B. Kimela	Ag. Secretary

SUMMARY OF ECONOMIC DEVELOPMENTS

Gross Domestic Product

In 2004, the Tanzanian economy performed relatively better than in the previous year. Output grew at 6.7 percent in 2004, up from 5.7 percent that was recorded in 2003. The growth was mainly driven by increased production in the agricultural sector arising from improved weather conditions.

Inflation Developments

During the quarter ending June 2005, average annual inflation stabilized at 4.1 percent, the same level recorded during the quarter ending March 2005. The turnout was slightly above the set target of 4.0 percent for the period, which is mainly explained by the rise in non food prices.

Money Supply and Credit Development

During this quarter, extended broad money (M3) and broad money (M2) expanded by 25.5 percent and 27.5 percent respectively. The expansion in money supply was a result of the increase in net domestic assets (NDA) of the banking system. Depending on the absorptive capacity, such a high growth rate in money supply is likely to put pressure on domestic prices.

Interest Rate Structure

As at the end of June 2005, the margin between overall lending and savings deposit rates widened by 0.1 percentage points to 12.9 percent from 12.8 percent

recorded during the quarter ending March 2005. The overall lending rates rose from 15.4 percent to 15.5 percent while lending rates to prime customers rose from 10.3 percent to 11.0 percent ending December 2004.

External Sector

The external sector recorded unsatisfactory performance during the quarter under review as the current account deficit widened to US\$ 284.0 million from a deficit of US\$ 232.3 million recorded during the quarter ending March 2005. The outcome was attributed mainly to the decline in traditional exports coupled with an increase in service payments.

Exchange Rate

On average, during this quarter the Tanzanian Shilling depreciated by 1.1 percent in nominal terms against the US\$, moving from an average of TZS 1104.0 per US\$ recorded during the quarter ending March 2005 to an average of TZS 1126.3 per US\$. During the quarter ending March 2005, the Shilling depreciated by 4.6 percent against the US\$.

Government Budgetary Operations

The overall central government budget deficit (before grants) widened to TZS 340.2 billion from a deficit of TZS 215.5 billion recorded during the quarter ending March 2005. After taking grants

into account, the deficit was reduced to TZS 296.6 billion. Revenue collections amounted to TZS 459.2 billion, being TZS 1.6 billion above the targeted amount for the quarter. Total expenditure amounted to TZS 799.4 billion, which was below the budgeted amount for the quarter of TZS 825.7 billion.

Public Debt Developments

Total national debt (domestic and external) stood at US\$ 9,087.4 million as at the end of June 2005, slightly lower than the debt stock of US\$ 9,152.4 million recorded during the quarter ending March 2005. Debt service payment amounting to US\$ 29.2 million was made during the quarter.

Zanzibar Government Budgetary Operations

During the fourth quarter of 2004/05, the Zanzibar Government budgetary operations recorded an overall deficit (before grants) of TZS 6.3 billion as compared with the deficit of TZS 3.0 billion recorded during the preceding quarter. However, after taking grants amounting to TZS 5.6 billion into account, the deficit narrowed to TZS 0.7 billion

Zanzibar Trade Account

Zanzibar Trade Account recorded a deficit of US\$ 16.3 million from a deficit of US\$ 13.8 million recorded during the preceding quarter. The increase in deficit was associated with a surge in the import bill (especially of fuel) relative to export receipts.

PART 1: ECONOMIC DEVELOPMENTS

1.0 OUTPUT AND PRICE

1.1 The Overall Economic Performance

The performance of the economy showed quite some improvement in 2004 as compared to 2003 mainly due to the conducive weather conditions that contributed to increased agricultural output. Real GDP grew by 6.7 percent in 2004, up from 5.7 percent attained in 2003. Other sectors performed moderately compared to the preceding year (**Table 1.1**).

Table 1.1: Tanzania: Economic Growth Rates

	Contribution 2004	GDP Growth-rates (In Percent)			
		2001	2002	2003	2004

1.2 Sectoral Developments

During the quarter ending June 2005, procurement of traditional export crops declined on average by 13.7 percent to 53,953.3 tons, from 62,550.6 tons recorded during the corresponding period in 2004 (**Table 1.2a**). As for cotton, the decline

was attributed to delay in commencement of cotton procurement from the farmers following gloomy conditions of the product in the world market and the prolonged negotiations between farmers and buyers on the indicative producer prices. On the hand, procurement of tobacco increased by around 24 percent in the quarter ending June 2005 mainly due to timely supply of farm inputs, availability of extension services and good crop husbandry.

Provisional statistics indicate that production of gold increased by 8.8 percent to 12,823.6 kilograms during the quarter ending June 2005, from 11,789.4 kilograms recorded during the corresponding period in 2004. The increase was mainly due to the commissioning of a new mining company, Tuluwaka Mining Company, which started production in March 2005.

Table 1.2a: Procurement of Export Crops

	April - June		% Change

Note: p=Provisional

Source: Respective Crop Boards

Manufacturing activities, which recorded an average growth of 7.0 percent for the past five years performed relatively better during the quarter ending June 2005. During this period, production of

¹Provisional statistics by large scale mining companies

manufactured commodities, in terms of Manufacturing Production Index, grew by 20.9 percent compared to levels recorded in the corresponding period a year earlier. The good outturn in performance of the manufacturing sector is mainly as a response to government's ongoing structural reforms that increased capacity utilization in divested industries and the stabilization in the supply of utilities – water, electricity etc. The substantial increase in production of food, beverage and tobacco, textiles and leather as well as chemicals, petroleum, rubber and plastic products was influenced by an increase in demand of the products in both domestic and foreign markets. The slow down of activities in some of the industries emanate from insufficient working capital, inadequate raw materials and fluctuations in exchange rates (which influences production in the basic metal industries that depend mostly on imported raw materials).

Food Supply Situation

During 2004/2005, the Strategic Grain Reserve (SGR) purchased 97,842 tons of maize grain compared to 23,925 purchased in 2003/2004. Also, the government released 14,281 tons of maize to areas that experienced food shortages in 2004/2005 as compared to 75,309 tons released in 2003/2004. As a result, the stock by the end June 2005 stood at 112,823 tons compared to 27,091 tons recorded in the similar period in 2004 (Table 1.2d). The government released 3,577 tons of maize to the market during the quarter under review as compared with 14,393 tons released during the similar quarter in 2004. There was no replenishment of SGR stock as the Government had already purchased almost all the 100,000 tons earmarked for the 2004/05-crop season before

March 2005. Preliminary assessment had estimated a food surplus of 242,409 tons during 2005/2006.

Inflation Developments

The average annual inflation for the quarter ending June 2005 stabilized at 4.1 percent, the same level recorded during the quarter ending March 2005. Non-food inflation however, averaged 3.2 percent, up from 2.2 percent recorded during the previous quarter. The rise in non food inflation is attributable to increases in prices of items like fuel, power and water, drinks and tobacco, transportation, and personal care subgroups. Significant price increases were registered on oil, charcoal, kerosene, personal care, and health items (Table 1.3). During the quarter under review, food inflation declined to 5.0 percent from 5.5 percent recorded in the previous quarter on account of an increase in food supply following the commencement of the harvesting period.

2.0 MONETARY AND FINANCIAL DEVELOPMENTS

Money and Credit

During the quarter ending June 2005, extended broad money (M3) increased by TZS 142.5 billion to reach a stock of TZS 3,266.5 billion as compared with an increase of TZS 125.2 billion recorded during the corresponding period in 2004. Broad money (M2) also increased by TZS 154.8 billion to a stock of TZS 2,366.5 billion as compared with an increase of TZS 99.1 billion recorded in the same period last year. The increase during the period under review translate into growth rates of 4.6 percent and 7.0 percent for M3 and M2, respectively. In the year ending June 2005, extended broad money (M3) expanded by about 25.5 percent while the broad money supply (M2) grew by 27.5 percent as compared with the target of 24 percent.

The increase in money supply during this quarter was mainly on account of the increases in currency in circulation as well as demand and savings deposits. From the sources side, the expansion in money supply was a result of the increase in net domestic assets (NDA) of the banking system, which was dampened by the decline in net foreign assets (NFA). The NDA rose by TZS 319.9 billion following the increase in net claims on government

as well as credit to the private sector (Table 2.1). On annual basis, credit to the private sector grew at the rate of 26.2 percent as compared with the growth rate of 46.7 percent recorded during the corresponding period in 2004. The impact of such a high growth rate in money supply is to put pressure on domestic prices.

Table 2.1: Developments in Selected Monetary Aggregates

(Billions of TZS)

	Mar-04	Jun-04	Mar-05	Jun-05		
				Actual	Quarterly Change Annual Growth

Source: Bank of Tanzania

Financial Markets Operations

During the quarter under review, treasury bills worth TZS 534.3 billion were sold as compared with treasury bills worth TZS 496.7 billion sold during the preceding quarter. Demand for treasury bills decreased from TZS 714.0 billion to TZS 676.9 billion, which was yet higher than the amount sold due to the elimination of outlier bidders. Given a total offer of TZS 569.5 billion during the quarter, it indicated that the market failed to absorb the intended liquidity from the economy that contributed to the growth of money

supply. Therefore, the excess liquidity in the market put pressure on the average interest rate which rose to 9.3 percent from 8.4 percent recorded in the quarter ending March 2005.

Chart 2.1: Treasury Bills Market Developments

In the treasury bonds market, demand was relatively higher during the period under review as compared to the previous quarter. During the quarter, offer amounted to TZS 36.2 billion while demand stood at TZS 52 billion out of which the amount sold was TZS 46.7 billion.

Interest Rates Structure

During the quarter under review, the spread between lending rates and the 12-months deposit rate remained significant at 10 percent, almost at the same level as it was in the preceding quarter (Table 2.2). The average savings deposit rate stagnated at 2.6 percent since the quarter ending December 2004 which was negative in real terms. The negative real interest rate on savings deposit was an indication of less importance placed on it by the commercial banks in the mobilization of funds. On the contrary, the overall average lending rate

rose from 15.4 percent to 15.5 percent while lending rates to prime customers also rose from 10.3 percent to 11.0 percent to which all had positive real returns.

Table 2.2: Tanzania Interest Rates Structure

	Jun-04	Sep-04	Dec-04	Mar-05	Jun-05
Savings Deposits Rate	2.4	2.5	2.6	2.6	2.6

Foreign Exchange Market Operations

The volume traded in the inter-bank foreign exchange market during the quarter under review amounted to US\$ 123.6 million, slightly higher than the amount of US\$ 122.8 million traded in the preceding quarter. The Bank of Tanzania was a net supplier of US\$ 36.5 million following high demand for foreign exchange in the market. The market forces (especially high demand during the quarter) led into the Tanzanian Shilling losing value against the US dollar to a rate of TZS 1,126.3 per US dollar from a rate of TZS 1,104.0 per US dollar in the quarter ending March 2005. The widening of current account deficit, which created high demand for forex, also partly contributed to the depreciation of the exchange rate.

3.0 PUBLIC FINANCE

Government Budgetary Operations

During the quarter ending June 2005, the government budgetary operations recorded a deficit of TZS 340.2 billion. The deficit was however, reduced to TZS 296.6 billion after considering grants amounting to TZS 42.5 billion. Total resources amounted to TZS 501.7 billion as against an expenditure of TZS 799.4 billion. Revenue collected amounted to TZS 459.2 billion, above the targeted TZS 457.6 billion for the quarter. Collections on all major tax categories were largely on target.

Chart 1a: Government Revenue Performance; Quarter Ending June 2005

Government expenditure excluding amortization amounted to TZS 799.4 billion as against the targeted TZS 825.7 billion. Recurrent expenditure was TZS 660.9.7 billion and development expenditure amounted to TZS 138.5 billion.

National Debt

The debt stock (domestic and external) as at the end of June 2005 stood at US\$ 9,087.4 million, out of which, external debt was US\$ 8,134.8 million (89.5 percent). The share of multilateral debt was 68.0 percent of the external debt while that of bilateral creditors, commercial creditors and export credits were 22.2 percent, 6.1 and 3.7 percent, respectively. During the quarter, the stock of domestic debts increased by 5.0 percent from TZS 1022.10 billion recorded in March 2005, to TZS 1072.9 billion – due to the issuance of government securities.

Debt Relief

During the quarter under review, Tanzania received US\$ 15.6 million from multilateral institutions under the HIPC debt relief framework. By the end of June 2005, total HIPC debt relief from multilateral creditors accumulated to US\$ 369.6 million (Table 3.2a).

Foreign Debt service payments during the period amounted to US\$ 29.2 million, after considering a debt service reduction of US\$ 15.6 million. The liquidity burden, as measured by the debt service ratio (total

debt service (TDS)/Exports of Goods and Services (XGS)) during the quarter was 4.9 percent indicating that the debt is sustainable . The ratio was 5.4 percent at the end of June 2004.

4.0 EXTERNAL SECTOR DEVELOPMENTS

Current Account

During the quarter ending June 2005, the current account deteriorated to a deficit of US\$ 284.0 million from a deficit of US\$ 232.2 million recorded during the previous quarter. The outturn was attributed to the decline in traditional exports coupled with an increase in service payments.

Exports

During the quarter under review, the value of merchandise exports declined by 18.6 percent from the previous quarter to US\$ 301.6 million, mainly on account of a substantial decline in export volumes and unit prices for most traditional exports. Export volumes declined largely because most of the traditional commodities were off season.

Imports

During the quarter ending June 2005, the value of merchandise imports declined by 10.3 percent to US\$ 576.0 million from the amount of US\$ 641.9 million recorded during the quarter ending March 2005. All major categories of imports recorded declines with capital goods imports declining most.

World Market Prices

The quarter ending June 2005 witnessed an improvement in most commodity prices. Prices of coffee (Robusta and Arabica), cotton, tea (Average Auctions) and gold increased with robusta coffee registering the highest increase. Those for sisal "UG" remained stable while Prices of cloves and

tea (Mombasa Auction) declined. Prices of crude oil (average of U.K. Brent, Dubai, and West Texas Intl.), Dubai (f. o. b) and white petroleum products all went up. The surge in crude oil prices is a result of

increased global demand for the product as well as due to the uncertain political situation in the Middle East.

5.0 ZANZIBAR ECONOMY

Budgetary Operations

Government budgetary operations for the quarter ended June 2005, recorded an overall deficit of TZS 700 million after considering grants amounting to TZS 5.6 billion. Total revenue collection amounted to TZS 13.6 billion, slightly below the target for the quarter of TZS 13.9 billion (Chart 5.1a). Total expenditure amounted to TZS 20.0 billion. Recurrent expenditure amounted to TZS 19.6 billion while Development expenditure (excluding donor funds) amounted to TZS 400 million.

Chart 5.1a: Government Revenue

Debt Developments

External Debt

Zanzibar debt stock (domestic and external) as at the end of June 2005, stood at US\$ 167.2 million up from US\$ 160.9 million registered during the preceding quarter with external debt accounting for 63.8 percent of the total.

Domestic Debt

During the quarter ending June 2005 Zanzibar domestic debt increased to TZS 68.1 billion from TZS 60.3 billion recorded during the quarter ending March 2005. The outcome was a result of an increase in domestic borrowing mainly in form of government securities.

Foreign Trade Developments

Trade balance between Zanzibar and the rest of the world deteriorated during the quarter ending June 2005. Trade account registered a deficit of US\$ 16.3 million, up from a deficit of US\$ 13.8 million recorded during the preceding quarter. The deterioration was associated with a surge in imports relative to exports. Total exports reached US\$ 19.1 million from the level of US\$ 13.3 million registered as at the end of March 2005. Imports for the quarter stood at US\$ 35.3 million, up from US\$ 27.1 million recorded during the preceding quarter.

the previous quarter, as export volume of cloves and seaweed declined.

Imports for the quarter stood at USD 25.6

million, compared with USD 36.6 million for the quarter ending December 2004. Imports of capital goods declined from USD 11.8 million to USD 9.3 million on account of less importation of building and construction materials. Importation of intermediate goods also decreased to USD 6.3 million from USD 7.9 million, owing to a 20.3 percent decline in imported oil and industrial raw materials.

6.0 ECONOMIC DEVELOPMENTS IN EAC AND SADC COUNTRIES

During the quarter ending June 2005, inflation rates in the EAC and SADC countries showed mixed trend (Table 6.2). While the inflation rate in Tanzania remained stable at 4.1 percent, Kenya and Uganda recorded increases in their inflation rates which in the case of Uganda was explained by an increase in transport costs.

The economies of South Africa, Malawi and Zambia recorded increases in inflation rates emanating from the increase in transport prices. Inflation rates in Botswana however, declined mainly due to increased food availability.

Note: * Adjusted for seasonal movements or seasonal variations, which refer to identical, or almost identical, patterns, which a time series appears to follow during the corresponding months (quarters) of successive years. Such movements are due to recurring events, which take place annually, as for example, the increase of food prices during Ramadhan.

** Percentage change of the Total NCPI is **Headline Inflation**, while the percentage change of the Non-Food NCPI is **Non-food Inflation**.

Notes:

- 1) Imports data (f.o.b) for 2001 have been revised using new ratios for freight and insurance services.
- 2) Following changes in the ratios of freight and insurance services to the total imports (c.i.f), figures for service account have consequently been revised.
- 3) GDP-Gross Domestic Product, mp-Market price, CAB-Current Account Balance, p = provisional
- 4) p = provisional data, subject to revision

Notes:

1) Imports data (f.o.b) for 2001 have been revised using new ratios for freight and insurance services.

2) Following changes in the ratios of freight and insurance services to the total imports (c.i.f), figures for service account have consequently been revised.

3) GDP-Gross Domestic Product, mp-Market price, CAB-Current Account Balance, p = provisional

4) p = provisional data, subject to revision

5) Net capital account has changed following the removal of the debt forgiveness.

The exceptional financing has changed following the inclusion of the rescheduled and forgiven debt.

The changes are according to the requirement of the BPM5.

Note:

p = Provisional

r = revised figures

- Prior to 2002 figures for TZS were converted from USD using quarterly average exchange rates. Beginning 2002 monthly average exchange rates are used to compute figures in TZS.

- Prior to July 1997, import statistics were estimated on the basis of issued Import licenses, Import Declaration Forms and PSI Reports, and oil imports were obtained from TPDC

Note:

Figures for 2004 and 2005 are provisional

na = Not applicable

1) Prior to 2002 figures for TZS were converted from USD using quarterly average exchange rates. Beginning 2002 monthly average exchange rates

'are used to compute figures in TZS.

2) Prior to July 1997, import statistics were estimated on the basis of issued Import licenses, Import Declaration Forms and PSI Reports, and oil imports were obtained from TPDC

GLOSSARY

Average Inflation Rate

This is calculated as the average of the inflation rates during the fiscal year or the calendar year

Currency in Circulation Outside Banks

Notes and coin accepted as legal tender in the domestic economy, excluding amounts held by the banking system.

Discount Rate

The rate of interest the Bank of Tanzania charges on Loans it extends to Deposit Money Banks and government overdraft. It is derived from the weighted average yield of Treasury bills of all maturities plus five-percentage points.

Exchange Rate

This is the price at which one currency can be purchased with another currency, e.g. TZS per US dollar.

Lombard Facility

The Bank introduced Lombard facility on 1st December 2003, as an overnight facility to enable commercial banks to borrow at their own discretion, through pledging of eligible government securities as collateral.

Lombard Rate

This is the rate payable for the use of the Lombard Facility, which is also used as signalling mechanism for the Bank of Tanzania's monetary policy stance. The rate is based on prevailing discount rate, REPO or inter-bank rates, depending on whichever is higher.

Money Supply, M

The sum of currency in circulation outside the banks and deposits of Depository Corporations, are defined in various concepts of money supply in the narrower and broader sense, i.e., narrow money (M1), broad money (M2), and extended broad money (M3).

M1, Narrow Money,

Consists of currency in circulation outside banks and demand deposits.

M2, Broad Money

Is equivalent to narrow money (M1) plus time deposits and savings deposits.

M3, Extended Broad Money

Consists of broad money (M2) plus foreign currency deposits.

Nominal Exchange Rate

It is the price at which actual transactions in foreign exchange markets occur.

Non-Food or Underlying Inflation Rate

This is a measure of price movements caused by factors other than food prices. It is an important measure, which provides better indication of the effectiveness of monetary policy on inflation since price movements in these items are caused largely by monetary policy.

Repurchase Agreement (REPO)

These are agreements to purchase/sale by the BoT government securities from/to financial institutions at agreed rate for a specified period, with an understanding that the financial institutions will repurchase/resell the securities to the BoT at the end of the period.

Reserve Money (M0)

The Central Bank's liabilities in the form of: (1) currency in circulation outside the Bank of Tanzania and (2) deposit money banks' deposits with the BoT are referred to as Base money, or reserve money

Seasonally Adjusted Indicators

Seasonal movements or seasonal variations, refer to identical, or almost identical, patterns, which a time series appears to follow during corresponding months (quarters) of successive years. Such movements are due to recurring events, which take place annually, e.g. the harvest season. Seasonally adjusted indicators show the impact of non-seasonal influences on a time series.

Weighted Annualised Yields of Treasury Bills

This is the average yield of Treasury bills, which is weighted by the volume sold of 91-day, 182-day, and 364-day Treasury bills, expressed in percentage per year.
