted to TZS 93.4 billion, out of which TZS 83.2 billion were from domestic sources and the balance was grants. Tax revenue amounted to TZS 77.3 billion, being below the target by 8.2 percent, while non-tax revenue was below the target by 14.6 percent. Total grants disbursed during the period amounted to TZS 10.2 billion, being 41.9 percent below the projections for the period, **Chart 5.2**.

Government expenditure during the quarter ending June 2015, amounted to TZS 105.8 billion, out of which TZS 85.2 billion was recurrent expenditure and the balance was development expenditure (Chart 5.4). Development expenditure was 32.3 percent below the estimates for the quarter, mainly on account of lower disbursement of donor funds.

Debt Developments

Total debt stock as at end June 2015, amounted to TZS 350.2 billion compared with TZS 317.2 billion recorded during the quarter ending March, 2015. Total external debt amounted to USD 121.6 million compared with USD 121.9 million registered at the end of March 2016, and it accounted for 70.8 percent of the total Zanzibar's debt stock. Debt guaranteed by the Union Government accounted for 87.2 percent of the total external debt stock and the balance was non-guaranteed debt. Debt due to multilateral creditors was dominant, followed by bilateral creditors (**Chart 5.5**).

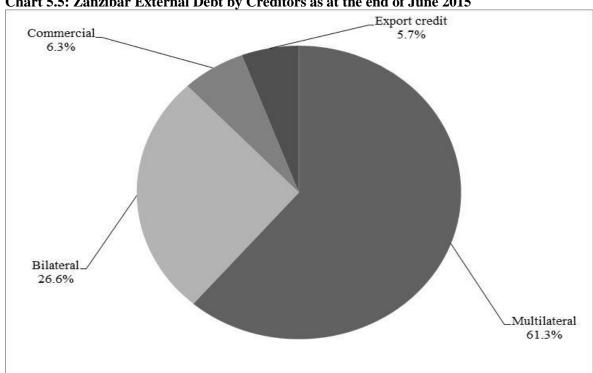

Chart 5.5: Zanzibar External Debt by Creditors as at the end of June 2015

Source: Ministry of Finance - Zanzibar

Debt maturing beyond 20 years dominated the profile of total external debt, followed by debt maturing in less than 10 years (Table 5.4).

External Sector Developments

Current Account

Current account balance recorded a deficit of USD 58.2 million in the quarter ending June 2015 compared with a deficit of USD 11.3 million recorded during the preceding quarter. The increase in deficit was mainly on account of increase in goods imports coupled with a decrease in exports of goods and services (**Table 5.8**).

Table 5.8: Zanzibar Current Account

Exports

The value of exports of goods and services during the quarter ending June 2015 declined to USD 31.2 million from USD 43.9 million recorded in the previous quarter. The decline was mainly on account of a decrease in exports of goods to USD 1.7 million during the quarter ending June 2015 from USD 8.0 million in the previous quarter; the decrease was largely associated with nil clove exports as a result of cyclical nature of the crop and decrease values of exports of seaweed and other non-traditional export goods (**Tables 5.8** and **5.9**).

Imports

During the quarter ending June 2015, value of imported goods and services increased by 57.6 percent to USD 94.7 million from USD 60.1 million recorded during the quarter ending March 2015. Value of goods imported increased to USD 80.8 million from USD 45.3 million, while services payments decreased to USD 13.8 million from USD 14.8 million reported in the previous period. The increase in merchandize imports is explained by increases of value of capital and consumer goods (**Table 5.10**).

Services and Income Account

In the period under review, services account balance recorded a surplus of USD 15.7 million, lower compared to a surplus of USD 21.0 million registered during the preceding quarter (**Table 5.11**). The decrease was mainly attributed to a decrease of receipts from tourism related activities.

6.0 ECONOMIC DEVELOPMENTS IN THE EAC AND SADC

GDP Performance

The average real GDP growth in the East African Community (EAC) region grew to 5.8 percent in 2014 from 5.2 percent recorded in the preceding year (**Table 6.1**). Real GDP growth in Rwanda increased to 7.0 percent in 2014 from 4.7 percent recorded in 2013 mainly due to a rise in output growth in agriculture, mining and quarrying, manufacturing, real estate, information and communication and construction activities. In Uganda, real GDP growth increased to 4.9 percent in 2014, from 3.9 percent recorded in the previous year mainly due to a rise in output from agriculture, trade, information and communication, and real estate activities. However, the real GDP growth in Kenya declined to 5.3 percent in 2014, from 5.7 percent recorded in preceding year mainly due to a decrease in output in agriculture, wholesale and retail trade, manufacturing and electricity activities. Real GDP in Tanzania slowed down to 7.0 percent in 2014 compared with 7.3 percent recorded in the preceding year. Activities which recorded higher growth rates than in the previous year include; agriculture, mining and quarrying; manufacturing, water, transport and storage; wholesale and retail trade; finance and insurance.

The average real GDP growth in the SADC region decline to 4.2 percent in 2014 from 5.2 percent recorded in 2013. With the exception of Malawi, Namibia, Mozambique and Mauritius other SADC countries recorded a fall in output growth. Real GDP growth in South Africa declined largely due to a slowdown in output in mining and quarrying, manufacturing, electricity and gas, wholesale and retail trade activities. Likewise, real GDP growth in Botswana went down largely on account of a fall in output growth in agriculture, mining, water and electricity activities. In Seychelles, real GDP growth went down mainly driven by a slowdown in output in manufacturing and construction activities. Similarly, real GDP growth in Zimbabwe declined mainly due to a fall in output growth in the mining and manufacturing activities. On the other hand, real GDP growth in Namibia went up mainly due to an increase in output growth in construction and mining activities. In Malawi real GDP growth expanded largely supported by growth in agricultural, manufacturing, construction, wholesale and retail trade, and services activities. Meanwhile, real GDP growth in Mauritius and Mozambique remained unchanged at 3.2 percent and 7.4 percent respectively in 2014, same level as recorded in 2013.

Inflation Developments

During the quarter ending June 2015, the average inflation rate in EAC region went up to 5.3 percent from 3.1 percent recorded in the preceding quarter (**Table 6.1**). Inflation rate in Tanzania went up due to an increase in prices of food items including fish, meat, round potatoes, cassava flour, cooking banana, fruits and vegetables. Likewise, inflation rate in Uganda increased mainly due to a rise in prices of food. In Rwanda, inflation rate increased mainly due to a rise in prices of food and non-alcoholic beverages, housing, water, electricity, gas and other fuels. In Kenya, inflation rate accelerated mainly driven by increase in the costs of food and non-alcoholic beverages, house rents, cooking fuels, petrol and diesel. On the overall, all EAC Partner States attained the convergence criteria level of inflation rates of not more than 8.0 percent.

The average inflation rate in the SADC region went down to 4.8 percent in the quarter ending June 2015 from 5.0 percent recorded in the previous quarter (**Table 6.1**). In the SADC region, inflation rate decelerated with the exception of Angola, Malawi, Tanzania, Swaziland and South Africa. The decrease in inflation rate in Zambia was mainly due to a fall in prices of non-food commodities, whereas in Zimbabwe it was largely due to weak consumer demand coupled with tight liquidity conditions. In Mauritius, inflation rate declined mainly due to a fall in the prices of vegetables. In Seychelles, inflation rate went down mainly due to a fall in the prices of fish, non-alcoholic beverages, meat, housing, water, electricity and gas. Inflation rate in Namibia decelerated mainly due to a decline in prices of food and non-alcoholic beverages, transport, communications, recreation and culture. However, the increase in inflation rate in Malawi was mainly on account of a rise in prices of food, while in South Africa it was mainly driven by increase in cost of housing and utilities. With the exception of Malawi, Angola, South Africa and Zambia the remaining SADC Member States managed to achieve the convergence criteria level of inflation rate of less than 5.0 percent during the quarter under review.

Notes: 1) Headline Inflation

Source: Bank of Tanzania

²⁾ Underlying Inflation

^{*} Adjusted for seasonal movements or seasonal variations, which refer to identical, or almost identical, patterns that time series appears to follow during the corresponding months (quarters) of successive years. Such movements are due to recurring events, which take place annually, for example the increase of food prices during Ramadhan.

8.0 GLOSSARY

Average Inflation Rate

Inflation is defined as the rate at which the average level of domestic prices is increasing over a period of time.

Currency in Circulation outside Banks

Notes and coin accepted as legal tender in the domestic economy, excluding amounts held by the banking system.

Bank Rate

The Central Bank Rate which is determined by the Monetary Policy Committee for signaling the direction of the monetary policy.

Discount Rate

The interest rate Bank of Tanzania charges on loans it extends to banks and to the Government. It uses Bank rate as a base plus a loaded factor, which change from time to time depending on the liquidity situation in the market.

Exchange Rate

The price at which one currency can be purchased with another currency, e.g. TZS per US dollar.

Lombard Facility

An overnight facility introduced by the Bank on 1st December 2003 to enable commercial banks to borrow at their own discretion, by pledging of eligible government securities as collateral.

Lombard Rate

The rate payable for the use of the Lombard Facility. The rate is based on the prevailing weighted average yield of 35-day T-bill, Repo (7 days) or overnight inter-bank rate whichever is higher in the market plus 20 percent.

Money Supply, M

The sum of currency in circulation outside the banking system and deposits of residents with banks defined in various levels of aggregation. In Tanzania, three aggregates of money supply are compiled and reported, namely: narrow money (M1), broad money (M2), and extended broad money (M3).

Narrow Money (M1)

This consists of currency in circulation outside banking system and demand deposits.

Broad Money (M2)

This is equivalent to narrow money (M1) plus time (fixed) and savings deposits.

Extended Broad Money (M3)

It consists of broad money (M2) plus residents' foreign currency deposits.

Transferable Deposits

Comprise of all deposits that are immediately convertible into currency and directly usable for making payments by cheques, draft, giro order, direct debit/credit or other payment facility without any kind of significant restriction or penalty.

Non-transferable Deposits

Include all claims reflecting evidence of deposit other than transferable deposits. Typical examples are saving deposits and time deposits.

Non-Food Inflation Rate

This is a measure of price movements caused by factors other than food prices.

Repurchase Agreement (REPO)

These are agreements to purchase/sale by the BoT government securities from/to financial institutions at agreed rate for a specified period, with an understanding that the financial institutions will repurchase/resell the securities to the BoT at the end of the period.

Reserve Money (M0)

The Bank of Tanzania's liabilities in the form of: currency in circulation outside the banking system, cash held by banks in their vault and deposits of banks kept with the Bank of Tanzania in national currency. Reserve money is also referred to as base money or high powered money.

Weighted Annualized Yields of Treasury Bills of all Maturities

This is the average yield of Treasury bills, which is weighted by the volume sold of 35-day, 91-day, 182-day, and 364-day Treasury bills, expressed in percentage per year.
