SUMMARY OF GLOBAL AND DOMESTIC ECONOMIC PERFORMANCE

Global economic output expanded in the first quarter of 2024, propelled by improvement in the supply chain, moderating inflationary pressures, and improved business and household incomes. Growth is projected to sustain, as reflected in the January 2024 World Economic Outlook (WEO) update.¹ The performance is attributed to the stronger-than-anticipated resilience of the United States, some emerging markets and developing economies, combined with fiscal stimulus measures implemented by China. Notwithstanding, the projected growth rates for 2024 and 2025 are below the pre-COVID-19 period (2000-2019), which averaged 3.8 percent. The deceleration in growth prospects is largely associated with the adoption of restrictive monetary policies by most central banks, the gradual withdrawal of fiscal stimulus and the persisting challenges associated with subdued productivity growth.

Global inflation is projected to fall from 8.7 percent in 2022 to 6.8 percent in 2023 and 5.8 percent in 2024.² The disinflation reflects reduced core inflation resulting from stringent monetary policies, easing of supply-chain disruptions, and decreases in energy prices. The moderating inflation levels and improved economic growth rates, however, are subject to normalised geopolitical tensions ensuing from Russia-Ukraine and Israel-Gaza wars, and low commodity prices, in particular oil.

The performance of the domestic economy was satisfactory in the first quarter of 2024 and outlook is favourable, despite facing external headwinds. In Mainland Tanzania, the economy is estimated to have grown at 5.1 percent in 2023, an increase from 4.7 percent in the preceding year. The growth was mainly driven agriculture, construction, and mining and quarrying.

Inflation developments in the country was consistent with global trends, slowing down to an average of 3 percent from 4.8 percent in the corresponding quarter in 2023. The decline was associated with ample domestic food supply and was in line with the country's target and regional benchmarks.

With regard to monetary implementation, the Bank continued to implement it consistent with maintaining inflation within the medium-term target of 5 percent. Following the adoption of interest rate (or price)-based monetary policy in January 2024, the Bank set the Central Bank Rate (CBR) at 5.5 percent for the first quarter of 2024. The Bank monitored the 7-day interbank rate—the operating target, to ensure that it remained within the target band of +/-200 basis points of the CBR. The 7-day interbank rate averaged at 7.26 percent during the quarter, which was within the targeted band. As a result, growth of monetary aggregates moderated and remained within the required levels. The growth of credit to the private sector was around 17 percent by the end of March 2024, compared to 22.5 percent attained in the corresponding period in 2023.

As for the Government's fiscal operations, expenditure continued to be aligned with the available resources. Revenue collection during the quarter ending December amounted to TZS 7,798 billion, of which tax revenue was TZS 6,615.4 billion.³ The revenue was 99 percent of the target, with the outturn largely explained by strong performance in import and income taxes. Expenditure amounted to TZS 9,669.6 billion, with recurrent activities and development projects being TZS 5,585.6 billion and TZS 4,084.1 billion,

¹WEO forecast global growth at 3.1 percent between 2023 and 2024, with a modest uptick at 3.2 percent expected in 2025. The forecast is an upward revision by 0.2 percentage for 2024 since October 2023.

³ Government fiscal operation data for the quarter ending March 2024 under compilation.

respectively. The national debt as at the end of December 2023 was USD 41,782.6 million, out of which USD 29,541.7 million or 70.7 percent was external debt.

The external sector saw improvement, though still faced with challenges resulting from tight monetary policies in advanced economies. The current account deficit narrowed by almost half to USD 464.3 million, compared to USD 820.8 million in a similar quarter in 2023. This was largely associated with the fall of the value of imports of crude oil, fertilizer and industrial supplies, as well as a significant increase in the value of gold and manufactured exports. Foreign exchange reserves remained sufficient at USD 5327.1 million, covering 4.4 months of imports of goods and services, consistent with the country's benchmark of 4 months.

Zanzibar's economy grew by 2.2 percent in the fourth quarter of 2023, primarily fueled by growth in accommodation and food services, manufacturing, and construction. Inflation averaged 5.1 percent, mainly due to decrease in both food and non-food inflation. On the fiscal front, the fiscal deficit narrowed reflecting the improved revenue collections following compliance and enhancement of the tax administration system. The current account balance improved to a surplus of USD 213.8 million in the quarter ending March 2024, up from USD 123.0 million in the same period in 2023. The outturn resulted from higher exports of goods and services and decrease of imports. Notably, much of the service receipts originated from tourism activities, contributing to Zanzibar's overall positive economic outlook.

GLOSSARY

Money supply

The sum of currency circulating outside the banking system and deposits of residents with banks defined in various levels of aggregation. In Tanzania, three aggregates of money supply are compiled and reported, namely, narrow money (M1), broad money (M2), and extended broad money (M3).

Narrow money (M1)

Consists of currency in circulation outside banking system plus demand deposits (cheque account).

Broad money (M2)

Comprises of narrow money (M1) plus fixed-term and savings deposits of residents with banks in the country.

Extended broad money (M3)

Consists of broad money (M2) plus foreign currency deposits of the residents with banks in the country.

Reserve money (M0)

Also referred as base money, or the monetary base or high-powered money. This includes currency in circulation outside the banking system, cash held in the vaults of banks and deposits of banks kept with the Bank of Tanzania in national currency.

Currency in circulation outside banks

Notes and coins of Tanzanian shillings circulating outside the banking system, i.e., outside the Bank of Tanzania and banks.

Disbursed Outstanding Debt

This is the amount of debt that has been disbursed but yet to be paid back or forgiven.

Discount rate

The rate of interest at which the Bank of Tanzania charges on loans it extends to banks. It uses Treasury bills rate as a base plus a loaded factor, which can be

changed from time to time depending on the liquidity situation in the market.

Exchange rate

The price at which one unit of a currency can be purchased with another currency.

External debt stock

The stock of a country's debt that is borrowed from foreign lenders through private commercial banks, foreign governments, or international financial institutions. It is the sum of public, publicly guaranteed, and private non-guaranteed long-term debt, use of IMF credit, and short-term debt (includes all debt having an original maturity of one year or less and interest in arrears on long-term debt).

Gross Official Reserves

Gross official reserves consist of external assets that are readily available to and controlled by the Bank of Tanzania for direct financing of balance of payments, and for indirectly regulating the magnitude of balance of payments imbalances through intervention in foreign exchange markets. Gross official reserves comprise the Bank of Tanzania's holdings of monetary gold, special drawing rights (SDRs), reserve position in the International Monetary Fund, and foreign exchange resources, available to the Bank of Tanzania for meeting external financing needs.

Inflation

The rate at which the average level of prices of a basket of selected goods and services in an economy is increasing over a period. It is often expressed as a percentage. Inflation indicates a decrease in the purchasing power of a nation's currency.

Food inflation

This is a measure of the rate of change of price of food both processed and unprocessed food.

Non-food inflation

This is a measure of price movements caused by factors other than food prices.

Core inflation

This measures the rate of change in prices of goods and services other than energy, utilities and unprocessed food, over a specified period of time. The unprocessed food items, energy and utilities are excluded since they are volatile and hence may be affected by non-monetary events, which do not constitute the underlying monetary inflation.

Interbank Cash Market

A money market in which banks extend loans to one another for a specified term of not more than 90 days. Each transaction represents an agreement between the banks to exchange the agreed amounts of currency at the specified rate on a fixed date.

Overnight Interbank Cash Market

The component of the money market involving the shortest term loan. Lenders agree to lend borrowers funds only "overnight" i.e. the borrower must repay the borrowed funds plus interest at the start of business the next day.

Lombard facility

An overnight loan facility available for banks to borrow from the Bank of Tanzania at their own discretion, by pledging eligible government securities as collateral.

Lombard rate

The rate of interest that the Bank of Tanzania charges on overnight loans it extends to banks. This rate uses Central Bank Policy Rate as a base plus a loaded factor, which can be changed from time to time depend on the supply of shilling liquidity in the economy.

National Debt

Total national debt obligations that include public debt and private sector external debt.

Public Debt

Debt payable or guaranteed by the Government. Tanzania's public debt has two main components, domestic debt (which is incurred principally to finance fiscal deficit) and external debt (which is raised primarily to finance development projects and comprises of debt the Central Government owes to foreign creditors and external obligations of government departments and agencies that are guaranteed for repayment by the Central Government).

Repurchase agreement (repo)

An arrangement involving the sale of securities at a specified price with a commitment to repurchase the same or similar securities at a fixed price on a specified future date. Repo are initiated by Bank of Tanzania for mopping up excess liquidity in banks.

Reverse repo

Simply the same as a repurchase agreement from the buyer's viewpoint. It is an arrangement that involves buying of securities at a specified price with a commitment to resale the same or similar securities at a fixed price on a specified future date. Reverse repo are initiated by Bank of Tanzania to inject liquidity in banks.

Transferable deposits

Comprise of all deposits that are immediately convertible into currency and directly usable for making payments by cheques, draft, giro order, direct debit/credit or other payment facility without any kind of significant restriction or penalty.

Other deposits

Include all claims reflecting evidence of deposit other than transferable deposits. Typical examples are saving and fixed-term deposits.

Weighted yields of Treasury bills

This is the average yield of Treasury bills, which is weighted by the volume sold of 35-day, 91-day, 182-day, and 364-day Treasury bills, expressed in percentage per year.
