## **1.0 Summary of Economic Conditions**

Despite the slowdown in world economic activities, the performance of the Tanzanian economy continued to show positive trends during the year 2002. Revised statistics indicate that **real Gross Domestic Product (GDP)** grew by 6.2 percent in 2002 up from 5.7 percent attained in 2001. All major sectors of the economy contributed positively towards this growth, with agricultural sector, which accounts for the largest share of GDP, growing at the rate of 5.8 percent. Manufacturing sector grew by 8.0 percent, compared with 5.0 percent recorded in 2001, while mining sector grew by 15.0 percent, compared to 13.5 percent recorded a year before.

During the quarter ending March 2003, **Consumer Price Inflation** averaged 4.3 percent, from an average of 4.5 percent recorded during the preceding quarter. The decline was due to the slowing down in food inflation. However, non-food inflation increased substantially from an average of 1.2 percent in the quarter ending March 2002 to an average of 9.5 percent during the quarter under review. The increase follows revision of electricity tariffs and increase in fuel prices caused by the war in Iraq.

**Monetary Developments** during the quarter continued to show encouraging results with Broad Money supply (M2) decreasing by TZS 5.2 billion compared with an increase of TZS 1,507.4 billion recorded at end of December 2002. The decrease in M2 was mainly due to the decline in net domestic assets (NDA) of the banking system, coupled with an increase in valuation account attributed by exchange rate fluctuations.

With regard to the **interest rate structure**, the margin between lending and savings deposit rates narrowed down slightly to 12.2 percent during

the quarter ending March 2003, compared to the margin of 12.6 percent, recorded during the quarter ended December 2002.

There was a remarkable deterioration of **the external sector** during the quarter ending March 2003, with exports declining by 22.9 percent while imports increasing by 5.1 percent. The trade account deficit also widened significantly.

The **Tanzanian shilling on average depreciated** against the dollar by 3.7 percent, moving from TZS 979.9 per US dollar during the quarter ending December 2002, to TZS 1,016.1 per US dollar during the quarter ending March 2003.

The **overall central government** budget deficit (after grants) recorded a deficit of TZS 91.5 billion during the quarter ending March 2003, compared with a surplus of TZS 50.5 billion during the quarter ending December 2002. Revenue collections amounted to TZS 307.3 billion, slightly less than TZS 307.9 billion recorded in the previous quarter, but higher than the targeted TZS 303.3 billion for the review period. Total expenditure (excluding amortization) amounted to TZS 485.5 billion or 5.9 percent of GDP. This expenditure was however 3.8 percent below the planned amount of TZS 504.7 billion for the quarter.

**Total government debts** stood at USD 7916.2 million as at the end of March 2003, or 4.4 percent lower than the stock of debt registered during the preceding quarter. The decline in the debt stock emanated mainly from cancellation of external debts, worth USD 619.3 million following implementation of Paris Club VII Agreement.

The **Tanzania Zanzibar Government budgetary operations** recorded an overall deficit before grants of TZS 4.0 billion during the quarter

ending March 2003, and even after considering grants, an overall deficit of TZS 0.8 billion was recorded.

**The Tanzania Zanzibar Trade account** recorded a deficit of USD 6.0 million, compared with a deficit of USD 6.1 million recorded during the corresponding period in 2002. The improvement was largely attributed to an increase in the value of exports that outweighed the increase in the value of imports.

## 2.0 International Outlook

The quarter ending March 2003 was characterized by mixed developments in the global economy. GDP growth rates for Japan and two countries in the Euro Area namely Germany and Italy stagnated during the period, while those for the United States and Canada recorded some improvements, when compared with the levels recorded in the previous quarter (**Table 2.1**). The reported stagnation in economic activities was mainly associated with the threat of the United States led war against Iraq as well as the fall in consumer and business confidence.

Output growth in Japan stagnated due to a number of factors including the decline in exports, a fall in residential investments and the strength of the Japanese yen against major currencies, which in turn made Japanese exports more expensive. The unemployment rate however remained at the same level of 5.4 percent as in the preceding quarter, with inflation rising to minus 0.2 percent from minus 0.5 percent recorded in the previous quarter.

Output growth in the Euro Area also stagnated due to several factors including weak domestic consumption, decline in business investments, decline in exports and a rise in imports. The strength of the Euro against the dollar made European exports more expensive and its imports cheaper. The fall in output was more pronounced in Germany and Italy where GDP declined by 0.2 percent and 0.1 percent, respectively. The UK economy slowed down mainly due to the reduction in the growth of the services sector and the decline in industrial production. The overall slowdown in economic activities increased the reluctance of employers to hire extra workers thus leading to a rise in unemployment rates in the region.

The US economy on the other hand recorded growth of 1.6 percent during the quarter largely due to increase in personal consumer expenditures and residential investments. The recovery in economic activities also contributed to the slight decline in the unemployment rate from 5.9 percent recorded in the previous quarter to 5.8 percent. Despite the increase in output growth, the US trade deficit widened by 3.0 percent to USD 136.4 billion, mainly due to decline in exports of goods and services. Inflation rate also rose by 0.7 percentage points to 2.9 percent.

In Canada, the increase in final domestic demand, resulting from an increase in housing and consumer spending, contributed to the 0.6 percent rise in output growth during the first quarter of 2003.

Key world interest rates remained on the same levels as those reported during the quarter ending December 2002. The UK Repo Rates remained the highest at 4.0 percent, the Japanese Overnight Rate was 0.0 percent, the USA Federal Fund Rate was 1.25 percent, Canadian Overnight Rate was 2.75 percent and the Euro Main Refinancing Rate was 2.75 percent.

In South Africa, the economy slowed down to 1.5 percent from 2.4 percent recorded in the previous quarter, largely due to the reduction in output of the manufacturing industry and the slowdown in growth rate of output of mining and quarrying industry. The strengthening of the Rand against some major currencies, and the lower rate of increase in the prices of food also contributed to the decline in the rate of inflation to 9.5 percent during the quarter under review, from 14.5 percent recorded in the previous quarter.

**Table 2.1: World Economic Indicators**

Country	GDP Growth Rates (%)		Unemployment (%)		Inflation (%)		Interest Rate
	2002-Q4	2003-Q1	2002-Q4	2003-Q1	2002-Q4	2003-Q1

Source: Bloomberg System

### **3.0 Real Sector and Price Developments**

#### **3.1 Overall Economic Performance**

The Tanzanian economy continued to show good performance during 2002, though slow, of all major sectors despite the marked deterioration in the terms of trade, volatility in world energy prices, general slow down of the world economy that started in 2001 and episodes of bad weather. Inflationary pressures also continued to remain subdued despite increasing growth in monetary aggregates.

#### **3.2 Sectoral Developments**

##### **3.2.1 Primary Sector**

Overall performance of three major sectors namely, agriculture, mining and manufacturing during the year 2002, was encouraging. The agricultural sector, accounting for almost 48 percent of GDP continued to show a positive trend, with value added of the sector estimated to have increased by 5.0 percent. Manufacturing also grew by 8.0 percent, compared to 5.0 percent recorded a year before, while Mining sector grew by 15.0 percent compared to 13.5 recorded in the 2001. Positive growth rates in the named sectors have been driven mostly by the gains in efficiency that have come as a result of persistent macroeconomic and structural reforms pursued by the government. Also, increased efficiency resulting from reduction of structural impediments in marketing, banking, legal and other bureaucratic arrangements, have also contributed to this improvement.

### 3.2.2 Secondary Sector

During the year 2002, positive growth rates have been recorded in the secondary and tertiary economic activities namely; trade, hotels, and restaurants (including tourism), construction, transport and communication, financial and business services. Value added in the trade, hotels and restaurants sector (including tourism), was estimated to have increased by 7.0 percent during 2002 compared with an increase of 6.2 percent recorded in 2001.

### 3.3 Food Security Situation

During the quarter ending March 2003, the **Strategic Grain Reserves (SGR)** stock position increased to 58,976 tons from 58,395 tons recorded during the quarter ending December 2002. The increase resulted from a net purchase of 581 tons of maize grain for SGR stocks by the Food Security Department. Following the poor and unreliable rainfall situation in most parts of the country during this season, it is anticipated that food production will decline thus calling for the Food Security Department to maintain higher levels of SGR stocks, to cater for the possibility of food shortages in the future.

**Table 3.1: Food Security, SGR Stocks**

### **3.4 Price Developments**

#### **Headline Inflation**

During the quarter ending March 2003, the quarterly year-to-year inflation rate declined to an average of 4.3 percent, from the rate of 4.5 percent recorded in the previous quarter. When compared with the corresponding quarter in 2002, quarterly average headline inflation declined by 0.4 percentage points, from an average of 4.7 percent. The decline in headline inflation emanated from a slow down in food inflation during the quarter.

#### **Non-food inflation**

Non-food inflation, increased from an average 1.2 percent during the quarter ending March 2002, to an average of 9.5 percent during the quarter ending March 2003. The increase is attributed to a one-time increase in electricity tariffs in April 2002, and an increase in fuel prices between January and March 2003 on account of the US led war in Iraq.

#### **Food Inflation**

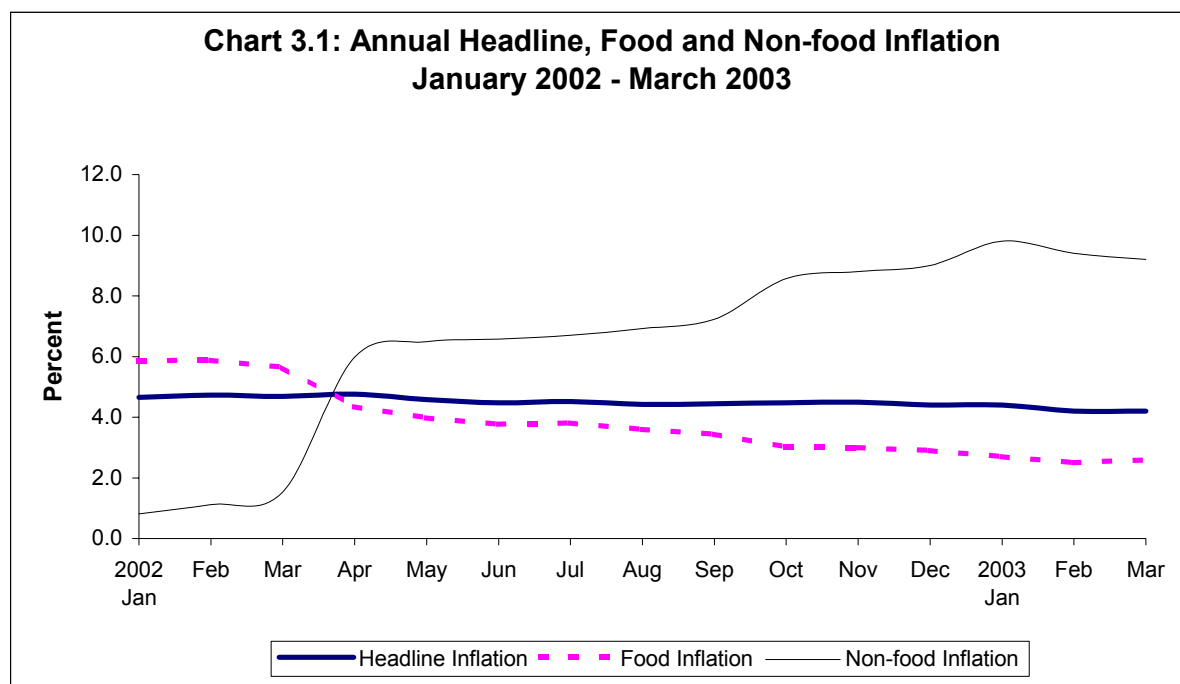

Food inflation rate declined significantly to 2.6 percent, from an average of 5.8 percent recorded during the corresponding quarter in 2002. The decline was mainly explained by the improved supply of basic foodstuffs, arising from good production in the previous season.

**Table 3.2: Quarterly Percentage Change in the Sub-groups of the National Consumer Price Index (All-urban)**

## **4.0 Monetary and Financial Developments**

### **4.1 Money and Credit**

The quarter ending March 2003 was marked by a small decline in the growth of money supply. Broad money supply (M2), fell by TZS 5.2 billion or 0.3 percent compared with an increase of 3.6 percent in the previous quarter. The decrease in money supply resulted from a decline in net domestic assets (NDA) of the banking system, coupled with an increase in the valuation account attributed to exchange rate fluctuations. NDA fell from TZS 775.3 billion in December 2002 to TZS 721.8 billion in March 2003, following the decline in other items net (OIN) by TZS 89.2 billion, which more than offset the rise in domestic credit by TZS 35.7 billion. Specifically, credit to the private sector by commercial banks increased by TZS 27.4 billion during the quarter ending March 2003, compared with an increase of TZS 23.9 billion during the quarter ending December 2002. Similarly, net claims on government by the banking system rose by TZS 8.3 billion, from TZS 264.6 billion in December 2002, to TZS 272.9 billion in March 2003. Explicitly, net claims on government by the Bank of Tanzania rose by TZS 13.9 billion, largely due to decline in deposits at the Bank of Tanzania by the same amount. However, the repayment by government of TZS 5.6 billion to commercial banks, following low demand of Treasury bonds, partly dampened the government indebtedness by the banking system. As a result of these developments, the share of credit to the government to total credit fell by a margin of 0.4 of a percentage point to 31.3 percent from 31.7 percent recorded in December 2002. The share of private sector credit to total credit also increased marginally to 68.7 percent at end-March 2003, from 68.3 percent recorded in the previous quarter.

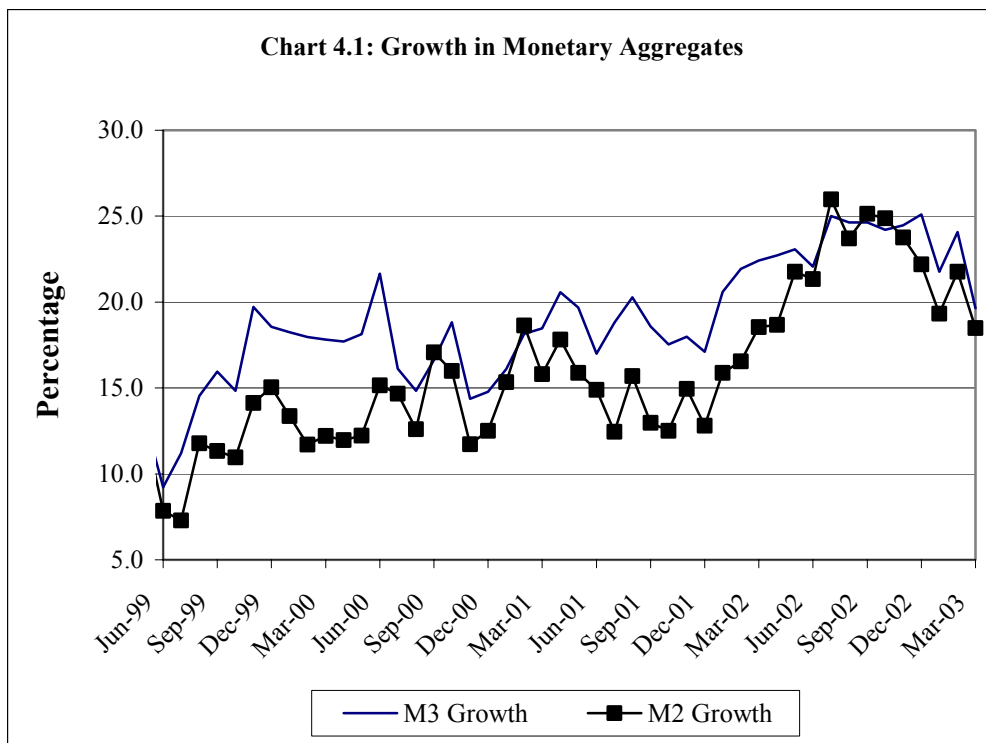

The liquidity of commercial banks, as measured by the change in their net foreign assets, showed improvement during the quarter ending March 2003. NFA of the banking system increased from TZS 1,018.3 billion to TZS 1,122.5 billion, representing a quarterly increase of 10.2 percent. The increase in the net foreign assets of the banking system during the quarter, may be attributed to the surge in both net international reserves (NIR) of the Bank of Tanzania, and net foreign assets holdings of commercial banks. The purchase of donor funds from the government by the Bank of Tanzania, coupled with exchange rate variations of the shilling were the main reasons for the increase in NIR. As a result, gross official reserves of the Bank of Tanzania rose from the level of USD 1,528.4 million recorded in December 2002 to USD 1,546.1 million in March 2003, equivalent to 7.3 months of imports of goods and non factor services. At the same time, commercial banks' net purchase of foreign exchange in the Inter-bank Foreign Exchange Market (IFEM), plus exchange rate variations also contributed to the increase in commercial banks net holding of foreign assets, from USD 585.2 million to USD 600.4 million.

During the review period, currency outside the banking system decreased by 9.6 percent from TZS 495.4 billion in December 2002 to TZS 447.9 billion in March 2003. The decline follows the process of issuing new currency notes by the Bank of Tanzania, which led to currency outside banks being deposited at commercial banks. Subsequently, savings and time deposits also increased by TZS 29.0 billion and TZS 15.8 billion respectively, while demand deposits fell by TZS 2.4 billion.

Extended Broad money (M3), increased by TZS 39.9 billion to TZS 2,087.6 billion during the quarter ending March 2003, from TZS 2,047.7 billion recorded in the preceding quarter. During the same period, foreign currency deposits of commercial banks increased by TZS 45.1 billion,

compared with an increase of TZS 62.2 billion during the previous quarter. The decline in foreign currency deposits is partly explained by the portfolio diversification made by some economic agents from foreign to domestic assets, following exchange rate speculations. However, foreign currency deposits as a percentage of extended broad money, rose to 28.0 percent in March 2003 from 26.4 percent recorded in December 2002. Also, during the same period, foreign currency deposits as a percentage of total commercial bank deposits increased from 34.8 percent in December 2002 to 35.7 percent in March 2003.

During the quarter under review, annual growth rates of all monetary aggregates decelerated from the rates attained in December 2002 (**Chart 4.1**), mainly due to efforts by the Bank of Tanzania, to mop up part of the excess liquidity through open market operations and sale of foreign exchange in the Inter-bank Foreign Exchange Market (IFEM). Consequently, M2 grew by 18.5 percent only in the year ending March 2003, compared with the growth of 22.2 percent in the year ending December 2002, while M3 grew by 19.6 percent during the year ending March 2003, compared with 25.1 percent recorded in the year ending December 2002.

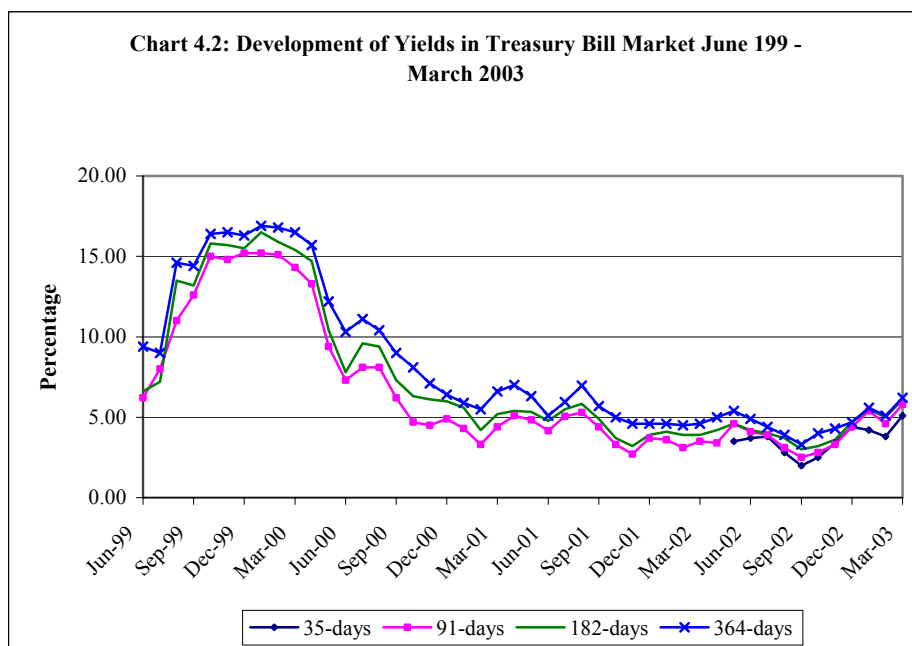

## 4.2 Financial Markets

### 4.2.1 Treasury Bills Market

During the quarter ending March 2003, Treasury bills worth TZS 333.3 billion were sold in the market, compared with TZS 385.7 billion sold in the preceding quarter. Demand for treasury bills declined during the quarter partly due to the liquidity squeeze in the banking system following Bank of Tanzania's endeavour to mop up part of excess liquidity from the economy.

The weighted average yields increased across all maturities during the quarter under review. Specifically, the average yields for 35-day and 91-day T.bills increased from 4.4 percent each to 5.1 percent and 5.8 percent respectively. Also yields for 182-days and 364-days T.bills both increased from 4.7 percent each to 6.1 percent and 6.2 percent respectively. As a result, the overall weighted average yield for all

maturities increased from 4.5 percent, recorded in the preceding quarter to 5.9 percent during the quarter ending March 2003 (**Chart 4.2**).

#### 4.2.2 Treasury bonds

During the quarter ending March 2003, the 2-year, 5-year, 7-year and 10-year Treasury bonds all amounting TZS 16.5 billion were sold compared with TZS 55.0 billion sold in the preceding quarter. The decline in total sales was partly due to investment portfolio diversification by major institutional investors, including pension funds that opted to venture into real estate business. The weighted average yields (WAY) for the 2-year and 7-year Treasury bonds decreased from an average of 5.3 percent and 6.9 percent, to 5.0 percent and 6.6 percent respectively. Those for 5-year and 10-year Treasury bonds increased, from 5.6 percent and 7.2 percent to 6.1 percent and 7.6 percent, respectively.

#### 4.2.3 Repurchase Agreements (REPOs)

During the quarter under review, Bank of Tanzania employed only the 2-day and 14-day REPOs for fine tuning liquidity in the economy. REPOs

worth TZS 17.8 billion were transacted between BOT and commercial banks, but were far lower than those transacted during the preceding quarter which amounted to TZS 37.5 billion. REPO rates across all maturities, increased from an average of 4.4 percent in the preceding quarter, to 6.5 percent during the quarter ending March 2003.

#### **4.2.4 Discount Rate Policy**

During the quarter under review, there was no borrowing from the discount window by either government or commercial banks. However the discount rate rose to 10.4 percent, from 9.2 percent recorded in the preceding quarter.

#### **4.2.5 Inter-bank Cash Market**

Total value of transactions in the inter-bank cash market increased by 69.1 percent, from TZS 749.7 billion traded during the quarter ending December 2002, to TZS 1,267.7 billion. Overnight transactions accounted for 83.7 percent of the total inter-bank transactions, compared with 77.0 percent traded in the previous quarter. The overall inter-bank cash market rates increased from 3.5 percent recorded at the end of December 2002, to 5.4 percent. Likewise, the overnight rates went up to 5.4 percent, from 3.4 percent recorded in the preceding quarter.

#### **4.2.6 Interest rate structure**

During the quarter ending March 2003, the spread between lending rate and savings deposits rates narrowed down by 0.4 basis points reaching 12.2 percent, from 12.6 percent recorded during the quarter ending December 2002.

Average interest rates quoted by commercial banks on domestic currency denominated deposits increased across the board, except those for savings deposit rates and the 3-month time deposit rates, which dropped from 3.1 percent and 3.0 percent in December 2002 to 2.8 percent and 2.5 percent in March 2003, respectively. However, the overall weighted average time deposit rates increased from 3.4 percent to 3.7 percent during the same period.

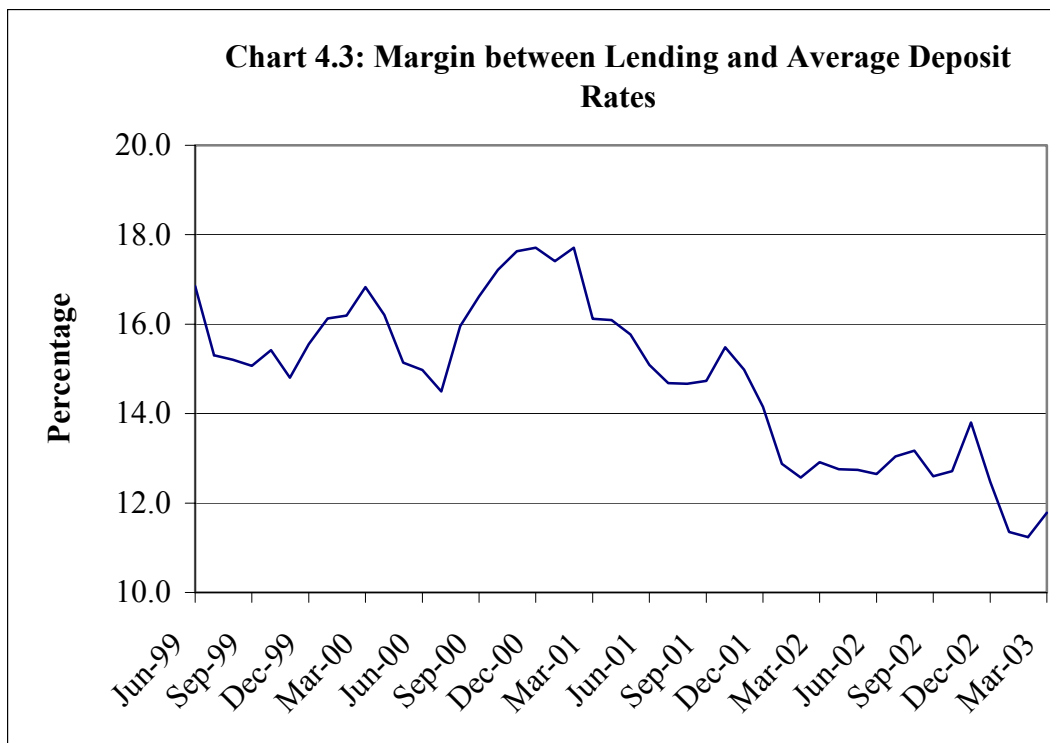

Lending rates quoted by commercial banks on all domestic currency denominated loans declined, except those for short-term loans of up to 1-year, which increased from 15.9 percent in December 2002, to 16.4 percent in March 2003. However, the overall weighted average lending rates fell from an average of 15.7 percent in December 2002, to 15.0 percent as at end of March 2003.

With regard to foreign currency denominated deposits and lending rates, the overall weighted average deposits rates increased from 1.2 percent recorded at the end of December 2002, to 1.3 percent during the end of March 2003, while the overall weighted average lending rates remained stable at 7.2 percent (**Table 4.1**).

#### 4.2.7 Inter-bank Foreign Exchange Market (IFEM)

During the quarter ending March 2003, the total amount traded at the Inter-bank Foreign Exchange Market (IFEM) declined by 3.5 percent to USD 217.7 million, compared with USD 225.6 million traded during the previous quarter (Table 4.2). Commercial banks dominated both supply and demand sides of the market, supplying USD 106.0 million, or 48.7 percent of total amount traded, and purchasing USD 182.8 million or 84.0 percent of total amount traded. Non-bank financial institutions supplied USD 14.5 million or 6.7 percent of total amount traded and purchased USD 4.6 million or 2.1 percent. Bank of Tanzania's intervention in the market resulted in a net supply of USD 66.9 million or 30.7 percent of the total amount traded.

### Exchange Rate

During the quarter under review, the Tanzanian shilling on average depreciated against the US dollar by 3.7 percent, moving from TZS 979.9 per US dollar as at the end of December 2002, to TZS 1,016.1 per US dollar.

## Bureaux de Change Operations

The total volume of transactions conducted by the Bureau de change system, increased during the quarter under review by 25.8 percent to USD 118.4 million, from USD 94.1 million transacted in the previous quarter. The Bureau buying and selling rates also followed the depreciation pattern exhibited by the shilling in the IFEM, and depreciated by 3.2 percent and 3.0 percent respectively (**Table 4.2**).

## 5.0 Public Finance

### 5.1 Government Finance

The fiscal position is estimated to have recorded an overall deficit before grants of TZS 178.1 billion or 1.9 percent of GDP<sup>1</sup> during the third quarter of 2002/2003, compared with a slightly lower deficit before grants of TZS 115.4 billion or 1.2 percent of GDP recorded in the preceding quarter. However, the deficit was further reduced to TZS 91.5 billion after considering grants amounting to TZS 86.6 billion.

<sup>1</sup> GDP estimates for 2002/03 is TZS 9,547.5 billion

Revenue collections amounted to TZS 307.3 billion or 3.2 percent of GDP, being TZS 4.0 billion above the targeted TZS 303.3 billion for the review period. This same trend was exhibited in all preceding quarters of the 2002/03 financial year, reflecting increased government tax collection efforts.

Total expenditure (excluding amortization) amounted to TZS 485.5 billion or 5.9 percent of GDP. The expenditure was however 3.8 percent below the planned amount of TZS 504.7 billion for the quarter. Out of the total expenditure, TZS 365.7 billion or 72.5 percent was for recurrent, while TZS 119.7 billion or 27.5 percent, was for development expenditure.

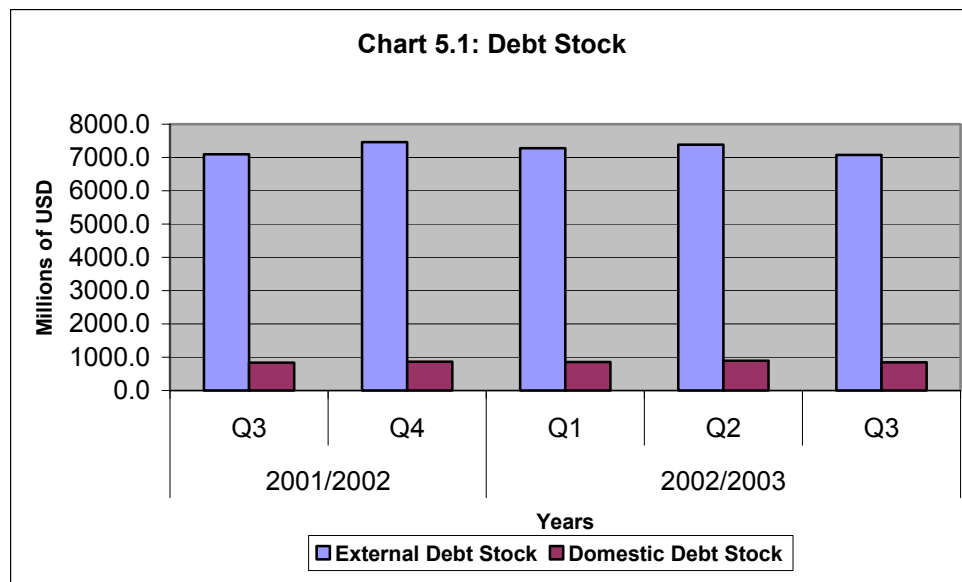

During January-March 2003, the government received external grants amounting to TZS 86.6 billion, which were less by TZS 38.9 billion than the targeted amount of TZS 125.5 billion. Out of the total grants received, HIPC relief was TZS 12.7 billion, being TZS 0.5 billion below the estimated amount of TZS 13.2 billion. Program and project grants amounted to TZS 73.4 billion against TZS 112.3 billion planned during the review period. The lower than expected amount of grants is partly due to unavailability of sufficient data on direct to project funds.

During the third quarter of 2002/2003, the budget registered an overall deficit (adjusted for cash and other items) amounting to TZS 96.0 billion, which was entirely met through borrowing from foreign and domestic sources to the tune of TZS 74.1 billion and TZS 21.9 billion, respectively.

## **5.2 Central Government Debt**

Total debt stock (both domestic and external) stood at USD 7,916.2 million as at the end of March 2003 or 4.4 percent lower than the stock

registered at the end of December 2002 of USD 8,276.3<sup>2</sup> million. The decline was largely due to contraction of external debt during the review period. Also when compared to the corresponding quarter of last year, total debt declined by 0.2 percent.

## External debt

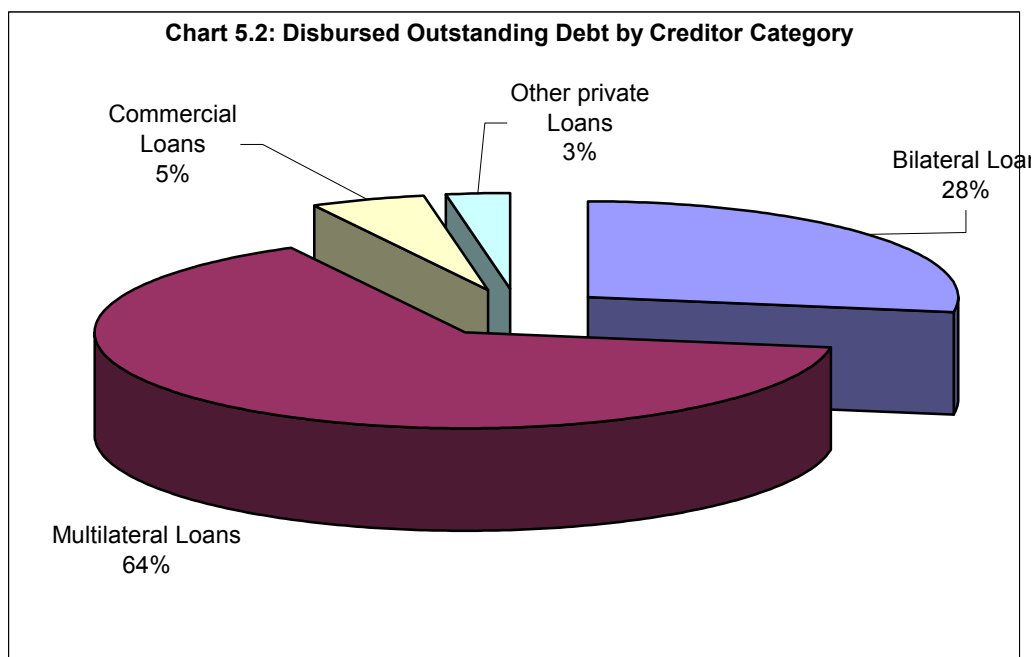

Total external debt declined by 4.2 percent from USD 7,384.7 million recorded as at the end of December 2002 to USD 7072.5 million during the period under review. The decline was mainly associated with the implementation of Paris Club V11 Agreed Minutes by the Government, which led to conclusion of bilateral agreements with the governments of Austria, Belgium, Norway, USA, Canada, Italy, France, United Kingdom, and Netherlands, culminating into cancellation of debts worth USD 619.3<sup>3</sup> million. Other reasons for the decline include net debt flows and exchange rate fluctuations.

<sup>2</sup> The amount was underestimated by USD 21.00 in the Economic Bulletin for the quarter ended December 2002.

<sup>3</sup> Includes cancellation of future inflows.

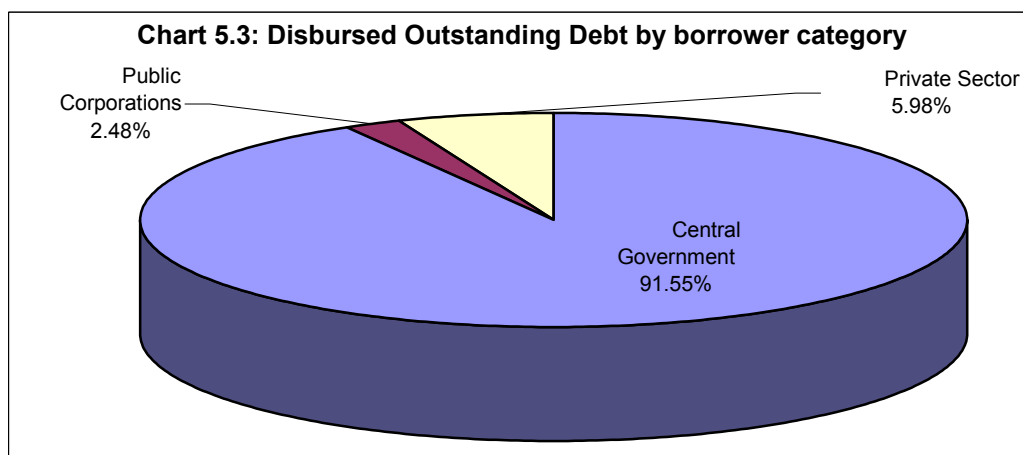

## The Profile of External Debt

The profile of disbursed outstanding debt by creditor category indicates that, 64.0 percent of total debt is owed to multilateral creditors, 28.0 percent is owed to bilateral creditors, 5.0 percent to commercial creditors and the remaining 3.0 percent to private sources (**Chart 5.2**).

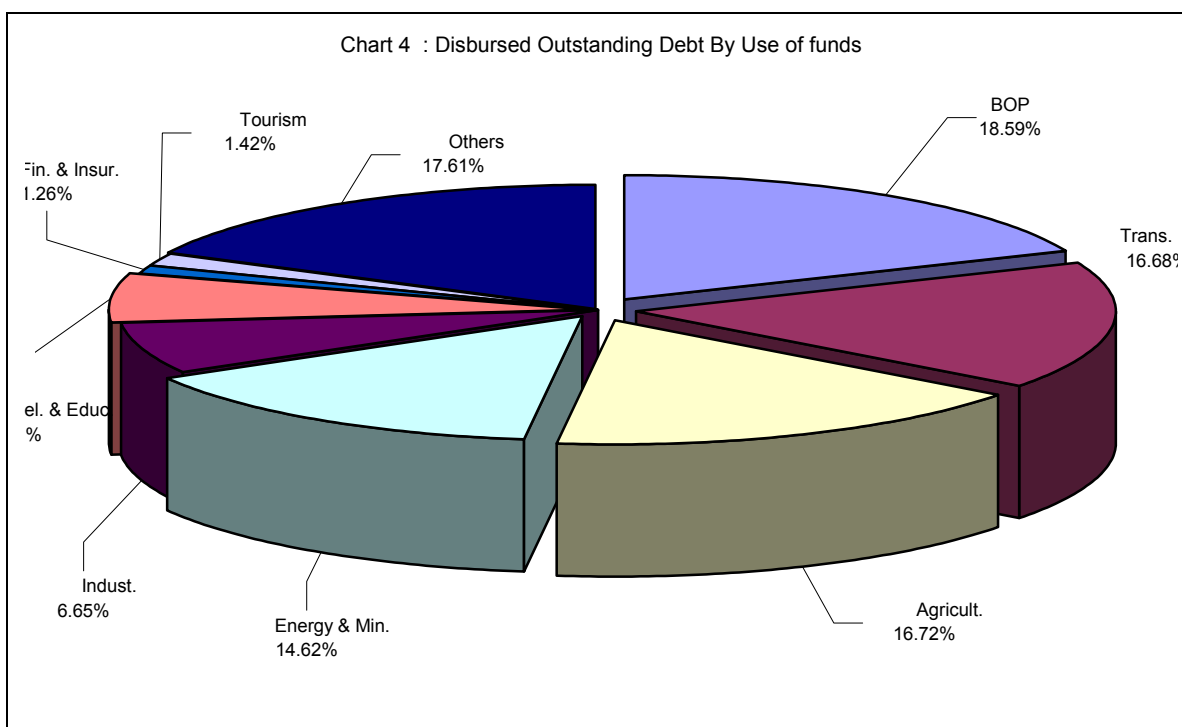

Source: Debt Department – BOT

Disbursed outstanding debt by borrower category shows that, the central government is the largest borrower, accounting for 92.0 percent of the total debt. The proportion of public and private sector in the total debt was 2.5 and 6.0 percent respectively (**Chart 5.3**).

Source: Debt Department – BOT

Classified by utilization of funds, 18.6 percent of the debt was disbursed in the form of Balance of Payments Support, while Transport and Telecommunications Sector received 16.7 percent. Agriculture received 16.7 percent, followed by Energy and Mining that received 14.6 percent. Industries absorbed 6.7 percent, while Social Welfare & Education, Finance and Insurance and Tourism received 6.4, 1.3 and 1.4 percent, respectively. The remaining 17.6 percent of debt was absorbed by other sectors (**Chart 5.4**).

Source: Debt Department - BOT

### **Debt contracted, disbursements and payments.**

During the quarter under review, new loans contracted and recorded reached USD 2.0 million, all of which went to the private sector. During the same period, disbursements amounted to USD 69.1 million while total debt service amounted to USD 31.0 million, thus resulting to a net inflow of USD 38.1 million.

## **Enhanced Highly Indebted Poor Countries (HIPC) Debt Relief**

During the third quarter of 2002/2003, Tanzania received a total of USD 14.5 million as HIPC debt relief from multilateral institutions. Out of which, USD 8.8 million came from International Development Association (IDA), USD 0.7 million from the International Food and Agriculture Development Fund (IFAD) and USD 5.0 million from the African Development Bank Group (ADB).

### **Debt Buyback Scheme**

The second and final closing of the scheme could not take place in November 2002 as planned earlier but is now expected to take place during the third quarter of the calendar year 2003. Debts worth USD 31.8 billion made up of both principal and interest are expected to be cancelled.

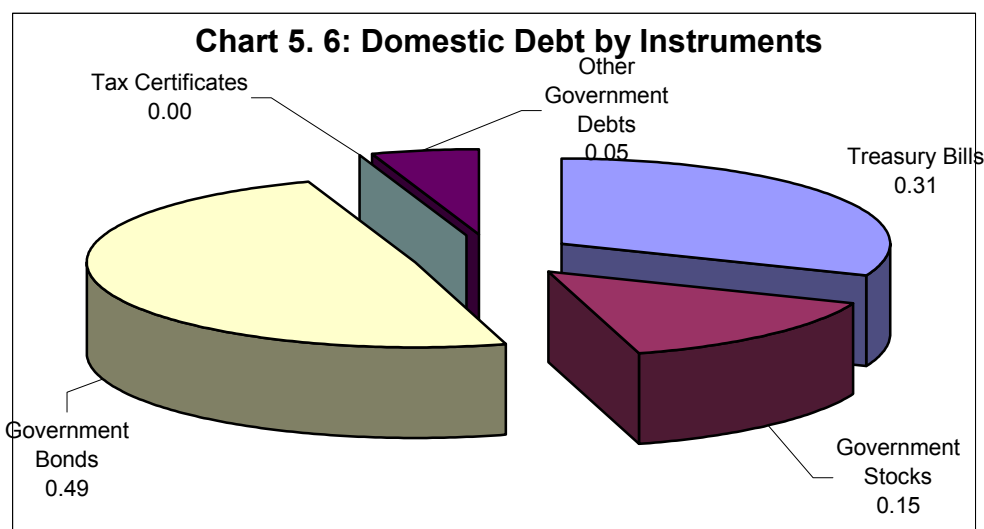

### **Domestic debt**

The level of domestic debt declined during the quarter under review, falling by TZS 1.4 billion or 0.2 percent to TZS 869.1 billion as at the end of March 2003. However, when compared with the corresponding quarter of 2002 total domestic debt increased TZS 51.8 billion or 6.3 percent. Domestic debt accounted for about 10.7 percent of total debt. Also in terms of its composition, government securities, consisting of treasury bills, government stocks and bonds, accounted for about 94.7 percent of total domestic debt, or 4.6 percent higher than the amount recorded in the previous quarter.

## Domestic Debt by Instruments

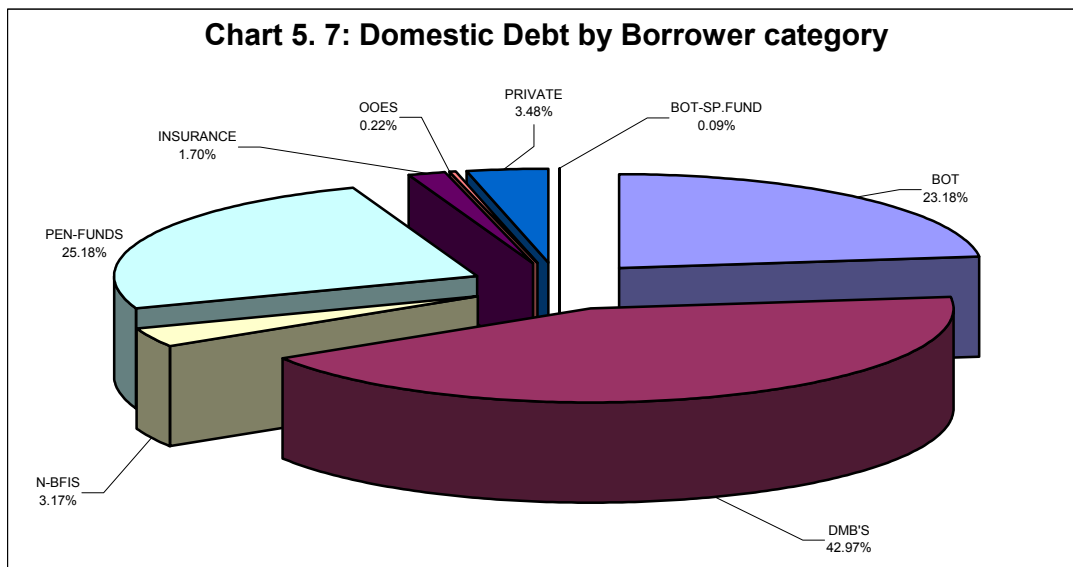

Analysis of domestic debt stock by instruments shows that, government securities, consisting of treasury bills, government stocks and bonds accounted for about 94.7 percent of total domestic debt, rising by TZS 36.32 billion or 4.6 percent from TZS 786.81 billion recorded in the previous quarter **Chart 5.6**).

Source: Debt Department - BOT

## Domestic Debt by Creditor category

As at end of March 2003, Commercial Banks were the largest creditors, holding claims worth TZS 373.5 billion or 43.0 percent of the total domestic debt stock. Pension Funds ranked second, with claims amounting TZS 218.9 billion or 25.2 percent. Bank of Tanzania and Private Investors each held claims amounting TZS 201.5 billion and TZS 30.3 billion or 23.2 percent and 3.5 percent respectively. Non Bank Financial Institutions and Insurance Companies claims accounted for 3.2 and 1.7 percent, each respectively. Other Official Entities and BOT-Special Fund altogether held 0.3 percent of total claims (**Chart 5.7**).

S

Source: Debt Department – BOT.

### Domestic Debt Service

A total of TZS 128.5 billion, fell due for payment during the third quarter of 2002/2003. Out of the total amount, TZS 110.9 billion or 86.3 percent was principal which was rolled over, while the remaining TZS 17.5 billion or 13.7 percent was interest that was paid out of government revenue.

## 6.0 External Sector Developments

The balance of payments for Tanzania during the first quarter of 2003 was characterized by a widening current account deficit, that reduced substantially the overall balance from a surplus of USD 174.8 million recorded during the previous quarter, to a deficit of USD 5.4 million (**Table 6.1**). However, when compared with the corresponding quarter of 2002, the current account deficit improved by 41.3 percent mainly due to improved performance in both trade and current transfers. The capital and financial account also recorded an improvement of 64.4 percent during the review quarter compared with an improvement of 105.5 percent recorded during the quarter ending December 2002.

## 6.1 Current account

The current account balance during the quarter under review, is estimated to have decreased from a surplus of USD 133.3 million in the previous quarter to a deficit of USD 56.7 million. The deterioration of the current account balance was largely due to poor performance of the goods and services account. Net current transfers also declined by almost 18.6 percent from the level of USD 168.0 million recorded during the previous quarter to USD 136.8 million.

## 6.2 Goods Export

During the quarter under review, total goods exports declined by 22.9 percent to USD 243.1 million from USD 315.1 million recorded in quarter ending December 2002. This was attributed to poor performance in both traditional and non-traditional exports. However, when compared with the corresponding quarter of 2002, total exports increased by 26.9 percent.

Overall, all traditional exports declined by almost 50.0 percent, mainly due to price and volume factors, except for coffee and cloves. However, export volume for cloves was exceptionally high owing to resumption of

crop purchasing by the Zanzibar State Trading Corporation (ZSTC) in December 2002. Also export unit prices for coffee improved by 28.6 percent in line with developments in the world market.

Non-traditional exports also declined by almost 8.0 percent mainly due to poor performance in minerals, manufactured and other exports. During the quarter under review, gold exports decreased by 4.1 percent from the previous quarter levels while other exports declined by 20.3 percent.

### **6.3 Goods Import**

During the quarter under review, total imports (f.o.b) increased by 5.1 percent to USD 401.5 million, from USD 382.0 million recorded in the preceding quarter. This was mainly due to increased importation of capital goods that went up by 12.7 percent. The increase in capital goods imports mainly associated with the surge in the importation of transport equipment.

Conversely, intermediate goods import declined marginally by 0.6 percent while consumer goods imports remained virtually unchanged at 0.1 percent.

## 6.4 Services Account

The Services account recorded a deficit of USD 19.3 million during the review period, down from a surplus of USD 35.9 million recorded during the preceding quarter. This development was attributed to decreased services receipts coupled with increased services payments. The decline in service receipts was largely associated with a fall in travel receipts on account of the fact that the quarter under review was an off-season period for tourism activities.

## 6.5 Income Account

The income account worsened significantly during the review period mainly scheduled interest payments that rose from USD 13.2 million during the quarter ending December 2002, to USD 23.5 million in the review quarter (**Table 6.4**).

Inflows of official current transfers declined by 21.0 percent during the quarter ending March 2003 to USD 134.1 million from USD 169.8 million recorded in the previous quarter. The inflows of official current transfers were exceptionally high during the quarter ending December 2002 due to the relatively higher donor disbursements for program assistance under Poverty Reduction Budget Support (PRBS) and sectoral basket funds.

--- = Information not available

## **6.6 Capital and financial account**

The balance on the capital and financial account improved from a surplus of USD 94.0 million recorded in the previous quarter, to a surplus of USD 193.2 million. The main contributing factor towards this improvement was the relative decline in banks foreign assets<sup>4</sup> from USD 55.9 million during the preceding quarter, to USD 15.0 million during the quarter under review. The relatively higher level of banks foreign assets during the quarter ending December 2002 was partly associated with the proceeds from the privatization of Air Tanzania Corporation (ATC) through which TZS. 20 billion or USD 20.0 million was realized.

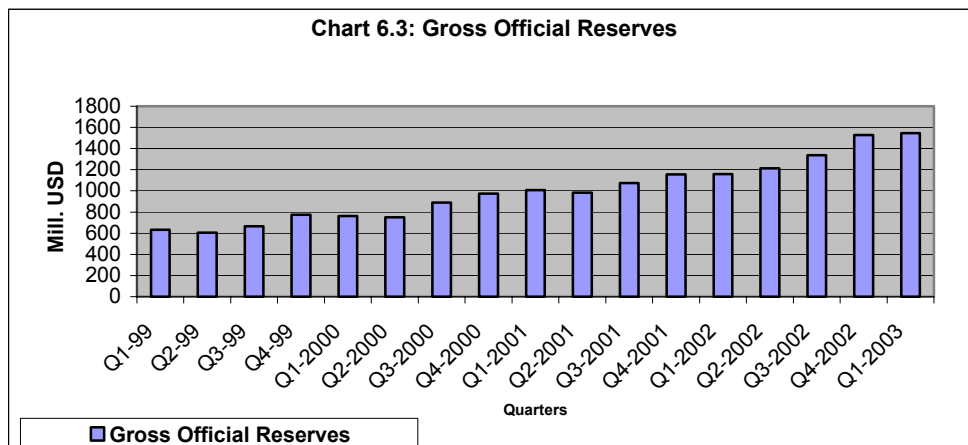

Other long-term investments, dominated by government debt recorded a net surplus of USD 40.4 million, during the period under review compared with a deficit of USD 10.8 million recorded during the previous quarter. The improvement was largely explained by the decline in government debt service obligations, resulting from the debt relief received under the HIPC initiative in 2002.

---

<sup>4</sup> A negative represents increase in foreign assets while a decrease in assets is represented by a positive in the balance of payments.

## 6.7 Gross Reserves

During the review period, total stock of international reserves in USD terms increased by 1.1 percent to USD 1,546.1 million from USD 1,529.0 million recorded in the quarter ending December 2002. However, when compared with the corresponding quarter in 2002, international reserves increased by 33.4 percent.

## **7.0 Economic Developments in Tanzania Zanzibar**

### **7.1 Government Finance**

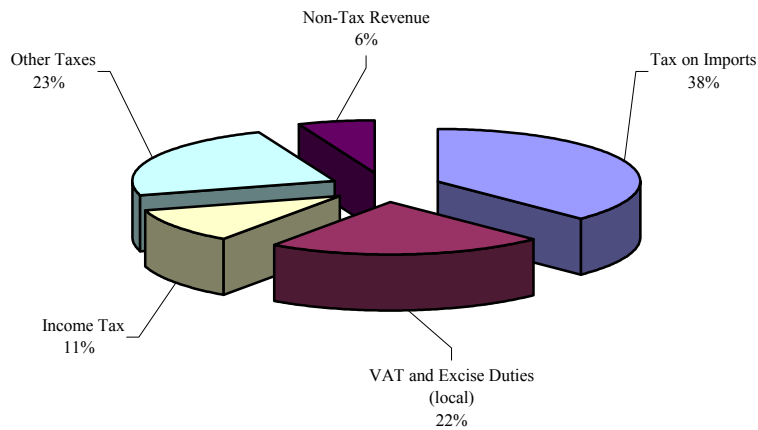

#### **Overall Performance**

During the third quarter of the fiscal year 2002/03, the Zanzibar Government budgetary operations, on cheque issues basis recorded an overall deficit of TZS 4.0 billion before grants, slightly lower than the deficit of TZS 4.2 billion recorded in the previous quarter ending December 2002. After considering grants amounting to TZS 3.1 billion, the budget registered an overall deficit of TZS 0.8 billion.

#### **Revenue Performance**

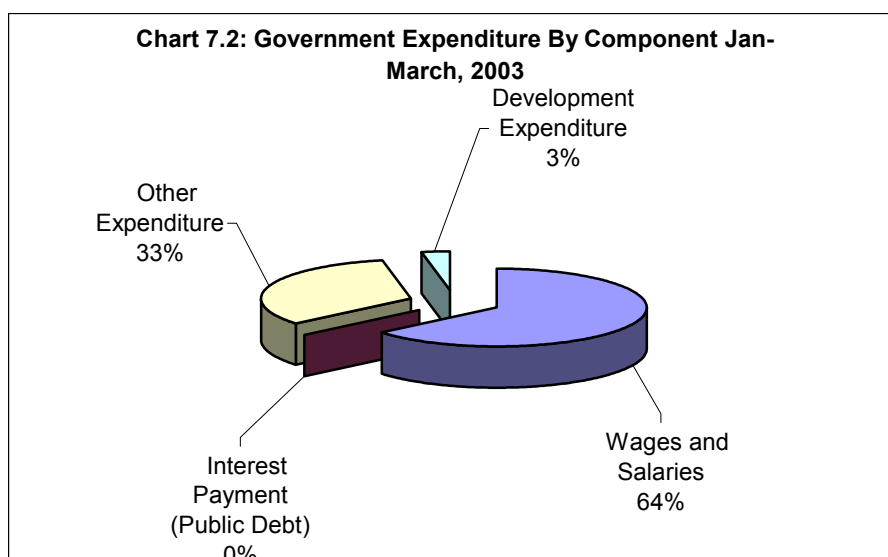

Total revenue collections decreased by 7.8 percent to TZS 11.6 billion from the amount of TZS 12.6 billion registered in the preceding quarter. Both tax and non-tax revenue sources declined by 6.9 percent and 20.1 percent respectively, due to reduced trade and tourism activities. Cumulatively, between July and March 2003, total revenue collections amounted to TZS 35.2 billion, or 53.0 percent of the annual target TZS 66.5 billion.

**Chart 7.1: Government Revenues By Source Jan-March, 2003**

## **Government Expenditure**

During the quarter ending March 2003, total expenditure slightly declined by 7.6 percent, from TZS 16.8 billion recorded during the previous quarter to TZS 15.5 billion. Recurrent expenditure amounted to TZS 15.1 billion accounting for 97.0 percent of total government expenditure. Development expenditure amounted to TZS 0.5 billion or 3.0 percent. The decrease in recurrent expenditure was mainly attributed to decreases in other expenditures, including the non servicing of the public debt.

## Financing

During the quarter under review, the government financed its expenditure from domestic sources and grants from the Union Government to the tune of TZS 3.1 billion. It also borrowed from non-bank sources (treasury bills) to the tune of TZS 1.8 billion.

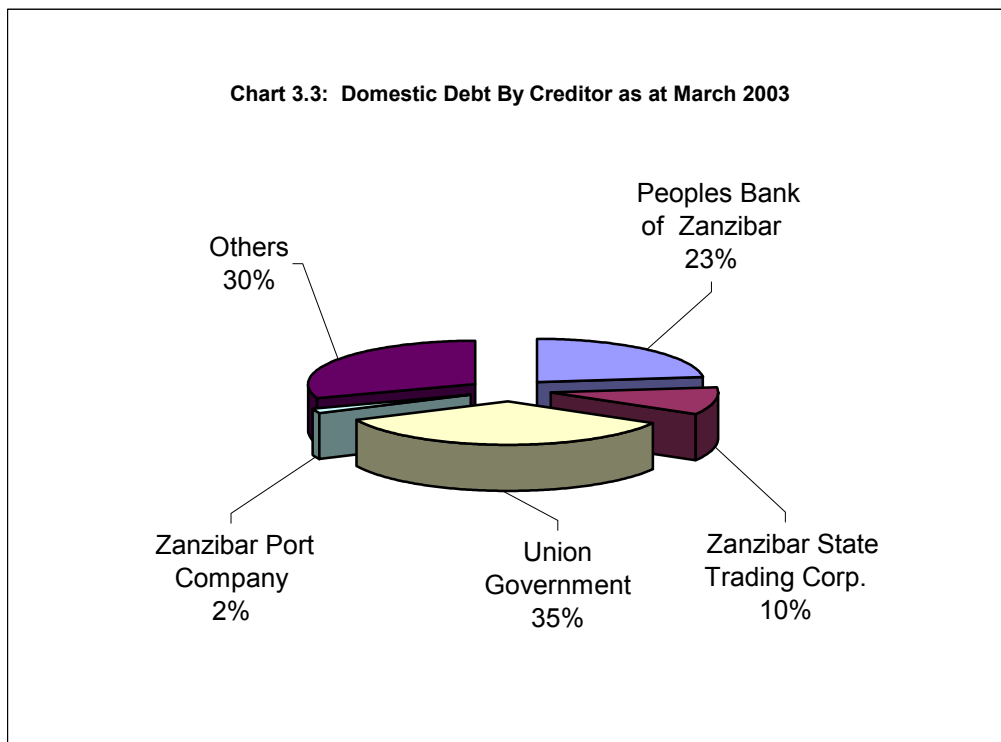

## 7.2 Debt Developments

Total debt stock (external and domestic) as at the end of March 2003, stood at TZS 110.0 billion equivalent to USD 104.6 million. External debt stood at TZS 70.6 billion or USD 67.2 million, accounting for 64.2 percent of total debt, while domestic debt stood at TZS 39.3 billion or USD 37.4 million, accounting for 35.8 percent.

### Domestic Debt

During the quarter ending March 2003, domestic debt increased by 61.7 percent, from TZS 24.3 billion recorded during the corresponding period in 2002 to TZS 39.3 billion. The increase was mainly due to new government borrowing, outstanding interest payments, and debts due to domestic suppliers and outstanding pension claims.

### **Domestic Debt by Creditors**

Domestic debt by creditor shows that, the Zanzibar Government owed the Union Government to the tune of TZS 13.6 billion, accounting for 34.6 percent of the total domestic debt. The People’s Bank of Zanzibar (PBZ) claims amounted to TZS 9.1 billion or 23.1 percent of total domestic debt. The Zanzibar State Trading Corporation (ZSTC) was owed TZS 4.1 billion, accounting for 10.3 percent of total domestic debt. Zanzibar Port Company (ZPC) claims amounted to TZS 0.7 billion, or 1.8 percent. Other creditor claims amounted to TZS 11.9 billion, or 30.2 per cent of the total domestic debt.

### **Domestic Debt by Instruments**

Domestic debt by instruments shows that, the Zanzibar Government’s advances or overdrafts from the Union Government amounted to TZS

13.6 billion or 34.6 per cent of total domestic debt. Long-term loans amounted to TZS 9.1 billion or 23.1 per cent. Government stocks amounted to TZS 4.1 billion or 10.3 per cent. Treasury bills amounted to TZS 3.1 billion or 8.0 per cent. Short-term loans amounted to TZS 0.7 billion or 1.8 percent and other instruments amounted to TZS 8.7 billion, or 22.2 per cent.

The quarterly debt analysis indicates that, long-term borrowing increased by 26.0 percent to TZS 9.1 billion, from TZS 7.2 billion recorded during the quarter ended March 2002, mainly due to accrued interest arrears. Government stocks however, increased substantially following conversion of short-term loans into stocks, and inclusion of interest arrears.

### **Domestic Debt by Maturity**

Debts with maturity of less than two years amounted to TZS 7.3 billion or 18.5 percent of total domestic debt. Those with maturity of between 2 to

5 years amounted to TZS 9.1 billion or 23.1 percent. Pension claims amounted to TZS 23.0 billion or 58.4 percent. Arrears amounted to TZS 2.9 billion or 0.01 percent.

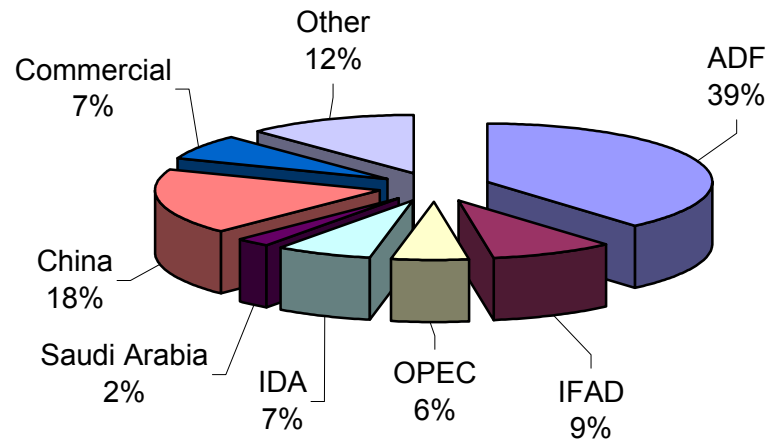

### **External Debt**

The Zanzibar Government external debt as at end March 2003, increased by 16.4 percent to USD 67.2 million, from USD 57.8 million recorded in the corresponding quarter in 2002. The increase was a result of the on going reconciliation of the external debt database by both the Union Government sources and the Zanzibar Government. There was however, no new external borrowing during the review period.

### **External Debt by Creditor Category**

The external debt portfolio shows that, multilateral debts amounted to USD 40.4 million or 60.4 per cent of total external debt. African Development Fund (ADF) debts alone amounted to USD 26.0 billion or 64.2 percent of total multilateral debt. Bilateral debts amounted to USD 13.9 million or 20.8 per cent with China's debt accounting for 88.2 percent of total bilateral debt. Commercial debts and other debts amounted to USD 4.6 million, and USD 8.5 million accounting for 6.7 percent and 12.1 percent respectively.

**Chart 7.4: External Debt composition by creditors as at March 2003**

### **External Debt by Maturity**

Debts with maturity of above 20 years amounted to USD 40.7 million or 60.5 per cent. Those with maturity of between 10 to 20 years amounted to USD 5.0 million or 7.4 per cent. Debts with maturity of between 5 to 10 years amounted to USD 8.2 million or 12.1 percent. Arrears amounted to USD 13.4 million or 20.0 per cent.

### 7.3 Foreign Trade Developments

#### Trade balance

During January-March 2003, the trade account (goods and services) recorded a slightly lower deficit of USD 6.0 million, compared with the deficit of USD 6.1 million, recorded during the corresponding period in 2002. The improvement was due to the relative higher change in the value of exports, which outweighed the change in value of imports of goods and services.

**Table 7.1: Trade Account (Goods and services)**

Trade account	Millions of USD			
	Item	January-March		% Change
		2002	2003	
<b>Exports</b>	<b>10.03</b>	<b>11.90</b>	<b>18.66</b>	
Goods	1.02	3.38	231.55	
Services	9.01	8.52	-5.44	
<b>Imports</b>	<b>16.09</b>	<b>17.85</b>	<b>10.94</b>	
Goods (fob)	10.78	12.34	14.47	
Services	5.31	5.51	3.77	
<b>Trade Balance</b>	<b>-6.06</b>	<b>-5.95</b>	<b>-1.85</b>

## Goods account

During the period under review, the Zanzibar's goods account deteriorated by 7.6 percent, to a deficit of USD 9.0 million, from a deficit of USD 8.4 million recorded during the corresponding period in 2002. The deterioration is explained by a much higher value of imports relative to exports.

**Table 7.2: Goods Account**

Item	Millions of USD		
	January-March		% Change
	2002	2003	
Exports	1.02	3.38	231.55

<b>Trade Balance</b>	<b>-8.36</b>	<b>-8.96</b>	<b>7.16</b>

Source: Tanzania Revenue Authority and ZSTC.

## Exports

During the period under review, total exports increased from USD 1.0 million recorded during the corresponding period in 2002 to USD 3.4 million. Traditional exports contributed more to this improvement following increased clove exports.

The volume of clove exports increased substantially from 30.0 tons exported in corresponding period in 2002 to 1,300.0 tons during the period under review. However despite the increase in volume, unit prices for cloves declined from USD 5,560.2 per ton recorded during the corresponding period in 2002 to USD 2,069.2 per ton. The decline in unit prices was attributed to the surge in clove production in Indonesia (major clove importer), which also restricted clove imports.

Non-traditional exports declined by 10.8 percent to USD 0.19 million from USD 0.21 million recorded during the corresponding quarter in 2002. Manufactured goods declined most, followed by fish and fish produce while other non-traditional exports rose significantly.

**Table 7.3: Zanzibar Exports by type of Commodity**

Traditional Commodities	2002	2003	%Change
<b>Cloves</b>			
Value *	0.17	3.33	1,512.66

## Imports

During the period under review, overall imports (c.i.f.) increased by 31.5 percent to USD 14.2 million, from USD 10.8 million recorded during the corresponding period in 2002. Capital goods imports increased most, followed by consumer goods imports. Intermediate goods imports however declined with industrial raw materials declining most.

**Table 7.4: Zanzibar Imports (C.I.F By Major Categories)**

IMPORT CATEGORY	2002	2003	% Change
<b>CAPITAL GOODS</b>	<b>2.60</b>	<b>4.76</b>	<b>82.98</b>
Transport Equipments	1.13	1.99	76.66

Note: Imports estimated on the basis of SBE forms from TRA,  
Value in Millions of USD

## **Combined Services and Income Account**

During the period under review, the combined income and services account (net) declined by 18.2 percent, from USD 3.7 million recorded during the corresponding period in 2002 to USD 3.1 million. The decline was attributed to increase in foreign payments coupled with a decline in foreign receipts. The decline in foreign receipts followed a fall in the flow of tourists to Zanzibar resulting from the fear of terrorist attacks as cautioned by US and UK authorities.

### **Service Account**

The non-factor services account (net) recorded a surplus of USD 3.0 million, which was lower than the surplus of USD 3.7 million recorded during the corresponding quarter in 2002. The deterioration was due to an increase in non-factor service payments coupled with the decline in non-factor services receipts.

### **Income Account**

The income account improved slightly by recording a surplus of USD 0.05 million, compared with a surplus of USD 0.04 million recorded during the corresponding period in the 2002. This was due to increased income receipts.

**Table 7.5 : Service and Income Sector Developments**

Millions of USD

		January-March		
		2002	2003*	% Change
