SUMMARY OF GLOBAL AND DOMESTIC ECONOMIC PERFORMANCE

Global economic growth remained resilient in 2025, expanding by 3.3 percent despite elevated trade tariffs, and ongoing economic uncertainty¹. Economic activity across most regions moderated in the fourth quarter of 2025, reflecting more favourable tariff outcomes than initially anticipated. Inflation dynamics varied: while inflation pressures edged up in some economies, others kept inflation within or close to established policy targets. Commodity markets also showed divergent trends. Crude oil prices declined despite ongoing geopolitical tensions, driven largely by expectations of increased OPEC production that bolstered global supply. In contrast, gold prices surged, supported by heightened geopolitical risks and demand for safe-haven assets from both private investors and central banks.

Domestic economic activity strengthened further in the third quarter of 2025, with real GDP growth increasing to 6.4 percent, from 6.1 percent in the same quarter of the previous year. Growth was broad-based, driven by improved performance in construction, agriculture, and financial and insurance services. The expansion was supported by sustained investment spending, higher capacity utilisation across productive sectors, and continued implementation of measures aimed at improving infrastructure and market efficiency. Price developments in the quarter ending December 2025 indicate that inflationary pressures remained contained, with headline inflation averaging 3.5 percent, compared with 3.4 percent in the preceding quarter and 3 percent in the corresponding quarter of 2024. Inflation remained within the national medium-term target of 3–5 percent and below the convergence thresholds set by both the EAC and SADC.

During the fourth quarter of 2025, the Monetary Policy Committee (MPC) maintained the Central Bank Rate (CBR) at 5.75 percent, consistent with its objective of anchoring inflation within the target band while supporting steady economic expansion. Monetary policy implementation proved effective, with the 7-day interbank rate remaining within the ± 2 percentage-point target corridor and closely aligned with the policy rate—signaling stronger transmission of monetary policy. Liquidity conditions were managed through repo and reverse-repo operations, issuances of 35-, 91-, and 182-day Treasury bills, as well as foreign exchange operations. Banks also continued to access the Lombard window to balance daily liquidity needs. Collectively, these instruments ensured orderly liquidity flows across the banking system, reinforcing price stability and fostering an environment conducive to sustainable economic growth. Reflecting adequate level of liquidity, broad money (M3) grew steadily at 25.8 percent, driven primarily by robust private sector credit growth of 23.5 percent by end-December 2025.

¹ International Monetary Fund (IMF), World Economic Outlook Update: Global Economy: Steady amid Divergent Forces, January 2026. Source: IMF publication

In the quarter ending December 2025, the external sector exhibited more favorable trade dynamics and notable resilience, supported by stronger export performance and moderated import demand. Exports rose to USD 3,107.4 million, up from USD 2,912.1 million in the corresponding quarter of 2024, driven by robust non-traditional exports and buoyant gold receipts. Imports eased slightly to USD 3,862.3 million, compared with USD 3,915.3 million in the same quarter of 2024, as persistent primary income outflows continued to offset gains in trade and services. Despite these improvements, the current account deficit remained broadly unchanged at USD 239.7 million, relative to USD 236.7 million in the quarter ending December 2024, as persistent primary income outflows continued to offset improvements in trade and services. Foreign exchange reserves stood at USD 6,329 million in December 2025, sufficient to cover 4.9 months of projected imports of goods and services. This level of reserves is consistent with both national and EAC benchmarks, anchoring external sector stability.

Fiscal operations continued to demonstrate strong performance during the quarter ending September 2025, with expenditure maintained within available resources. Domestic revenue collection reached 112.5 percent of the quarterly target, driven largely by higher tax receipts, as tax revenue attained 118.0 percent of projections. This performance reflects the effectiveness of ongoing fiscal reforms, particularly improvements in tax administration and sustained growth in economic activity. Total expenditure amounted to TZS 12,191.1 billion, of which, 60.0 percent was allocated to recurrent spending, while the remainder supported development projects. By the end of December 2025, the national debt stock stood at USD 50,794.2 million, representing a 0.4 percent decline from the previous quarter. External debt accounted for 69.5 percent of the total, with the balance comprising domestic debt. Of the external debt, 82.8 percent was held by the public sector.

Zanzibar's economy grew by 7.0 percent in the third quarter of 2025, moderating from 7.5 percent recorded in the corresponding quarter of 2024. Growth was driven by accommodation and food services, construction, livestock, real estate, and manufacturing sub-sectors. Headline inflation averaged 3.5 percent in the quarter ending December 2025, down from 5.1 percent recorded in the same quarter of 2024, with the decline largely resulting from easing prices of both food and non-food items. Fiscal performance remained strong, with government spending broadly aligned with available resources. On the external front, Zanzibar's current account surplus increased to USD 219.5 million compared with USD 167.1 million in the corresponding quarter of 2024, supported by higher service receipts, particularly from tourism-related activities.

GLOSSARY

Broad money (M2)

A definition of money that comprises narrow money (M1) plus domestic currency time and savings deposits of residents with banks in the country.

Central bank rate

Means the interest rate set by the Monetary Policy Committee and used by the Bank to implement or signal its monetary policy stance.

Core inflation

This measures the rate of change in prices of goods and services other than energy, utilities and unprocessed food, over a specified period. The unprocessed food items, energy and utilities are excluded since they are volatile and hence may be affected by non-monetary events, which do not constitute the underlying monetary inflation.

Currency in circulation outside banks

Notes and coins of Tanzanian shillings circulating outside the banking system, i.e. outside the Bank of Tanzania and other depository corporations.

Disbursed outstanding debt

This is the amount of a loan or credit that has already been disbursed to the borrower and has not yet been repaid or forgiven.

Discount rate

The rate of interest rate used by Bank on counterparties wishing to re-discount their Treasury bills for liquidity purposes. It uses the prevailing Central Bank Rate (CBR) as a base plus a loaded factor, which can be changed from time to time depending on the liquidity situation in the market. Currently the applicable loaded factor is 250 basis points.

Exchange rate

The price at which one unit of a currency can be purchased with another currency, for instance, TZS per US dollar.

Extended broad money (M3)

A definition of money that consists of broad money (M2) plus foreign currency deposits of residents with banks in the country.

External debt stock

The stock of a country's debt that is borrowed from foreign lenders through private commercial banks, foreign governments, or international financial institutions. It is the sum of public, publicly guaranteed, and private non-guaranteed long-term debt, use of IMF credit, and short-term debt, which includes all debt having an original maturity of one year or less and interest in arrears on long-term debt.

Food inflation

This is a measure of the rate of change in the price of food, both processed and unprocessed.

Gross official reserves

Gross official reserves consist of external assets that are readily available to and controlled by the Bank of Tanzania for direct financing of balance of payments, and for indirectly regulating the magnitude of balance of payments imbalances through intervention in foreign exchange markets. Gross official reserves comprise the Bank of Tanzania's holdings of monetary gold, Special Drawing Rights (SDRs), reserve position in the International Monetary Fund, and foreign exchange resources available to the Bank of Tanzania for meeting external financing needs.

Inflation

The rate at which the average level of prices of a basket of selected goods and services in an economy is increasing over a period. It is often expressed as a percentage. Inflation indicates a decrease in the purchasing power of a nation's currency.

Interbank cash market

A money market in which banks extend loans to one another for a specified term. Each transaction represents an agreement between the banks to exchange the agreed amounts of currency at the specified rate on a fixed date.

Interest rate-based monetary policy

This is a monetary policy framework used by central banks to attain macroeconomic objectives by influencing interest rates in the economy. Using this approach, the Bank of Tanzania sets the policy rate (Central Bank Rate) on quarterly basis to influence the level of interest rates in the economy and uses various instruments, such as open market operations, statutory minimum reserve requirements to affect the level of the liquidity in the economy.

Lombard facility

An overnight loan facility that was established to enable banks to borrow from the Bank of Tanzania at their own discretion, by pledging eligible government securities as collateral.

Lombard rate

The interest rate that the Bank of Tanzania charges on overnight loans it extends to banks. This rate uses the Central Bank Rate (CBR) as a base plus a loaded factor, which can be changed from time to time depending on the supply of shilling liquidity in the economy. Currently the applicable loaded factor is 200 basis points and act as the upper band of the Central Bank Rate Corridor.

Money supply

The sum of currency circulating outside the banking system and deposits of residents with banks is defined at various levels of aggregation. In Tanzania, three aggregates of money supply are compiled and reported, namely: narrow money (M1), broad money (M2), and extended broad money (M3).

Non-food inflation

This is a measure of price movements caused by factors other than food prices.

Narrow money (M1)

Consists of currency in circulation outside the banking system plus demand deposits (cheque account) of residents with banks in the country.

National debt

Total national debt obligations that include public debt and private sector external debt.

Public debt

Debt payable or guaranteed by the Government. Tanzania's public debt has two main components, domestic debt (which is incurred principally to finance fiscal deficit) and external debt (which is raised primarily to finance development projects). It comprises the debt central government owes to foreign creditors and external obligations of government departments and agencies that are guaranteed for repayment by the Government).

Primary income account

It comprises income from compensation of employees, interest income, dividends and retained earnings from capital investments, rental income from the use of natural resources and other types of primary income including those that relate to insurance policy holders and pension funds.

Secondary income account

It entails transfers between residents and non-residents that correspond to the provision of a good, service, financial asset, or other non-produced asset with no corresponding return of an item of economic value.

Overnight interbank cash market

The component of the money market involving the shortest-term loan. Lenders agree to lend borrowers funds only "overnight" i.e. the borrower must repay the borrowed funds plus interest at the start of business the next day.

Repurchase agreements (repo)

An arrangement involving the sale of securities at a specified price with a commitment to repurchase the same or similar securities at a fixed price on a specified future date.

Reverse repo

An arrangement involving the buying of securities at a specified price with a commitment to re-sale the same or similar securities at a fixed price on a specified future date.

Reserve money (M0)

The Bank of Tanzania's liabilities in the form of currency in circulation outside the banking system, cash held by banks in their vaults and

deposits of banks kept with the Bank of Tanzania in national currency. Reserve money is also referred to as base money, or monetary base or high-powered money.

Weighted yields of Treasury bills

This is the average yield of Treasury bills, which is weighted by the volume sold of 35-day, 91-day, 182-day, and 364-day Treasury bills, expressed in percentage per year.
