SUMMARY OF ECONOMIC DEVELOPMENTS

Real GDP at market prices grew by 7.0 percent in 2013, compared to 6.9 percent recorded in 2012, with growth accelerating in communications, trade and repairs, and hotels and restaurants activities. Annual headline inflation increased to an average of 6.4 percent in the quarter ending June 2014 compared to 6.0 percent recorded in the preceding quarter, mainly due to an increase in prices of food and non-alcoholic beverages.

Extended broad money supply (M3) grew by 15.8 percent compared with 14.9 percent in the year ending June 2013. This development is explained by increase in credit to the private sector and net foreign assets of the banking system. Meanwhile, the spread between the 12-months deposit rate and one-year lending rate widened to 3.59 percentage points in the quarter ending June 2014.

Government budgetary operations (on cheque issued basis) were characterized by good domestic revenue collection coupled with moderate expenditure. Domestic revenue collections by the Central Government were 88.4 percent of the target for the quarter ending March 2014. Total external debt stock increased by USD 556.1 million to USD 14,021.2 million from the amount recorded in the quarter ending March 2014. The increase was mainly on account of new disbursements and accumulation of interest arrears. Total domestic debt stock increased by TZS 41.0 billion to TZS 6,535.4 billion from the amount recorded in the previous quarter, on account of issuance of Government securities that outweighed maturing obligations.

During the quarter ending June 2014, current account deficit narrowed to USD 1,174.7 million from USD 1,185.4 million recorded in the corresponding quarter in 2013 due to increase in exports of goods that outweighed the impact of goods import.

Real GDP for Zanzibar is estimated to have grown by 7.3 percent during the quarter ending March 2014, from 6.8 percent recorded in the corresponding period in 2013. Activities that contributed to the growth include hotel and restaurants; and transport and communication sectors. Headline inflation increased to an average of 6.8 percent, from 4.8 percent recorded during the corresponding quarter in 2013, largely driven by the prices of fish and banana; and items under communications, education, recreation and culture subgroups. Government

budgetary operations registered a deficit of TZS 13.5 billion after grants and adjustment to cash. Development expenditure was below the estimates for the quarter by 61.5 percent, on account of delayed disbursement of donor funds. The current account deficit improved to USD 16.7 million in the quarter ending June 2014 from USD 18.7 million recorded in the preceding quarter, mainly on account of decrease in imports of goods and services.

In the East African Community, headline inflation declined to an average of 5.0 percent from 5.8 percent registered in the preceding quarter. This development was largely driven by the fall in prices of food, transport and housing. In the Southern African Development Community, average inflation rate remained at 6.2 percent, same as recorded in the previous quarter.

1.0 OUTPUT AND PRICES

Overall Economic Performance

Real GDP at market prices grew by 7.0 percent in 2013, compared to 6.9 percent recorded in 2012. Growth accelerated in communications which registered a growth rate of 22.8 percent, trade and repairs (8.3 percent) and hotels and restaurants (6.3 percent) activities.

Sectoral Performance

Procurement of Traditional Export Crops

During the quarter ending June 2014, procurement of major traditional export crops declined to 54,193.4 tonnes from 88,999.1 tonnes recorded in corresponding period in 2013, mainly due to shortfall in procurement of tobacco (**Table 1.1**). Contrary to the decline in total procurement of export crops there was an increase in procurement of tea, associated with good weather in the tea growing areas.

The volume of gold produced during the review period declined due to closure of two mining companies while decline in the value of gold was also explained by a fall in price of gold in the world market (**Table 1.2**).

When compared to the previous quarter, wholesale prices for all selected food crops decreased, with exception of rice and beans. However, when compared with the

corresponding quarter in 2013, prices of rice and maize decreased mainly due to higher crop harvests (**Table 1.4**).

Current Account

During the quarter ending June 2014, current account deficit narrowed marginally to USD 1,174.7 million compared to a deficit of USD 1,185.4 million recorded during the same quarter in 2013. This outturn was due to increase in exports particularly goods that rose by 21.6 percent, outweighing the impact of goods import which recorded an increase of 4.6 percent (**Table 4.1**).

Exports of goods increased to USD 1,416.8 million in the quarter ending June 2014 from USD 1,165.5 million recorded in the corresponding quarter in 2013. The increase was on

World Commodity Prices

The average world market prices of tea (Mombasa auction), cotton, cloves, gold and white petroleum products declined during the quarter ending June 2014 when compared with the levels recorded in the previous quarter. Meanwhile, prices for coffee, tea (average), sisal and crude oil increased (**Table 4.5**). While the price of tea (Mombasa auction) decreased mainly due to speculation of tea supply increase in Kenya, following improved weather condition, the price of tea (average) increased partly due to high demand from European and Middle East countries. The fall in price of cotton was partly on account of weak demand from China due to slowdown in economic activities, while that of cloves was influenced by expected increase in production in Madagascar. The price of sisal rose mainly due to an increase in global demand, while that of coffee was due to a rise in speculation that coffee production in Brazil and Vietnam will be low in 2014/15. The prices of crude oil rose mainly on account of supply disruption in Libya, geopolitical tensions in Ukraine and increase in demand from Asian Pacific countries. The price of gold decreased largely due to shift of preference for investment on equities.

The number of tourists increased to 81,499 from 54,276 recorded during the quarter ending March 2013.

Sectoral Performance

Procurement of Major Export Crops

During the quarter ending June 2014, procurement of cloves was 82.4 tonnes compared to 41.3 tonnes procured in the corresponding quarter in 2013, on account of favorable weather condition and cyclical nature of the crop. Similarly, seaweed procurement was 3,363.8 tonnes compared to 1,424.5 tonnes recorded during the corresponding quarter in 2013, due to increase in world market prices (**Chart 5.1**).

Inflation Developments

The headline inflation averaged at 6.8 percent in the quarter ending June 2014, compared to 4.8 percent recorded in the corresponding quarter in 2013. Services and Income Account

Services account registered a surplus of USD 14.6 million in the quarter under review, lower than a surplus of USD 21.8 million recorded in the quarter ending March 2014. This was mainly on account of decrease in receipts from tourism related activities (**Table 5.10**).

6.0 ECONOMIC DEVELOPMENTS IN THE EAC AND SADC

During the quarter ending June 2014, the average inflation rate in the East African Community declined to 5.0 percent from 5.8 percent registered in the preceding quarter. With the exception of Tanzania and Kenya, inflation in other partner states declined largely driven by the fall in prices of food, transport and housing. The inflation rate in Tanzania and Kenya rose mainly on account of increase in prices of some food, energy and fuels (**Table 6.1**). All East African partner states recorded single digit inflation during the period under review. However, only Rwanda and Burundi attained the agreed convergence criteria of inflation rate of not more than 5.0 percent.

The average inflation rate in the SADC region remained unchanged at 6.2 percent as recorded in the previous quarter (**Table 6.1**). With the exception of Angola, Malawi, Mauritius, and Seychelles inflation rate in the other SADC countries decreased. The easing in inflation rates in Angola, Malawi, Mauritius and Seychelles was mainly on account of the decrease in the prices of food, housing and electricity. Moreover, the tightening of monetary policy contributed to the decrease in inflation in Malawi. Zimbabwe continued to register a deflation which is largely associated with liquidity problems. The rise in inflation in Lesotho, Mozambique, Namibia, Swaziland and Zambia was mainly explained by the increase in the prices of food and transport. Likewise, in South Africa the inflation rate increased largely on account of weak rand, high wage settlements, rising utilities and food costs. Only Botswana, Mauritius, Mozambique, Seychelles and Zimbabwe were the SADC member countries that managed to achieve the agreed convergence criteria of the inflation rate of less than 5.0 percent.

2) Underlying Inflation

* Adjusted for seasonal movements or seasonal variations, which refer to identical, or almost identical, patterns that time series appears to follow during the corresponding months (quarters) of successive years. Such movements are due to recurring events, which take place annually, for example the increase of food prices during Ramadhan.
